Newspaper Articles Relating to Metal Mining in the North of England 1712 to 1998

With Specific reference to the North Pennines Mines and Miners

Introduction

The following information is a result of having found miners graffiti whilst exploring the lead mines of the North Pennines.

Such as: —

I wanted to know more about these men and their families.

I began this quest initially by exploring the Hexham newspapers, the Hexham, Courant, Hexham Herald and Alston Herald. The task grew when I discovered the degree of mobility of these extraordinary people, and what follows is dedicated as a memorial to all those who lived and worked in the lead mining areas of the North Pennines.

The information contained in this document has been gathered over many years and from many sources.

I am particularly grateful to John Walton Robinson and Edwin Dodds whose transcriptions of the St Augustine's, Alston (transcribed 1909), St John's, Garrigill (transcribed 1908), Redwing Chapel and Alston Chapel (transcribed 1909) registers and

memorial inscriptions, made my research so much easier. These can be accessed at Newcastle City Library.

Other resources & sources have been used and acknowledged when such information has been known.

I am also particularly grateful to the great numbers of people who have made their research freely available on the internet, for other researchers to read and learn from.

Please note that these are all secondary sources and therefore all information should be checked using a primary resource before being used.

Newspaper Records

8th October 1712 (Newcastle Courant)
These are to give notice to all persons, who have a mind to venture in Lead Mines, that a fourth part of a Flourish Grove, called Hillclose Grove, in Aldston Moor; is to be sold by Mr Thomas Heron, the Elder of Corbridge: Enquire of Mr William Heron in the Close, in Newcastle upon Tyne, who will appoint the Time and Place to Treat about the same.

15th October 1712 (Newcastle Courant)
Where as several Piggs of Lead have been lately stolen from the upper end of the New-Key, in Newcastle upon Tyne, If anyone can discover or apprehend any person or persons concerned in the same and give Notice thereof to the printer of this paper, they shall receive a Guinea Reward.

11th January 1716 (Newcastle Courant)
The House of Commons impeach'd two English and five Scotch Lords, concerned in the Rebellion, viz. Derwentwater, Widdrington, Niddisdale, Carnworth, Penmure, Wintoun and Nairn: And this day the said Lords were brought from the Tower, to the Bar of the Lords House, and there impeach'd, and were afterwards recommitted to the Tower as Prisoners of Parliament.

27th February 1716 (Newcastle Courant)

London, Feb. 25.

Yesterday Morning about Eight a Clock, a Detachment of the Guards of a 1000 Foot, and 500 Horse marched to Tower-hill, and surrounded the Scaffold, The Sheriffs of London and Middlesex at Nine, went to the Tower, and demanding the Bodies of the Earl of Derwentwater, and the Lord Viscount Kenmure the Lieutenant of the Tower delivered them up, and took a Receipt. The Sheriffs then conduced them to a Room in the Transport Office, and afterwards to the Scaffold, where the Executioner performed the Decollation with as much Dexterity as themselves or Friends could wish holding up the Head, said, "God bless King George, here is the Head of a Traytor" as is usual. The Lord Kenmure, who took: his Fate the last, behaved himself with an uncommon Courage, being observed before his Exit to talk Familiary with his Friends, and two Nonjuring Ministers, to walk round the Block, to pull off his hat and Peruke, and Cloaths himself and: even to take Advice how to place his Head and from first to last, not in the least to alter his Countenance; but the, Earl of Derwentwater had not the like Presence of Mind, being seized with great Anxiety, and a seeming Discomposure.
The Executioner got a Black Velvet-Sute belonging to the latter, and two half Broad Pieces, and of the Lord Kenmure Nine, Guineas wrapt up in a Paper; Their Heads and Bodies were sent away to the Surgeons to be sew'd together, and afterward to the Undertakers, to be interrd.
On Thursday Night the Addres of the House of Lords, was considered in Council, and at last agreed to Reprieve the Lord Widdrington, the Lord Nairn, and the Lord Carnwath, for twelve Days, which was sent about eight of the Clock Yesterday Morning to the Tower; and about Ten, the Earl of Derwentwater was brought to the Scaffold out of the Transport Office, and prayed, and laid his Head and rose up, and prayed again, and spoke to this Effect, viz; "*That he*

could have saved his life, but had always been bred up in the Rules of Honour, and chose rather to die than discover. That if the Prince would have given him his Life, he would have been Faithful, but having not thought fit to Grant it, he beg'd Pardon of his Majesty, for pleading Guilty". After which, the Lord Kenmure was brought upon, the 'Scaffold, and about; Eleven he was beheaded. He was assisted by two Ministers, and dy'd a Protestant. Betwixt Nine and Ten on Thursda'y Night, the. Earl of Nithsdale made his Escape in his Sisters' Cloaths, and Riding Hood out of the Tower, he being very like her and went through all the Guards undiscovered. The Captain of the Guard, and also the Wardens were secured and imprisoned, as also, his Sister; and diligent Search is made after to seize him. He was to be beheaded Yesterday; if he had not made his Escape.
The Earl of Derwentwater's Corps, are to be carried to Northumberland, to be interr'd, and the Lord Kenmure's for Scotland. The latter when he took his Leave of his Son on the Scaffold, clap'd him on the back, *and bid him be Couragious.*

24th March 1716 (Newcastle Courant)
The King hath seized on the Estates of the Late Earl of Derwentwater, and Kenmure, as also on the Lords Widdrington, Nithsdale, Carnwath, Nairn, and Winton, being forfeited for being in the Rebellion; but we hear the Stewards have carried off all the Deeds and Writings, and are not to be found.

13th June 1717 (Stamford Mercury)
We hear from Edinburgh, That the Silver Mine which was discovered last Winter near Alva, five miles of Sterling, by Sir John Erskine, who being concerned in the late Rebellion, obtained Pardon by the Procurement of his brother, who is the Czar's chief Physician, yields £800 a Week Sterling in good Oar, which is mixed with Lead, Tin, Copper, Sulphurous Matter, &c. Tis said, that according to the ancient Laws of Scotland, the Propriety of the Mines belongs to the Owner of the Land where the same is found out, only the Tenth Part falls to the King.

16th June 1722 (Newcastle Courant)
The Lord's: Read a Second Time the Bill to Enable Arch-Bishops, Bishops, Colleges, Deans and Chapters, Parsons and Vicars, others having Spiritual promotions to make Leases of their Mines, &c. Committed it to a select Committee.

14th July 1722 (Newcastle Courant)
From the St. James's Evening-Post, London, July 7
Last Thursday the remaining Part of the Estate of the late Earl of Derwentwater was sold by the Commissioners and Trustees for Sale of the forfeited Estates, at Essex-house, for £7210 to Mr. Garthsolke, a Northumberland Gentleman, also the Estate late of Ralph Shuttleworth, Esq; in the County of Lancaster, of the yearly Value of £4 5s. for £51 to Mr. Smith, Merchant in London.

20th July 1723 (Newcastle Courant)
An Account is come from Durham, of the hearty welcome which their Representative Sir John Eden met with, in his return for his great Services in opposing the Bill for enabling the Bishops, &c. to make Leases of Mines not accustomably letten by them: The Consequence whereof was made appear to

be so destructive of the Rights of the Dean and. Chapter, the Copy-holders and Lease-holders of that County that scarce a Family but what is in some degree affected by it. The People, in general were Impatient of seeing their Preserver of their Properties, some of them met him on the other Side the River Tease, and as the Rumour of his Arrival spread thro' the Country, they were a little Time above 2000, to return him Thanks, and Congratulate with him, on the happy Deliverance. They conducted him to Durham with Music, ringing of Bells, and all other Demonstrations of Joy: About a Mile from Durham, many of the Citizens complemented him with their Banners difplay'd, 2 Banners were provided by some of the Lease-holders, with Sir John's Crest and Motto. Pro Aris et Focis.

31st August 1723 (Newcastle Courant)

London, Aug. 27. On the 19th Instant died of the Small Pox at Brussels, aged about 30, and much regretted for her exemplary Charity to the Poor, and many other excellent Qualities, Mary-Anne, Relict of James Ratcliffe, late Earl of Derwentwater, who was beheaded on Tower Hill, for High Treason February 24, 1716. She was Daughter of Sir John Webb Bar. and has left Issue two Sons. Her Corpse was carry'd, the Day after she died, to Louvain, to be inter'd there in the Church of the English Regular Canonesses of St. Austin.

24th October 1724 (Newcastle Courant)

To be Let against May next

N.B. Whoever buys the Lead Oar, or Timber must give sufficient Security for the Payment of the Governments money.

22nd March 1735 (Ipswich Journal)

We hear there will be no Lottery this year for finishing Greenwich Hospital, but that the late Earl of Derwentwater's forfeited State of about £6000 per annum will be sold, and the Money arising by the sale thereof (or so much as wanted) will be applied to finish the noble work.

8th May 1735 (Derby Mercury)

Wirksworth, May 6. A few days ago, a poor Man, as he was working in a Lead Mine near this Town, found above a Hundred Pieces of Roman Silver Coin, being the *Romani Denarii*: The newest of these pieces must be above 1600 years old. The Busts of the five Emperors of Rome appear exceeding full and clear upon several of them, and the Inscription very legible. There was the remains of a pot in which they were hid, but very much decay'd.

10th May 1735 (Newcastle Courant)

Yesterday the committee upon Greenwich Hospital voted Lord Gage £1000 *(Sic)** as a reward for detecting the fraudulent sale of the late Earl of Derwentwater's Estate: One Gentleman was for giving him but £700 but his Lordship declar'd he had expended above that sum in prosecuting the discovery, and that he might have had above £10,000 for concealing the Roguery.

**Actual amount was £2000.*

17th May 1735 (Newcastle Courant)

From Wye's Letter, &c. May 8.

To day the Lords in a Committee went thro' the Bill for the Application of the Estates of the late Earl of Derwentwater and Charles Ratcliff and reported it without Amendment.

23rd March 1736 (London Gazette)

London, March 24, 1735-6

Whereas by an Act of Parliament passed in the Eighth year of the reign of His Majesty George the Second, for the application of the Rents and Profits of the Estates forfeited by the Attainder of James late Earl of Derwentwater, and Charles Radcliffe, it is enacted amongst other things, that the Commissioner or Governors of His Majesty's Royal Hospital for Seaman at Greenwich, are to give six months previous notice in the London Gazette of the Time and Place, when and where such Estates are intended, to be Lett. Notice is therefore hereby given by us the Commissioners of the said Hospital. That on Wednesday the 29th September, next ensuing, and every Wednesday and Friday following, will be let on Lease for 21 years, or on Tack notes for one year, at Salter's Hall in London, any of the Lead mines, or Veins of Lead ore within the Manor of Aldston Moor, in the County of Cumberland, or elsewhere belonging to the said estate, till the whole shall be lett; and all Adventurers are desired to give their proposals in writing, directed to William Corbett, Esq., at the Pay Office in Broad-street, London, or to Messrs. Walton and Boag, at Ravensworth Castle near Durham, showing what Veins or Mines they or each of them would take, and whether on Lease or Tack Note, and at what Due or share to the Hospital.

15th May 1736 (Newcastle Courant)

To be Sold

A Twenty-Eighth Part of a Lead Mine at Blackhall, in the county of Durham, situate near the sea, and now very hopeful for ore, together with a Twenty-Eighth Part of a large quantity of ore in hand. Enquire of Mr William Browne in Stockton, in the said County of Durham.

14th August 1736 (Newcastle Courant)

SALTERS-HALL, JULY 24. 1736.

WHEREAS it has been represented to us the Commissioners for Greenwich Hospital, that great Inconveniencies will attend the letting the Farms, Tythes, Collieries, Lead-Mines, &c. belonging to the Derwentwater-Estate, by obliging Tenants to go to London, to their great Loss and Expence: In order therefore to remedy the same, we do hereby give Notice, that those Persons who cannot conveniently attend at Salters-Hall in London, according to the former Advertisement, and are desirous to take any of the said Farms, Tythes, Collieries, Lead-Mines, &c. may apply to Messrs. Walton and Boag at the Three Kings in Newcastle upon Tyne, Thursdays and Saturdays, from Eight in the Morning till Twelve, or from Two till Six o'clock in the Afternoon, who will give them any Information relating to the same; and are also impowered to treat for letting any of the said Farms, Tythes, Lead-Mines, &c. subject to our Confirmation.

21st May 1737 (Newcastle Courant)

To Be Sold

The Dues of Lead Ore arising within the Manor of Alston Moor, from Christmas last to Christmas next. Enquire of Messrs. Walton and Boag, at the Three Kings in Newcastle upon Tyne, or of Mr John Stephenson, Moor Master, at Nentsberry in Alston Moor, who are impowered to sell the same.

18th June 1737 (Newcastle Courant)

WHEREAS a very promising Copper-Mine has been discover'd in a Limestone-Quarry, adjoining to the Glebe-Land of Middleton-Tyas near Richmond, Yorkshire whence have been taken many hundred Weight of very Rich Oar; and whereas certain Persons had agreed with the Incumbent there to sink for a Mine in the Glebe aforesaid, in a Place very promising, where are great Signs of Copper, and have sunk in the Rock about fifteen Yards, at which Depth was found Stone mix'd with pure Copper; but the said Undertakers, being under a Prosecution for being detected in some indirect Practices, having desisted: This is to give Notice, That if any Person or Persons arc inclin'd to undertake the said Mine, as now sunk and made very easy to proceed on, upon advantageous Terms, they may apply to the Rev. Dr. Mawet, at Kneton Hall near Middleton-Tyas aforesaid, who will treat about the same.

31st December 1737 (Newcastle Courant)

TO BE SOLD

A Freehold and Copyhold Estate, call'd Newlandside, near Stanhope, in the county of Durham of the yearly value of Thirty Pounds, consisting of Arable Meadow, and Pasture Grounds, with a good Dwelling House, Barns, Byers, and Stables. Also a very good Lead Mine in the Freehold Estate. Enquire of Mr Henry Ward, Attorney at Law in Newcastle.

9th December 1738 (Newcastle Courant)

On Tuesday last a General Court was held at the Admiralty Office, of the Commissioners and Governors of Greenwich Hospital, when they signed a Lease to George Liddell, Esq; and Company, of all the Lead Mines on the Derwentwater Estate.

23rd February 1739 (London Gazette)

Royal Hospital for Seaman at Greenwich Aug, 30, 1739

Whereas by an Act of Parliament passed in the Eighth year of the reign of His present Majesty, for the application of the Rents and Profits of the Estates forfeited by the Attainder of James late Earl of Derwentwater, and Charles Radcliffe, it is enacted amongst other things, that the Commissioner or Governors of His Majesty's Royal Hospital for Seaman at Greenwich, are to give six months previous notice in the London Gazette of the Time and Place, when and where such Estates are intended, to be Lett.

Notice is therefore hereby given by us the Commissioners of the said Hospital. That on Wednesday the 2nd April, 1740, at Salter's Hall in London will be let on lease for 21 years, or on Tack notes for one year, the following open Lead mines or Veins of Lead ore, viz.

Cooperhole-head, Goangill, Nentsberry Green Ends, ditto North Vein, Middle Vein, Guddimgill Moss, Dowgang, Nenthead Field, Dow Pott-Syke, Garrigill-burn old grove, Dodberry Dike-head, Hill Close, Clargill Midows, Clargill Cleugh-head, Cash-burn, Cornriggs, Gate Castle, Middle Syke, Scarr Ends, Lee House, Low Birchy-bank, Broomberry West of Tyne, Dry Burn, Gill House-Burn, How Burn Moss, Park-grove, Rock Hill, Horse Edge, Slattymea.

And on Wednesday the 4th June following will be also Lett at the same place, the several other open Lead mines or Veins of Lead ore, viz, Broomberry

East of Nent, Guttergill, How Blagill, High Birchy Bank, Roderup Cleugh, and Green Hill Sike or Green Cragg, all within the Manor of Alston Moor in the County of Cumberland, belonging to the said estates; and all Adventurers are desired to give their proposals in writing, directed to William Corbett, Esq., at the Pay Office in Broad-street, London, or to Messrs. Walton and Boag, at Ravensworth Castle near Durham, showing what Veins or Mines they or each of them would take, and whether on Lease or Tack Note, and at what Due or share to the Hospital.

8th March 1739 (Newcastle Courant)

There is a Lead-mine in the Estate, now open and work'd, and a good Prospect of Lead in several other Parts of the Manor, there is a Prescription of £4 a year to the Vicar of Warcopp, in lieu of all Tythes for the whole Estate. Exact Rentals may be had either from the said Mr. Collingwood at Newcastle, Mr. Rich. Yeats in Appleby, or from Mr. Thomas Simpson, Attorney, in Penrith. N.B. Mr. Rich. Orton of Warcopp, will shew the Estate to any person who desires to see it.

11th October 1740 (Newcastle Courant)

On Thursday last, in the afternoon, after a long and tedious illness, died at his seat in this town, George Liddell, Esq., one of the representatives in Parliament for Berwick upon Tweed, and one of the Commissioners for Greenwich Hospital, &c. He was a gentleman of great abilities, and well esteemed by all in the country.

18th October 1740 (Newcastle Courant)

In the Paragraph in our last, relating to the Death of George Liddell, Esq., it was said that he was a Commissioner for Greenwich Hospital, &c., therefore this first opportunity is taken to declare that the said assertion is false and groundless, —- That worthy Gentleman's Corps was carried from his Seat, and interr'd on Tuesday last at Lamesley, on which Occasion most of the Gentlemen in this Country attended, and the greatest Order and Decency imaginable was observed through the whole Funeral Rites.

The biographical details below were obtained from www.historyofparliamentonline.org

LIDDELL, George (1678-1740), of Eslington, Northumberland.

ConstituencyDates

BERWICK-UPON-TWEED
1727 - 9 Oct. 1740

Family and Education

Baptised 1st August 1678, 4th son of Sir Henry Liddell, 3rd Bt., M.P., of Ravensworth by Catherine, daughter and of Sir John Bright, 1st Bt., of Badsworth, Yorks.; cousin of Thomas and uncle of Sir Henry Liddell, 4th Bt.

Biography

The Liddell's of Ravensworth were descended from a Newcastle merchant, who bought the Durham estates of the Gascoines, including a rich coalfield, in 1607. Like the rest of the family, a coal-owner, George Liddell was one of the

founders of the 'Grand Alliance', a cartel which dominated the North Country coal trade for the rest of the century. From 1727, he was returned for Berwick with the support of the government interest there. On excellent terms with Walpole, who called him 'the wise man of the north', he voted with the Government on every recorded division. On 14 Apr. 1738, Edward Harley's parliamentary diary refers to a bill relating to the forfeited Derwentwater estate, the proceeds of which went to Greenwich Hospital.
The outward presence for this bill was to sell part of the estate to clear off the mortgage upon it. The private interest was a job for Colonel Liddell, for it was intended to sell that part of the estate upon which were mines and woods and lands capable of great improvement, and not that part which was fully improved.
In a list of the division on the Spanish convention in 1739, Liddell is shown as 'director for Greenwich Hospital of Lord Derwentwater's estates'. He died 9 Oct. 1740. He was unmarried.

3rd January 1741 (Newcastle Courant)

Royal Hospital for Seamen at Greenwich, Dec. 7, 1740

THE Commissioners of his Majesty's Royal Hospital for Seamen at Greenwich hereby give Notice, that on Wednesday the 24th of June 1741 or as soon after as may be, the following open Lead Mines, or Veins of Lead Ore, within the Manor of Aldston-Moor, in the Count of Cumberland, belonging to the Derwentwater Estate, will be lett, on Lease for 21 Years, or on Tack-Note for one Year, viz. Couperholehead, Goangill, Nentsberry Gran Ends, ditto North Vein, Middle Vein, Guddingill Moss, Dowgang, Nenthead Field, Dowpot Sike, Garrygill Burn Old Grove, Dodberry Dikehead, Hill Close, Clargill Meadow, Cash Burn, Cornriggs, Gate Castle, Middle Sike, Scarr Ends, Lee House, Low Birchey Bank, Broom Berry, West of Tyne, Dryburn, Gillhouse Burn, Howburn Moss, Park Grove, Rock Hill, Hors Edge, Slate Mea, Broom Berry, East of Nent, Guttergill, Howblagill, High Birchy Bank, Roderup Cleugh, Green Hill Sike or Green Cragg, Nentsberry Haggs, Green Cast, Baxton Edge and Balehill or Farnberry. And all Adventurers are desired to give their proposals in writing, directed to William Corbett, Esq., at the Pay Office in Broad-street, London, or to Messrs. Walton and Boag, at Ravensworth Castle near Durham, showing what Veins or Mines they or each of them would take, and whether on Lease or Tack Note, and at what Due or share to the Hospital.

7th February 1741 (Newcastle Courant)

To be Sold

THE LEAD MINES in Weardale, in the county of Durham, call'd ALLERGILL, late belonging to Mr Wm. Denton, deceas'd, being held by lease for the remainder of a Term whereof nineteen Years and upwards are yet to come. Whoever is inclined to purchase the same, may apply to Miss Denton of Stockton; and the works will be shewn by Mr John Elliot of Middleton.

25th July 1741 (Newcastle Courant)

To be Sold

Together, or in Parcels, Situate at Aldston, in the County of Cumberland,

AN Estate lately belonging to Mr Thomas Lee, deceased, consisting of Arable, Meadow and Pasture Ground, well fenced and watered; with a Malting and a convenient Pub- lick House, commonly called Aldston House, with good Byers and Stables. Enquire of Mr Robert Hutchinson at Aldston aforesaid, Mr Henry Salkeld, Pewterer, or Mr Henry Ward, Attorney at Law, in Newcastle upon Tyne.

N.B. Mr Thomas Lee, who lately gave Notice in the Newcastle Journal, that he had a Title to the said Estate, has now conveyed all his Right to the Persons who intend to sell.

Thomas Lee of Aldstone House, was buried 29th January 1741, at St Augustine's, Alston.

15th January 1742 (London Gazette)

The Directors of His Majesty's Royal Hospital for Seamen at Greenwich hereby give Notice, 'That the Dues of Lead Ore, which were raised in the Manor of Aldston Moor, belonging to the Derwent water Estate, in the County of Cumberland, from Michaelmas1741, to Michaelmas 1742, and also the Dues of Lead Ore raised and to be raised from Michaelmas 1742, to Michaelmas 1743 are to be sold to the best Bidder, together or separate. Walton and Boag, at Ravensworth Castle, near Durham, or of Mr John Stephenson, Moor Master, at Nentsberry in Aldston Moore.

26th May 1744 (Newcastle Courant)

They write from Edinburgh, that they have certain information there, that at the Earl of Hoperton's Mines at Leadhills, there have been made some Experiments to blow Furnaces with a Fall of Water, which is now brought to the utmost perfection. It is found by Experience to be sufficient for melting any Ore in Leadhills, and is far preferable to Bellows for the Constancy of the Blast. It likewise exceeds all Methods known of conveying good Air into the Works at what Depth or Distance soever.

29th January 1745 (London Gazette)

Royal Hospital for Seamen at Greenwich,

To the Best BIDDER,

On Tuesday the first Day of May next, between Twelve and Five o'clock in the Afternoon, at the House of Mr Joseph Hay, Innkeeper in Durham,
THE Manors of WHITFIELD and OWSTON, in the County of Northumberland, of the yearly Value of £900 and upwards, clear Rent, Land-Tax excepted, together with the Advowson of the Rectory of Whitfield, with a large and modern Seat-house, several inclosed Farms, containing 3200 Acres and upwards, and an extensive Royalty of about 8000 Acres of Ground belonging thereto; both the inclosed Grounds and the Commons are capable of great Improvement, and there is Plenty of Fish, Moor-game, and other Opportunities of Sport within the same. There is a valuable Spring of Wood now growing thereon, and a great Prospect of very valuable Lead Mines within the Premises. Also several Parcels of Freehold, Copyhold, and Leasehold Lands, lying at Wolsingham, in the County of Durham. For further Particulars enquire of Mr James Close, or Mr Jonathan Wharton, both of Lincoln's Inn, Anthony Wilkinson and Robert Wharton, Esqrs. or Mr Goddard in Durham.

30th June 1750 (Newcastle Courant)

To be LETT immediately,

THE several VEINS of LEAD ORE following, at Rookhope, in the parish of Stanhope and County of Durham, viz. Respy, alias Resby Myres, West Brackensike, East Brackensike, Longwell, West Scarsike, and East Scarsike. Whoever desires to treat for the same, or any of them, may apply to Mr Robert Ellison, or Mr Ralph Featherston, in Westgate, Newcastle upon Tyne.

24th August 1751 (Newcastle Courant)

To be SOLD immediately

A FULL FOURTH PART OR SHARE of a very rich Lead MINE called DOWGANG, nigh Nenthead in Aldstone Moor, held by Lease under the honourable Commissioners of his Majesty's Royal Hospital for Seamen at Greenwich for 21 years 15 of which are yet unexpired. The said Mine for more than a Year past, and at present employs nigh 100 Workmen, and may be viewed by any Gentleman or Agent that has a desire to purchase, and moreover the owner Mr Robert Rutter may be treated with either at his own House, or at the House of Mr Nathaniel Yeats, in Aldstone Town, and will make proper Title, and also deliver the original Lease to any Purchaser.

14th September 1751 (Newcastle Courant)

To be S O L D,

Situate near Hexham, in the County of Northumberland,

A Very improveable Freehold ESTATE, of the yearly Value of 100/, called SETLINGSTONES, containing 500 Acres of Arable, Meadow and Pasture Ground; also the Wood thereupon, and a Lead Mine within the same. This Estate is tythe free, paying only a small Modus of 1s. 6d. yearly, and has a Right of Intercommoning upon a very large Common, called Grundon Common. The Dwelling-houses, Out-houses, and other Conveniences are in good Repair, and none wanting proper for a Tenant.

Mr Matthew Pigg, of Padge-croft, or Mr William Todd, of Landends, near to Haydon-bridge, will shew the said Estate, and treat about selling the same, or any Person inclinable to purchase it, may apply to Mr Joshua Douglas, of Newcastle upon Tyne, or Mr Charles Shaftoe, of Hexham, to treat about the Sale thereof.

9th November 1751 (Ipswich Journal)

Keswick in Cumberland, Oct. 22. The same villainous Gang that hath for the last fourteen years past, plundered the black Lead Mine in Borrowdale, and yearly stolen from thence, by a moderate Computation, one thousand pounds worth of Black Lead; by Force broke into and kept possession thereof, during the time the Assizes were held last year at Carlisle, for the county of Cumberland; when many of the gang were then tried for robbing the mine. The same attempt was also made and repeated by them this last August, during the time several of their companions were taking their trials at Carlisle, for breaking into and robbing the Mine; and when others were also tried upon the Black Act for shooting several times in the night at Mr John White, and six others employed to guard the mine, with an attempt to murder the Guard, and take possession of the mine. And a third attempt to murder the said John White, and the rest of the Guardsmen, and then to seize and keep possession of the mine, was also made by this desperate and wicked set of men, in the night of Sunday the 20th inst., when the Guard, though several times shot at, providentially escaped by the darkness of the night.

6th June 1752 (Newcastle Courant)

By a Letter from Fort Augustus, in the North of Scotland, we are informed, that there has lately been discovered on the Estate of McDonald of Glengary, near to that Place, very rich Copper and Lead Mines, and that a Gentleman from

London is actually at Work there, having carried with him a Number of Miners for that Purpose. The said Letter further adds, that from the Reports of skilful Miners, who have viewed the Country, there is the greatest Prospects of valuable Mines there that has as yet been discovered, and that the same, if properly looked after, would turn out to be an inestimable Treasure.

16th September 1752 (Newcastle Courant)

We are informed from Denbigh in North Wales, that there are already three Companies of Miners employed to draw Lead from the Mines belonging to his Grace the Duke of Ancaster in that Country, and that there will be Work enough for ten Companies more The Circumference of the Duke's Estate is about 80 Miles, the Whole consisting of Mountains full of Fossils and Minerals: But above all, they abound chiefly in Lead Ore of every Kind, and it is asserted, that the Ore, and Ore-bearing Symptoms, appear on the Surface of the Ground.

Every one of the capital Veins of the richest Mines that ever were, and are now, in North Wales, determine in his Grace's Estate with greater Lustre than at the several Spots whence considerable Wealth was drawn: And there are so many Mines in the Duke's Lands, that it would be impossible for the several Mining Companies (united) in Great Britain to work them all. The Lands which form the Gwedyr Estate, belonging to his Grace, lie chiefly in the Countries of Caernarvon and Denbigh, on both Sides the navigable River Conway. The chief Lead Mines are in Caernarvonshire, in the Hills called the British Alps, which are some hundred Yards (almost perpendicular) high. In these Lead Mines are many Veins, from half a Yard to three or four Yards broad; and they run or strike due East and West for three or four Miles. Many Strings of Lead Ore, from half an Inch to four Inches broad, appear on the Surface of the Ground. The Estate in Question abounds with Rivulets for washing the Ore; and the farthest Mine is not above three or four Miles from the Navigation of the River Conway. All the Lands, quite to the Place where the Vessels are loaded, belong to the Duke of Ancaster, a Circumstance that will be of great Advantage to those who shall be concerned in those Mines. May Prosperity attend the Working of there, and every Undertaking which, by employing Multitudes of industrious Poor, enriches Individuals, and the Kingdom in general. So many Branches of Commerce are departing from us, owing to our Venality and Indolence, and the superior Wisdom and Industry of Rival Nations, that it is our Duty zealously to cultivate any new Trade, Manufacture, &c. which may offer itself.

11th August 1753 (Newcastle Courant)

To be SOLD,

A FARM situate at NEWLANDSIDE, in the Parish of Stanhope, in Weardale, in the County of Durham, consisting of a Farm house, Barns, and other Conveniences; 70 Acres or more of Freehold Lands, in which there is a Lead-mine and Lime- stone Quarries, and 45 Acres or more of Copyhold Lands, held under the Bishop of Durham, at a yearly Rent of 9s. 8 d. and a Fine of 10s. on Admittance; together with several other Pieces of Woody Ground, not included in the Quantities above mentioned; and an unlimited Right of Common on Bolyhope Fell. The whole Let for three Years, from May-day last, at £42 per Ann. For further Particulars, enquire of Messrs Walton and Boag, at Ravensworth-castle, or of Mr William Boag, Attorney at Law in Newcastle

upon Tyne. —Mr Tallintire Schoolmaster, at Westgate, near Stanhope aforesaid, will shew the Premises.

17th September 1754 (Manchester Mercury)

Country News

Carlisle, Sept. 4. We hear that the Indictments against _____ and others for breaking into the Black Lead Mines in Borrowdale in this county, were respited until the next Assizes; and that the mines will be opened a second time this summer, in order to exhaust all the veins thereof, the proprietors of the Mines being unable to find any method sufficient for their preservation from being robbed, and that a great quantity of the lead already dug is just now sent to London; and that a very large quantity more of the best and finest lead that was ever seen is also going to London.

4th January 1755 (Newcastle Courant)

They write from Middleton-tees, in the county of Durham, that a few days ago two Men were killed, and several others much bruised in a lead mine near that place.

1st February 1755 (Newcastle Courant)

To be LETT by Lease, from the Dean and Chapter of Durham, Renewable every four or seven years

5th May 1764 (Caledonian Mercury)

To be LET

A LEAD MINE on the Banks of the large lake of Loch Maree, in the parish of Gerloch, and county of Ross, which is navigable at all seasons of the year, and communicates with the sea, on the west by the river Ewe; and on the east, by an easy day's journey, of good road from Dingwall or Inverness. Upon a small experiment made by the proprietor, a vein of above three feet of lead has already appeared, and the neighbouring ground abounds with oak and other woods.

Samples of the ore and Sparr, with an accurate draught and description of the mines and conterminous ground, are to be seen in the hands of Alexander Mackenzie, Writer to the signet, who is impowered to adjust articles with any person or company disposed to contract for a lease.

7th July 1764 (Caledonian Mercury)

TWENTY-SIX TUNS of POTTERS ORE, of the best quality, in one or more lots, and all the mining tools, air pipes, pumps, and other materials belonging to the lead mine at Castlandhill, are to be sold, by way of roup, at the said lead mine, which lies within a quarter of a mile of the harbour of Inverkeithing, upon Tuesday the 17th of July instant, by twelve mid-day.

Roup = Auction

29th September 1764 (Newcastle Courant)

To be LET, as usual, on very reasonable Terms

SEVERAL VEINS of LEAD ORE, within the Manor or Lordship of KIRKHAUGH in the county of Northumberland: Some of them have been wrought by the Lead Company in London, under Lease, lately expired. —Any

persons desirous of taking these veins, may apply to Christopher Richardson, Esq; at Nunwick, near Penrith, Robert Lowes, Esq., at his house in Hexham; or Mr Brougham, Attorney at Law, at Penrith aforesaid, in Cumberland.

16th March 1765 (Newcastle Chronicle)
We hear from Alston, that in the storm on Tuesday se'nnight, one Charles Beaston, a miner, was suffocated on his return home from the mine, between Nenthead and Garrigill, his body was found the next day. Also a boy, about 14 years of age, perished in the said storm, in going from Nenthead to Allendale.
Charles Beasting (son of James, baptised at Garrigill 19th May 1727) of Garrigill Gate, was buried at St John's Church, 6th March 1765.
Charles married Hannah Pattinson, 9th June 1753, at Alston.
Children of Charles Beasting:
Ann baptised September 1754,
William baptised August 1756, married Hannah Waugh, 27th November 1784
James baptised 6th August 1758, married Jane Bowman, 6th May 1779
Mary baptised 13th January 1761, married Peter Milburn (of Stanhope) 21st June 1783 or John Fairless of Stanhope 1792
Hannah baptised 18th September 1763, possible marriage to John Dickinson, possible burial at Garrigill, 12th June 1827.
Possible burial of Hannah Beasting snr., 1st October 1788, at Garrigill.

30th March 1765 (Newcastle Chronicle)
Last week died at Nenthead near Aldston, Ann Gibson, aged 110 years. She came front Derbyshire 70 years ago, and has wrought in the lead mines there ever since.
Ann Gibson was buried at St Augustine's, Alston, 20th March 1765.

2nd April 1765 (Newcastle Journal)
Newcastle, March 30. The latest storm was the most severe in Alston moor that has been known for many years; and tho' it may appear almost incredible in many parts of England, we are well assured that the snow in several places was fourteen or fifteen foot thick. At Tynehead a home was overblown while the people were in it, and the whole family (Mr. Watson's; were obliged to roll themselves out from the top part ot the house over the snow, at the utmost danger of their lives. At Nenthead several houses were covered up above the windows, and the people were confined within for some days, and obliged to burn candles all the while.

4th May 1765 (Newcastle Chronicle)
To be SOLD together or Separate
THE LEASE of the LEAD-MINE, called Eastrake, within the Common of Middleton in Teesdale, in the County of Durham, for the Remainder of a Term of 21 Years, which Commenced at Michaelmas, 1750.
Also the LEASE of the LEAD MINE, called FLEAKBRIDGE; and of a VEIN of LEAD-ORE, about three hundred Yards South-east of the said Fleakbridge Mine; and of another VEIN of LEAD ORE, called Fleakbridge Old Vein, in Wiregill, all within the Common of Middleton in Teesdale aforesaid, for the Remainder of a Term of 21 Years, which commenced the

7th of March, 1758; together with the Engine and other Materials at the laid Fleakbridge Mine. Enquire of Mr Hugall, Attorney, in Durham.

28th December 1765 (Newcastle Chronicle)

To be LET

At Threapland, in the county of Cumberland

A COPPER MINE in which a good deal of work has been done, but not of late years; the Manor and Lordship of Threapland where the said Mine lies is very extensive with Limestone Ground, and very promising of both Copper and Lead Ore.

Anyone who chooses to lease the said Mine for a term of Years, will be used upon very reasonable Terms, and may see some of the Copper Ore lately got out of the side of the old Mine. For further particulars, enquire of Mr Roger Williamson, at Snittlegarth, or of Mr Thomas Story of Dalston, near Carlisle.

31st May 1766 (Newcastle Courant)

Last week was married at Aldston, in Cumberland, Mr Edward Loraine, a Gentleman largely concerned in Lead Mines there, to Miss Netters, of Rosegill, a beautiful young lady, with a fortune of 2000 *l*.

At St John's, Garrigill, Edward Loraine married Isabella Nattrass, daughter of John Nattrass, 15th May 1766.

Edward Loraine son of Robert Loraine and Mary Allgood

14th June 1766 (Newcastle Courant)

To be SOLD,

THE DUES of LEAD ORE, raised within the Manor of ALSTON MOOR, in the County of Cumberland. Part of the Derwentwater Estate, from Michaelmas 1764, Michaelmas 1765. Enquire of John lbbetson, Esq., at the Admiralty Office, London.

N.B. The Commissioners of Greenwich Hospital propose to build, with all possible Expedition, a Smelting Mill, with two Ore Hearths and a Slagg Hearth, at or near Woodhall, in the County of Northumberland, and, in the mean Time, will erect proper Bingsteads near the same, for the Reception of the said Due's; The Mill, with its Conveniences, will be let along with the Dues, Rent-free for nine Months, after its being ready for Work, which it is expected will be about Martinmas next, the Purchaser or Purchasers of the said Dues, delivering up the said Mill, with its Conveniences, at the end of the said nine Months, in as complete Repair as when the same shall be entered upon.

10th January 1767 (Newcastle Courant)

We learn from Aldstone, in Cumberland, that so great is the increase of that place from the Lead Mines that 800 Sheep and 10 Bullocks were killed there on Christmas Eve, and were all sold before seven o'clock at Night.

Saturday some of the Grover's at Fallowfield having been at Hexham, where they drank too freely, and on the road Home meeting with a young Woman, they used her so rudely, and frightened her so much, that it is feared she will lose her reason.

24th January 1767 (Newcastle Courant)
On the 13th instant five of a Grover's at Fallowfield Lead Mines, who had abused the young Woman (as mentioned in the paper of the 10th inst) were apprehended, and carried before a Justice of the Peace, where they submitted to pay the surgeon's Bill, and give her 12 Guineas, and enter into a Bond for their future good Behaviour.

21st February 1767 (Newcastle Chronicle)

Royal Hospital for Seamen at Greenwich,
Feb. 13, 1767.
NOTICE is hereby given,

THAT such Persons as may be willing to purchase (together or in separate Parcels) the DUES of LEAD ORE, raised from Michaelmas 1765, to Michaelmas, 1766 at the following Lead Mines within the Manor of Aldston-Moor, Part of the Derwentwater Estate, in the County of Cumberland, (that is to say) Rampgill and Redgroves, Rampgill Sun Vein, Thortergill Sun Vein, Guddamgill Moss, Middle Cleugh, Middle Cleugh first Vein, Middle Cleugh second Vein, Longcleugh, Fletcherass, Carrs, Windy Brow, and Old Blagill, may deliver in their Proposals (sealed up) to the Directors of this Hospital, at Salters Hall in London, on Wednesday the 4th Day oft March next, at Eleven o'clock in the Forenoon; or on or before Friday the 17th Day of February, to Mess'. Walton and Smeaton, at Farnacres, near Newcastle upon Tyne. —Note, That it is expected Security be given by the respective Purchasers before the Delivery begins, for Payment of the Money at Michaelmas 1767; and to oblige them to remove the Ore before that Time.
JOHN IBBETSON, Secretary.

4th July 1767 (Newcastle Chronicle)
On Monday the 22nd of last month, in the evening, two women called at the house of one John Wilson of Carr-sheel in Allendale, one of whom pretended to be deaf and dumb, the other acted as her interpreter; they had a considerable quantity of powdered herbs which they sold as never-failing remedies for all disorders; the interpreter said they were going to Aldstone in Cumberland, but were much fatigued with that day's journey, and entreated to lodge there that night, and accordingly were accommodated with a bed in a room in which were other three beds, taken up by some miners who boarded there. About 7 next morning they arose, and pretending to be in a violent hurry to get to Aldstone would not stay to breakfast, but persuading their hostess to give them half a crown for a few doses of their powdered herbs, took their leave, and walked away. About four hours after their departure, one of the miners coming from his work, went up to the room where these two women had lodged, to put off his working cloaths, and dress for the remainder of the day, when on taking down a pair of breeches which hung at the head of his bed, and upon examining the pockets (wherein he had left a purse containing £13 19s. 6 d.) to his great astonishment perceived that his purse and its contents were gone: The two women were immediately suspected for the theft, and ten or a dozen miners were instantly called together, who pursued and came up with them about eleven o'clock that night near Temmon, on their road to Carlisle, and found them both exceedingly intoxicated, they having indulged themselves at Glenwelt with

a large quantity of cyder and brandy. The next morning they were carried before John Tweddell, Esq; of Unthank-hall, one of his Majesty's justices of the peace for the county of Northumberland, when the deaf and dumb lady came to her perfect hearing and speech. —On their examination they confessed the fact, and returned the greatest part of the money, and said they were born at Edinburgh; she who had pretended to be deaf and dumb called herself Ann Buchanan, otherwise Hewston; the other, who had acted as her interpreter, called herself Margaret Smyth. — They were both committed to the county goal at Morpeth.

8th November 1766 (Newcastle Chronicle)
We hear some experienced miners and assayers of metal, are soon to be engaged to go over to Minorca, where there is a prospect of improving a silver and lead mine, lately discovered in that island, to great advantage.

11th April 1767 (Newcastle Courant)
Last week died at Nent Head, near Stanhope, William Clemison aged 97. He retained his faculties to the last.

5th September 1767 (Newcastle Chronicle)
Edinburgh, Aug. 28. We are informed from the Island of Isla, that in working the lead mines there, a vein of seven feet thick has been lately discovered, which is almost double the bulk of any vein yet discovered in Scotland.

12th July 1768 (Manchester Mercury)

One Ounce in a Lead Mine, called Loggerheads, two Miles from Mould, in Flintshire, in Lease from Mrs. Jones.

28th January 1769 (Newcastle Courant)
Wednesday two well dressed men were found lying by each other dead, at a place called Harwood Head, and near the edge of a lead mine on the moors betwixt Aldston and Middleton in Teesdale. It is supposed they had come from Aldston on the preceding day, and overtaken by a thick snow with a violent wind, had missed their road, and travelled about the moors till quite spent, when they had laid themselves down and expired.

16th March 1770 (Derby Mercury)
The great Cause between the Partners of *Little-Pasture* and *Black-Hole*, concerning a rich Lead Mine near Eyam, was determined on Monday Morning, after a short hearing, in favour of *Little-Pasture*.

19th May 1770 (Newcastle Courant)

To be LET

A LEAD MINE, called Awgills, on Stainmore, in the county of Westmorland, under lease for 18 years, whereof nine are not yet expired, lays in a fine streak of ground, pays 7 duty, has a good Bob Engine upon it, the wheel thereof nine yards diameter, and the cranks 8½ cwt. and strikes four, five, or six feet, as occasion requires. —Any Gentlemen that are inclineable to take the same, may apply to Jonathan Ewbanke, of Stainmore aforesaid, who will shew the Works, the Engine, and all other necessary Utensils on the field, on or before Thursday the 5th day of July next; on which day (if the Field is not let) all the Miner's and Smith's tools, which are very good, and little worse for wear, will be sold by public Auction.

9th June 1770 (Newcastle Courant)

To be LET and entered immediately

THE LEAD MINES, lately wrought by Mr Thomas Shirley, under certain lands, lying and being in Muggleswick Park, held by lease from the Ho. Dean and Chapter of Durham. —Enquire of Mr Lynn, of Urpeth, near Chester le Street.

17th November 1770 (Newcastle Chronicle)

THE MINES of LEAD, COPPER, and IRON ORE, and all other the MINES and MINERALS within and under the Grounds of the extensive Lordship of Millam In the County of Cumberland, situated on the Irish Sea on the West, and the navigable River Dudden on the East, are to be let immediately, and great Encouragement will be given to work the same.

Enquire of Mess. Peele and Wilson, of Simond's Inn, Chancery-lane, London, Esqrs. Edmund Gibson, of Burr-field, near Bootle, in the County of Cumberland, Esq; Mess. Grey and Burke, in Durham; Mr Pemberton, Attorney at Law, in Sunderland, and Mr Bell, in Whickham, near Newcastle upon Tyne, who will treat about the same: Mr John Ashburner, of Millam Castle, in the said County, will shew the Boundary of the said Lordship.

8th December 1770 (Newcastle Chronicle)

TO be Sold by public Sale to the best Bidder, at the House of Mrs Sarah Stokeld's, in Hexham, on Wednesday the 19th Day of this inst. December, between the Hours of One and Four in the Afternoon, (by Mr Joseph Topping and John Stokeld, Assignees of William Ridley, late of Hexham, Flax-dresser) All that One Sixteenth Part or Share of a certain LEAD MINE, commonly called Haddon Field Lead Mine, situate in the County of Northumberland, and held by Lease under their Graces the Duke and Duchess of Northumberland; and all our interest therein during all the Term unexpired in and by the said lease, and also all our sixteenth Share, or all Ore lying above Ground, as also all our sixteenth Share of all Materials belonging to the said Lead Mine.

And also all that One Sixteenth Part or Share of certain other LEAD MINES, called Broomsbery Lead Mine, situate at Aldston Moor, in the County of Cumberland, and held by Lease under the Commissioners of Greenwich Hospital; and all out Estate and interest during all such Term as are thereof unexpired, and also all our sixteenth Share of all Materials belonging to the said Lead Mine.

N.B. The several Persons who stood indebted to the said William Ridley at the Time of his Failure, are desired to pay their several and respective Debts to the said Assignees immediately, otherwise they will be prosecuted without further Notice.

22nd December 1770 (Newcastle Courant)

LEAD MINES.

To be LET,

Within the Lordship or parish of Sedburgh in the West Riding of the County of York, TWO VEINS of LEAD ORE, and ONE of COPPER——Any Person inclinable to take the same, or any part of the said extensive Lordship, for winning and working of Lead or Copper Ore, may apply to George Dixon, of Cockfield, near Raby, in the county of Durham, or Roger Moyster, at the Cross Hall, near Sedburgh.

January 1771 (The Scots Magazine, Volume 33)

An account of Old John Taylor.

John Taylor, son to Barny Taylor, by his wife Agnes Watson, was born in Garrygill, in the parish of Aldstone, in the county of Cumberland. His father was

a native of Westmoreland, a miner; and died when John was only four years old, leaving other three children, two daughters older, and a son younger, besides John, to the care of their mother, who lived about twenty-five years thereafter.

John was early set to work, owing to the poor state that his mother was left in by his father's death. Accordingly, he went, and wrought at dressing lead-ore, which he followed for two years at a 2d. per day. From thence he went below ground, a kibble-boy, and had been employed in assisting the miners in removing the ore and rubbish to the bank, at the rate of 4d. per day, for three years or four, when the great solar eclipse, called the Mirk Monday*, happened. At that time, he was at the bottom of a shaft or pit called Winlock shaft and was called on, by the man at the shaft-head, one Thomas Millbank, to tell those below to come out, because a great cloud had darkened the sun, so that the birds were falling to the earth. This event, which he always repeats with the fame circumstances, is the only aera from which to reckon his age.

John continued to work in the mines in the neighbourhood, of Aldstone till about twenty-six years of age. He then went to the leadmines at Blackhills in the Bishoprick of Durham, where he continued about nine years; four of which he was employed in watching an engine that drew water from these works, where he was obliged to such close attendance, that he had only four hours of the twenty-four allowed to refresh himself by sleep, his victuals being brought to him on the spot.

From Blackhills he was sent by one Mr Donbledays, a Quaker, to view and make a report of some mines in the Island of Islay, for the Quaker company, his then masters. He soon returned again to the north of England from Islay, where he had begun an acquaintance with one Captain Pollock, who then had the mines of Islay in possession, having purchased the lease of these works from one Squire Keafie, an Irish gentleman, and wanted to sell the lease again to the Quaker company. Some time after John was engaged by Captain Pollock (who had missed a bargain with the Quaker company) to go to Islay as an overseer, and to work himself also; where he went, and remained some little above a year; and then again returned to the north of England; where he remained some time, he does not remember how long, till he was engaged, with some others, to go to Etrick, in the south-east of Scotland, to make trials for lead-ore for a gentleman there, one Scot of Harden; Where he continued about a year and a half; when the gentleman dying, the work was dropt, and the workmen left unpaid, by which John lost £18 of his wages: as Harden's successor was a minor, and his affairs in disorder, no payments were made till the heir came of age; before which period John left the evidences of his debt, and never more inquired after it.

From Etrick, John, on his way to Edinburgh, fell in with some gentlemen of the mint, coming from London to coin the Scottish money into British; with whom he engaged, upon giving sufficient security for his good behaviour. He continued in the mint at Edinburgh for two years, till that job being ended, he then again engaged with Pollock before mentioned, who had got some Edinburgh and Glasgow merchants to join him in working the mines of Islay, to go to Islay again. Having gone to the north of England, and brought more miners along with him to carry on the works, he settled in Islay, and married his only wife, in 1709, and remained there till the year 1730; when the Islay works giving up, John was obliged to decamp, with his family. He brought his family then to Glasgow, and

leaving them there, went to the mines at Strontian in Argyleshire; where he wrought about two years; but being attacked by the black scurvy that then raged at Strontian, he left that place, and returned to Glasgow; and for some time he continued thereabouts as a day-labourer, quarrying stones, ditching, &c. But wearying of that way of life, he went to Hilderston-hills, near Bathgate, and wrought about three months for the York-building Company there, in what they called a silver vein. This work also misgiving, John from thence, in 1733, came to Leadhills, where he wrought regularly as a miner till 1752; when his great age obliged him to desist from working any longer; being then about one hundred and fourteen years old.

He was always a thin spare man, about five feet eight inches high, black-hair'd, ruddy faced, and long visaged; had always a good appetite; and when he was obliged to go to work, (as the miners are at all hours), found no difficulty of making as hearty a meal at mid-night as at mid-day. His breakfast for many years past and at present still is; a few pottage made of oatmeal, with a little milk or ale mixed; his dinner; flesh and broth of flesh, constantly from his youth; and at present he eats a little flesh to dinner, when boiled tender. His drink was, and still is, chiefly malt liquor: and although he could never be called a drunkard, yet by times he would take a bottle heartily with an acquaintance; and if his daily labour produced so much a's supplied the demands of his family, and kept him out of debt; no man in the world enjoyed life with an happier relish than John.

He never remembers to have been sick (for the small pox he had in his infancy) till about the year 1724, when he was seized in Islay with a bloody flux; and at Strontian he was seized, in common with the rest of the miners, with the scurvy, occasioned by drinking spirits; and feeding on salt provisions. Here John had also a severe fever, occasioned by travelling to and from Glasgow; where he had been to visit his family, in the heat of summer; and what is remarkable, of this fever is, that having been let blood in the' arm, the wound broke out, and before it was discovered; the blood had run through the bed and alongst the floor, till under a table in the midst of a company that were drinking in the room, by which he was almost bled to death.

In 1741 and 1742, in the spring of both years, he was seized with the scurvy at Leadhills, owing probably to the same causes that brought it on him at Strontian.

In March 1758 his wife died; when he having got cold, was seized with a looseness, attended with feverish symptoms, which brought him very low. Having recovered from this illness, he continued healthy for several years, till the spring of 1763, when he was again attacked with sickness; but recovering, he has continued in tolerable good health since.

One remarkable incident of John is, that his teeth were strong and good, and he freely eat the hardest cakes or bread, till 1764, when he took the resolution of leaving off to chew tobacco, which he had constantly used, to save an article of expense that he thought unnecessary. Accordingly he left off using tobacco for about two months: the consequence of which was, that the toothache seized him, and has not left him a tooth, save some few double ones, that are more a trouble than a benefit to him.

For about these eight or nine years past, the different seasons of the year have had a visible effect upon his body; with regard to his strength or weakness; for, from the month of February to the end of May, his ability gradually decays; so that he is then very weak, and sometimes unable to walk.

From the end of May, to the end of September, he revives naturally with the warmth and heat of the season, so that he is then at the strongest, and continues tolerably so till the approach of spring. In cold weather he lies much in bed, and takes a glass of brandy twice or thrice a-day to warm his stomach. In warm days he walks out with a stick, and is not much bowed down.

Leadhills Graveyard

SACRED
To
The MEMORY of
ROBERT TAYLOR
who was during many years
an Overseer to
the
SCOTCH MINING COMPANY
at
LEADHILLS
and died May 6th
1791
in the 67th year of his age.
He is
Buried by the side of his Father
JOHN TAYLOR
who died in this place
at
the Remarkable age of
137 years.

Source: Findagrave.com
Added by Derek Moffat

His wife bore him nine children; whereof five are dead, and four living, at and about Leadhills.

In last October; 1766, he walked from his own house to Leadhills, a large computed mile; and having entertained his children and grandchildren in a public house, returned the same day on foot.

John is not yet, nor never was, a great sleeper. He always used a great deal of exercise, and when able to work, had always his hand in some work or other: and till within these few years he used to divert himself, white-the season answered, with fishing trouts with a rod.

The above was written in the end of 1766, or beginning of 1767. —What follows, was added in April 1770.

John is now in the 132d year of his age; and is so very weak, that he is close confined to bed, not being able to stand, or sit, or stir himself, but as he is helped, like a child. The faculties of his mind are also much impaired of late, as

well as those of his body, so that at some times he has little of judgement or memory left. His diet is much the same as above described, but generally must be fed by another hand, being so weakly that he is seldom able to do it himself.
* Mirk Monday happened A. D. 1652
Leadhills, April 24. 1770.
John Taylor's death at Leadhills was reported in The Scots Magazine of 1st May 1770.

2nd February 1771 (Newcastle Chronicle)
A very rich lead mine is discovered near Caldbeck, in Cumberland, said to be the property of the Earl of Egremont.

21st February 1771 (Stamford Mercury)
The rich copper mine now in full work in the Island of Anglesey, was discovered two years since by a Scotch Gentleman, versed in mines and minerals, who in traversing the mountainous part of the Island, after long continued rain, saw the master vein laid quite bare. The floods having washed away the upper strata of mould and rubbish discovered the courses for a considerable length.

23rd February 1771 (Newcastle Chronicle)
TO be Sold to the best Bidder, on Friday the 29th of March next, between the Hours of Four and Eight o'Clock in the Afternoon, at the Sign of the Blue Bell, in Alston, Cumberland, One Tenth Part or Share of a LEAD MINE, called and known by the Name of Old Blagill within two Miles of Alston aforesaid, and taken by Lease under the Hon. Commissioners of Greenwich Hospital, for the Term of 21 Years, and only three Years expired of the said Term, and in the last Year a large Quantity of Ore has been got, and has at this Time very good Ore In the Workings, and under a proper Plan for managing the said Work; the said Share is the Property of Mr Wm Ainsley of Alfton aforesaid; and any inclinable to purchase the said Share, may apply any Time before the Day of Sale to the said Wm Ainsley, and he will shew the said Mine, and treat about the same; to enter on the 5th Day of April; and Conditions will be produced against the Day of Sale for the Payment and Security of the said Share.
Also to be sold at the same Time, Three Eighth Parts or Shares of a LEAD MINE, called and known by the Name of Calvertfolds, in Tyne head, in the said Parish of Alston-Moor, and taken by Lease of Mr Gill, for the Term of 21 Years, and not one Year yet expired, and a large Quantity of Ore has already been raised. Conditions will be produced against the Day of Sale. Any inclinable to purchase the said Shares, may apply to Mess. Wm or George Ainsley, of Alston aforesaid, and they will shew the said Mine.
N. B. The Reason of the above said Shares being to sell, is Wm Ainsley being employed as Agent under the Hon. London Company, and will not be allowed to have any Share or Shares in Lead Mines so long as he continues Agent for the said Company.

23 March 1771 (Newcastle Chronicle)
TO be publicly Sold to the best Bidder, at the House of Mrs Ann Hetherington, known by the Sign of the Globe, in Alston, in the County of Cumberland, on Saturday the 20th Day of April next, between the Hours

of Two - and Four in the Afternoon, ALL that one-sixteenth Part or Share of certain LEAD MINES or VEINS of LEAD ORE, lying and being within and under the Manor or Lordship of Alston Moor in the said County of Cumberland, late belonging to Joseph Batty, of Nentsbury Greens, and commonly called Broomberry Lead Mine, held by Lease under the Commissioners Greenwich Hospital for the Term of twenty one years of which eighteen were to come on the 12th Day of March inst. And also, One Sixteenth Share of all UTENSILS and MATERIALS belonging to the said Lead Mine.

For particulars, in the meantime, enquire of Mr Adam Wilkinson, of Nentsbury, or Mr Wm. Westgarth of Coalcleugh; Assignees of the said Joseph Batty.

N. B, All Persons who stood indebted to the Estate of the said Joseph Batey, are required immediately to pay their respective Debts to the said Mr Wilkinson and Mr Westgarth, or they will be forthwith prosecuted.

27th May 1771 (Caledonian Mercury)

Sale of the Lease of the Lead-mines of Isla.

TO be SOLD by public voluntary Sale, in the Exchange Coffee-house in Edinburgh, on Wednesday the 7th day of August next, betwixt the hours of four and five afternoon.

The LEASE of all the MINES in the ISLAND of ISLA, which has 23 years to run from the 11th day of November next. —These Mines are already opened in eight different places distant a few miles from one another, seven of them containing veins of Lead, and one of them a Copper vein. —There are several Levels already finished, and one just now driving that leads to a vein of solid Lead-ore, about three feet thick, without any mixture of Sparr.

The Island of Isla is conveniently situated on the west of Scotland, has a fine natural harbour, called FREEPORT, in the neighbourhood of these mines, where the Ore can be shipped off at a small expense, as there is little or no land carriage, and the necessary materials for carrying on the works be received at the same small expense. —-What Lead-ore has been already raised from these Mines turns out extremely rich yielding about 50 per cent, in solid Silver.

The Lease with the Articles of Sale, and a Report of Engineers who viewed them in July 1770, may be seen in the hands of William Wemyss writer to the Signet, Edinburgh: and copies thereof in the hands of Charles Fergusson, Esq; and Co. at London, and Mess. Clifford and Co. at Amsterdam: —And any person who shall go to Isla to survey the works, will be shown the premises, and receive particular information of them, on applying to James Addison engineer there.

Mr Charles Freebairn architect will treat with any one intending to purchase previous to the day of sale.

24th June 1771 (Caledonian Mercury)

Sale of the Lease of the Mines of Isla.

TO be SOLD, within the Exchange coffee-house in Edinburgh, on Wednesday the 27th day of November next, betwixt the hours of four and seven o'clock afternoon, jointly or separately, as purchasers may incline,

FIVE-TWENTIETH SHARES of the LEASE of the MINES of ISLA, which have been carried on for several years to advantage, and have now a promising appearance in sundry places, particularly, in one level, which is carrying up towards a very capital vein, on a string leading to the said vein, which though drove only a few fathoms, has yielded upwards of 250 tuns of ore of excellent quality, and holds silver well worth the refining.

At same time, FIVE or SIX SHARES more will be disposed of, if purchasers incline.

The field is the most extensive in Britain, and appears to be thoroughly mineral, having been opened in numberless places, many miles distant from one another, having great advantages of levels, and rivers for machinery, when under level, with good roads to the different shipping places, which are safe and convenient, within three or four miles of the work.

The island of Isla is situated on the south-west coast of Scotland, near the Frith of Clyde, has several safe and convenient harbours, particularly in the Sound of Isla and Lochindale.

The lease, whereof twenty-two years are yet to run, with the articles of sale, and surveys made by Engineers, are to be seen in the hands of William Wemyss, Writer to the Signet, Edinburgh; and copies thereof are lodged with Mr. Charles Freebairn Architect, and James Addison, Overseer at the works; Messrs. Charles Fergusson and Company, London; and Mess. Clifford and Sons, Amsterdam; to any of whom such as intend to purchase, may apply for further particulars.

7th September 1771 (Newcastle Courant)

TO be Let, for a Term of Years, All the LEAD and COPPER MINES, or Veins of Lead and Copper Ore, lying and being within or under the Manor or Lordship of Melmerby, in the county of Cumberland; and also, a Blue SLATE QUARRY, belonging to Thomas Patterson, of Melmerby aforesaid, Esq. — Whoever chooses to take the said Mines or Quarry, or any of them, will be treated with at Melmerby-hall in the said county.

9th November 1771 (Newcastle Courant)

To Be Sold

At the house of George Aynsley, of the Blue Bell, in Aldstone, in Cumberland, on Saturday the 7th day of December next, between the hours of two and four o'clock in the afternoon of the same day.

A Leasehold MESSUAGE or DWELLING HOUSE, for the term of 999 years(few years of which are expired) with appurtenances thereunto belonging in good repair and condition, situate, standing, and being in Nenthead, in the parish of Aldstone, aforesaid, late belonging to Joseph Elliot, of Nenthead, aforesaid, Miner, deceased.—For further particulars, in the meantime, apply to Messrs. Lowes and Sparke, in Hexham, Northumberland.

Possible burial of Joseph Elliot of Nenthead, 14th July 1768.

18th April 1772 (Newcastle Courant)

To be SOLD to the highest Bidder

By the Assignees of George Wray, a Bankrupt, at the Golden Lion, in Hexham, on Friday the 1st day of May next, between the hours of two and four in the afternoon, subject to the conditions to be then exhibited.

ONE EIGHTH PART of the valuable LEAD MINE, called Windybrea, in the county of Northumberland, held by lease for twenty-one years, of which term about 14 years are unexpired. —Particulars may be had at Mr Cuthbert's Office, in Newcastle.

24th April 1772 (Derby Mercury)

THE Proprietors of LEAD-MINES and Miners, in the Wapentake of Wirksworth, are desir'd to meet at the House of William Lovett, at Matlock New Bath, on Wednesday the 13th of May next, at Eleven of the Clock in the Forenoon, to consider of proper Measures to be taken, for the Support of the mineral Customs in the said Wapentake.

TO be SOLD

A LEAD MINE, call'd Calver-mill Sough, in the Liberty of Calver, and County of Derby. —-Also a Fire Engine, and all the Materials belonging to the above Mine and Engine. Apply to Mr. Thomas Souther, or to Mr. Adam Dawson, of Wensley, in the County of Derby, who will treat for the same.

26th June 1772 (Derby Mercury)

To be Lett,

At the House of Mr. William Lovatt, being the New Bath at Matlock, on Friday the 24th Day of July next, upon such Terms as shall be then and there produced.

FULL Power and Authority to drive up a SOUGH from the Bottom of a Piece of Wood-Ground, within Cromford, in the County of Derby, called Birchwood, into and through the same; also, through the Lands, Commons and Waste Grounds within the Manor of Cromford aforesaid, to those well known, rich, and valuable Veins of Lead Ore, lying within the several Manors of Cromford, Wirksworth, and Middleton, in the said County; and to enjoy the said Sough to the Lessees sole use for any Number of Years.

This Sough will lay dry all the said Veins 18 Fathom lower than the present one call'd Cromford Sough, and consequently procure the Proprietors a great Composition from the Owners of the Mines already discovered, which for want of such Level cannot be further wrought. It will be brought' up much sooner, and at much less Expense at this Place than any other; and has this particular Advantage over any Sough hitherto begun or thought of, that it will not, like them, run parallel to the Veins, but a-cross them, and thereby enable the Proprietors, at a very small Expense, to make the earliest Discoveries of other Mines, and work them to their owe use and Benefit.

At the same Place a much deeper Level may be had with Ease, if Occasion shall require it, by a Wheel to be turn'd by the River Derwent.

4 July 1772 (Newcastle Chronicle)

TO be Sold to the best Bidder, on Saturday the 11th of July next, between the hours of Two and Five o' Clock in the Afternoon, at Mr Geo. Ainsley's, at Alston House, One Sixteenth Share of a Lease of all that valuable LEAD MINE, in Alston Moor, called Rodderup Cleugh, held under the Commissioners of Greenwich Hospital, for twenty one Years, near fifteen of which are unexpired. For further Particulars, enquire of Mr Jacob Vickers, at Stanhope; or Mr George Ainsley aforesaid.

8th August 1772 (Newcastle Courant)
Saturday se'nnight, as Mr Thomas Vipond, of Skides, was crossing the river Tyne near Aldston, the water being much out by the late rains, he was unfortunately drowned. *Buried at St John's, Garrigill 28th July 1772*

26th August 1772 (Caledonian Mercury)
We are informed, that the lease of Mr Riddle's lead and other mines on his estate of Ardnamurchan, is purchased by Alexander Edgar, Esq; and some wealthy merchants of Bristol. These mines though very promising, have been much neglected since the York Building Company failed; in their time they were wrought to great advantage.

26 September 1772 (Newcastle Chronicle)
TO be Sold to the best Bidder, on Saturday the 10th of October next, between the Hours of Two and Six in the Afternoon, at the House of Mr Thomas Walton, Innkeeper, in Aldston, all that valuable LEAD-MINE known by the Name of Goongill, situate within two Miles of Aldston aforesaid, now in the Possession of Mr Joseph Pigg, and Partners. Any Person or Persons inclinable to view the said Mine, may apply to Philip Harrop, at Foreshield, near Aldston; or to Mr Andrew Adamson, in the Town of Aldston, either of whom will shew the same.

It is confidently said, that a bill will be brought in to regulate companies which are not established by authority; that the partners shall not be liable to make good any losses that shall exceed their capital stock, which capital stock shall be annually declared in the public papers, so that everyone may know what credit to give them. This statutory law will be of great service in promoting of mining and other hazardous schemes as many people will cheerfully subscribe what they can spare, when they would not choose to run the risk of embarking their whole, or an uncertain part of their fortune, in pursuit of plans of trade, that at best are doubtful; at the fame, time they will take care that their capital stock is sufficient for all the purposes of their trade, or they may afterwards increase their stock, and advertise such addition to their capital. The public companies in France are said to be on this footing, and the partners not liable for more than their capital stock.

24 October 1772 (Newcastle Chronicle)
TO be sold to the best Bidder, at the House of Mr Gibson, the Golden Lion, in Hexham, on Tuesday the 17th Day of November next, betwixt the Hours of Ten and Twelve o'clock in the Forenoon, Seven Sixteenth SHARES of all the COPPER and LEAD MINES, known by the Name of Dryburn, near Aldstone, held by Lease under the Governors of Greenwich Hospital for twenty-one Years, seventeen of which are yet unexpired.
This Work has been carried on at a very great Expence in driving Levels, &c. to unwater the Mines; in which Proceedings several Veins of both Copper and Lead have been cut; and, upon the whole, this is looked upon to be the most likely Trial West of Tyne.
There is a Smith's Shop upon the Premises, As also every Convenience for washing Ore, &c.
Mr Ralph Bainbridge, at Aldstone, will shew the Premisses.

20th January 1773 Garrigill St John's Church Register
Samuel Willgoose, agent of the Lead Mines at Nenthead, was buried 20th January 1773
The will of Samuel Wilgoose (Perogative Court of Canterbury 1384 – 1858) gives information regarding his family.
He had three daughters and two sons alive at the time of making his will 10th July 1771. Ann who had married Joseph Heywood, 4th September 1764, at Pinxton, Derbyshire, Elizabeth who had married Arthur Wright, 11th September 1764, at Pinxton, Derbyshire, Margaret who had married John Chapman 18th July 1763.
Samuel leaves legacies for the children of his son, Thomas, as well as to his sons Thomas and Samuel.
At St John's Churchyard
Headstone

In Memory of Samuel Wilgoose of Nenthead
Who died 18th Day of January 1773 Aged 66 years.

19 June 1773 (Newcastle Chronicle)
TO be Sold to the highest Bidder, at Mr John Waugh's at Aldstone, on Saturday the 26th inst. between the Hours of Two and Four in the Afternoon, One-sixteenth Share of that valuable LEAD MINE, called Rotherhope Cleugh. For further Particulars, enquire of Mr John Waugh, at Aldstone aforesaid**.**

21 August 1773 (Newcastle Chronicle)
LEAD MINES
TO be Let, for the Term of 25 Years.
A Vein of LEAD ORE, called Woodmar Well, situate in Priorsdale, in the County of Cumberland: As also several other Veins, lying in a Tract of Land North of Stoney Cleugh, towards Nenthead. Any Persons inclinable to take

any of the said Veins, may apply to Evan Emerson, at Temple Sowerby; Mr Adam Wilkinson, at Nentsberry; or Mr Jos. Dickinson, at Lovelady Shield.

4th September 1773 (Newcastle Chronicle)

TO be Let, The Mines of LEAD and COPPER, in the Manor of Knaresdale. —Any Person desirous of taking any one of the Veins there, may apply to Thomas James, of Penrith, who will treat about the same. And to encourage Adventurers, a low Duty will be accepted.

18 September 1773 (Newcastle Chronicle)

To be Sold, on Saturday the ninth Day of October next, at the House of Mr John Bell, Innkeeper in Alston, Cumberland, The LEAD MINE, called and known by the Name or Cashburn, lying and being in Alston Moor, and held by Lease under the Right Hon. the Governors of Greenwich Hospital, for the Term of twenty-one Years, of which fifteen Years are yet unexpired. — A large Quantity of exceeding good Ore has been got at the Mine, and a good Prospect of future Success; every Thing necessary to work the said Mine to Advantage being almost completed. Any Person or Persons inclinable to purchase, may hear farther Particulars, by applying to Mr Wm Slack, at Alston aforesaid, who will shew the premises.

12th November 1773 (Derby Mercury)

LOT. 11th. One Twenty-Fourth Part or Share, in another Lead Mine, called WATER LANE GROVE.
LOT. 12th. One Twenty-Fourth Part or Share, in another Lead Mine, called DAVIS's.
Such of the above Lead Mines, as lie in the King's Field, are tenable as long as the Company who are in possession thereof shall think proper to continue them, subject to the customary Rents of Mines in the county of Derby; and such of the Mines as lie in the property of Individuals, are held by Leases from the Owners of the lands wherein the same lie, for long terms of ears, which will be particularised in the conditions of sale.
Most of the eight last mentioned Lots are profitable to the proprietors thereof, and are likely to turn out to great advantage upon the finishing of the several Levels and Works, which are now carrying on for the draining and pursuing the Ore therein.
The first Lot will be offered to sale exactly at Three o'clock, and the other Lots will be put up successively, in the course above set forth.
For further particulars application may be made to Mr Glover, Mr Roe, or Mr Peter Wright, in Macclesfield, in the county of Chester; Mr John Dantry, of Leek, in the county of Stafford; Messrs. Barkers and Wilkinson, at Chesterfield in the said county of Derby; or Mr Wright, Attorney, in Manchester, in the county of Lancaster.

21st June 1774 (Leeds Intelligence)

To be SOLD,

At the House of Lodge Calvert, Innholder of Starbottan, near Kettlewell in Craven, in the County of York, on Monday the Fourth Day of July next, pursuant to such Conditions as shall be then and there produced.

ALL that FREEHOLD ESTATE, late Part of the Estate of Mr James Jackson, situate in Starbottan aforesaid, and consisting of four inclosed Closes of rich, Arable or Meadow Ground, and two Dales of Land in the Open Fields; also of the following Beast-Gates and Sheep-Gates, upon the stinted Pastures belonging Starbottan aforesaid, hereinafter mentioned, that is to say, eight Beast-Gates upon Cam, Forty-two Sheep-Gates on Knucklebone, and ten Beast-Gates, or forty Sheep-Gates on the Outmoor.

The said Premises are now let at Will, at upwards of £22 per Annum, and are capable to be let for a Term of Years at that Rent or upwards; are subject to a Lord's Rent of 8s. per Annum, and pay a Modus of 1s. per Annum in Lieu of Hay Tythe; may he so proportioned in Point of Value, as to accommodate a Purchaser or Purchasers with Queen Ann's Bounty Money (or any other pious Donations). By the Governors of which Bounty, or their Solicitor, the Title has already been approved upon another Occasion.

At the same Time and Place will also be fold by Auction,
A valuable LEAD ORE MINE, consisting of ten Meers of Ground Square, and situate on a Place or Pasture called Hunterfleets, in Coverdale, in the said County of York, with the Shafts, Tools, &c, &c. thereto belonging, all in a working Condition.
Also, One Fourth Part or Share of another valuable LEAD MINE, situate on the same Pasture, at a Place there called Stone-Gill, consisting of ten other Meers of Ground, Square.

Also, One Twelfth Part of another LEAD MINE, at Starbottan aforesaid, called Old Cam Forefield.
The two first mentioned Lead Mines are held under Grant, from the Rev. Dr. Marton, of Lancaster, and are subject to a ninth Part of the Lead Ore got thereout, to be paid to him for working the same.
The other Lead Mine is held under Grant, from his Grace the Duke of Devonshire, and is subject to pay a fifth Part of the Lead Ore got thereout, as a Duty for working the same.

Further Particulars may be had by enquiring at Mr Alcock's Office, in Skipton, Yorkshire or of Mr Law. Simondson, of Starbottan; who, or the Tenant, will shew the Estate; and who, or Mr Joseph Airey, of Starbottan aforesaid, will shew the said Mines.

23rd July 1774 (Newcastle Chronicle)

5th November 1774 (Newcastle Courant)
Married
Last week, at the Quaker's Meeting-house at Newbiggin, in Derwent, Mr Thomas Reay, an eminent Merchant at Aldstone, to the much esteemed Miss Elizabeth Smith, of Blanchland.

10th December 1774 (Newcastle Chronicle)
LITERARY ARTICLES
THE LEAD MINER'S Complaints

The trees all their verdure have lost,
Scarce a leaf to be seen in the spray;
The rivulets are buoyed up with frost,
Obstructing the stream in its way.
The valleys are covered with snow,
Unsullied now Crossfell appears,
The icicles brilliantly show,
If Sol do but faintly appear.
The Miner's tho' hardy and brave,
Are benumbed with the chilness of air,
As from their subterranean cave,
They to their own lodging repair.

But the washers of ore, as to them,
Their fate is undoubtedly worse
Their water's all froze in the dam,
Retarding its bubbling course.

Ye rich, who live splendid and gay,
And each day deliciously dine;
Reflect on the labours, I pray,
Of those that work hard at the mine.

Aldistone, Nov. 26, 1774

17th March 1775 (Derby Mercury)
Joshua Roose and John Woodhouse, being indicted for the wilful murder of Thomas Mather, by lighting a fire in a lead mine near Wirksworth, with an intention to drive out the people at work in a mine adjoining, belonging to another company, (after communication had been opened betwixt them) and thereby suffocating him the said Thomas Mather, were after a trial which lasted five hours, convicted of Manslaughter, and branded in the left hand; and for their correction, ordered to continue in gaol six months.

17th June 1775 (Newcastle Chronicle)

Probate of William Westgarth 30th June 1810
National Archives' Reference IR26/433/431

12th October 1776 ((Cumberland Pacquet, and Ware's Whitehaven Advertiser))
Monday Se'ennight, a melancholy accident happened at Nenthead Lead Mines, in this county. A girl belonging to Mr Isaac Scollick aged about 10 years of age, fell down a Whim-Gee shaft 40 fathoms deep; what heightened the distress of this catastrophe was, that her parents were both within a few yards of the place,

and saw her fall.—The body was immediately drawn up, bruised in a manner too shocking to relate.

2 November 1776 (Newcastle Chronicle)

The respective lots will be shewn by the tenants residing upon the same respectively, save the estate in the manor Brough, which will be shewn by Mr Stephen Cleasby of Cragg House, near Brough aforesaid.
The several Creditors of the said Adam Wilkinson, are desired to send account their respective debts, and also the nature of their securities, to James Liddell, of the town and county Newcastle upon Tyne, Merchant, (one of the Trustees in whom the estates and other the effects of the said Adam Wilkinson are vested for the payment his debts) or to Mr John Donkin, of Sandoe, (Steward to Henry Errington, Esq; the joint Trustee with the James Liddell) on or before the 21st day of July next. *And also to be SOLD to the highest Bidder, on Thursday the 29th day of July instant, between the hours two and five in the afternoon, at the house of the said Mr James Robinson,*
All the several Parts and Shares of Lead Mines belonging to the said Adam Wilkinson.-—Particulars in the meantime may be had upon application the said Mr Liddell or Mr John Donkin: And on the two following days will be SOLD by the same mode of Sale. All the other Personal Estate of the said Adam Wilkinson.

7th August 1779 (Newcastle Courant)

To be LET and entered upon the 12th day of May next.

The several Farms late belonging to Adam Wilkinson of Nentsbury, in the county of Cumberland, Gentleman, (viz.) Wydon Eales in the parish of Haltwhistle, Hole-house in the parish of Knaresdale, Nether Esh Gill, Upper and Lower Nentsbury, and part of Nenthead, in the parish of Aldstone; and also a farm within the manor of Brough, in Westmorland. —For further particulars respecting the Farms called Wydon Eales, and Hole-house, enquire of Mr Donkin of Sandoe, who is appointed to let the same, and the respective tenants who are resident upon these two Farms will shew them. —For further particulars respecting the other Farms, enquire of Mr Robert Hodgson, of Aldstone, who is appointed to shew and let the same.

8th January 1780 (Newcastle Chronicle)

Friday night, about twelve o'clock, J. Rickerson, Esq; of Randalholm, set out on a matrimonial jaunt to Gretna Green, with the amiable Miss Jenny Wilkinson, of Nentsberry, near Aldston. No frigid clime or season can impede the rapid marches of the *God of Love*.

Jane daughter of Adam Wilkinson of Nenthead baptised 8th September 1762, married William Randall Featherstonehaugh Richardson Randall 13th June 1780, at St Augustine's, Alston. (Was this their 'official' marriage?)

In Garrigill Church Yard:

IN MEMORY OF
Adam Wilkinson of Nentsbury
Who died 10th January 1790, aged 70 years.
Also of Elizabeth his wife who died 10th April
1810 aged 87 years
Also of Hannah his daughter who died 10th July
1789 aged 30 (or 50) years
And Mary his daughter died 10th July
1817 aged 63 (or 65) years

29th April 1780 (Newcastle Chronicle)

LEAD MINES

TO be Let, for a Term of 21 Years, All the VEINS already cut in Littlegillhead Level, with all the veins which shall hereafter be discovered in the further prosecution of the said Level; and likewise all the Rest of the unwrought Veins, in Eshgill Liberty, situated in Priorsdale, in the parish of Alston, and county of Cumberland.

For particulars, enquire of Mr Evan Emerson, at Temple Sowerby; Mr Joseph Dickinson, at Lovelady Shield; or Mr Robert Hodgson, at Aldston.

22nd July 1780 (Newcastle Courant)

To be SOLD

SEVERAL Parcels of OAK WOOD belonging to the commissioners and Governors of Greenwich Hospital, now cut in the Barony of Langley, and in Coastley Highwood, Hexhamshire, Wooley, Dilston, Newtonhall, Whittle, and Newlands Woods; also, several Parcels of Oak Bark in Langley Barony, and at Dilston, Newtonhall, Whittle, and Newlands. —All persons who may be desirous of purchasing all or any part of the Wood or Bark, are requested to deliver their proposals in writing to Messrs Walton and Turner, at the Golden Lion, in Hexham, on Tuesday the first day of Next month, between the hours of eleven in the morning and fur in the afternoon. For particulars apply to Mr Nicholas Thornton, at Millhills, near Haydon Bridge; Mr George Sample, at Longhope, near Hexham; Mr John Jobling, at Newtonhall; and Mr John Surtees, at Ebchester.

The wood at Wooley is fit for shipbuilding, that at Whittle for Boat Builders, and all the rest well situated and fit for Lead Mines. —There is a small parcel of Ash to be sold at Newlands.

5th August 1780 (Newcastle Courant)

TO be Sold in public Sale, on Wednesday the 30th Day of August 1780, at the House of Mr Nathaniel Yeats, in Alston, in the County of Cumberland, by the Trustees and Executors of Thomas Armstrong, late of Haltwhistle Fell End, in the County of Northumberland, deceased, One-Eighth SHARE of BROWNLEYHILL LEAD MINE, in Alston-Moor; together with One-Eighth Share of all Work Tools, and other Materials belonging thereto. The Time for Payment of the Money and other Conditions will be fixed upon the Day of Sale; and any Time previous thereto, the Mine Tools and Materials may be seen. And the Creditors of the said Thomas Armstrong are desired to meet the said Trustees at the Crown, in Haltwhistle, on Thursday the 31st of August 1780, to inspect and examine the Accounts of the said Trustees.

24th November 1780 (Derby Mercury)

To be Sold

ALL the LEAD MINES belonging to the Company of Mines Royal, &c. being within the Liberties of Wensley and Matlock, Wapentake of Wirksworth, and County of Derby, known and called by the Names of Dealfield, Holewood Pipe, Old Tearfall, Wood's Pipe, Barber's Calamine Holes, and Old Ash.— Likewise the Materials at the "said Mines, such as Horse Engines, Gear Barrels, Wind-Trunks, Washing Fats, &c. &c. Apply to THOMAS LEAN of Bonsall, in the said County, who will treat for the same.

18th May 1781 (Derby Mercury)

On Thursday, last two Persons were unfortunately killed by the Damp in a Lead Mine at Wirksworth in this County. -—This melancholy Affair was nearly as follow, viz. A Man going down at Four in the Afternoon, found the Person dead whom he was then going to relieve from his Work, upon this he returned and acquainted the Neighbours, and six other Men went down with an intention of bringing up the Deceased, but were also overtaken by the Damp, and were obliged to retreat as fast as possible, and notwithstanding their precipitate Flight, the first Man, being much weaker than the rest, was not able to support himself, and is said to have fallen at least twenty Fathoms-—The other five were drawn to the Top with much Difficulty, but were so much hurt by the Damp, that it was some Time before they recovered.—-This Disaster is said to have been occasioned by the Smoke of a Lime Kiln, which was drawn by the Air into the Shaft.

9 June 1781 (Newcastle Chronicle)

WHEREAS at a Meeting of the Receivers and other Agents of Greenwich Hospital, and of the Stewards and Agents of many of the Lead Mines within Alston Moor, and several others, the principal Inhabitants of this Parish to take into Confederation the great Evils, Misfortunes, and mischief which lately have happened in this Neighbourhood by reason of the great number of Dogs kept by the Workmen employed in the said Lead Mines; and others for the killing and destroying of Game: It was resolved, That if any Lead Ore Miner employed in the said Mines shall presume, after the 24th Day of June next, to have, keep, or use, either for himself or others, or to have in the possession of others, for his use, any Greyhound, Hound, Spaniel, or other Dog, for the Destruction of Game; or shall, from the Date hereof, presume to go upon the Moor within this Manor, or the Moors adjacent thereto, to break, train, or exercise any Dogs under the Description aforesaid, all and every such Lead Ore Miners offending herein, shalt not be employed again, after the Expiration of their then Bargain, in any of the Lead Mines aforesaid. And the said Lead Ore Miners are hereby required to take Notice, that from and after the said 24th Day of June, it will be made a Condition in the letting of every Bargain to be wrought in any of the said Mines, that if they shall be found to offend as above-mentioned, their Bargains shall, from the time of the Offence committed, be null and void. And all and every other Person and Persons not employed in any of the said Lead Mines, and who are not qualified by the Laws of the kingdom to kill Game, are hereby required to take Notice, that if they shall, from and after the said 24th Day of June, have, keep, or use, either for themselves or others, any Dogs under the Description aforesaid; or from the Date hereof break, train, or exercise them in Manner afore said, such persons offending will be prosecuted for the doing thereof with the utmost Rigour of the Law, a subscription for that purpose being agreed upon and entered into.

N.B. Any Person or Persons who will give Information to any of the Stewards or Agents of the said Lead Mines, of any Persons offending as above stated, will meet with every due Encouragement, and be thankfully rewarded.

(This will be no more advertised)

22nd January 1782 (Cumberland Pacquet and Ware's Advertiser)

COPPER MINES

To be Let on Lease, all the Copper Mines in the Manor of Tilberthwaite, in the County of Lancaster, belonging to John Pennington, Esq. Several veins of which have been lately opened, and produced valuable Copper Ore, and from every Appearance is very promising. —And also the SLATE QUARRIES in the Manor of Little Langdale, in the county of Westmorland.

N.B. Any Person or Persons who choose to Rent the same, may apply to Mr Atkinson of Muncaster-House, where proposals of Letting may be seen; and he will treat with any inclinable to Lease the same.

9th February 1782 (Newcastle Chronicle)

TO be Sold to the best Bidder on Friday the 1st March 1782, at the House of Mr Adam Wilkinson at Nentsberry, in Aldston Moor, HALF of the REMAINDER of a LEASE, bearing Date March 25, 1779, for 21 years, of a very valuable and promising LEADMINE, known by the name of Littlegill, situate in Aldston Moor, now in the possession of the Executors of Matthew Watson, late of Northgate.

Joshua Myers will shew the Premises. —The sale to begin exactly at Two o'clock in the afternoon.

27th April 1782 (Newcastle Chronicle)

FIRE ENGINE

TO be Sold, All the MATERIALS of one of the completest Fire Engines in the North of England, built in the Year 1776, for the Copper Mines at Middleton Tyas, near Richmond, in the County of York, all the Iron Work whereof was made at Carron;

The principal Articles consist of

A bored CYLINDER, with Bottom, 10 Feet 4 Inches long, 61 Inches Diameter, and weight upwards of 5 Tons.

The BOILER is composed of 13 Pieces of rolled Iron Plates, and weight upwards of 6 Tons, exclusive of a strong Lead Cover.

A bored WORKING BARREL, 11 Feet long and 21 inches Diameter. —-Another and Suction, 10 Feet, with another of the same Length.

The MAIN PUMPS, of which there are two Sets, vis. one of Cast Iron 9 Feet long and 22 inches Diameters, with a Door to change Buckets.

Another PUMP, 7 Feet 4 Inches long and 17¾ Inches Diameter, with a Clack Frame and Door.

Another BOTTOM PUMP, with Snore Holes, 7 Feet 4 inches long, 17¾ Inches Diameter. Wood Pumps of various dimensions.

Two FRUSTUMS of CONES for turning Iron Hoops upon.

Two WHEELS of CAST IRON, one 12 Feet, and the other 10 Feet Diameter, with Chains fixed to the Beam for working Pumps by Sliders, at Shafts, 38 Yards from the Engine Shaft.

The REGULATING BEAM is 4 Feet square, composed of 16 Pieces of Fir Timber, combined together with Screw Bolts, 26 Feet long, with Martingales, Chains, &c.

And every other Article and Utensil belonging to a Fire Engine.

Printed Particulars of every minute Article may be had on Application to Mr George Allan, at Darlington; Mr Hutton Perkins, at Barnard castle; Mr John

Gordon, at Forcett; or of Mr Christopher Charge, at Middleton Tyas, who will shew all the Premises.
N.B. Middleton Tyas is 18 Miles from the Port of Stockton, from whence any of the above Materials may be sent by Water to any Part of the Kingdom.

15th June 1782 (Newcastle Chronicle)

Lead, Copper, Iron, and Coal Mines, Woods, Kelp, Shores, &c.

TO Let for Term of entered upon immediately, All any Parts of the MINES in the Baronies of Ardnamorchan said Sunart, those hitherto wrought arc commonly known by the Name of the Strontian Lead Mines, situated within three Miles of the Head of Loch Sunart (a navigable Arm of the Sea. wherein any Number of Ships of the largest Size may ride Anchor with Safety) in the County of Argyle. They were formerly wrought by the Duke of Norfolk's Company, afterwards by the York-building Company, with great Success, and since by other Companies; at present they are wrought by the Proprietor, the Lease having come into his Hands lately by Accident. The Appearances of Ore are deemed by judges to be flattering; who also are of Opinion, that if a Level drove for 300 Fathoms to flank the principal Vein, (which is tractable for upwards of fifteen Miles in Length in Sunart) and another of 900 Fathoms, drove upon the same Vein, these Works may be carried on several Hundred Years without any other levels. There is Plenty of Fuel for smelting the Ore, and Provisions most kinds are to be found upon the Estate; the Inhabitants are uncommonly civilized and attentive to Strangers, among whom any Number of Pickmen and Labourers may be got or trained at very reasonable Wages. N. B. There is now above 100 tons of Lead at Strontian for Sale; its Quality is well known many Places,- particularly at Bristol and Glasgow, where Quantities of it may be now seen. …
Also the LEAD MINES in the Lands of Torobols, in the Island of Illa, contiguous to Shawfields Mines, and to Navigation. …
For particulars apply to Sir James Riddell, Bart. at his House in Stradford-Place, London, the Proprietor; to David Erskine, Esq; Edinburgh; to Mr Thomas Gibson, Newcastle; or to the Agents or Tenants upon the several premises.

1st July 1782 (Caledonian Mercury)

ISLAY MINES.

TO be LET in tack, for such number of years, and on such terms as can be agreed upon. The WHOLE MINES in the Island of Islay, belonging ta Mr Campbell of Shawfield. These mines discover themselves at surface in many different places of the Island. They were opened and wrought by Mr Freebairn the late tacksman in nine different places. Eight of the veins carried lead only, and the other a mixture of lead and copper ore.
The veins are in general from two to three feet wide of solid lead and brangled ore; and according to the assays made in Scotland, give from 16 to 32 ounces of silver per ton; but from assays made in London yield to the amount 48 ounces. One of these vein runs in some paces nine feet wide, carrying three ribs of ore; each of them four inches solid, besides small strings and brangled ore intermixed.
The works need no timber, and in general have not much water when, at the depth of 20 or 30 fathoms. Levels are already made in different places; and

the report of an experienced miner who lately surveyed them, concludes thus: "Upon the whole these mines already discovered shew that if the levels were carried up and engines properly placed to take the benefit of the water that offers to work them, they would become profitable and lasting."

There will be also let to the person who takes the mines, a FARM in their neighbourhood, consisting of between four and five hundred acres, with a convenient stead of offices lately built.

The Island of Islay is peculiarly situated for working its minerals to advantage, being the Southern most of all the Western Islands, and within two days sail of Liverpool, and many other places of market. The veins already opened are also within less than three measured miles of a fine natural harbour in the Island called Freeport, where a smelting house, dwelling house, and set of offices have been created, and will be likewise set in lease to the person who takes the mines.

For further particulars apply to John Spottiswood, solicitor at law, London, Isaac Grant, writer to the Signet, Edinburgh, or James Addison, late overseer of the above mines, presently residing at the house of Mess. Hugle, MacDougal, and Company, Queen-street, Glasgow.

2nd July 1782 (Manchester Mercury)

BLACK LEAD PENCIL MANUFACTORY,

At WORSLEY, near MANCHESTER.

J. GILBERT and Co.

Respectfully acquaint the PUBLIC,

THAT they now make that valuable Article, and that they will use their utmost Endeavours to retrieve the Reputation of them, which has been so much injured by Persons who have imposed on the Public by Selling Pencils of little or no Value. This Imposition has prevented much the Sale of good Lead, which is a Disappointment to the Public, and a great Loss to the Proprietors of the Black Lead Mine, of which J. Gilbert has a Share, and has induced him to begin this Manufactory, in which the Public may be assured; none but the best Lead will be used.

As the Manufactory is so far situated from the Metropolis, J. Gilbert and Co. for the Convenience of their Customers have appointed them to be sold (Wholesale only) by William Champante No. 4, Minories, London, from whom they maybe had on the same Terms, as from J. Gilbert and Co. and may be assured of having the best Sorts at the shortest Notice and lowest Prices, which are fixed according to the Length of Lead in them.

N. B. All our Pencils are marked "J. G. Worsley."

20th July 1782 (Newcastle Courant)

A Correspondent writes from North Shields that last Saturday Afternoon, he, in Company with a friend took a Trip to Marsden Rocks, to view, as he had several times done some Years ago, the large and spacious Caverns, with other romantic and entertaining Scenes of Nature, which are to be met with upon the Sea Coast there; and what gave them additional Pleasure, being quite new, was an interview with an old Man, seemingly near 80 Years of Age, who told them that, in the earliest Part of his Life he was a Miner in the Lead-mines at Allen-heads, had for some years past lived at South Shields; but, to avoid the Charge of house rent, he and his Wife formed a resolution to make one of the Caves

under these Rocks the Place of their Residence which, the Beginning of this Summer they accordingly did, and have furnished that in which they reside with two beds, Tables, Chairs, a convenient Fire-place, Furnace, &c. The romantic Situation of the Place, and Singularity of the Thing, has drawn a great Number of People to visit him, whom he accommodated with hung Beef, Tea, &c. our Correspondent and Friend were refreshing themselves in the Cave, a Carriage arrived with two Gentlemen and Ladies, attended by their Footman, for whom he provided some tea.

10th September 1782 (Cumberland Pacquet and Ware's Advertiser)

LEAD MINES to LET

SEVERAL whole and entire unwrought Veins of Lead Ore within the Manor of Dufton, in the county of Westmorland, called by the Names of MELDON, or the BACKSIDE of DUFTON FELL; many of these Veins have been proved to be rich and profitable in the Earl of Darlington's Manor of Middleton in Teesdale, and necessarily bear by their course through this Liberty, the Mineral Strata appear to be in great Perfection, setting forth an encouraging prospect to the skilful Miner from his judicious trials.

Any Person inclinable to take all or any Part of the same, may apply to Edward Milward, Esq. the Owner, and Lord of the Manor of Dufton, who will treat with and grant all reasonable and desirable Terms to any spirited Adventurers within his Liberty.

14th September 1782 (Newcastle Courant)

LEAD MINES to LET.

Several whole and entire unwrought Veins of Lead Ore within the Manor of Dufton, in the county Westmoreland, called by the names of Meldon, on the back side of Dutton Fell; many of these Veins have been proved to be rich and profitable in the Earl of Darlington's Manor of Middleton in Teasdale, and necessarily bear by their course though this liberty; the Mineral Strata appear to be in great perfection, setting forth an encouraging prospect to the skilful Miner from his judicious trials.

Any person inclinable to take all or any part of the same, may apply to Edward Milward, Esq; the Owner, and Lord of the Manor of Dufton, who will treat with and grant all reasonable and desirable terms to any spirited Adventurers within his liberty

28th December 1782 (Newcastle Courant)

6th May 1783 (Cumberland Pacquet, and Ware's Whitehaven Advertiser)
Deaths
At Aldstone, in the 79th year of his age, Mr. Jonathan Hilton, one of the Moor Masters of that place.
Jonathan Hilton was buried 28th April 1873, in St. Augustine's Churchyard. See "Alston Moor Its Pastoral People its Mines and Miners" by William Wallace pages 124-126; reprint 1986.

12th June 1783 (Derby Mercury)

LEAD MINES.

Seven Twenty Fourths Shares or Parts of a certain Groove or Lead Mine, called or known by the Name of Ringing and Raddle Hole Rakes, Six Twenty Fourths Shares or Parts of a Lead Mine, known by the Name of the Dimple Groove, One Twenty Fourth Share or Part of a Lead Mine, known by the Name of the Side Groove. The above Mines or Grooves, are situate near the Turnpike Road leading from Matlock to Buxton, one Mile or thereabouts from Matlock Bath. Six 24ths Shares or Parts of a Mine, known by the Name of Whalfe Mine. Six Twenty Fourths Shares or Parts of a Mine, known by the Name of Crymbow Mine.

These Mines or Grooves are situate one Mile from Monyash, in the Hundred of High-Peak, and County of Derby.

For Particulars apply to Miss GOODWIN at Monyash; or Mr. GEORGE GOODWIN at the Spa, Derby. 11th June, 1783.

13th November 1783 (Derby Mercury)

To be SOLD by Public Auction

On Tuesday the 30th of December Inst. betwixt the Hours of Twelve and Four o'clock in the Afternoon, at the Angel Inn in Winster;

ALL that LEAD MINE and Branch of a Sough, called Davis Mine and Sough, being within the Liberty of Wensley, and Hundred of Low Peak.

The Sough is completed up to the Forefield of the said Mine or Vein within a few Fathoms, and with the Advantage of Twenty Fathoms deeper than the Upper-bearing Stratums, betwixt which and the Sough, are two others totally untouched, near two Hundred Yards behind the present Forefield; which from the ancient Time these were in Workmanship, the Unskilfulness of the Miner, and the Necessity of a Sough or Drain, which is so far completed at a very great Expence and Time, the deep and valuable Part were rendered impregnable, being over-powered with Water.—It appears in the Books or Accounts of a King's Officer, called a Bar-Master, (late Mr. Abel of Wensley, where, in his Son's Hands, the same are to be seen) whose Office in Part, were to keep in his respective Liberty, Accounts of all Ore raised or got therein, which being the Custom to be done by Measure, were upwards of Twenty-five Thousand Loads, which at this Time sell at Two Guineas per Load, and the Expence thereof were estimated by a very respectable Miner not to exceed Twelve Shillings,

The Reason of this Publication, is on Account of the present Proprietor being at too great a Distance from the Work.

27th January 1785 (Derby Mercury)

THE additional Tax or Duty of One Guinea per Fodder or Ton, laid upon Lead exported, by an Act of the last Session of Parliament, and which took place on the 20th of September last, having been found to operate to the great Disadvantage of the Persons concerned in Lead and Lead Mines in this Kingdom, by enabling Foreigners to bring their Lead to Market at a lower Price than English Lead can be afforded.

A MEETING of the Principal Miners and Maintainers of Mines in this County, is appointed to be held at Mr. MASON's, at MATLOCK BATH, on FRIDAY the 11th Day of FEBRUARY next, at Eleven in the Morning, to take into Consideration the Means of obtaining a Repeal of the said Tax or Duty,

By Order,

ANTH. LAX MAYNARD.

Chesterfield, 31st January, 1785.

17th February 1785 (Derby Mercury)

TAX upon LEAD. DERBYSHIRE.

AT a Meeting of the principal Miners and Maintainers of Mines in the County of Derby, held at Matlock Bath in the said County, this 11th Day of February, 1785, pursuant to Advertisements in the Derby News Paper, for the Purpose of taking into Consideration the Means of obtaining a Repeal of the Tax or Duty laid upon Lead exported from Great- Britain, by an Act of the last Session of Parliament.

PHILIP GELL, Esq. in the Chair.

Resolved unanimously, That the Tax or Duty of £1 1s. per Fodder or Ton, and the additional Import or Duty of £5. per Cent, and £5. per Cent, thereon, laid upon Lead exported from Great-Britain, by an Act of the last Session of Parliament, is a very burthensome, partial, and oppressive Tax, as it falls entirely upon the Mine Adventurers, who are a few Individuals, and not upon the Public at large.

Resolved, That it is the Opinion of this Meeting, that if the said Tax or Duty should be continued, German and other Lead will be brought to Foreign Markets at a Price which English Lead cannot be afforded at, from the great Expence that now attends the working of Lead Mines in England, and the general Poorness of such Mines; and that the foreign Trade for Lead will thereby in a great Measure be lost to this Country.

Resolved, That the Right Honourable Lord George Cavendish, and Edward Miller Mundy, Esq; the Representatives in Parliament tor this County, be immediately applied to & requested to confer with the Members of other Counties, in which are Lead Mines, in Order that the most effectual Means may be taken to obtain a Repeal of the said Tax or Duty.

Resolved, That the before-mentioned Resolutions be signed by the Chairman, and published in the Derby, York, and London News-Papers. P. GELL, Chairman.

22nd February 1785 (Cumberland Paquet)

Whereas there have been lately Stolen from Dufton Smelt mill, in the county of Westmorland, five pigs of Lead, marked E.M.D. the property of Edward Milward Esq. of Dufton Hall, in the said county: Any person who can give information respecting the same, so as the Offender, or Offenders, may be brought to

Justice, shall, upon their conviction, receive a Reward of Ten Guineas, from the said Edward Milward, Esq., or Mr Jebs Smith, of Dufton, aforesaid.

1st March 1785 (Leeds Intelligencer)

Lead Mines.

To be SOLD by AUCTION,

At the House- of Mr. William Hartley, in Grassington, in the County of York, on Friday the 18th Day. of March Inst. between the Hours of Four and Six o'Clock in the Afternoon, TWO-SEVENTH PARTS of a certain LEAD MINE, called BLACKRIGG, situate on the. High-end of. Knaresbro' Forest, near Greenhow-Hill, the Property of the Assignees of James Collins.

Also, All the said Assignees Share and Interest of, in and to another LEAD MINE, called BUCKDEN GAVEL Lead Mine, near Kettlewell in the said County.

12th October 1785 (Cumberland Pacquet and Ware's Advertiser)

COWPER'S BANKRUPCY

NOTICE is Hereby Given, that a Meeting of the Creditors of THOMAS COWPER, of Dufton, in the county of Westmorland, a Bankrupt, will be held at the King's Head in Appleby, on SATURDAY the 15th October next, 1785, at Two o'clock in the Afternoon; to take into their consideration, how to recover sundry Debts, due to the said Bankrupt, and other Special Affairs.

Also to be SOLD the same Evening

At the King's Head in Appleby aforesaid

A valuable LEAD MINE upon Dufton Fell, at a place called White Rake and Clover Dock, in the county of Westmorland, nearly one year of the Lease of which is unexpired.

Also will be SOLD at the same Time

A valuable COLLIERY, situate at Meldon, upon Dufton Fell aforesaid. Upwards of six years of the Lease are unexpired.

The Particulars relative to the Sale of the Lead Mine and Colliery will be made known at the Time of Sale, or in the mean Time, by applying to Sir George Atkinson, Assignee to the Estate and Estates of the said Thomas Cowper.

29th October 1785 (Newcastle Courant)

COUNTY of DURHAM.

A MURDER

Escaped from the custody of the Constables of the Forest, in Weardale, in the parish of Stanhope, in this county, one GEORGE PEART, late of Burtry Ford, in the same parish, Miner, who is charged before one of his Majesty's Justices of the Peace for the said county, with having killed one JAMES STEPHENSON in the night of the 21st instant, near the house of William Lowes, of Heathery Cleugh, in the said parish of Stanhope.

The said George Peart is about twenty-five years of age, six feet four inches high, remarkably (strong, and well made, and lowers in his walk, is of a sullen countenance, has a tear or cut upon his right cheek, just under the eye, wears his own light brown hair, which hangs' loose about his neck; had on when he escaped, a round hat, an olive coloured sustian jacket, a striped waistcoat, and dark olive coloured velveret breeches; was born at Rush, near Saint John's Chapel, in Weardale, and speaks the dialect of the place; it is supposed he is

gone towards Alston Moor, or some other part of Cumberland, probably with an intent to get employment in the Lead Mines there, in which business he has been brought up.
Apprehend and secure the said George Peart, and give information to Robert Curry, of Bishop Oak, in the said county of Durham, Esquire, one of his Majesty's Justices of the Peace for the same county.
27th October 1785. By Order, Geo. Pearson, Clerk of the Peace.

4th February 1786 (Newcastle Courant)

LEAD STOLEN

Whereas FOUR PIECES or PIGS of LEAD, the Property of the Commissioners and Governors of the Royal Hospital for Seamen at Greenwich, marked at each end G H—L—1785, were, between Tuesday morning the 17th, and Thursday morning the 19th of last month, stolen from near Summer Rods Bar, on the Glenwhelt Turnpike Road: Messrs Walton and Turner hereby give notice, that any person or persons making information to them, or to Messrs Mulcaster, at Langley Lead Mill, so as the offender or offenders may be convicted of the said offence, shall receive a Reward of TWENTY POUNDS.

13th May 1786 (Newcastle Courant)

Died

Tuesday, at Dukesfield, in the 75th year of his age, Mr Francis Salkeld, Agent to Sir Thomas Blackett, Bart., in the lead mines; in which capacity he served the family 63 years with great reputation.

12th August 1786 (Newcastle Courant)

To be SOLD by public Sale to the highest Bidder,

On Wednesday the 27th of September next, at the Crown and Thistle, Groat-Market, in the town of Newcastle upon Tyne,
THAT valuable Royalty or Manor called Tynehead, in the Chapelry of Garrigill, parish of Alston, and County of Cumberland, about six miles from the market town of Alston; consisting of several enclosed Meadows and Pasture, with an extensive Common; the whole by computation about 25 miles In circumference, and containing many valuable Lead Mines, now under lease, and working, some In a prosperous state; and all Let at one sixth duty of the Ore or Value, to the Lord of the Manor; and no doubt there are many Lead Mine Veins not found. The inclosed Lands by computation, are about 340 acres, susceptible of much Improvement, and now occupied by seven tenants, on Leases of 21 years, which will expire at Martinmas, 1787.
There are also four Leasehold Estates on said Royalty, which pay Tithes, Lords Rent, and a Twenty-penny Fine. — Conditions, to be produced on the day of the sale; and for further Information apply to Mr Thomas Andros; or Mr Robert Hodgson, at the town of Alston.
N. B. For the benefit of improving the Estate, there are plenty of Coals, Limestone, and Freestone therein.

12th May 1787 (Newcastle Courant)
Thursday Se'nnight, about three o'clock in the morning Mr Matthew Watson, jun. the Carrier from Weardale to this town, was stopped, about four miles of Stanhope, by a single footpad, who robbed him of 15gs. and his pocket-book.

5th May 1787 (Newcastle Courant)

LEAD MINE.

To be SOLD by public Auction

On Tuesday, the 15th day of May at the house of Mr Ions, Golden Lion, in Hexham, between the hours of eleven and twelve in the forenoon subject to such conditions of sale at shall be then and there produced,
ONE Twentieth Part or Share of that very valuable LEAD MINE, situate near Alstone, known by the name of Old Blagill, with every appurtenance thereto belonging. —For any further information, may apply to Mr Richard Hetherington, Newcastle; or Thomas Rutherford, Low-Glasshouses.
Newcastle, 19th April, 1787.

6th September 1787 (Derby Mercury)
A Shocking Misfortune happened on Monday the 3d. Inst. at Great Hucklow, near Tideswell in this County. Two Men were working in a Lead Mine, when the Earth suddenly gave way, without any previous Motion to make them aware of the Danger, one of the Men was sorely bruised, and the other hastening to extricate him, was almost instantaneously crushed to Death, with his Arms clung round his fellow Labourer. Immediately on the Alarm being given by their Wives (who were at top of the Mine, unhappy Spectators of the Accident) a great Number of People gathered together and begun to dig away the Earth, to save, if possible, the unfortunate Miners. After working three and thirty Hours, almost without ceasing a Man's Voice was heard to say, in scarce intelligible Accents, "Make haste I cannot live much longer!" Redoubling their Efforts, in about two Hours, and after having dug twelve Yards from the Surface, they succeeded in their Endeavours and found one of them dead as above described, and the other in a miserable State— both his Arms broke, and, from present Appearances, unlikely to recover. The Man that is dead has left a Wife and six Children totally destitute the other has three Children, and his Wife is in daily Expectation of adding another to her distressed Family.

3rd November 1787 (Newcastle Courant)

SALE of SHARES of LEAD MINES.

26th April 1788 (Newcastle Courant)

SALE of SHARES of a LEAD MINE

To be SOLD by Auction

On Friday the 16th day of May next, between the hours of one and three o'clock in the afternoon, at the house of Mr Thomas Hetherington, at Lowbyer, near Alston in Cumberland.

THREE Sixty-Fourth Shares of a very valuable Lead Mine, situate in the county of York, known by the name of Cock Hill, subject to conditions of sale then to be produced. —For further particulars enquire of Messrs. Thomas Temperley and John Friend, both of near Alston; or Mr Charles Shaftoe's office, in Hexham.

18th June 1788 (Cumberland Pacquet, and Ware's Whitehaven Advertiser)

Last week, as some workmen were quitting a lead-mine, in the neighbourhood of Keswick, a part of the roof fell in, and shut up one of the people. The others were so near as to hear him call out for assistance; and, on removing a part the, rubbish, he told them a large stone pressed upon his head. After much difficulty, they got to him, and brought him out; but, he was so much bruised that he died soon after.—The accident was rendered more shocking by the circumstance of his son, a boy of about twelve years of age, having just stepped out of the place before the roof gave way, and by his cries alarming the others.

19th June 1788 (Derby Mercury)

27th September 1788 (Newcastle Courant)

NOTICE to COPARTNERS

THE Copartners of Broomsberry Lead Mine and Black Hall Smelt Mill, do give notice to all such of their Partners as are at present in any arrear on account of their respective Shares of the said Mine and Mill, that unless they appear at the next Meeting of the said Copartners to be held at the house of Mr Thomas Ions, the Golden Lion, in Hexham, on Tuesday the 14th day of October next, at eleven o'clock in the afternoon, and then and there pay and discharge all such sum and sums of money as they shall be then found in arrear on account of their said respective shares, that the same will in pursuance of an Agreement in the present Deed of Copartnership, becomes forfeited to the other partners, who have come to a resolution to dispose of such shares, in the manner directed by the said Deed, whereby the said partners for neglecting to discharge their arrears will be totally barred from any future claim to any part of the said Mines or Mill. 27th September 1788.

1st October 1788 (Cumberland Pacquet, and Ware's Whitehaven Advertiser)

The following casualties have happened within these few days, as appears from the inquests taken by Mr. John James, coroner, of Carlisle. —A young man, employed in a mine at Aldstone-moor, having occasion to bring up some working-tools, which had been left there a few days before, imprudently ventured farther than his light would burn, and was suffocated. —William Willis, another person employed in the same mines, was immured by a part of the roof falling in. On clearing away the rubbish, after much difficulty, his body was discovered under a stone of three yards in length, a yard broad, and about the same depth. They were under the necessity of blasting the stone, before the mangled remains of the unfortunate man could be got out.

William Willis of Nenthead was buried at St Augustine's, Alston,18th September 1788.

4th October 1788 (Newcastle Courant)

NOTICE to CREDITORS

WHEREAS an Advertisement appeared in last Saturday's Paper, giving notice to all such Partners of Broomsberry Company as are in arrears on account of their Shares in Broomsberry Lead Mine, and Black Hall Smelt Mill, to appear on Tuesday the 14th day of October instant, at eleven o'clock in the forenoon, at the House of Mr Ions, the Golden Lion, in Hexham, to discharge such arrears, upon pain of forfeiture of any future claim to such Mine or Mill.

The surviving Trustees in a Deed of Trust of the Goods and ----- of Mr Robert Allgood, late of Hexham, do hereby give notice to the Creditors of the said Mr Robert Allgood, they do not intend to discharge any arrears that may be then found due, on account of his the said Mr Robert Allgood's Share, or in any shape to take any steps for preventing the same from sinking into the hands of the other Co-partners. 4th October 1788.

6th December 1788 (Newcastle Courant)

3rd May 1791 (Cumberland Paquet)

Newcastle, April 30. Thursday Se'nnight, as Mr Joseph Dixon, of Clargill, one of the proprietors and agent of Fallowfield lead mine was returning from this town, he was attacked by two footpads, at Welton Bridge near Harlow Hill. One of the villains seized the bridle of his horse, while the other presented a pistol to his breast of Mr Dixon, who endeavoured to push it away, but without effect, as the pistol went off and shot him through the left arm. They then knocked him off his horse, robbed him of upward of 30*l* and left him for dead in the road.

14th May 1791 (Newcastle Courant)

At the Cumberland Quarter Sessions, Wm. Dickinson and Isaac Hodgson, were tried on two separate indictments, for stealing iron implements from the lead mines, on Alston Moor. Hodgson was found guilty, on the first indictment, and Dickinson was acquited; but on the second, they were both found guilty. The former is to be transported for seven years, and the latter was publickly whipped at Alston, on Saturday, and is to be imprisoned six months in county gaol.

26th July 1791 (Cumberland Paquet)

1st September 1792 (Newcastle Courant)

Died

Yesterday, se'nnight, of a few hours illness, at his son's house, on the Sandhill, in this town, where he had been on a visit for a few days, Mr John Brumwell, of Aldstone, Surgeon, aged 72.

15th February 1793 (Chester Chronicle)

ISLE OF MANN MINES.

TO BE LET,

AND MAY BE ENTERED UPON IMMEDIATELY,

ONE or more Lead Mines in the Isle of Mann, at present in work. Proposals will be received, and further enquiries answered, by Capt. Charles Small, Douglas, Isle of Mann, where samples of the ore of the respective mines may be seen.

N B. Near 100 tons of LEAD ORE arc now on hand to be disposed of.

As it is imagined that a COPPER MINE, many years unwrought, may be opened to considerable advantage, the proprietor will give every suitable encouragement to any persons, or company, disposed for such an undertaking. Further particulars may be known by applying as above.

6th July 1793 (Newcastle Chronicle)
Married
Lately at Hexham, the Rev. Mr Jackson, vicar of Alstone cum Garrigill, in Cumberland, to Miss Bird, daughter of Mr Bird, of Hexham
Benjamin Jackson married Zilpah Bird 13th June 1793, at Hexham.

27th July 1793 (Newcastle Courant)
ROAD from BURTRY FORD to ALSTON, from ALSTON to MEREBURN, and from ALSTON to BURNSTONES.
A MEETING of the several persons desirous to promote the making and repairing of the above mentioned roads, under the authority of Parliament, is requested to be held at Thomas Hetherington's, at Lowbyer, near Alston, on Saturday the tenth day of next month, at eleven o'clock in the forenoon; at which time, subscriptions will be taken in for defraying the expenses of applying for and obtaining an Act in the next session of Parliament, and of making and repairing all the said Roads, or of such part or parts thereof, as shall be agreed upon at the said meeting.
25th July 1793.

24th August 1793 (Newcastle Courant)
To be SOLD, One-Fortieth Share of that rich and valuable LEAD MINE, BLAGILL, on Alstone Moor, Cumberland.
Apply to Mr John Errington, Cleatlam; or Mr Peter Allison, Streatlam-Castle, in the county of Durham.

1st March 1794 (Newcastle Courant)
Wednesday se'nnight, at Garrigill, in Cumberland, the wife of Thomas Wallace, lead miner, was delivered of three sons, which were named Abraham, Isaac, and Jacob; the mother and children are all likely to do well.
Thomas Wallace married Jane Heatherington at Stanhope on the 18th May 1793, Abraham died in 1794, his burial is recorded at Garrigill 4th March 1794.
In 1814 Jane died I believe at Renwick, on 10th December.
Isaac married Mary Schollic, at Renwick 22nd January 1816. Shortly afterwards Isaac and his wife emigrated to Canada.
Jacob Wallace married Rachel Wallace 12th May 1819, at Kirkoswald and followed his brother to Canada.
In a petition requesting land, Isaac states that his father, brother & wife, and his Uncle and family arrived in Canada in the summer of 1819.
Thomas Wallace snr. died in 1822.
In 1851 Isaac aged 57, and Mary aged 61, are listed as living, at St. Paul d'Abbotsford, St Hyacinthe County, sub district 403, Canada East, Quebec, also William Wallace aged 26, born Canada.
The following information is derived from the National Archives of Canada, Lower Canada Land Petitions.

Petition of Isaac Wallace for land 17th October 1817

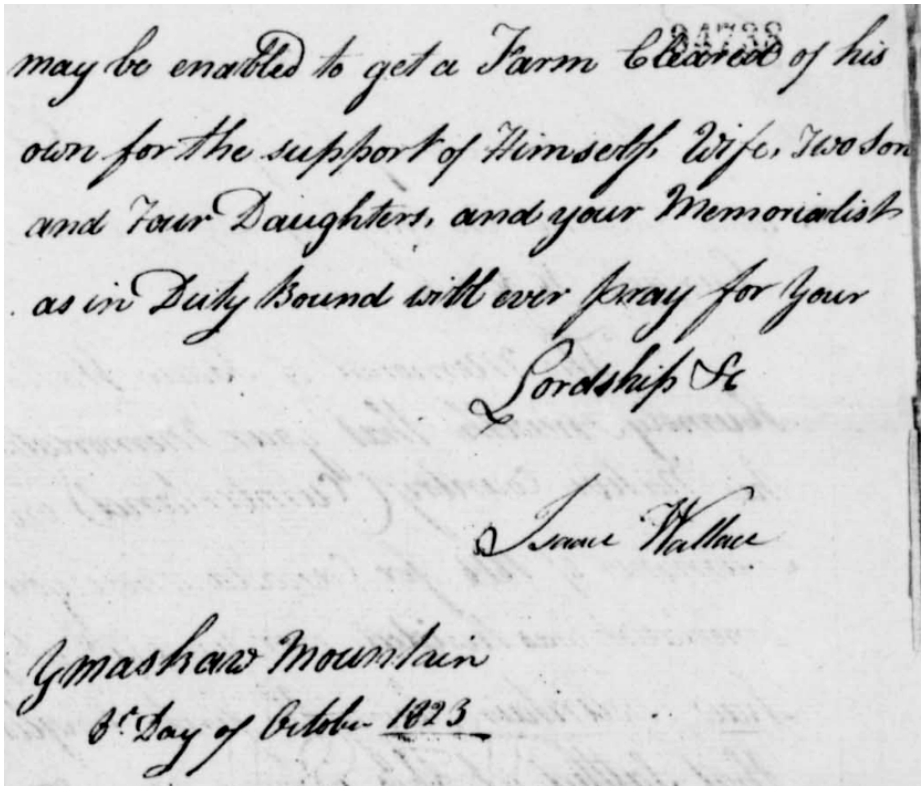
To

94737

His Excellency George Earl of Dalhousie
and Governor in Chief of upper and Lower
Canada &c. &c. &c. &c.

The Memorial of Isaac Wallace
Humbly Sheweth that your Memorialist left
his Native Country (Cumberland) in the
Summer of 1816 for Canada where your Me-
morialist has Resided ever since &c. at Ymas-
haw Mountain, being the first English man
that Settled at this Place; — your Memorialist
immediatly wrote to his Father that he liked this
place very well advising them to come out
without delay, accordingly they arrived here
in the Summer of 1819. viz. My Father, Brother and
wife and my Uncle and Family and a number
of your Memorialists Country People; and we now
feel anxious for a Near Settlement:
and understanding that the Land of the
Township of Granby has fallen into the hands
of Government

Therefore your Memorialist Humbly Hopes
that your Lordships will be Graciously pleased
to Grant them a portion of Land in the
Township of Granby; that your Memorialist



may be enabled to get a Farm Cleared of his own for the support of Himself, Wife, Two Son and Four Daughters, and your Memorialist as in Duty Bound will ever pray for Your Lordship &c

Report of a Committee of the whole
Council Present The Honorable
Sir Francis Burton Bt. C.J. Lt. Gov.
The Chief Justice, Mr Dunpearay
Mr Kerr, Mr Percival, Mr Powell
Mr Stanton, Mr Smith and
Mr Hale on sundry Petitions
for Grants of Waste Lands of the
Crown

Approved

except
that this Land
be referred to
the Agent in Kildare

May it please your Lordship

On the Petition of P. C. Loedel late of the
Hospital Staff for a grant of Lot No 7 in the
2nd Range, No 8 in the 5th Range and the S.E.
Half of Lot No 6 in the 6th Range of the Township
of Kildare being Reserves but grantable by
the new system, the Committee recommend
that the prayer of this Petition be granted
on the usual military conditions.

On the Petition of John Vannovious for
a grant of Lot No 4 in the 15th Range of the
Township of Inverness, the Committee
recommend that the Petitioner obtain
one Hundred acres on the usual
military conditions.

On the Petition of Jacob Wallace for a grant
of Lot No 1 in the 5th Range of the Township
of Granby, the Committee recommend
that the Petitioner obtain One Hundred
Acres on the usual military conditions.

The above document is the approval of grants of land to settlers, including Jacob Wallace and Isaac Wallace of 100 acres. Isaacs grant is recorded on page 61520/21 of this document, dated 6th November 1823.

At the White-horse, in Holywell, in the county of Flint, on Wednesday the 15th of October inst. between the hours of three and five o'clock in the afternoon, subject to conditions;

FIVE-AND-A-HALF Sixty-fourth Shares in Talargoch mine.

FOUR-AND-A-QUARTER Fifty-ninth Shares in Holway level-mine.

Particulars may be known by applying to Mr. Thomas Edwards, mine agent, near Holywell aforesaid, or Messrs. Dicken and Warren, attorneys, Market-Drayton.

2nd May 1795 (Newcastle Courant)

LEAD MINES.

To be SOLD to the best BiDDER,

At the house of Mr Rog Gibson, Corbridge, on Wednesday the sixth May, between the hours of one and three o' clock in the afternoon, subject to conditions then to be produced.

TWO FORTIETH PARTS or SHARES of that valuable LEAD MINE called BLAGILL, in the parish of Alston, and county of Cumberland with the same PARTS or SHARES of BLAGHILL SMELT MILL, situated at Langley. For particulars apply to Mr Alex Whaley, at Sandoe; or to Mr Reg. Gibson, Corbridge.

N.B. The Lead Mine is now working to great advantage having lately opened a vein of excellent Ore, belonging the Blagill Co. in the great level called Nentforce.

3rd October 1795 (Newcastle Courant)

TO be SOLD by public AUCTION,

On Saturday the 10th day of October instant, at the Wheat Sheaf, in the county of Durham

(Either together of in separate Lots,)

ALL that extensive and complete freehold Estate called STANHOPE HALL, in the county palatine of Durham, pleasantly situated on the banks of the River Wear, above the city of Durham, and extremely eligible for a

Gentleman's Seat, abounding with very fine Plantations, which extend upwards of a mile from the Hall, along the side, of a beautiful and romantic Rivulet. The whole Estate lies together to a most commodious manner, and consists of an extensive demesne with a large Hall or Mansion House, and a great number of other Buildings, Gardens, &c. adjoining; And also, about fourteen different compact FARMS, with convenient and suitable housing thereon, and likewise a WATER CORN MILL belonging thereto—All the housing upon the Estate well built and In good condition, and the respective Farms properly sub-divided by good and sufficient fences.

The whole of the Estate is in a very favourable situation for farther improvement, having a Limekiln and plenty of Lime- stone upon the premises; and a Turnpike Road is lately made, in consequence of an Act of Parliament, through the body of the Estate, which connects it well with the other great Roads.

The Proprietor of this valuable Estate it possessed of all its Royalties, and it abounds with a number of Lead Veins, some of which are now working and at times are very fortunate, and in various parts extremely rich; and as a great number of the Veins have not yet been tried or explored, it is supposed there are favourable prospects for several good Mines. Large Flats or Beds of Ore have also been frequently found in the Estate besides the above mentioned Veins — And for the convenience of working the Lead Mines a most extensive and well-built Mill for smelting the Ore, together with a refining Mill for extracting the Silver from the Lead, are erected upon the Estate, together with other Apparatus requisite for the whole process of making Lead fit for market.

For further particulars enquire of Francis Gregg, Esq. Skinner's Hall, London; Mr Ramshay, of Naworth Castle, near Brampton in Cumberland, where a plan of the Estate may be seen; or of Mess Mounsey, Attorneys, In Carlisle.

Mr Christopher Walton, of Stanhope Hall, will shew the premises.

12th December 1795 (Newcastle Courant)

Whereas JOHN DODD, of Alston, and THOMAS DODD, of Nenthead, both in the parish of Alston and county of Cumberland, have often been imposed upon, by Persons taking up Goods in their Names, in and about the Neighbourhood of Newcastle: This therefore is to caution the Public, if they suffer any Person or Persons to do so in future, the aforesaid John and Thomas Dodd will not pay such Contracts, except Notes are given under their Hands for such Goods.

9th January 1796 (Newcastle Courant)

LEAD MINES TO BE SOLD.
TO BE SOLD BY AUCTION,

At Mr William Thirlwell's, the Three Crowns, in Alston, on Saturday the 23rd instant, between the hours of three and five in the Afternoon, (subject to such conditions of Sale as shall be then produced)

ONE Sixteenth SHARE of that good and valuable LEAD MINE, called BROWNLEY HILL, in Alston Moor.

Also Eight Sixteenth SHARES of SLOAT LEAD MINE, In Alston Moor.

Also, One Sixteenth SHARE of C0CKHILL LEAD MINE, near Pately Bridge, in Yorkshire.

For further Particulars apply to Mr William Hutchinson, jun. Loning, near Alston; or to Mr Hunter, Attorney at Law, at his Offices, in Hexham, or Alston.
Hexham 6th January 1796

13th February 1796 (Newcastle Courant)

LEAD MINES to be SOLD.

TO BE SOLD BY AUCTION,

At the House of Mr Michael Walton, by the Sign of the Golden Lion, in Alston, on Saturday the 13th inst., between the Hours of Two and Five in the Afternoon, (subject to such Conditions of Sale as shall be then produced)
TWO SIXTEENTH SHARES of Brownley Hill LEAD MINE, and of the New TRIAL now making by the Brownley Hill Company, in Alston-Moor, in the County of Cumberland.
For further Particulars, apply to Mr Allgood Hunter, at his Offices, in Hexham or Alston.
WANTED, against May-Day, next,
The Sum of EIGHT HUNDRED POUNDS, upon a good real Security; for which 5l. per Cent, interest will be given, and regularly paid. —Apply as above.
Hexham, 3d Feb. 1796.

21st May 1796 (Newcastle Courant)

DURHAM.

The respective tenants will shew the Premises; and for further Particulars in the mean Time, apply to Mr Dickenson, of Love-Lady Shield, on Alston Moor aforesaid; or Mr Hunter, Attorney at-Law, Hexham. October 10, 1796.

19th January 1797 (Derby Mercury)

Friday last a fatal accident happened to two men who were at work in a Lead mine near Wirksworth, in this county, occasioned by the ground suddenly giving way and closing in upon them, by which they were immediately buried in the ruins. The body of one of them was dug out on Monday afternoon; the other has not yet been found. Each of them have left a widow and several children to lament their misfortune.

26th January 1797 (Derby Mercury)

We are happy to acquaint our readers that Job Pearson *(see 9th March 1797 for his correct name)* of Matlock Upperwood, one of the poor men who were buried by the running-in of a lead mine near Wirksworth, (as mentioned in our last weeks paper) has, after a week's confinement, been providentially discovered alive, and is now in a fair way of recovery. His release may principally be ascribed to the humane exertions of a gentleman of great respectability at Wirksworth, by whom a number of miners were unremittingly employed for that purpose; he has, however, the heartfelt satisfaction of having restored to a disconsolate wife and nine small children, an excellent husband and father, and

to society, an honest and industrious member. Anthony Pearson, the other miner, was found dead some days before.

9th March 1797 (Derby Mercury)

JOB BODEN's

Thankful address to his mineral friends.

IMPRESS'D with the sincerest gratitude the human heart is capable of feeling, in being by their labour and the blessing of God, restored to the world by a resurrection from his late dreadful situation, after being buried a full week in the gloomy bowels of the cold earth, near 30 fathoms deep, by the breaking in of a Lead Mine on Cromford Moor, near Wirksworth, by which sad mischance his fellow partner and worthy companion was suffocated in the mud and rubbish, who has left an inconsolable widow and two small children to lament the loss of a tender husband and indulgent parent.

Job Boden of Matlock, the survivor, (knowing the impossibility of a personal attendance on all) takes this method of returning his humble and hearty thanks for the persevering and strenuous exertions of his numerous friends all-round the neighbourhood, for their unremitting labour and hazard in opening a way for his deliverance, amongst which valuable number he begs leave to remark particularly, a Gentleman of WIRKSWORTH, well known for his charitable benevolence, (whole name he forbears to mention) to whole personal attendance at the Mine, and encouraging assistance, he (under God) stands chiefly indebted, for being restored to the arms of a disconsolate wife, and the inexpressive joy of eight daughters; who all humbly join in this public acknowledgment, it not being in their power to do more than to pray to God to reward them for their goodness and humanity.

JOB BODEN.

Matlock-Wood, Feb. 26, 1797.

10th March 1798 (Newcastle Courant)

DURHAM

To be SOLD by private Contract

A VALUABLE LEAD MINE, part Freehold and Part Copyhold, called HARNISHAW MINE, eligibly situate at BOLLIHOPE, near Stanhope in Weardale, four miles south-west of Wolsingham, a capital Market Town in the County of Durham. The Mine is in great repute, and has an Engine and considerable Works erected at a great Expence.

Together with East and West Bollihope Farms, Freehold and Copyhold of Inheritance, situate in the Parish of Stanhope, contiguous to the Lead Works, and containing 147 Acres and 39 Perches, more or less, of very good arable meadow, pasture, and wood land, Two Farm-Houses, and proper Out-buildings, let to Mr Lowes, Tenant at Will, at £105 per Annum. The Farm is entitled to an unlimited Right of Common upon the extensive Tract of Land called Bollihope Common. Total Out-goings £1 7s 1d. only.

For Particulars apply to C Wren, Esq., Newcastle; Mr Dinning, Newlands, near Belford; and Messrs. Van Heythuysen and Carr, John Street, Bedford Road, London.

21st April 1798 (Newcastle Courant)

EAST BUCKLERDALE LEAD MINE
In the TOWNSHIP of FROSTERLEY, County Durham
TO BE LET UPON LEASE

For Severn, Fourteen, or Twenty-one years, subject to Conditions, which may be known upon Application, to Mr James Wall, at Frosterley,

THE WORKING of the LEAD MINE, in the Freehold Estate, called East Bucklerdale, in the Township of Frosterley, being a North East Continuation of the well-known valuable Mine, of Dryburnside.

To prevent the Possibility of the above mentioned Mine being worked ineffectually, Mr Richardson, of London, the proprietor, has been favoured by the Permission of Mr Todd, at Frosterley, to introduce a Horse Level, from the Bed or Level of the River Wear for the Benefit of his Lessee.

The threat of invasion by the French induced the Government to introduce a system of Voluntary Contributions to raise money for the defence of the country.
Below is an extract from a government publication, "Address to the Inhabitants of Great Britain from The Committee for Conducting the Voluntary Contribution for the Defence of The Country." Published 1798:

…These, and other considerations, have induced Government to propose a Voluntary Subscription in aid of the fund to be raised by the new assessment, which will give an opportunity to those who, by the plan of that assessment, pay very small sums, or sums very inadequate to their incomes, to come forward with a voluntary contribution; at present so essential and necessary to the interest, the honour, the safety, and the political existence of the state. This measure has been justly termed a small premium of insurance, to secure the whole of our remaining property. The rich and opulent are therefore' more particularly interested in it.

But it is not from the rich only that Contributions may be expected. Persons of every station and condition, we are confident, will readily come forward in aid of this measure, as their ability and circumstances may allow.

As the danger is general, so will be the de sire to contribute to repel it, and those whom the projected invasion of the enemy would plunder of the produce of their farms,

of the savings of their trade, nay, from whom it would cut off the very employments by which their bread and the subsistence of their families are earned, will cheerfully part with a certain portion of that produce, or those savings, to secure the quiet and peaceful enjoyment of the remainder. Persons in the-lower and more laborious situations of life, which do, not admit of their present contribution in money, will have an opportunity, in case of an actual invasion, of aiding their country, not less effectually, by their personal services in labour; which the public funds will compensate, which the public gratitude will reward and honour. …

The response to this by various parishes in the country can be seen by the following published in the Newcastle Courant of 3rd March 1798.

Morpeth, March 1st, 1798

AT a Meeting held this Day of the VESTRY and INHABITANTS of this Parish,

It was unanimously Resolved.

I. That in the present Situation of Public Affairs, when the Country is threatened to be invaded by ambitious and implacable Enemies, whose avowed Object is to destroy the Constitution and Independence of these Kingdoms; it behoves all Ranks and Descriptions of People to use their utmost Exertions to defeat their Hostile Designs.

II. That it is the Opinion of this Meeting that, Nothing would tend So much to frustrate the Projects of the Enemy, as the Success attending Voluntary Contributions for tbc Defence of the Country.

III. That a Subscription Book be opened to enter the Voluntary Contributions of this Parish at Mr Bennet's, to be afterwards transmitted to the Bank of England, as the Voluntary Contributions of Morpeth Parish.

IV. That a Committee be appointed to carry these Resolutions into Effect.
Signed FRED. EKINS, Chairman.

21st June 1800 (Newcastle Courant)

All Letters must be Post-paid.

C. B. Lead Mine Company was formed by Charles Bathurst based at Arkengarthdale

10th January 1801 (Carlisle Journal)

LEAD MINE

IN the late Mineral Survey of the County of Dumfries, made by Messrs. BUSEYS, the Public expence, they examined a Shaft formerly begun, in a place where evident appearances of Lead had been discovered, upon the Estate of Tundergarth, belonging to William Murray, Esq. and there they met with a large Vein of that kind of Spar which usually accompanies Lead Ore, and also pieces Lead sticking to some of the Spar, from which there is every reason to believe that, if a proper trial was made, Lead might found. As Mr, Murray desirous of entering into an Agreement, upon reasonable Terms, with any skilful Miner, whose Experience and whose Circumstances enable him to prosecute this undertaking, he makes this public Intimation, that such Persons as are willing to engage may Apply to him for the necessary information, at Murrayfield near Lockerbie.

N.B. There is a Level already carried on from the entrance of the Shaft to the Vein of Spar, being about a quarter of a mile in length.

2nd March 1801 (Star(London))

LEAD MINES IN SCOTLAND.

To be Leased for such a number of years, as may be agreed on,

THE LEAD MINES of STRONTIAN, which have been open for more than seventy years, and presently out of lease. The veins run in an almost uninterrupted course for several miles, have been wrought to a great extent, and are peculiarly well situated for levels, wood, water, and water carriage.

Strontian is a port town, situated (on an arm of the sea) at the head of Loch Sunart, in the northern part of Argyllshire, and is close by the principal mines. In this village are several acres of good grass land, houses for the Manager and Agents with store-house smelting-house, and other necessary buildings; to which vessels of seventy tons have an easy and safe access. There is also a most excellent grazing hill contiguous to the mines, with houses for many of the workmen, and at no great distance similar accommodation for many more.

These works, from their extent and situation, are capable of being carried on upon a very superior scale, and are well worth attention, evincing every probability, under proper management, of being a permanent and valuable concern. The lead is duty free, and the opening of the Crinan Canal will considerably shorten communication with Glasgow, &c.

Horse and water engines are already erected upon several of the mines, and a smelting apparatus at Strontian, so that, water excepted, they are free and fit for immediate work.

Proposals will be received by Henry Jardine, Writer to the Signet, at Edinburgh; and Thomas Jeffreys, at Strontian, who will shew the Premises and different plans of the same.

11th August 1801 (Cumberland Pacquet and Ware's Whitehaven Advertiser)

Marriages

The 21st ult., at Gretna Green, Mr Whitfield Harrison of St John's Chapel, Weardale, to Miss Sarah Todd, daughter of the late John Todd, Esq. of Scorton, Yorkshire.

Whitfield Harrison and Sarah Todd were married, 30th July 1801, at Stanhope.

12th December 1801 (Carlisle Journal)

On the 7th inst. Joshua Vipont fell down the Shaft of a pit at Newlands, in the parish of Aldston, and was killed on the spot.

Joshua Vipond, miner/innkeeper, of Nenthead, aged 30, was buried at St John's churchyard, Garrigill, 6th December 1801.

5th June 1802 (Carlisle Journal)

14th August 1802 (Carlisle Journal)

CHARLTON'S ASSIGNMENT.

WHEREAS Matthew Charlton, of Alston in the Parish of Alston, and County of Cumberland, Shopkeeper, hath, by Indenture, duly- executed, bearing dale the 31st day of July, now last past, assigned all his Book Debts, Shares of Lead Mines, and other Estate and Estates whatsoever, unto Joseph Watson, of Hillhouse, and Robert Walton, of Corby Gates, both in the said parish of Alston, Gentlemen, (IN TRUST), for the equal benefit of themselves, and all other the Creditors of the said Matthew Charlton, who shall execute the said Deed on before the 1st day November now next coming:—

Notice is therefore hereby given,

That the said Assignment is lodged at the Office of Mr. Bainbridge, Attorney at Law, Alston, for the Perusal and Signature of the Creditors; and such of them as shall neglect or refuse to execute the same within the time aforesaid, will be excluded all benefit arising therefrom. And all who stand indebted to the said Matthew Charlton, are requested Immediately to pay their respective Debts to the said Joseph Watson and Robert Walton, otherwise Prosecutions will be commenced for the recovery thereof. Alston, August 2, 1802.

30th October 1802 (Carlisle Journal)

LEAD MINES CRAVEN.

TO LET, For a Term of Years—on Duty,

THE LEAD MINES within the Royalty of Darnbrook, near Arncliff, in Craven, Yorkshire, which were worked with great success some years ago. They are situated within 8 or 10 miles of the Great Canal from Leeds to Liverpool, and are furnished with a copious Supply of Water for washing and dressing the Ore, and for working Smelt Mills and Machinery. There is also Coal within the Royalty. Mr. Thomas Pearson, of Darnbrook, will shew the Mining Grounds; and for Particulars, and the Terms of Letting, apply to Mr. Robert Clarke, of Stockton-upon-Tees.

8th March 1803 (Tyne Mercury; Northumberland and Durham and Cumberland Gazette)

Speedy & Regular Communication,
BETWEEN DURHAM AND ALSTONE MOOR.

The frequent and disagreeable Delays, Disappointments, and Impositions, which have been long experienced in the Conveyance of Letters, Parcels, and all Kinds of Goods on the Road between Durham and Alstone Moor, (by way of Wolsingham, Stanhope, Chapel in Weardale, &c.), having induced the Gentlemen and commercial Men in that Distract to attempt the Establishment of a Postman and Carrier to and from those two Places, by which a Communication shall be opened twice a Week; it is proposed, that, for the first year, Subscription be entered into, by all who may be interested therein, or who are desirous of promoting the object of such an institution. The Subscription to be raised is intended to be applied to the Encouragement of the Person or Persons' undertaking the same, and for indemnifying them against any Deficiency in point of Carriage, &c. which every New Attempt of that Nature is obviously subject to, until it be fully known and regularly established.

All Persons, therefore, who are desirous of encouraging this Undertaking, will please to signify the same by Letters, on or before the Fifth Day of March instant, to Mr Robert Bainbridge. Attorney at Law, in Alstone, with the respective Sums they intend subscribing towards its Attainment: it being intended to hold a Meeting the following Day,, at two o'clock in the Afternoon, at the House of Mr George Walton, Innkeeper, in Chapel in Weardale, for the Purpose of carrying the Plan into complete Execution; when and where the Attendance of such of the Subscribers as can make it convenient is particularly requested; and when and where also the Person or Persons willing to undertake the said Employment, or a Part, or on the whole line of Road, will likewise attend, with, proper Securities for the due Fulfilment of his Engagements.

22nd March 1803 (Tyne Mercury; Northumberland and Durham and Cumberland Gazette)

Extraordinary Instance of Resuscitation.—A few days ago, a miner whose name is Wm. Makepeace, going from Allenheads to Allendale town during an intense frost, was found apparently lifeless. Being carried to the latter place, Mr Arnison the surgeon requested send for the Coroner, in order that an inquest might be taken upon the body. Perceiving, however, some fluttering and irregular pulsation, which indicated that the spark of life was not utterly extinct, Mr A. was determined to TRY the methods recommended by the Humane

Society in cases of suspended animation. Accordingly, the requisite assistance was procured, to rub the body, administer stimulants, &c. For six hours all their labours were unavailing, and at the end of that period it was with some difficulty that the people could be prevailed on to continue their exertions. Persevering a little while longer, the at first feeble pulsation became more strong and distinct, which inspired them with hope; and by a continued application of 12 hours, the man was restored to the use of all his faculties. On his recovery, he informed the surgeon that he had been at Allenheads, along with a gentleman there, in a lead mine, and had only drank two glasses of liquor at a considerable distance from each other. In walking home, he became gradually feeble, and at length was so debilitated that he sunk down by the side of the road, when he turned so completely insensible, that he could not account for the cause of his illness in any rational way whatever.

17th January 1804 (Tyne Mercury; Northumberland and Durham and Cumberland Gazette)

TO BE SOLD BY AUCTION,

At the House of Mr Richard Fetherstonhaugh, Innkeeper, Alston, in the County of Cumberland, on Friday the 17th Day of February next• between the Hours of Four and Eight o'clock in the Evening,

ONE-SIXTH Part or' Share of all those Veins or Mines of LEAD-ORE, called Pasture-head Veins or Mines, situate within the Manor of Ayle, in the Parish of Kirkhaugh, and County of Northumberland, with the like Share of all mining Materials and Utensils to the same Mines belonging, and which Share formerly belonged to Mr John Wood, late of Hexham, Currier, and is now intended to be sold towards defraying the Expences already accrued in winning and working the fame.

Further Particulars in the mean Time may be had by applying to Mr Richard Fetherstonhaugh, Alston.

12th March 1804 (Leeds Intelligence)

Deaths

On Saturday the 18th ult. died at Wark-Mill, near Allendale Town, Mr Jonathan Spark, sen. in the 59th year of his age; 27 of which were spent as agent at Allenheads Smelt Mill, for Thomas Richard Beaumont, Esq; of Bretton Hall, near Barnsley.

Jonathan Spark, baptised 27th October 1745, son of Jonathan and Mary Spark, married Margaret Tweddell 22nd November 1775.

Children of Jonathan and Margaret Spark:
1. Mary baptised 18th October 1776, at Allendale
2. Jane baptised 15th July 1779, at Allendale
3. Jonathan baptised 11th March 1781, at St Peter, Allenheads
4. Margaret baptised 8th June 1782, at St Peter, Allenheads
5. Hannah baptised 7th March 1784, at St Peter, Allenheads
6. Hugh baptised 23rd October 1785, at St Peter, Allenheads
7. William baptised 30th September 1787, at St Peter, Allenheads
8. Joseph baptised 19th August 1790, died 20th October 1790, at St Peter, Allenheads.

Margaret Spark wife of Jonathan was buried 27th August 1790,

The Dukesfield Smelters and Carriers Project gives the following information: (https://www.dukesfield.org.uk/jonathan-sparke-1781-1866/)

Jonathan Sparke (1781-1866)

Jonathan is described as agent at Allen Mill (1804) & variously lead mill agent (1805), smelter (1807), agent (1812), agent at the smelt mill (1814). Jonathan was resident at Peasmeadows during this period – placing him probably at Allenheads smelt mill. H was born in 1781, the son of Jonathan Sparke and wife Margaret nee Tweddle at Peasmeadows, near Allenheads. Jonathan senr, (1745-1804) was also lead mill agent for 27 years, at Allenheads Smelt Mill until his death, 1804, aged 59 (of asthma).

Jonathan married Elizabeth Dryden on 9 Oct 1804 at Warden and their children were baptised from there between 1810 and 1814. It is possible that he was moved to the role of mill agent at Dukesfield in that year. He was certainly there by 1826, remaining at Dukesfield Hall until 1836 when he moved to Hill Top, Langley, presumably as part of the transfer of smelting from Dukesfield to the Blagill part of the Langley smelting mill complex. He was in Haydon Bridge village by 1851 and in Whittoes Hill, Haydon Bridge in 1861– possibly Gees Wood House (there in 1863), described as smelting /lead agent in the 1841- 61 census returns. His son John Tweddle Sparke (1814-60) worked as a smelt mill clerk at Dukesfield. In 1833 he moved to Allen Mill then on to Blagill Mill in 1835 as agent. By 1841 he had left the employ of the Beaumont's.

Jonathan died on 31 July 1866 at Haydon Bridge.

Elizabeth Sparke wife of Jonathan Spark, died 7th May 1818, aged 37, at St Peter, Allenheads.
In 1841, at Hill Top, Warden, Haydon Bridge, Jonathan Spark, smelting agent aged 60, and Samuel Walton, smelting agent, aged 30.
In 1851, at Haydon Bridge, Jonathan Sparke, widower, aged 70, lead Agent, daughter Mary Walton, wife of Samuel Walton, Smelting Agent, aged 39, grandchildren, Isaac Walton 7, Mary Jane Walton 5, Jonathan Sparke Walton 4, Elizabeth Walton 10 months, George Jonathan Middleton 14, and Margaret Jane Middleton 11.
In 1861, at Haydon Bridge, Jonathan Sparke, widower, aged 80, lead Agent, daughter Mary Walton, married, house keeper, aged 49, grandchildren, Isaac Walton 17, Mary Jane Walton 15, Jonathan Walton 14, and Elizabeth Walton 10 years.

30th June 1804 (Carlisle Journal)

SHARE IN A BLACK-LEAD MINE

And we do hereby further give Notice, that we have appointed a Meeting to be holden at the House of Mr James Pearson, at Low Byer, near Alston, on Monday the Twenty Second Day of April next, at Ten o'clock in the Forenoon of the same Day, at which Meeting any Person who may be injured or aggrieved by the setting out of such Roads may attend, and object thereto, in order to have such Redress therein as may be thought right.
Dated the Twenty seventh Day of March, 1805
JOHN FRYER. WILLIAM DONKIN. WILLIAM BATES.

20th April 1805 (Newcastle Courant)

BLAGILL SMELT MILL,
NEAR EGGLESTON, TEESDALE

WANTED, an AGENT or PARTNER, to take the Management of the above SMELT MILL and REFINERY, which is well situated for Carriage to Newcastle and Stockton, and near both Coal, Peat, and Lime, of the best Quality, at a low Price; this Mill is built on a much larger Scale than most other Mills in the Country, having a large Water Wheel with Plenty of Water, two large Hearths and Bellows, one Ore Furnace, and a Refining House forty Feet Square inside, containing two Refining Furnaces and a Reducer, with two Coal and Lime Houses, and nine large Bingsteads, which will hold Ten Thousand Bings of Ore. The whole of the Buildings and Bingsteads are completely flagged, so that there can be no Waste of Ore, and can smelt and refine two Hundred and Fifty Bings of Ore a Week, if required. Part of this Mill will be let to smelt and refine by the Bing or Fodder, to those who wish to smelt their own Ore. A Man of respectable Character, and well acquainted with Alston Moor and Teesdale, will meet with good Encouragement by applying to the Owner, David Crawford, Heworth, below Newcastle, Letters, Post paid, will be duly answered.

30th November 1805 (Carlisle Journal)

Colonel Stanley has conferred the surgeoncy of the Royal Lancashire Militia, vacant by the resignation of Dr Barker, upon Mr. Stephenson of Nenthead, in Cumberland, who has accordingly joined the regiment at Plymouth.

18th January 1806 (Lancaster Gazette)
On Tuesday se'nnight, Mr Gibson, a young man of Alston Moor, was killed, by falling down the shaft of an old mine.
St Augustine's, Alston, burial records give John Gibson natural son of Mary Gibson and Christopher Whitfield killed at the mines died Jan 7 1806, aged 18 years.

17th May 1806 (Newcastle Courant)
Marriages
Thursday, se'nnight, Mr. J. Stagg of Alston to Miss Ruth Dickinson, of Dufton Hall, Westmorland. *(Joseph Stagg aged 31, married Ruth Dickinson aged 30 at Dufton 8th May 1806) See Robert Stagg & Family*

22nd July 1806 (Tyne Mercury; Northumberland and Durham and Cumberland Gazette)
WHEREAS I, THOMAS FOSTER, of DADDRY SHIELD, in the Parish of Stanhope, and County of Durham, Miner, did, on Sunday the first Day of June last past, assault and ill treat ISAAC HORNSBY, of Nenthead, in the County of Cumberland, Gentleman, on the Road between Daddry Shield aforesaid and Westgate, in the said Parish and County, without any Provocation, for which Offence, the said Mr Hornsby has very properly instituted a prosecution against me; but on Consideration of my thus publicly begging his Pardon, and my Promise to be of good behaviour for the future, has kindly consented to withdraw such prosecution. Witness my Hand, the 11th Day of July 1806

Whoever will give such information to Mr Matthew Fleck, at Stella, as may lead to a Discovery of the Offender or Offenders, so that they may be prosecuted to Conviction, shall, on such Conviction, receive a Reward FIFTY POUNDS, by Application to Mr Middleton Hewitson, Percy-Street, Newcastle.—Newcastle 13th June 1807.

29th August 1807 (Newcastle Courant)
Marriages
The 11th inst. At Middleton, in Teesdale, Mr Wm. Barnes, of Egglestone, to Miss Stagg, of the same place.
William Barnes married Elizabeth Stagg, daughter of Joshua Stagg, see the Stagg family history.

17th October 1807 (Lancaster Gazette)

On the 30th ult. an inquest was held at Kirkland, Kendal, on the body of Sarah Jameson, aged 26, wife of Thomas Jameson, weaver, and daughter of Mr Emerson Cain, of Alston Moor.—Verdict—Manslaughter. It appears that a controversy was the cause of her untimely end, by the blows given by her husband! He is now in Appleby gaol.

1st March 1808 (Tyne Mercury; Northumberland and Durham and Cumberland Gazette)

COURT OF KING'S BENCH,

Tuesday, Feb. 23.

THE BISHOP; OF DURHAM v. T. R. BEAUMONT, Esq. AND HIS WIFE.

This was an action directed from the Court of Chancery. We have often before had to state the proceedings in this case.

Mr Walton, who opened the pleadings, said, that the issue stated, that two discourses were held between the Plaintiff and Mr J Erasmus Blackett, in which certain representations were made by the latter respecting the ninth part of certain lead-ore of Weardale mines, in the county of Northumberland, to which Dr Barrington was entitled as Bishop of Durham. It was said to be represented to the Right Rev. Prelate, that 925L was the full annual value of such ninth share of lead-ore at the time of the representation. The Bishop asserted, that this representation was made, and which assertion was contradicted by the Defendant. There was another, account, in which it was said, that 925L was more than the value, which was in the same manner, and by the fame parties, averred and contradicted.

Lord Redesdale and Mr Baron Wood had been subpoenaed as witnesses, and sat on the Bench with the Chief Justice, On the part of the plaintiff. Sir S. Romilly, from the Court of Chancery, assisted by Mr Topping and Mr Martin, conduced the cause. On behalf of the Defendants, the Attorney-General and Mr Garrow were assisted by Mr Bell, also from the opposite side of the Hall.

Sir S. Romilly very briefly stated the facts of the case. Mr Edward Emms, Secretary to the Bishop of Durham, deposed to the two conversations between Mr J. E. Blackett and the Rev. Prelate; the one held at the castle of Durham, the other at the time of a meeting of the Sons of the Clergy at the Turk's Head, Newcastle. His evidence was to the effect stated in the pleadings, that Mr Blackett had said, when his honour and conscience were appealed to by the Bishop, that the full annual value of the ninth share of lead ore was 925L; or that such sum was more than the value. The Attorney-General, in a very long address to the Jury, stated the nature of mining concerns; and insisted that the witness had entirely forgotten what had passed at the two interviews referred to. He then called the Gentleman who was party to the conversation.

Mr John Erasmus Blackett, during a long examination, directly contradicted the evidence of Mr Emms, asserting that he neither did say nor could say, that 925L was the full value of the Bishops ninth share of the lead ore, but admitted that he said, that such annual rent was a fair equivalent for such ninth share, under all the risks and difficulties attending the working of the mines. The witness said he was 81 years of age.

The Attorney-General; on the occasion of this conflicting testimony of two respectable witnesses, proposed to call some honourable person to give

testimony to the character of his own witness, on the authority of the case of Doe, on the demise of Stephenson v. Walker, before Lord Chief Justice Mansfield; but the Noble and Learned Judge said, that he was most confidently of opinion, that there was no colour or pretence for adducing such testimony.
After Sir S. Romilly had replied, and Lord Ellenborough had summed up the evidence, the Jury retired, and after deliberating between two and three hours, found a verdict for the Plaintiff.
It is not improbable, that the effed of this decision will be to the amount of 60,000L. or perhaps more, in favour of the Bishop of Durham.

27th August 1808 (Leeds Mercury)
A case of very considerable importance to the owners of mines came to be tried at Durham. It was an action brought by John Skottowe, Esq., of Chesham Bucks, the owner of some mines in Derwent, against the Incorporated Lead Company, who had been tenants thereof for a great number of years, and damages to the amount of £100,000 were claimed by Mr Skottowe, against them for waste and destruction done to his inheritance. After several legal objections, taken by the Defendants, were overruled, a verdict was entered for the Plaintiff for the damages claimed, subject to a reference as to the amount. A verdict, subject also to a reference, was likewise obtained by the Lessees of some adjoining mines, against the Lead Company, for the damages done to their mines, in consequence of the acts of waste done to Mr Skottowe's.

8th November 1808 (Cumberland Pacquet, and Ware's Whitehaven Advertiser)

18th January 1809 (Morning Advertiser)

ROBBERY

A short time since, Mr. W. Richardson, the Collector of the Lead Company, at Durham was robbed of upwards of £934 by two footpads, as he was travelling on horseback from Barnard Castle, when he was within about three miles of Wolsingham. The circumstance of a footpad robbery in that part of the country caused considerable alarm, and every possible exertion was made with a view to apprehend the robbers, and recover the stolen property. Two men were taken into custody on suspicion, and Mr. Richardson actually swore to their being the robbers, and they stand committed for trial. Since which one of them has proved incontestably that he was at Carlisle, by the evidence of one of the Magistrates of that city; this excited much astonishment in the minds of the Magistrates at

Durham, and induced them to write to the Magistrates at Bow-street, to send an Officer more intelligent than their own. On hearing the full circumstances of the case, he gave it as his opinion, that Mr. Richardson had not been robbed, it turned out that Richardson had been heard to say, he travelled in danger of his life, as he carried such large sums with him, the sum of which he said he was robbed was the largest he ever had: yet, on the day of the night on which he stated himself to have been robbed, he had done his business in sufficient time to have left Bernard Castle at two o'clock; but he did not leave till four, when he was sure to be benighted. On the spot where he said he was robbed, lived a Gentleman, to whom he was personally known, yet he did not go to his house to give him an alarm, where he could have procured a number of men to go in pursuit of the robbers.
Antheny, the officer, searched Mr. Richardson, and found upon him some papers, which he said were in his saddle-bags at the time he was robbed.
Under all these circumstances, the Magistrates have committed him, on suspicion of having embezzled the money of which he said he was robbed, and he will be tried at the ensuing Sessions, there being no Assizes for Durham in the Spring.

30th December 1809 (Lancaster Gazette)
Saturday se'nnight, a person named Bell, was found dead in the snow, near Garrigill Gate, Alston Moor.
Alston burial records show John Bell, miner, aged 45, of Skellgill, was found dead.

10th March 1810 (Carlisle Journal)

See 8th March 1845, 29th November 1845, and 10th July 1852.

4th March 1815 (Durham County Advertiser)

ONE HUNDRED AND FIFTY GUINEAS REWARD.

WHEREAS about seven o'clock in the morning of Monday the 20th inst. a most daring robbery was committed about half a mile from the town of Wolsingham, in the county of Durham, on Thomas Watson, of Wolsingham aforesaid, common carrier and postman, (who was 'then driving a waggon and cart, on the turnpike road, to Chapel in Weardale) by some villain or villains unknown, who knocked him down, and severely braised him on the head, and left him lying on the road in a state of insensibility, and feloniously took from the said Thomas Watson, two black leather pocket books, containing £31 in £5 and £1 provincial notes; and several letters. And in consequence of the inability of the said Thomas Watson, to defray the expence of a prosecution, a meeting was held this day at Wolsingham aforesaid, by several of the inhabitants of the parishes of Wolsingham, Stanhope, and the neighbourhood, and a subscription entered into for defraying such expence, at which meeting Robert Curry, of Bishop-oak, near Wolsingham aforesaid, Esquire, presided. Whoever will give such information to the said Mr Curry, as may be the means of discovering the offender or offenders, will upon conviction, receive a reward of one hundred and fifty guineas, to be paid by Mr Joseph Little, of Stanhope in the said county, the Treasurer. And in case any accomplice In the said robbery, will give such information as may lead to the conviction of any other offenders In the said robbery, he shall receive the above reward, and all possible means will be used to obtain the pardon of such accomplice.—February 21, 1815.

8 April 1815
Report of Thomas Dodd to the Court of Assistants of the Governor and Company for Smelting Down Lead with Pit Coal and Sea Coal
Northern Mines Report Book 1806 - 1820

On the 15 February last the son of a poor widow in this place and who was the principle support of the distressed family was in a moment precipitated down one of the Whims shafts at Rampgill 330 feet and was broke to pieces. I hope the Court will pardon me for naming this doleful event, for I knew the Court in some disastrous cases graciously condescended to bestow some small charity upon the survivors. This was a fine boy of 17 or 18 years of age. The rope had got off the pulley wheel which is exactly over the top of the new shaft and in his attempt to put it right he slipped his foot and went down. In the margin was written, “Boy killed by fall down the Whimsey shaft at Rampgill see the books page 95”.

The only burial that fits this description is that of Thomas Archer, aged 18 years, who was buried at Alston 17th February 1815.

2nd May 1815 (Tyne Mercury; Northumberland and Durham and Cumberland Gazette)

TO MASONS AND BRICKLAYERS
TO BE LET

THE BUILDING a Set of HORIZONTAL CHIMNEYS, at Allenheads Mill, near Allendale Town. Every material necessary for completing the work, will be furnished to the undertaker by the proprietor. —Mr Jona. Sparke, the agent at the place, will shew the situation and a plan of the building. For further particulars apply to Mr John Mulcaster, Blaydon Refinery, near Newcastle, who will receive proposals until the 15th day of May, 1815.
Blaydon Refinery, 27th April, 1815.

17th June 1815 (York Herald, and General Advertiser)

Elopment. —On the evening of the 5th inst., Mr F. _____' schoolmaster of Nenthead, near Alston, eloped in a post chaise with the youngest daughter of the London Lead agent of the above place, and arrived at the Howard's Arms Inn, in Brampton, the following morning, from thence the anxious pair resumed their flight for Gretna Green: presently two neighbouring sturdy rustics, each upon a prancing roadster, appeared in pursuit to retake the fair fugitive; happily poor pedagogue and his intended rib had fled, and the two ninnies dodged on to Gretna Green, but, previous to their arrival, the enamoured lovers were coupled at the celebrated temple of Hymen. She is the third person of that family who has been tied with Hymen's cable at Gretna Green.

27th June 1815 (Tyne Mercury; Northumberland and Durham and Cumberland Gazette)

On the ____ of the 5th inst. Mr F. Charlton, schoolmaster, Nenthead, aged 20, eloped with Miss R. Dodd, youngest daughter of Mr T. Dodd, agent, of the same place, aged __. They took chaise at Alston, and were wafted on by _____ to Gretna Green, the next day, by 12 ___Hodge left Alston on the morning of the 6th, in pursuit of the lovers, but he did not reach Gretna till ___ at night, and only a few minutes before the _____ pair re-entered the vehicle on their return home. They reached Brampton that night, where the wished for consummation is said to have taken place. This couple are particularly attached to each other, though they suffer all the pangs of a cruel separation.
See Thomas Dodd and Family, & Rebecca Charlton.

Deaths

Saturday se'nnight, at Alston, Mary wife of Thomas Walton, agent to the East Crossfell Lead Mine Company, aged 27. *See17th February 1818*

3rd October 1815 (Tyne Mercury; Northumberland and Durham and Cumberland Gazette)

In the matter of Arthur Mowbray, George Lewis Hollingsworth, John Wetherell, William Shields, Wm. Boulton, and William Richard Stokes, of the city of Durham, and of Darlington, in the county of Durham, and of Thirsk, in the county of York, and of Lothbury, in the city if London, bankers, partners, dealers and chapmen, bankrupts.

AT a General Meeting of the Creditors, held on the 20th day of September, 1815, at the house of William Ward, the Wheat Sheaf Inn, in the city of Durham, pursuant to a notice in the London Gazette,

THOS. HANWAY BIGGE, Esq. in the Chair.

1st. It was resolved, That the assignees have power to give authority to the solvent partners in the Berwick bank, to sue for, and collect the out standing debts and property of the said bank, on giving such security as they shall approve and depositing the surplus in the Bank of England, or in some approved banking house, to be invested in Exchequer bills, or other government securities, and applied and divided between the said assignees, and the said solvent partners, according to their respective interests therein.

2d. It was resolved. That the assignees do pay to the clerks of the respective banking houses, the salaries and wages not exceeding half a year, due at the time of the bankruptcy, and to the servants of the respective bankrupts, their wages not exceeding a quarter of a year, due at the time of the bankruptcy. …

3rd. That the assignees may take into consideration the situation of the said bankrupts, with reference to the Arkendale and Derwent mines, and procure, at the least possible expense, information as to the value thereof, and to lay the result of their enquiries before a future meeting, to be called by the assignees as soon as they shall be prepared for it, or to sell and dispose of the same at their discretion without convening a further meeting. …

25th November 1815 (Durham County Advertiser)

To be SOLD by public Auction,

26th March 1816 (Tyne Mercury, Northumberland and Durham and Cumberland Gazette)

LEAD MINES
To be SOLD by Auction

On Saturday the 15th day of April, at 6 o'clock, at Lowbyre, near Aldston
All those well-known LEAD MINES, called Brownley Hill and High Raise, situate near Nentsbury, in Aldston Moor, with the valuable crushing –mill and appurtenances belonging to the said mines.
Further particulars may be known on application to Robert Hayton, the agent, at Grassfield, near Nentsbury, aforesaid. —March 20.

2nd November 1816 (Carlisle Patriot)

ALSTON MOOR

Owing to the extreme depression of the Lead-mining concern, the town and neighbourhood of Alston Moor are at this time in a most deplorable state; some hundreds of the Miners having been lately discharged, and being without any employment, are in a state of complete insubordination. They have for some time past assembled together in large bodies every morning at the sound of a horn, for the purpose of poaching, the neighbourhood of Alston abounding with game, and have sallied out in all directions upon the adjoining Manors. A gamekeeper was lately fired at and wounded in attempting to secure one of them; and two of the keepers having one day succeeded in taking a man who was out by himself, were carrying him off, when they were pursued by the rest of the gang, and obliged to take shelter in a house which was presently surrounded by the poachers, who threatened to shoot them immediately if they did not release the man; and the muzzles of six guns were presented at them through one window; they were, therefore, obliged to release their prisoner to save their own lives.—(Carlisle Patriot)

9th November 1816 (Carlisle Patriot)
To the Editor of the Carlisle Patriot,
"Alston Moor, Nov. 7, 1816.
"Sir, —I am sorry to see that you have been to much imposed on, and induced to insert in your paper of last week, a paragraph respecting this country, which is nearly all together false, or so much exaggerated, that it certainly requires contradiction. Owing to the great depression in the price of lead, many Mines in this country are now not worked, and consequently many workmen are without employment: but the number, comparatively speaking, is very small. I myself, only five days ago, requested the Overseer of the parish to send me a list of the persons who had applied for parochial relief, on account of want of employment, and the number which he gave me is only twelve. —Neither has there been any insubordination or disturbance whatever; and the account of the poachers collecting together in large bodies, is also entirely false. Two young men—the

sons of a respectable landed proprietor in the parish and consequently, not obliged to pursue the unlawful practice from necessity—were about a month ago detected poaching in an adjoining Manor, and one of them was secured by the Gamekeeper, and taken to a farm-house in the neighbourhood. And the only part of your paragraph, which is true. Is that ten or twelve men went from this place in the night and released the person in custody—but no guns were fired either in the release, or when the poacher was seized. It is therefore hoped that you will contradict a report which is so completely false, and calculated to do much injury."

14th December 1816 (Carlisle Patriot)
On Saturday last, a man named John Irwin, formerly a miller at Burnstones Mill near Alston, was found lying dead in a small rivulet near Burnstones. He had been engaged for some time previous as a Labourer at Mr Thomas Robinson's, Middle Farm, and was on his return home. For some time before he had been in a desponding way from illness and having been reduced in circumstances. On the preceding Saturday he had procured a bottle of laudanum at Carlisle, the contents of which he drank and afterwards laid himself down in the water. A paper was found in his pocket declaring the motives which actuated him, and expressing a desire to be buried in a particular place. He has left a wife and family. We have not yet heard the result of the Coroner's inquest.

7th January 1817 (Cumberland Pacquet and Ware's Whitehaven Advertiser)
The subscription at Alston Moor, to employ the industrious poor of that parish, has been very liberal, amounting upwards of £800. For the last two months, from fifty to sixty men have been employed in repairing the roads.

18th January 1817 (Carlisle Patriot)
A Correspondent informs us, that the subscription for the Relief of the Labouring Poor, in Alston, continues to increase rapidly, and that the greatest portion of the Ladies of the town and neighbourhood have seconded the benevolence of the gentlemen, by forming themselves into a Society for the distribution of warm clothing to the poor females of the town, which clothing they make with their own hands; their subscriptions already amount to a considerable sum. Such a plan at this season of the year cannot fail to do much good, and reflects great honour on its promoters. The Members of the Society have been most indefatigable in the selection of proper objects of charity, as well as in promoting the subscription.

VALUABLE LEAD MINE.

For SALE by public Auction, (Unless an acceptable offer shall be sooner made by Private Contract, of which early notice will given,)

At the house of Anthony Wood. Innholder, in Pateley Bridge, in the parish Ripon, on Saturday the 30th day of August instant, at 3 o'clock the afternoon, AN EIGHTH SHARE or that very rich LEAD MINE, called the SUNSIDE or COCHILL HILL MINE, upon Greenhow Hill, three miles west of Pateley Bridge aforesaid, which has been in constant working for a great many years, with more general success than any other adventure of the kind in that district. The mine is in now lease, for about 17 years to come, five respectable proprietors only, who conduct it on the best principles of mining, with facilities in levels, superintendence, &c. peculiar to itself. The profits have been hitherto certain and considerable, and the prospects are still flattering, so that

a person desirous to improve his income, as well as capital, without risk, will find the offer of this share worth attention. For all particulars apply to Mr Nathan Newbould. of Pateley Bridge aforesaid, Mining Agent, or at office of Messrs. Coates and Morley, in Ripon.—August 11, 1817.

19th August 1817 (Tyne Mercury; Northumberland and Durham Cumberland Gazette))

22nd November 1817 (Carlisle Patriot)
Deaths
At Alston, Mrs. Isabella Potts, advanced in years, mother of Richard Potts, merchant.

23rd December 1817 (Tyne Mercury; Northumberland and Durham and Cumberland Gazette)
On Saturday se'nnight, a well-dressed young woman went into the shop of Mr John Cowper, merchant, Alston, and bought goods to the amount of 18s. for which she presented a £10 Bank of England note in payment. After she was gone, Mr C. began to suspect the validity of the note, and took it to the office of Mess. Bainbridge, solicitors, who also were of opinion that it was forged. While Mr C. was there, another note of the same value was brought into the office tor inspection, by Mrs Pattinson, merchant, which had been paid to her by the same woman for a trifling purchase. This confirmed suspicion, and Mr C. immediately went in search of the delinquent, whom he found in a public-house along with two men.— After talking to them a short time, he recovered his goods and change; but the party prevaricated so much, that Mr C. had them all taken into custody, and carried before a magistrate for examination. They have since been all committed to Carlisle gaol, for trial at the next assizes: Their names are Catherine Smith, *alias* Henderson; Patrick Callaghan, *alias* Smith, *alias* Murphy; and Bernard Callaghan. There were found upon them several provincial bank notes; and it is supposed they have been altering forged Bank of England notes at Newcastle, Durham, Sunderland, and Shields.

Deaths
1st inst. at Alston, aged 36, much respected, Mr Thomas Walton, agent for Crossfell lead mines. *See 11th July 1815*

18th February 1818 (The Morning Chronicle)
This Day is Published
AN APPEAL to the POOR MINER, and to every Nobleman, Gentleman, and Tradesman in the Kingdom, who feels interested in the Miner's fate.
By FREDERICK HALL, of Reeth, in Yorkshire.
Second Edition; with the Resolutions at the Meetings held at Reeth, Richmond, Middleton in Teesdale, Stanhope, Chapel in Weardale, Alston and Hexham; and very important further Information obtained upon Mr. Hall's Visit to the several Towns.

Sold by Longman, Hurst, Rees, Orme and Brown, London; J. and G.Todd; York; Mr. Charnley, Newcastle; Mr, Wilson, Hull; Mr. Bowman, Richmond; and all Booksellers in the kingdom.

At a MEETING of the COMMITTEE of the MINER'S APPEAL, held at Alston, on Monday the 9th day of February, 1818,
JOSEPH SALKELD, Esq., in the Chair;
It was resolved unanimously, That this, Meeting approves of the Petition which has been read, and that it be left for signature, at the Golden Lion Inn, in Alston.
Resolved, That John Little, Esq. Chairman of the Meetings, at Alston, be requested to take the said Petition to London, and produce it at the Meeting to be held at the London Tavern,
Resolved, That the said Petition be inserted in The Newcastle Courant, and other Newspapers.
JOSEPH SALKELD, Chairman,
The Chairman having left the Chair, it was resolved unanimously, That the Thanks of the Meeting be given to Joseph Salkeld, Esq. for his conduct in the Chair.

TO THE LORDS OF MANORS, AND PROPRIETORS OF LEAD MINES, AND TO THE MINING ADVENTURER.
The Petition of the Miners, Tradesmen, Landholders, and the Inhabitants in General of the Parish of Alston, in the County of Cumberland,
Humbly sheweth—That in this Parish there are ancient and very extensive Lead Mines, and a great proportion of the Population is composed of labouring Miners.
That in consequence of the low price of Lead, the Wages of the Miners have been so greatly reduced as to subject them to very severe privations and distress, and a very great additional burden has been laid on the Parish.
The Average of the Poor Rate for the last year amounted to Eleven Shillings in the Pound on the Rack Rent, and at this time requires Twelve Shillings in the Pound; and notwithstanding every attention and economy is practised, the Rate is still increasing, the aggregate number of Paupers being at present upwards of eight hundred, out of a population of about five thousand.
In the hope of better times, your Petitioners have borne their distresses with patience and fortitude, and their industry has been unremitting.
Your Petitioners therefore humbly pray, that you will be to take their situation into your serious consideration and adopt such measures as may tend to advance the Price of Lead, and by thus enabling the Adventurer to afford better wages to the miners, to relieve us from a state of distress and misery hitherto unparalleled. And your Petitioners will ever pray. (Signed by upwards of 1000 Signatures).

23rd May 1818 (Carlisle Patriot)
The *Jason*, sailed from Whitehaven, for Quebec, on Sunday morning, with one hundred and ten passengers; of whom nineteen men, nineteen women, and sixty four children were from Alston, in this county.

30th June 1818 (Tyne Mercury; Northumberland and Durham and Cumberland Gazette)

Marriages

15th inst. at Alston, Mr Thomas Shaw, miner, of Grassington, to Phoebe, only daughter of Mr Wm. Elder, china and Staffordshire ware merchant, Alston.

11th July 1818 (Carlisle Patriot)

On the evening of Tuesday last, we were visited, in this neighbourhood, by a very severe storm of lightening, thunder, and rain, of considerable duration. It extended from Carlisle over nearly the whole of the northern and eastern parts of the county. It was particularly violent at Alston Moor. The lightning struck the house of Mr William Walton, and instantly killed Mrs Walton, his wife, Mr. W. and his daughter, were both struck senseless to the ground by the same flash, and their recovery is yet very doubtful. A cow and several sheep, belonging to Mr. Walton, were also killed at the same moment.

8th August 1818 (Carlisle Journal)

TO BE SOLD BY AUCTION,

At the Golden Lion, ALSTON, in the County of Cumberland, on the 22d Day of August, 1818, at Six o'clock in the Evening

22nd August 1818 (Durham County Advertiser)

Marriages

At Alston, on Saturday last, Mr. Humphrey Morrison, of Love Lady Shield, to Mrs. Frances Short of Foreshield, one of the proprietors of that valuable lead mine Hudgill Burn, in Alston Moor.

In 1851, at Flat, Garrigill, Humphrae Morrison, independent and farmer aged 70, his wife Frances, servant Catherine Dixon aged 52, and visitor John Bell, scholar aged 15.

Humphrey Morrison was buried at Garrigill 21st November 1855, aged 77, Frances was buried at Garrigill, 17th February 1861, aged 74.
See 6th November 1885

22nd August 1818 (The Times)
Extract of a letter from William White, Master of the brig Jason, of Whitehaven, which sailed from the port the 17th May last, freighted by Government, with 128 settlers from Alston Moor, for Upper Canada: -
"Jason (off Kamonrascas, about 100 miles below Quebec), June 28
"We arrived all well, in the river St. Lawrence on the 20th inst. after a pleasant and agreeable passage; since which we have been detained by contrary winds."
The Montreal Gazette of 15th July 1818, records that the brig arrived at Quebec on 30th June, following a 42 day journey, with 128 settlers, and the ship also carried ballast, lead and tin.

The following is from an article in the Ontario newspaper, "The Peterborough Examiner" referring to the original settlers, from Alston Moor, of Smithtown, Ontario, in 1818, who are commemorated by a monument in that town.

11th October 2014, Peterborough Examiner
"The Cumberland Settlers"
Elwood Hugh Jones, Professor Emeritus of History at Trent University and Archivist, Trent Valley Archives,

"… The Cumberland settlers had written to the Colonial Office asking for help in settling a group of some sixty settlers in Canada. The British government agreed to give 100 acres to each adult male member of the group, and to refund the settlement duties if they made improvements within five years of reaching their land. The group travelled from Port Hope mostly by water, as there were no roads until the 1840s; the women and children stayed in Port Hope until 1819, and the men established a group home on the triangle that is still evident at the base of the Communication Road, now known as Chemong Road. After the winter they helped each other to build their first homes, shanties or small log cabins, on their respective 100 acre lots which stretched along Communication Road for a few miles. …"
"…When the Cumberland Settlers arrived in Smith Township in 1818, they were the first European settlers in the area north of Rice Lake. Settlement was opened after a British treaty with the First Nations. It remains a mystery as to why the Colonial Office chose to settle them on such virgin land, but it appears to be connected with Upper Canadian ideas that the War of 1812 made it essential to develop and protect the waterways that could provide alternate ways to stifle American invasions. …"

William Dixon house, Peterborough, Ontario
The pictures above and the text below are from:
Heritage Designation Brief and City of Peterborough Bylaw 1986-93

DESCRIPTION OF HISTORIC PLACE
An early Georgian style, stone dwelling, the William Dixon house is located on a hillside on Park Street in Peterborough. It is recognized for its heritage value by City of Peterborough Bylaw 1986-93.

HERITAGE VALUE
"The heritage value of the William Dixon house lies in its association with the Dixon family, one of the six original "Colony Settlers" of the Peterborough area. A good example of Georgian styling, it is among the oldest houses in the town and one of only a few stone dwellings surviving. William Dixon immigrated to Canada from England with his parents in 1818. In 1829, after his marriage to Isabella Harvey, William built his first house on a share of the family land. His second house, now 661 Park Street North, was built in 1837 on the 1829 foundation. It is built with stones from Dixon's quarry, but has been covered on three sides with stucco plaster. Dixon was a district magistrate, captain of the militia during the 1837 Rebellion, and owner of the first sawmill and stone quarry in the Peterborough area. The house was owned by the Dixon family for over 50 years."

10th February 2014 Peterborough Examiner
"In Search of Dixon's Mill" Elwood Hugh Jones
"William Dixon snr died in 1823. … His eldest son, also William married in 1829 Isabella Harvey (1800-1884) who came with a party from Scotland in 1819, built the house, known as Dixon House, and apparently dating from 1829, has had a storied history. They lived in Dixon House, which was built in 1837 on the site where the first house was built in 1829. Two of the five sons that came with William Dixon died in 1819 and 1820. Joseph Dixon (1809-1863) and his wife, Margaret, had five sons and a daughter."
"According to the Theberges, authors of the history of Smith Township, At the Edge of the Shield (1982), William and Joseph Dixon were operating this mill by 1826, and at that time it had one muley saw. At the time there were four water powered sawmills, but only this one was in Smith township."

William Dixon married Nancy Chester, 23rd November 1791, at St Augustine's, Alston, Nancy was the daughter of Isaac and Frances Chester, of Allendale, Northumberland, she was baptised at Ninebanks, Allendale, 10th April 1767.
Children of William and Nancy Dixon.
Isaac born 9th December 1797, baptised 29th December 1797, Leadgate
John baptised 3rd April 1800, Leadgate
Ann born 6th April 1803, baptised April 1803, Leadgate
William born 12th August 1805, baptised October 1805, Leadgate
Joseph born 15 December 1807, Aimshaugh
Utrick born 23rd April 1810, Aimshaugh

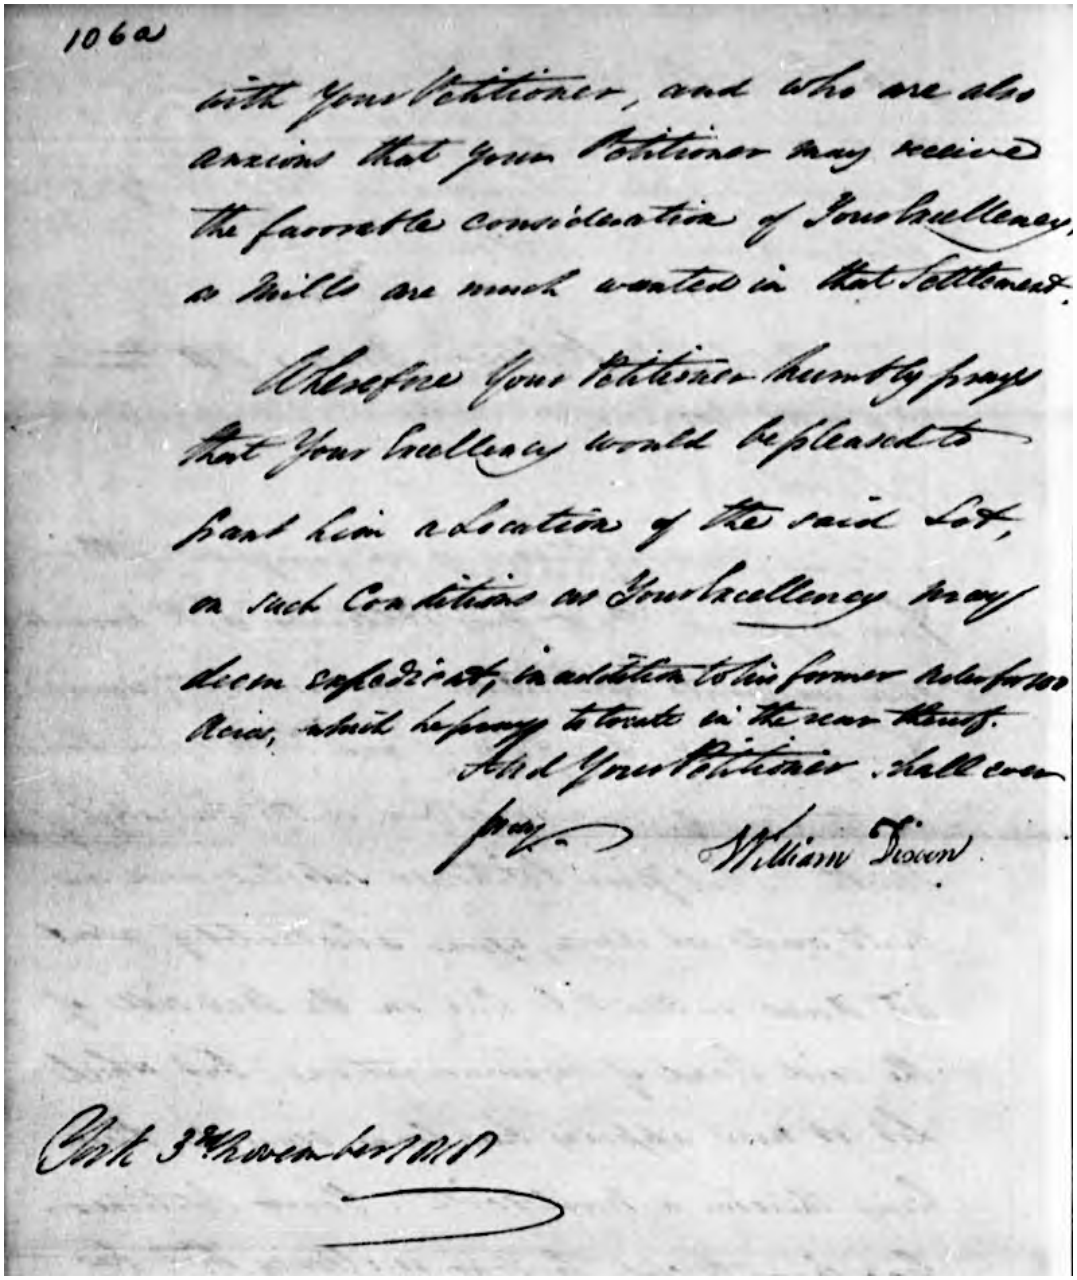
To His Excellency Sir Peregrine Maitland KCB
Lieutenant Governor of the Province of Upper Canada
& Major General Commanding His Majesty's Forces
therein &c &c &c

In Council

The Petition of William Dixon of the Township
of Smith Yeoman

Humbly Sheweth:

That your Petitioner is an Emigrant Settler
from England. That your Petitioner, with several
other Emigrants with whom he came out, received
permission to make choice of and settle upon Lands
on the Road of Communication in the Township of
Smith. That your Petitioner selected, and has
built, and set down, upon a Broken Lot of about
65 Acres, called No One on the West side of
the said Road of communication, but which
Lot it now appears has been erroneously, there
being thereon a Mill-seat. Your Petitioner
begs leave to state to Your Excellency, that he
would be enabled in a short time to erect Mills
on the said Lot, having himself a family of five
Sons, and being promised assistance by a
number of Persons, his friends, with whom he is related,
and who are settled in a body at the same place
with



106a

with your Petitioner, and who are also anxious that your Petitioner may receive the favorable consideration of Your Excellency, as Mills are much wanted in that Settlement.

Wherefore your Petitioner humbly prays that Your Excellency would be pleased to grant him a location of the said Lot, on such Conditions as Your Excellency may deem expedient, in addition to his former location of 100 Acres, which he prays to locate in the rear thereof.

And your Petitioner shall ever pray &c. William Dixon.

Marriages
At Stanhope, on Wednesday last, Mr. Joseph Crawhall of Denton West House, near Newcastle, to Miss Margaret Emerson, of Weardale.

10th October 1818 (Durham County Advertiser)
We are happy to announce the return, to work of the miners in the employ of Colonel Beaumont. It appears that these men had petitioned for an increase of wages for working the ore, and an additional allowance of 2s. 6d.. per week subsidence money, making in the whole ten shillings. Several meetings bare been held at Chapel during the fortnight the miners have been off work; but nothing decisive took place till Monday last, when it was announced by the chairman, Mr Thomas Walton, that it was the wish of Mr Beaumont, jun. that they should return to their work, and he would use his influence with a view to promote the object of their petition. The miners upon this promise returned to their employment. There are upwards of two thousand men, independent of washer boys, employed in Col. B.'s mines, and their wages, during the last two years, we are assured, have not averaged five shillings per man per week, and the greater part of them are now receiving parish aid. Subscriptions have latterly been entered into for their relief, and C. Rippon, Esq. of Stanhope Castle, in addition to a sum of money, sent the poor men fifteen bolls of rye. The meetings were very peaceably conducted.— Two men, who had collected contributions, as they stated, for the general fund, but had applied them to their own use, have undergone the punishment of being ducked.

17th October 1818 (Durham County Advertiser)
The paragraph which appears in our last, describing the situation of the Weardale miners, and which we received from a person who signs his letter "A. Coulthard," we find to be totally incorrect. We have been permitted to inspect Col. Beaumont's pay lists for the last three years, and we were surprised on learning from them the amount which has been paid in wages, some of the miners having actually earned, in a single year, upwards of £140. per man! A great deal, however, depends upon the nature of the workings, and the different situations in which the men are employed, and there is consequently much variation in their earnings. There are, we understand, about 1200 men employed in Col. Beaumont's Weardale mines, and the annual pay list amounts to about £60,000., making an average of £50. per man per annum, instead of 5s. per week, as stated by our Weardale correspondent. Mr Wentworth Beaumont did not enter into any promise to promote the object of the miners' petition, as has been incorrectly stated. The following, which is extracted from a letter written in Mr W. Beaumont's own hand, is the correct statement:— "When the deputation from the miners waited upon me on Thursday, 2nd inst. I remarked, that whatever their situation might be, I considered their conduct highly improper, and assured them that I should listen to no application from them until they had returned to their work.

24th October 1818 (Durham County Advertiser)
The miners lately employed by Col. Beaumont, in Weardale, are again off work. They resolved, at a meeting on Monday last, not to return to their employment until an advance of wages is allowed them.

31st October 1818 (Durham County Advertiser)
The Weardale Miners are again at work, an increased allowance of 5s. per Bing of ore been granted them.

31st October 1818 (Carlisle Patriot)
We have frequently heard, for the last two years, of the alarming extent to which the system of Poaching has been carried, in several parts of this and the adjoining Counties, more particularly in that part of the extensive parish of Alston Moor, coiled Garrigill, where the practice of Poaching may be said to be almost universal, and has led to the utter subversion of that social bond of society, by which the inhabitants of every particular district, as well as kingdom, ought to be united to each other, and has in many instances, caused the laws of the country, as well as the civil officers intrusted with their execution, to be trampled upon. We are, however, very glad to learn that several spirited and respectable inhabitants of the above parish, sensible of the disgrace reflected upon the district by the practice we have alluded to, have determined to exert themselves as far as lays in their power to put a stop to it, and have professed themselves willing to act as Special Constables, in aid of the civil power, to restore good order; and they have also signed a resolution to mark every act of Poaching with their determined disapprobation.-Our Correspondent adds, that notice has been given for a general meeting, to be held at Alston, on Thursday the 5th of next month, to consider of the most effectual means to be adopted, in order to discourage and put an end to the practice of Poaching in that parish, which is expected to be attended by every respectable inhabitant of the parish and neighbourhood.

12th December 1818 (Durham County Advertiser)
Weardale Poachers.—On Monday morning last a party of constables succeeded in taking two of the most incorrigible members of this fraternity. Their success. however, was of short duration—the fellows were taken to Chapel, whence the circumstance rung through the hills— the clan mustered their forces, and marched to Stanhope, where the escort had imprudently stopped at a public house with their captives. Here a few of these daring and lawless miscreants, leaving their companions as a corps of reserve at the end of the town, rushed into the house armed with guns, and in three minutes effected a rescue, by disarming and putting to flight double their numbers, and most unmercifully beating one or two of the constables who had the courage to remain to do their duty, one of whom, we regret to add, lies at Stanhope in a most dangerous state. Anthony Siddle, one of the persons rescued, has since delivered himself up to justice, and is now in the gaol in this city.

19th January 1819 (Tyne Mercury; Northumberland and Durham and Cumberland Gazette)
On Sunday se'nnight, the inanimate body of Mr John Walton, of Blaglehead, near Alston, was found on Eales Fell, between Whitfield and Knaresdale.

who died at Castlenook May 8th 1840
aged 31 years.

23rd January 1819 (Carlisle Patriot)
On Monday last, a party of Hussars, 28 in number, under the command of an officer, was sent from this city to Alston Moor, at the requisition of the magistrates of that place. It appears that poaching has lately been carried to an extreme pitch in that neighbourhood; the men engaged in it are of the most desperate character; and their conduct is generally of a very daring nature. One of these persons having been apprehended, he was rescued by his associates in such numbers, and under such circumstances, as to render it necessary to support the civil with military power. The result of this expedition is not yet known in Carlisle; but the most absurd reports are in circulation—such as that three of the hussars and several of the inhabitants have been killed. We mention this merely to give it a contradiction.

30th January 1819 (Durham County Advertiser)
Mr Brignal, one of the constables of this city, having been directed by the magistrates, assembled at the late Quarter Sessions, to serve six warrants on the six individuals concerned in the attack upon the constables at Stanhope. when Siddle and his fellow prisoner were rescued, Mr B. waited upon the Rev. W. Wilson, at Wolsingham, to ask the advice of that magistrate, as to the course he should pursue. Mr W. very readily lent his assistance and accompanied Mr Brignal to Chapel, the residence of most of the offenders, none of whom they saw. They then Called upon some of the friends of the men, and pointed out to them the folly of any attempt to evade the law, and they succeeded in obtaining a promise that the accused persona should all appear with their sureties at Wolsingham before the Rev. Magistrate on the following day. Five out of the six faithfully fulfilled this promise, and entered into recognizances to appear at the next sessions to answer to the charge of assaulting the constables when in the exercise of their duty. Mr Brignal is of opinion that the character of the Weardale miners has been much mis-represented. They are, he says, quiet, hospitable people, and be has no doubt, had he gone alone to Chapel, that he should have met with no obstruction in the performance of his duty. He attributes the late attack at Stanhope to the improper conduct of the constables then employed.

27th February 1819 (Durham County Advertiser)
At a Court of assistants, held at the Lead Company's House, in Martin's Lane, London, on Tuesday the 19th January, 1819.
It was moved, seconded and resolved unanimously,
That this Court do express its warm approbation of the Bishop of Durham's very benevolent design of establishing a certain number of Schools In Weardale, in the county of Durham, as intimated to the Court by the deputation of its members who visited the Company's Works in the month of August, and more particularly communicated to the Court by the Rev. George Newby, of Wilton-le-Wear, on the 14th instant; and that this Court, deeply impressed with the importance of instructing the children of the poor miners and others, have

already given directions to their superintendent, Mr Stagg, to prepare a Building at Middleton in Teesdale. and another at Nent Head In Alston Moor, each capable of accommodating Two Hundred Children, to be opened as Schools, on the first day of next May; and by, a resolution of this Court, held on the 19th of February, 1818, It was ordered, “that the Masters of the said Schools should be members of the Church of England, and that the children be required to attend public worship twice evry Sunday, leaving the option, of the place to their parents;” that In these Schools the Court anxiously hope all the children of their workmen employed in Teesdale and Alston Moor. will receive the rudiments of religious and useful education, and in some degree realise the expectations entertained by the Bishop of Durham; but that this Court, fully sensible of the importance of extending the benefit of education as proposed by his Lordship, are willing, in addition to the establishments they have already ordered. to contribute the sum of four hundred pounds in aid of his Lordships benevolent and pious design.

Moved and seconded,

That a copy of this resolution be transmitted to the Honourable Right Reverend the Lord Bishop of Durham, and that the Reverend George Newby be requested to convey the same to his Lordship.

To the Editor of the Durham County Advertiser.

It is with heartfelt gratitude I am enabled to regale your readers with tidings from the mountains of a more pleasant cast than those which hare lately issued from your press.— 'The resolutions of the Lead Company, (which appear in another part of this paper,) will be hailed by every miner as the commencement of a new era, and afford grounds to hope that the character of my brethren will ere long be belter understood and more justly appreciated. We are not so sunk in barbarism, as to be insensible of the blessings of a free constitution, and lament sincerely, in common with our more enlightened countrymen, the dreadful consequences that must result from lawless anarchy and unrestricted violence. But the innocent should not suffer with the guilty; and the desperate and disgraceful attack made in this dale upon the civil authorities in the discharge of their duty, is contemplated by every honest miner with feelings of abhorrence and merited contempt, and in a forcible light points out the necessity of co-operation (to prevent the recurrence of a similar outrage), of all parties who are possessed of the means of redressing the existing grievances amongst us.

Westgate, Feb. 23. A———R.

To the Editor of the Durham County Advertiser.

SIR,—We, the undersigned, against whom a bill of Indictment fur an assault and rescue at Stanhope, was found by the Grand Jury at the 1st Quarter Sessions for the county of Durham. hare heard with much concern of a paragraph which appeared in the Tyne Mercury of the 2nd instant. We request you to slate to the public, that it appeared without our knowledge, and that it by no means accords with our sentiments . We are fully sensible that we have grossly violated the laws. and are anxious to make all the amends in our power. *Our surrender was unconditional—no promises were held forth to us, and no understanding exists that we should be treated leniently if we surrendered.* We do not deny that we hoped, and still hope, that a prompt

submission to the offended laws would induce the magistrates to be merciful but we throw ourselves on their mercy, and trust that the injudicious language of others may not make it less easy for that mercy to be extended to us
With regard to a paragraph which appeared in the Durham County Advertiser of the 30th Jan. last, respecting the conduct of the constables whom we assaulted, we can truly say that it was inserted without our knowledge, and that we are very sorry it was inserted at all. To recriminate on others would ill become men in our situation. Our earnest wish is to testify by any means in our power our sorrow for the past; and we intreat all persons whatever to abstain from meddling in a matter which concerns only ourselves, and those who will have to decide on our cases. We are, Sir, your humble servants,

Newcastle, 11th April, 1820.

24th April 1819 (Durham County Advertiser)
DURHAM EASTER SESSIONS.
At these Sessions Thomas Lowe, John Kidd, John Currah, James Craggs, Wm Bell, and Dixon Watson, were put to the bar, charged on an indictment found against them at the Christmas Sessions, for an assault on a constable, and rescuing from his possession Anthony Siddle whom he had in lawful custody. The circumstances which led to this prosecution, (and which were stated in our paper of the 12th of December last,) were as follow:—Application was made at the Michaelmas Sessions last year, for bench warrants to apprehend several persons residing at and near Chapel, who were suspected of poaching to a great extent. Thos Cairns, the prosecutor in this case, with other constables, was dispatched to execute the warrants, but they did not succeed in taking more

than one man, Anthony Siddle, whom they brought with them to Stanhope, at which place they stopped to take some refreshment, having travelled all night. They had not remained at Stanhope many minutes, before the house in which they were was besieged by a large party of these daring mountaineers, in arms, who had followed them from Chapel, where they mustered. A party of them, among whom were the defendants, entered the house, and commenced an attack on the constables, whom they beat unmercifully, and put to flight, and finally succeeded in rescuing Siddle from custody. The constables, though armed with the authority and power of the law, found they had no chance with their assailants who fought with one hand, and in the other they held their guns ready cocked. No damage was done by the guns. Siddle, however, delivered himself to justice a few days after this. On the prisoners being arraigned, they pleaded guilty.—Mr Losh, on the part of the prosecution, addressed the court. He said, he appeared there to conduct a prosecution against the prisoners, for a very serious offence. The Learned Gentleman then stated the particulars (as above) and observed, that to assault an officer of justice, or obstruct him in the discharge of his duty, was of itself a very great offence, inasmuch as it prevented the ends of justice being attained, but in this case the offence was considerably aggravated, by the ill treatment which the constables received from their assailants. The offence for which Siddle was apprehended was one of no ordinary nature, and one which the laws of this country visited with severe punishment; yet he was sorry to observe it was carried on, in the neighbourhood where the defendants resided, to a most alarming extent, and which rendered the interference of the civil authorities absolutely necessary to check an evil daily increasing, and the commission of which, in the face of the law, must of necessity tend to injure the morals of the people and make them worse subjects, as they were inculcating a principle of contempt of the laws, the strict observance of which was imperiously necessary to; protect the constitution of the country and the peace and welfare of our fellow subjects; yet these practices had been committed to an extent before unknown, and when the hand of justice had succeeded in discovering the author of them, and was about to consign a perpetrator to be dealt with according to law, the prisoners rose in a body, and without more to do, resolved and did take the law into their own hands to defeat the objects of justice; under these circumstances the Court would, be believed, find it to be its duty to pass upon the prisoners a severe and exemplary punishment, as great a punishment as the law would allow, but he was instructed to inform the Court, and in doing which he felt the greatest pleasure, that the whole of the prisoners, since the time of their entering into recognizance to appear here, had conducted themselves in a manner which left no doubt that they had become sensible of their offence, and had resolved to conduct themselves properly in future. That their contrition had been manifest he had been most credibly informed. In consequence of which he had humbly to entreat the Court to pass upon the prisoners as mild a punishment as the nature of the case would admit; and he hoped and trusted that whatever punishment the Court in its judgment might think right to inflict upon the defendants, it would have the effect to convince them that the laws of their country are not to be violated with impunity, and would render them better and more peaceable subjects. The Learned Counsel said he would only add that most of the prisoners had wives and small families, and those, he was informed, who were not married had families dependent upon them.—The Rev. W. Nesfield

(chairman *pro. tem*) said, that before passing sentence, he felt it his duty to say a few words to the prisoners: they stood there charged with almost as heavy an offence at could be committed. It gave great satisfaction to him to find them evincing contrition for their offence: if they had not, the Court would have found it their bounden duty to pass upon them a sentence which would have deprived their helpless families, and those who were dependent upon them, for a time, of that support which they were bound to afford them. He trusted that the prisoners, as well as everyone who heard him, would profit by this prosecution, and learn in future to respect the laws of the country. The Rev. Gentleman then delivered the sentence of the Court, which was, that the prisoners be fined 1s. each and find sureties, themselves in £50, and two sureties in £__, each to keep the peace for one year, and to be imprisoned until such fine be paid and such sureties found. They were all immediately dismissed, except Kidd, who had no sureties ready. He was consequently sent to prison, but has since been discharged on finding sureties. They are all fine looking men, and conducted themselves in the most proper manner before the Court.

1st May 1819 (Carlisle Journal)

IMPERIAL PARLIAMENT.

HOUSE LORDS. Thursday, April 22.

The House met this day, in pursuance of the terms the adjournment. Except the presenting of petitions, and some routine Business, nothing was transacted. Amongst the petitions was one (presented by the Earl of Lonsdale) from the owners of lead mines in Northumberland, Cumberland, Yorkshire, and Durham, praying that lead-mines may not assessed to the poor-rates.

HOUSE OF COMMONS FRIDAY, April 23.

Mr. V. PAULETT presented a petition from the miners of Stanhope against the Lead Mines' Assessment for the Poor-rates; and similar petitions from other miners in the county of Durham; as was a similar petition from the miners of Northumberland, Cumberland, Westmorland, and Yorkshire, presented by Mr ELLISON.

Mr. MORRITT moved the second reading of the Mines' Assessment Bill. Its object, he said, was make the ore mines liable to assessment for the poor-rates, and was brought before the House in consequence of petitions to that effect from the North Riding of Yorkshire. It was his intention to exempt the iron mines from the payment poor-rates, this sort of property never having been taxed.

Col. WOOD could find no reason to tax lead mines and suffer iron mines not to be taxed. It was also proposed exempt lead mines from this tax where benefit societies are established among the workmen. In proportion as they were dragged into the operation the poor-rates, they would destroy all efforts among the poor to relieve themselves. He should vote against the Bill.

Lord LASCELLES said, that the miners were in great numbers on the poor-rates, and the farmers were obliged to pay, to their absolute ruin, for their support.

Sir J. GRAHAM opposed the measure, because it was a partial one, and ought to have taxed all such property. He moved that the Bill be read a second time that day six month.

Lord MILTON objected to the exemption of iron mines, and was willing have his own, and all such property, subjected to the poor-rates. These mines created

the very poor rates which they would not defray, because they attracted a very great proportion the poor their immediate neighbourhood.
Mr. V. PAULETT supported the amendment, because the mines would be given up altogether if this Bill passed, which were now only kept at work to give support to a great many poor persons.
Mr. CURWEN supported the Bill.
The House then divided— For the second reading, 43—Against it 77—Majority, 34. The Bill was consequently lost.

31st July 1819 (Carlisle Patriot)
On Saturday last a young man of the name of Lee fell down a shaft of 40 fathoms, at Nenthead, near Alston, and was killed on the spot.
The only Lee buried at Alston or Garrigill for this period that I have found is, Joseph Lee of Physic Hall, buried 25th July 1819, at Alston, aged 13 years.
Marriages
At Alston, on Wednesday se'nnight, Mr. W. Bainbridge, solicitor, to Miss Hannah Rowell.

7th August 1819 (Newcastle Courant)
Sunday night whilst a miner's family of the name Birket, residing in the neighbourhood of Alston Moor, were sitting round the fire, the lightning descended down the chimney and threw the whole upon the ground, they soon after recovered from the shock. A young girl was severely burnt and a boy much hurt, but the rest were little worse. The — element was attracted by almost every piece of iron in the house extracting nails from the wood, and throwing whatever implements were made of that metal considerably out of their place.

11th December 1819 (Durham County Advertiser)
Married
On the 27th ult., Mr Richard Bell, of Shildon, near Blanchland, agent to Arkendale and Derwent Mines Company, to Miss Mary Ellis, of Hexham.

11th December 1819 (Carlisle Journal)
We are happy to announce that the Bishop of Durham is now building and endowing eight schools in suitable situations, among the lead mines of his county. The masters will have moderate salaries to encourage industry, but not preclude the necessity of exertion. By this judicious diffusion of his Lordships bounty, throughout the district, the means of useful learning will be brought commodiously home to a greater number of scholars, than by one large though central establishment, more splendid but less useful.

15th April 1820 (Newcastle Courant)
ALSTON MOOR DIVISION.
WE, JOHN FRYER, of the Town and County of Newcastle upon Tyne. WILLIAM DONKIN, of Sandoe, in the County of Northumberland, and WILLIAM BATES, of Chollerton, in the same County, the Commissioners named in, or appointed and acting under the Direction of an Act of Parliament, passed in the 43rd Year of the Reign of his late Majesty King George the Third, intituled "An Act for dividing, allotting, inclosing, and otherwise improving several Commons, Moors, or Wastes, within the Manor of Alston, otherwise Alston Moor and Garrigill, in

the Parish of Alston, in the County of Cumberland." having completed the Division and Allotment of the said Commons, Moors, or Wastes, and having drawn up a Draft of our Award of the said Division, and the said Draft having been read over, perused, and settled at a Meeting advertised and held for that purpose, we have caused the said Award to be fairly engrossed or written upon Parchment and do hereby give Notice, that we will attend the House of Mr Matthew Hetherington, at Low Byer, near Alston, on Thursday the 27th Day of April instant, at ten o'clock in the Fore noon for the purpose of reading over and executing our said Award, in the Presence of such of the Proprietors as may attend for that purpose.

Newcastle, 11th April 1820.

3rd June 1820 (Durham County Advertiser)

Marriages

At Stanhope, on Saturday last, Thomas Hodgson to Eleanor Batey; John Batey to Hannah Milburn; Joseph Vipond to Mary Westgarth; Joseph Featherston to Mary Lonsdale; and John Walton to Sarah Walton, all of the parish of Stanhope.

Deaths

At St John's Chapel, Weardale, aged 60, Mrs. Raine, wife of Mr. Henry Raine, of Wellhope, much respected.

24th June 1820 (Durham County Advertiser)

VALUABLE MINING GROUND TO BE LET.

To be LET by Proposal,

For 21 years, from the first of January next,

THE LEAD MINES within the Lordships of Arkindale, New Forest, and Hope, in the North Riding of Yorkshire, in the three following lots, viz.: —

Lot 1. To comprise Moulds, and the whole of the west side of Arkle Beck up to Coneyseat Hill and Middle Beck.

Lot 2. To comprise the grounds from Middle Beck, south east to Earlsett Cragg, and from thence in a line to Hurgill Head; and from thence down Eskelith Gill to the place where that Gill falls into Arkle Beck.

Lot 3. To comprise the grounds called Windegg, Tanner Rake, Hope Moor, and Hexwith, and the whole of New Forest.

N. B. If the lots are let separately, a money rent and a duty on smelted lead will he required for each lot: but, if any persons are willing to take the whole royalty together for 21 years, a money rent only, without duty, will be accepted.

Proposals will be received for taking any of the lots, or the whole, at Mr Yarker's, the King's Head, in Richmond, on Tuesday the 18th day of July next, at twelve o'clock; and in the meantime, the particular terms and conditions to be performed by the lessees of any lot, or for the whole royalty, may be seen on application to Mr Joseph Alderson, West House, Arkindale (who will shew the mining ground, and, by permission of the present lessees, their levels and works underground), or at the office of Messrs Clarke and Grey, Stockton upon Tees.

June 20th. 1820.

8th July 1820 (Carlisle Patriot)
Marriages
At Alston, on Saturday last, Mr. William Daglish, cabinet maker, Newcastle, to Miss Isabella White, daughter of Mrs. Teasdale, of the former place.

4th November 1820 (Carlisle Patriot)
TO SCHOOLMASTERS.

WANTED, against CHRISTMAS, 1820, a SCHOOLMASTER in the VILLAGE of GARRAGILL-GATE, in the Parish of ALSTON, in the County of Cumberland. Salary £60 per Annum. None need apply except Persons of good moral conduct, and who are well acquainted with the Madras System of Tuition.

Such Persons as intend to Apply, must attend at the Schoolhouse at NENTHEAD, in the said Parish, on THURSDAY the 7th DECEMBER next, to be Examined by Mr. CARR, the Schoolmaster there, as to their Capacity for Teaching and Qualifications, and afterwards attend the Committee of the School on FRIDAY the 8th Day of DECEMBER, at Two o'clock in the Afternoon, in the Schoolhouse at Garrgill-Gate aforesaid. Further Particulars may be had by applying to Mr. DICKINSON, of Lowbyer, near Alston.

10th February 1821 (Carlisle Patriot)
The following most distressing accident, occurred at the mines of Wanlockhead, early in the morning of Wednesday, the 31st ult. Among the numerous workmen employed in these extensive lead mines, there are persons constantly stationed at the hand-pump, for the purpose, we believe, of raising the water to such a level, as the engine can act upon, and who, from the nature the duty, frequently require to relieve one another, like soldier's guard, or sailors in a storm. In consequence of this arrangement, two labourers had just begun to descend the mine, to relieve two of their fellow pumpers, who were at the same time ascending, when a young man, named Matthew Weir, came forward with the intention it is supposed, of assisting his companions, but who overstepping the guard from the darkness the morning, actually walked into the Pit, and was instantly precipitated to the bottom—a depth of at least 196 feet. In his fall, he came in contact, though at different distances, with Peter Hastie and John Moffat, the two men that were ascending; both of whom he unseated with such violence, that the former after hanging for a few seconds, fell upon the dead body of Weir, to the great consternation of the people below. John Moffat was rather more fortunate; and while forced from his seat and in the very act of falling back, his ankle providentially got fixed in the loop of the rope; and in this way he hung suspended by the heels in the very middle of the yawning chasm! We will not attempt to describe what the unfortunate man must have felt, while placed in a situation which was nearly as frightful as that of the Aeronaut who made a desperate effort to repair some part of his balloon, and who while dangling between heaven and earth, trusted to the frail hold of a few folds of ribbon. Suffice it to say, that the people below, while removing the bodies of the other men, discovered the woeful plight of the remaining sufferer, who was ultimately saved by the great and meritorious exertions of the man at the windlass and lowered to the bottom without any further accident. Of the three persons concerned in this calamitous affair, M. Weir was killed on the spot; P.

Hastie although taken up alive was unable speak, and died the same evening; and John Moffat though still living, is considered to be in very doubtful way. The two individuals last named were both single men; but M. Weir has left a sorrowing widow, and a numerous family.—*Dumfries Courier.*

21st May 1821 (Cumberland Pacquet, and Ware's Whitehaven Advertiser)
Monday last, whilst Benjamin Gibson, of Thornthwaite, was working in a Lead mine near that place, the roof gave way and he was instantly crushed to death. The following day an inquest was held on view of the body, before H. Thompson, Esq. and a verdict of accidental death returned—The unfortunate sufferer was an industrious, honest man, and has left a wife and family to lament his untimely death.

22nd September 1821 (Durham County Advertiser)
About 500 men and 150 children were entertained with an excellent dinner at Middleton in Teesdale, on Tuesday se'nnight, by Robert Stagg, Esq. agent to the London Mining Company. The day was spent in the most joyous, yet decorous manner.

Marriages
At Stanhope, on Saturday se'nnight, Mr. Joshua Craig, to Miss Deborah Featherston, Tuesday se'nnight, Mr. Jonathan Vickers of Peasmires, to Miss Collingwood, of Noah's Ark, both in the parish of Stanhope.

17th November 1821 (Durham County Advertiser)
The Society for the Encouragement of Parochial Schools in this Diocese has just published its Annual Report; and we cannot forbear laying before our readers the following extract.
It records one of the many acts of munificence and wisely directed charity, which will make the name and memory of the present Bishop of Durham honoured by our latest posterity: —
"A large and most important addition to the number of Schools in Union with the Society has been made by the splendid liberality of the Lord Bishop of Durham. His Lordship has built seven School-houses in different parts of Weardale, (towards the cost of which the London Lead Company have liberally contributed the sum of £400); in which it will be seen, on reference to the list, that more than 500 children are regularly taught. A permanent endowment of them has been given by the same munificent hand; but in such a judicious measure, as may tend rather to assist and stimulate, than to supersede, the liberality of local contributors; without whose active and zealous co-operation, it is needless to say, the amplest endowments would be unable to secure the reel prosperity of such institutions. …"

6th April 1822 (Carlisle Patriot)
One of the Dufton Lead Mines is so productive that a labouring man and his son have earned the sum of five hundred pounds whilst working it in the last twelve months.

5th October 1822 (Cumberland Pacquet and Ware's Whitehaven Advertiser)
Deaths
At Allenheads, on the 18th ult. Aged 71, Mrs Crawhall, deservedly regretted.
Ann Crawhall buried 21st September 1822, at St Peter's, Allenheads.

9th November 1822 (Westmorland Gazette)
Alston Moor:
The proprietors of the Grassfield lead mine, Alston Moor, have lately discovered a vein in their mining field, which is very productive.

7th December 1822 (Westmorland Gazette)
Accident:
On the 12th inst., *(sic)* while Mr William Walton, of Alston, miner, was employed in walling and arching a level on Dufton Fell, Westmorland, the roof of the arch gave way, and killed him on the spot. Another person employed in the same work fortunately escaped.
At Alston, St Augustine's, a William Walton, aged 33, was buried 14th November 1822.

24th December 1822 (Tyne Mercury; Northumberland and Durham and Cumberland Gazette)
A correspondent says that "Alston is now one of the most flourishing towns in the north of England, owing to the richness of the lead mines. The proprietor of Hudgill Burn Mine will share this year between 30 and 40 thousand pounds, exclusive of the 5th lot of ore to the Governors of Greenwich Hospital, as lords of the manor. The whole of the land under which the above mine is situated is not worth £4 per annum."

11th January 1823 (Durham County Advertiser)
COURT OF KING'S BENCH, Saturday, JAN. 4.
Statute of Limitation
DOUBLEDAY v. PULLEN
This was an action for the recovery of £2,000. upon Bills of Exchange, drawn by the Plaintiff and accepted by the Defendant . The transactions between the parties appeared to be of a very complicated nature. They had embarked in working, upon an extensive scale, a lead mine in the county of Durham. Its concerns were managed by shareholders. The capital was distributed in fifty shares, twenty seven of which were sold for £8000. each, and with the £2I6,000. so raised, £70,000. was appropriated in the shape of capital for working the mines, and the remainder was sunk in a variety of other disbursements between the parties. In the course of the business the Plaintiff and Defendant separated, the latter entering into an agreement to make some advances upon the credit of the twenty-two undisposed shares of the mines. Bonds and deeds were accordingly executed by those concerned, and in a subsequent arrangement, four notes of £500. each, drawn by the Plaintiff, and accepted by the Defendant, were paid into the banking-house of Messrs Lambton &. Co. at Newcastle. The bankers compelled the Plaintiff, who was the drawer, to pay these bills upon their being dishonoured by the Defendant, whose affairs had become embarrassed, owing to the unexpected failure of the lead mines, the shares of

which were the security on which he relied for the fulfilment of his contracts. The Defendant refused to pay the notes on the ground that the security, on the faith of which they had been given, had proved utterly unavailing. The statute of limitation was also pleaded, it not appearing that any promise of payment had been made within the term of six years. The latter plea was established, and the Plaintiff was non-suited.

25th January 1823 (Carlisle Patriot)
Our Alston correspondent write—"The weather is so very cold and stormy, that a man named Abraham Graham, perished in crossing the hills between Nenthead and Allendale, on the 17th instant."

7th June 1823 (Durham County Advertiser)

To be LET by Contract,

In one or several Lots, as may be agreed upon,

THE BUILDING of TWO OVERMEN'S HOUSES, and of COTTAGE HOUSES for the accommodation of Twenty Five Miners' Families, to be erected at Middleton in Teesdale.

Proposals will be received by Mr. Stagg, at Marton House, near Appleby, on or before Tuesday the 25th June, 1823. Persons sending in Proposals may attend on the same day, before 12 o'clock, if it suits their convenience.

Plans and specifications of the work may be seen, and other particulars be known, at Marton House, near Appleby; at the London Lead Company's Office, Middleton; and at the Office of Mr. Bonomi, Architect, Durham.

Two sufficient sureties will be required for the due performance of the Contract, and their names must be sent in with the Proposal.

Marton House, near Appleby, June 4th, 1823.

9th August 1823 (Durham County Advertiser)
Alston Moor, which, from the richness of its lead mines has become so interesting and profitable a district to those who are connected with it, is likely to be touch benefited by the aid of the celebrated Mr McAdam, who, accompanied by Lord Lowther and Mr Locker, Secretary to Greenwich Hospital, is now at Alston, projecting roads in different directions from that place. It is said an entirely new line, with a very easy elevation, may be made over Heartside to Penrith.

20th October 1823 (Cumberland Pacquet and Ware's Whitehaven Advertiser)

Marriages

On Wednesday last at Alston, Mr Isaac Crawhall, of Newhouse, Weardale, to Ann, second daughter of John Wilson, Esq. of Nenthall.

On Wednesday last at Alston, Mr Edward Heylin, of Penrith, draper, to Miss Maria Featherstonehaugh, daughter of Mr Featherstonehaugh, Innkeeper, Alston.

25th October 1823 (Durham County Advertiser)

THE MINERAL LAWS OF DERBYSHIRE.

The Lead mines of Derbyshire are of very remote antiquity. The Odin mine at Castleton bears the name of one of the Saxon deities; it may. therefore, be

inferred that it was known to, and worked by the Saxons previously to the introduction of Christianity. In the wapentake of Wirksworth there were lead mines so early as the year 853; at which time a grant was made by the abbess of Repton, of her estate at Wircenworth on condition that an annual stipend of lead, of the value of three hundred shillings, should he paid for certain religious uses as she then directed. The laws that now govern the mining interests of' this county contain some curious provisions; how they originated is now difficult to determine, but, from indisputable records, it appears “that Edward the First directed the Sheriff of the county to call a meeting at Ashbourne of such persons as were best acquainted with the rights and customs of the mines.” On this occasion their privileges were ascertained and confirmed; the two Courts of Money and Wirksworth established; and a code of permanent regulations adopted. These regulations constitute the mineral law of Derbyshire at the present time. The principal officers of these Courts are denominated barmasters, and it is their peculiar duty to preside on all cases of trial in which the mining interests of their respective jurisdictions are concerned; and generally, to see that justice is fully and fairly administered. It is likewise the duty of the barmaster to put miners in possession of any veins of lead ore which they may discover. The mode of doing this is extremely simple, yet curious. When a man has found or imagines he has found a vein of ore in any part of the “King’s Field," which, with very few exceptions includes the whole of the mineral districts of Derbyshire, he may claim it as his own merely by fixing down a few sticks, put together in a peculiar way, and notifying the same to the barmaster, who immediately gives him complete and exclusive possession of his newly-acquired property in a way as summary as it is decisive. The barmaster, accompanied by two jurymen belonging to the mineral Court, enters the place, field, or meadow, where the miner intends to commence his operations marks out a plot of ground about fourteen yards square, takes it from the former proprietor, whether it be freehold or not, and given it to a new possessor. But this is not all; the miner has now only obtained a piece of land in which to sink his shaft. The little insulated spot which has just been made his own, if surrounded with fields some covered with grass and some with corn, through which the barmaster and the two jurymen soon mark out a path to the public highway; they arrange themselves on a line with each other, and with their arms wide extended and their fingers' ends just touching, they march abreast from the mine in the most convenient direction to the nearest public carriage road, placing stakes on each side as they proceed, within which they confirm to the miner a carriage-way in perpetuity, whereon he may cart his minerals, uninterrupted by any authority whatever. Neither standing corn, nor any other description of standing corn, nor any other description of property, with the exception of “a dwelling-house, a high road, a garden, or an orchard," is, or can be exempt from the fundamental law of the miners. A number of other provisions, equally singular, are included amongst their regulations. “If any miner be killed or slain. or damped upon the mine, within any groove,” no King's Coroner has power to interfere; the barmaster becomes invested with his authority, and holds an inquest accordingly. In article the thirteenth it is provided, “that no person shall sue any miner for debt that doth belong unto the miners in any Court but the Mineral Court, and, if any person do the contrary, he shall lose his debt and pay the charges in law.” In a subsequent clause it is enacted, “that no officer, for trespass or debt, shall execute or serve any writ, warrant, or

present, upon any miner, being at work in the mine, nor when the miners come and go to the Barmote Court, but the barmaster or his deputy only." These extracts are sufficient to shew how extensive and various the authority of the barmaster is; they likewise exemplify the peculiar nature of those previsions which govern and regulate the practice of the miners of Derbyshire.

13th December 1823 (Carlisle Patriot)

We are enabled to lay before our readers the following important communications from Mr. McAdam to Mr. Locker. Secretary to Greenwich Hospital, on the subject of the intended new roads in the Counties of Cumberland and Northumberland: they contain many encouraging statements; and we trust the project will not be suffered to languish by those who have the power of conducting it to its desired termination. Mr. McAdam forcibly points out the advantages of a better communication in the district referred to; but how much would the facilities of commerce of all kinds be increased by a continuation of the Carlisle Canal to Newcastle? As one improvement generally leads to another, we hope that the Northumberland Noblemen and Gentlemen will arouse themselves and exhibit their wonted spirit of enterprise and liberality: we are sure that they will be well seconded in Cumberland.

(COPY.)

Aldstone Moor, 19th July 1823.

On inspection of the several Roads to which my attention was directed by you, I find them in a most deplorable state, both as regards the lines and the surface. The same may be observed of all the roads in this part of the country, the want of management being apparent throughout. The lines of road have been so improperly carried, that in many places the rise is one in seven, and in several parts one in five.

With respect to the construction of the roads, they are altogether the worst that have yet come to my knowledge: not only have the old defective methods been followed in the formation, stoning, and subsequent repairs of the roads, but the work has been executed in the most slovenly careless manner, without method, and regardless of expense. No pains having been taken to preserve the roads from the Winter floods, by keeping open the waterways, they are washed out so as to present the appearance of a bed of rocks, rather than an artificial road. Under such circumstances it must be obvious that the traffic required by the commerce and agriculture of the district must be carried on with difficulty and at a great expense. In the circle of which Aldstone is the centre, having a diameter of about thirty-six miles, all the articles produced in the country, and requiring transport, are of a heavy description, viz: lead and lead ore, coal, lime, timber, stone. And the distances to be travelled are considerable, the rate carriage at present is high yet the persons employed are very inadequately paid—such are the difficulties arising from the condition of the roads

The quantity of lead and lead ore carried upon the roads within the circle under consideration may he computed at 14,000 tons annually; of coal, perhaps 3,000 tons; timber and other heavy commodities, 3,000 tons, making an aggregate of 20,000 tons per annum. Supposing the average distance carried to be only ten miles and that the improvement of the roads to lower the price of carriage at the very moderate rate of three-pence per ton per mile, the direct saving would he £2,500 per annum. The indirect saving of expense of carriage of provisions, and other lighter commodities, and the facilities to be given to the agricultural and

other interests of the country are not so easily estimated, but may be supposed to be of much consequence, because the situation of the mines in a very high country has collected an extra population of six thousand persons dependent for a supply of provisions on a lower Country, distant from twenty to thirty miles, and because lime is much and very usefully employed in the agriculture of the country for the grass lands required for the; maintenance of a great number of horses employed in the transport.

In addition to all the advantages belonging particularly to the domestic economy of the circle, good roads will open communications from south to north, and from east to west, through a country in the centre of the kingdom, which in its present state forms a barrier to all improvement, by which the traffic will be much increased, and the toll revenues consequently improved.

On the road front Hexham to Penrith the greatest impediments are Cupola Bank, Whitfield Fell, and Hartside Fell. The road over Cupola Bank may be made at a rise of one foot in twenty-seven, without an increase of distance beyond half a mile, which will probably be regained soon after the ascent is attained. Whitfield Fell, may be crossed at a rise of one foot in twenty-six on the eastern side, and on the western side about one foot in twenty-one to Clargill, and from thence to the summit one foot in twenty-eight. Hartside Fell may be crossed at a rise of one foot in thirty from Aldstone to the summit, and at one foot in twenty from Melmerby to the summit. All the other parts of this road may be so much improved, as to be considered nearly level.

The road of communication to Nent Head, which branches front this road, at or near Clargill, may be greatly improved, so as no part of it may rise more than one foot in twenty-three, and will be much shorter than the present defective line; this road is important, as being the communication with the coal mines, from which Aldstone and the lead district, in Nentwater, are principally supplied.

Should the roads from Hexham to Penrith and from Burtryford to Burnstones be consolidated, and the branches added from Hudgill Burn to Clargill, from Aldstone to Penrith, from Langley Mills to Haydon- bridge, from Langley Mills by West Boat and Tower Tye to Bellingham, the whole road in the New Trust will be about seventy-five miles, of which fifty miles must be made over new ground, and twenty-five miles of old road improved.

The expense, including bridges and the purchase of land, fencing, &c. will be about £20,000.

The tolls at present levied on these roads amount to about £1,500 per annum, and the additional tolls that may be levied on the road, to be added, may be safely estimated at £1,700, making an income of £3,200. The future expenditure for repairs, allowing for statute labour, to be performed, and including Surveyor's salaries, will be about £1,775; Interest of debt £1,000; total 2,775; income as above £3,200; surplus £425.

I have the utmost confidence that there will be a material increase of the tolls, as soon as the roads are put into a proper state of repair, whereby the communications will be facilitated, and much intercourse promoted through this country.

I have the honor to be, Sir, your most obedient servant,

(Signed) J. L. McADAM.

To E. H. Locker, Esq., Secretary to
Greenwich Hospital.

(COPY.)

Office of Roads, Bristol, 30th Sept. 1823.

SIR, —I beg leave to report to you, for the information of the Directors of Greenwich Hospital, the conclusion of my labours in laying off' and procuring plans of the various roads in the Counties of Cumberland, Northumberland, Durham, and York, connected with the Manors and Estates of the Hospital.

These roads are comprised in a circle, of which the diameter is about fifty miles, extending from Bellingham in Northumberland, on the north, to Rokeby Abbey Bridge, in the County of York on the south; and from Penrith in Cumberland, on the west, to West-boat in Northumberland, on the east; including several branches, as by a sketch accompanying this will be more easily understood.

Copies of the plans of the roads are sent to you with this, for the purpose of shewing the particulars of the proposed improvements for the information of the Board.

The estimate of expense that accompanies the plans, has been formed upon the supposition of receiving a considerable addition from the road revenue of tolls and statute labour: the former will be increased by the improvement of the roads, and the consequent increase of traffic; the latter must be continued for two or three years, while the improvement is in progress. It may reasonably be expected, that the country will give that aid cheerfully and effectually in consideration of the great advantage to be derived, and the prospect of an entire abatement of statute labour, in as far as relates to the turnpike roads, and in consideration, that the improvement of parish roads, with reduced expense, will keep pace with that of the turnpike roads. Agriculture will be relieved from compulsory statute labour, and the expensive and inefficient remedy of indictments will be no longer resorted to.

In making the estimates, I have also taken into account a reasonable time for accomplishing the whole plan, beginning with removing the most prominent evils which at prevent obstruct the communication, and proceeding with the other improvements in the order of their importance, at the same time getting the old roads put into a good condition. I have likewise calculated entirely upon the Trustees committing the execution of the whole to the hands of skilful and economical officers, and placing the affairs of the roads under vigilant and respectable control, by which in future the roads may be kept in good order, and their revenues protected from waste, fraud, and mismanagement.

It is not easy to enumerate the great advantages which opening the communications of this country will afford to the property; the various and complicated interests of Greenwich Hospital in the North of England, required that an extended and liberal view should be taken of their affairs, and of the state of the country in which they are placed: your journey has accomplished that desirable object, and I must trust much to your communicating so the Directors the many and great advantages to be derived from your labours, amongst which the amendment of the roads and opening communications are certainly important features, when we consider the quantity of, heavy commodities which are transported to considerable distances by them and their tenants. From the very remote situation of the mining country (many of the mines being from 1500 to 2000 feet above the level of tide water), it is necessary to connect the roads of the district with others in every direction, in order to create a traffic of the extent and description that will secure a toll revenue

adequate to the objects in view; viz. payment of interest, creating a sinking-fund, and preserving the roads in a state of good repair.

The Estates and Manors of Greenwich Hospital in the Counties of Northumberland and Cumberland, are placed in a mountainous part of the country, difficult of access, and having at present no other roads than those formed on the old pack horse tracks, and carried upon lines so inconvenient and steep, as not only to be a great obstruction to the local carriage, but to present a barrier to all communication with commercial districts on every side.

The heavy commodities produced within the circle described above, are transported at an expense, one third, and in many cases one half, beyond what they might be carried on good lines of well constructed road. This loss falls particularly heavy on the Hospital and its tenants: and generally the value of the whole property is depressed by this impediment to traffic of every kind. A population of six thousand persons, in the mining district, is supplied with provisions entirely from a lower part of the country, at present with much difficulty and expense. From the great extern and flourishing condition of the woods and plantations of these Estates the transport of their timber to a market is already of consequence and will be every year of increased importance.

The great impedimenta that surround and as it were cut off the mining district from the rest of the world, are on the west, Hartside Fell; on the south, Killhope Cross, and Yad Moss; to the north. Coal Fell; on the east, Whitfield Fell and Cupola Bank. ‘The late survey has shown that these impediments may be got over, without any increase of distance, by very easy ascents. The steepest rises will not exceed one foot in twenty, and these are not of any extent.

A branch road has been laid off into the most extensive mining district in Nent-Water, by which the distance in materially lessened, and a new road, nearly level, made to communicate with the present turnpike, road. This with the projected improvements of Cupola Bank and Whitfield Fell, will open a safe and easy road to Langley Smelting Mills, from whence to Hexham the proposed alterations will give easy access. Beyond this line it is hoped that the local Trustees will be induced to make the necessary and very evident improvements on the road from Hexham to Newcastle, which in the port of shipping with which the Estates of the Hospital communicate.

The enlightened measures adopted by Greenwich Hospital, for the improvement of the roads, deserve the grateful and active co-operation of the Landed Proprietors off the several counties. It is difficult to estimate the extent, or the advantages of the impulse thus given to improvement by the exertions of a great public body, actuated by the most enlarged views of sound policy and concern for the public welfare.

The want of a method of making cheap and durable communications throughout the country, has hitherto prevented the roads from keeping pace with the advancement of our national prosperity. This is peculiarly observable in these counties, where the roads are generally the most expensive and the worst in the kingdom. The extent and value of the mines, and the vast quantity of agricultural produce, are source of wealth, which are at present kept in check by the want of eligible communication, but which could not fail of rising to their proper level, were this restraint removed. The Commissioners of Greenwich Hospital, as extensive landed proprietors, and Lords of a great mining country, have an immense and peculiar interest in the execution of this wise measure.

The new method of constructing good and durable roads, at comparatively small cost, cannot fail of producing extensive benefits in the Northern Counties, where the large sums expended in making, and the ignorance of those employed in repairing roads, have prevented the Proprietors fully availing themselves of their natural advantages. This part of the kingdom abounds with the most excellent materials, procurable at moderate prices; the people are industrious, healthy, and ingenious, and the funds for maintenance of the roads are ample. Were these powerful means placed under the control of a respectable executive department, properly supported by the Commissioners, there can be no doubt of a favourable result.

I have the honor to be, Sir, your most obedient,
humble servant, J. L. McADAM

To E. H. Locker, Esq., Secretary to Greenwich Hospital,

27th December 1823 (Durham County Advertiser)
Deaths
At Egglestone, lately, aged 28, after a long and tedious illness, which she bore with exemplary fortitude and resignation, Margaret, youngest daughter of Mr. John Barnes, principle Lead Mining Agent to the Earl of Darlington.
See 30th September 1826

6th March 1824 (Durham Chronicle)
Deaths
Suddenly, on the 27th ult., at Blaydon, Mr John Alderson, aged 70, many years agent to the Lead Company. His beloved disposition endeared him to a numerous circle of friends, who deeply lament his loss.

17th April 1824 (Durham County Advertiser)
Deaths
At Egglestone, in this county, on the 8th inst., in the 40th year of his age, after a tedious illness, which he bore with real Christian patience, Mr. Joshua Stagg, Cashier to the London Lead Company. He was highly and deservedly respected, and his death is sincerely lamented. *See Robert Stagg & Family*

24th April 1824 (Carlisle Patriot)
The Act for repairing the old and making several new turnpike roads in the neighbourhood of Alston Moor, which were surveyed last year by J. L. McAdam, Esq. has received royal assent.

15th May 1824 (Carlisle Patriot)
Married
Mr. Joseph Hetherington, of the Flat, near Aldstone, to Deborah, second daughter of William Leach, of Eden Banks, Esq.
Joseph Hetherington married Deborah Leach (baptised 15th February, Cumwhitton), 13th May 1824, at Cumrew, Cumberland. Alston parish records show Joseph Hetherington to be a Yeoman, living at High Middle Skelgill, Alston.

26th June 1824 (Carlisle Patriot)
An inquest was held at Alston Moor, on Wednesday evening last, before Richard Lowry, Esq. coroner, in view of the body of Robert Thompson miner, who was killed on Tuesday, in Brownley Hill lead mine, by the fall of a quantity of rubbish, technically called limestone-deads, under which he was suffocated. Verdict, accidental death.

3rd July 1824 (Carlisle Patriot)
On Tuesday last, an inquest was held at Alston Moor, before Richard Lowry, Esq., coroner, in view of the body of Joseph Dickinson, who was killed on the day preceding in Hudgillburn lead-mine by the falling of two large stones, while employed in picking out stones from the roof of the mine with a gavelock *(Iron crow-bar)*. Verdict, accidental death.
Buried 1st July 1824, at Alston aged 30 years.

2nd August 1824 (Cumberland Pacquet and Ware's Whitehaven Advertiser)
The lead mines in the Isle of Man are at present very promising; forty miners who have been engaged to work at them, arrived here on Monday last, from Alston Moor, and on the following morning took their passage in the Alley and Nancy, Mylrea, for Douglas.

11th September 1824 (Durham County Advertiser)
EFFECTS OF THE THUNDER STORM OF THURSDAY, 2nd INST.
When we stated in our publication of last Friday, that this city and neighbourhood were visited on the previous evening with a dreadful storm of thunder, lightning, and rain, we were not aware of its disastrous consequences. We have since collected the distressing details, and we now lay them before our readers.
No case that has come within our knowledge, as resulting from the storm, appears to us so lamentable as that of the late Mr. John Pinkney, and we therefore place it first in the melancholy catalogue. Mr. Pinkney was an agent to the London Lead Company, and employed in their mines, near Middleton, in this county; he was also a local preacher in the Methodist conpecion *(sic)*, and generally respected. In riding from the mines towards the town of Middleton in Teesdale, in company with Mr. John Elliott, another agent, poor Pinkney and his horse were struck by the electric fluid, and both instantly deprived of life. The following particulars of the awful event were stated before the coroner by Mr. Elliott: —
Deponent and John Pinkney were riding in company towards Middleton, in the afternoon of Thursday the 2nd of September instant, about four o'clock in the afternoon; deponent mounted on a mule, and Pinkney (the deceased) on a bay mare. When about two miles from Middleton, a thunder storm commenced, which increased till they had advanced within half a mile of that place, when a remarkably vivid flash of lightning passed deponent's face so near that he felt its great heat. His mule being alarmed, immediately sprang forward, and deponent on looking back for deceased, saw him, together with his mare, lying on the ground. Deponent immediately alighted, and called for assistance, when John Bailes and Jacob Tarn, and a boy or two, came from a neighbouring house, and helped to lift deceased up. He appeared to be quite dead, and his

mare also. The body of Pinkney was soon afterwards removed to his own house. A short time before he was struck, deceased observed, in allusion to the lightning, that "he had never before seen any thing so beautiful."
[The hat of the unfortunate man was produced before the Jury. It was much torn and jagged in the front of the crown and brim, and a small perforation appeared in the back part of the crown, shewing that the electric fluid had passed through his head. The breast of the mare, it was stated, had a putrid appearance.]
The evidence of Mr. Elliott being deemed conclusive, no other person was examined, and the Jury returned the following verdict: —"That John Pinkney, (the deceased), on the second day of September instant, while riding in company with one John Elliott, in a thunder storm, was, by the visitation of God, suddenly struck with electric fluid, by means whereof lie received a violent shock in his head and different parts of his body, which caused his instant death."
Mr. Pinkney has left a widow, far advanced in pregnancy and five young children, to mourn his melancholy fate.
John Pinkney aged 36, was buried at Middleton, 4th September 1824.
John Pinkney married Mary Walton, at Middleton 18th May 1811.
Elizabeth, baptised 28 Aug 1814, child of John and Mally, Miner
George, baptised 5 Jul 1812, born 6 Jun 1812, 1st son of John (miner) and Mally (formerly Walton)
John, baptised 10 Nov 1816, child of John and Mally, Miner
Mark, baptised 12 Nov 1820, child of John and Mally, Agent On Lead Mines
Mary, baptised 22 Oct 1824, child of John and Mary, Miner Agent Deceased.
In 1841, at New Town, Middleton, Mary Pinkney, aged 50, Elizabeth, dress maker, aged 25, and Mark, aged 20.
Mark Pinkney married Sarah Bowman, 3rd quarter of 1841.
In 1851, at Masterman Place, Middleton, Mark Pinkney, millwright, aged 31, his wife Sarah 31, children, John 10, Thomas 8, Sarah 6, Joseph 4, George 1, and his mother Mary Pinkney, widow, annuitant, aged 62.
In 1861, at Hude, Middleton, Mary Pinkney, widow, aged 73.
In 1861, at Townend, Mark Pinkney, millwright, aged 41, his wife Sarah aged 41, children, John, millwright, aged 19, Thomas Bowman, millwright, aged 17, Sarah Ann 15, Joseph 13, George 10, Mark 7, Mary Isabela 5, Matthew Dixon aged 2.
Mary Pinkney died 4th quarter of 1869

9th October 1824 (Durham Chronicle)
Deaths
At Truro, in Cornwall, on the 19th ult., Mr James Deans, engineer to the Baldew Tin Company, and son of Mr Wm. Deans, of Shildon, near Blanchland, engineer to the Arkendale and Derwent Mines Company.
James Dean aged 24, was buried 24th September, at Kenwyn, Cornwall.
See 5th April 1844, death of William Deans
In Orchard Street, on the 29th ult., aged 67, Mr W Deans. He was 28 years engineer to the Derwent Mining Co., but latterly of this town.

9th October 1824 (Carlisle Patriot)
Inquests held before Richard Lowry, Esq., Coroner: At Alston, on Tuesday last, on the body of Thomas Little, aged four years, who on the day preceding fell into a mill-burn which runs through the town, and was drowned before he could be rescued. Verdict accidental death.

1st February 1825 (Cumberland Pacquet and Ware's Whitehaven Advertiser)
Inquest
At Alston on the 23rd, on the body of Thomas Percival, aged 26 years, who was so much hurt in the side by some splinters of a stone which he was blasting in Smallcleugh Lead-mine, that he died in two hours: verdict accidental death.
Thomas Percival married Hannah Blacklock, 10th February 1791, at St Augustine's, Alston.
Children of Thomas and Hannah Percival, baptised at St Augustine's Alston:
1. Nancy baptised 31st August 1793, daughter of Thomas Percival of Nenthead.
2. Joshua baptised 4th October 1794, son of Thomas and Hannah Percival of Moor-Cock-Hall. Joshua Percival died 6th November 1842, aged 48.
See 1st July 1876
3. Elizabeth baptised 3rd September 1796, daughter of Thomas and Hannah Percival of Nenthead.

8. John baptised 8th February 1809.

Thomas Percival senior, of Nenthead was buried, 10th September 1824, aged 59, at St Augustine's, Alston.
Thomas Percival of Wellgill, Dykeheads, was buried at St Augustine's, Alston 23rd January 1825.

In 1841, at West Nenthead, Hannah Percival, aged 70, Edward, lead miner, aged 30, John, lead miner, aged 30, Robert, apprentice shoemaker aged 25, and Hannah aged 9.
Robert Percival shoemaker died 17th March 1843, aged 27, at Nenthead.
In 1851, at Fair Hill, Nenthead, Hannah Percival, lead miners widow, aged 81, son John, lead ore washing foreman, aged 42, and granddaughter, Hannah Percival, aged 19.
Hannah Percival, aged 92, was buried at Nenthead, 19th October 1859.

26th March 1825 (Westmorland Gazette)
NEW LEAD MINE.—As the industry and ingenuity of man extend, so does his perseverance too, in seeking out sources of wealth. A lead mine has been recently opened at Glencoin, which may be considered part of the North Eastern

base of Helvellyn, by a company who have every prospect of success, as the ore is fine, a specimen of which we possess.

29th March 1825 (Cumberland Pacquet and Ware's Whitehaven Advertiser)

VALUABLE LEAD IN ALSTON MOOR IN THE COUNTY OF CUMBERLAND.

TO BE SOLD by PUBLIC AUCTION, at the Low Byer Inn, near ALSTON on SATURDAY the 7th of May, at 11 o'clock in the Forenoon,

Two VEINS of LEAD ORE, that have been intersected by the Great Nent Force Level, by which these Veins are completely freed from Water, to the Depth of near 60 Fathoms, through the whole of which they are unexplored.

These Veins are in the immediate Neighbourhood of the rich Veins of Hudgill Burn, of some of which they must be a Continuation. Further Particulars may be obtained by Application to Messrs. WAILES and BRANDLING, Greenwich Hospital Office, Newcastle- upon-Tyne, where a general Plan may be seen; or by personal Inspection of the Mining Ground and Plans, upon Application to Mr. DICKINSON, the Hospital's Agent, in Alston Moor, who has Directions to afford every Information upon the Subject.

Newcastle. 21st March. 1825.

9th April 1825 (Durham County Advertiser)

Deaths

At the Low Leases, near Hexham, on Friday last, aged 65, greatly respected, Mr. John Smith, formerly steward at Copelaw *(sic)* smelt mill, belonging to the London Lead Company.

Gaunless Smelt Mill (Copley, East of Eggleston), Smelt mill first built for the 3rd Earl of Darlington, and latter operated by the London Lead Company, operated from about 1770 to about 1870.

23rd April 1825 (Durham County Advertiser)

BRITISH LEAD COMPANY.
CAPITAL £500,000.

TO BE RAISED BY 10,000 SHARES OF *£50*. EACH

THE PROMOTERS would not now obtrude any object of little moment or doubtful excellence. For more that a Century their Ancestors have been connected with the valuable Lead Mines in the Northern Mining District of England, and they know the immense Profits that some families and "THE LONDON LEAD COMPANY" have obtained, as they also know the increasing demand for Lead, evinced by a rise of more than 20 per Cent, in Pig Lead, and of 30 per Cent in Lead Ore, at the Pit's mouth. They have, therefore, purchased and secured many valuable Lead Mines, not only in CUMBERLAND, NORTHUMBERLAND, and DURHAM—but in DERBYSHIRE, STAFFORDSHIRE, WESTMORLAND, YORKSHIRE, and NORTH BRITAIN. They propose principaly to attend to the Extraction and Purchase of Lead Ore: but Mines for Zinc, Copper, and Black Lead, have been also acquired.

Of the Mines and Mining Grounds, surveys have berm made by scientific and practical men, possessing local information. Some Mines are held on old leases, and the remainder on equitable terms. Several are now actually

worked, and all the railways, machinery, and needful apparatus supplied. Their general produce is rich and abundant The Lead in several reins is open to the day, with much silver intermixed. The Copper has been ascertained by able Mineralogists to be of the (best quality, and the Black lead of a superior kind. Where the Mining Grounds are unworked—they are either in abeyance, from the want of sufficient Capital after a great preparatory expenditure, or are contiguous to Mines long open—and that have enriched their Possessors. Under circumstances so peculiarly propitious—favoured by much local patronage—sanctioned by the opinions of opulent and enlightened men—and encouraged by the knowledge of the wealth realized by Companies and Individuals, who have hither to monopolized the supply, —THE PROMOTERS propose to raise the Capital necessary to carry on operations with the spirit and success, that will ensure to Subscribers early and gainful returns. That Capital is divided into small Shares, to enable the small takers of Mines to invest their monies in an object to which they are attached and they will reserve *one-fourth* of the Shares for the Gentlemen in the Northern Counties who wish to subscribe.

To afford opportunities for subscribing, to persons distant from the Metropolis intending not to speculate, but to make permanent investments—THEY will receive applications for Shares until May 10th. After that day no application can be received; but the Shares will be immediately allotted, and a deposit of £5. per Share required. Such applications for Shares, with an undertaking to pay the deposits, which are to be forfeited if the Deed of settlement be not duly signed, or if future calls be withheld—may be addressed to,

Sir Peter Pole and Co. Bankers, Bartholomew-Lane,
London;
Matthew Forster, Esq. Solicitor, Newcastle-upon-Tyne ; and
John Wilks, Esq. Solicitor, Finsbury Place, Loudon

30th July 1825 (Carlisle Patriot)

On the 22nd inst., Richard Lowry, Esq. coroner, held an inquest at Nenthead, Alston, on the body of Hannah Briggs, aged 59, who was found dead on the 21st, at the bottom of a lead mine, called High-Whimsey-foot shaft, but by what means she was precipitated down the said shaft, there was no evidence to show, and the jury returned a verdict to that effect.

Hannah Briggs was buried 24th July 1825, aged 59, at St Augustine's, Alston.

12th November 1825 (Newcastle Courant)

TO SURGEONS

WANTED by the by the Governor and Company for Smelting down Lead &c., a regularly-educated SURGEON and MAN-MIDWIFE, to attend upon their Workmen and Families in the Parish of Alstone, in the County of Cumberland. His Residence must be fixed at Nenthead, about five Miles from the Town of Alstone the Situation must be entered upon on the 1st of January, 1826.

The Salary is liberal, and general Practice is allowed.

Candidates will be required to produce satisfactory Testimonials on or before the 17th December, 1825, on which Day the Examination will take Place, and the Appointment be made.

Further Particulars may be known on Application to Mr John Millican, Nenthead House.
Nenthead House, November 2nd, 1825.

15th November 1825 (Cumberland Pacquet and Ware's Whitehaven Advertiser)
Inquests held before Richard Lowry, Esq. one of the coroners for this county: - On the 7th inst. At Fair View, parish of Alston, on the body of Hannah Lee, aged 78 years, who on the preceding day was found dead at a place called Briggle Burn Hush, having accidentally fallen down a precipice, into it, and when discovered she was in a standing position, her person entirely covered with rubbish, excepting a small part of her head only, and of course she was smothered. Verdict, accidental death.

6th December 1825 (Tyne Mercury; Northumberland and Durham and Cumberland Gazette)
We are happy to be enabled to state, that the Alston lead mines have, for some time past, been more than usually lucrative. The agent of Greenwich Hospital has, within the last few days, made no less than 18 grants for new mines, and had applications for eight more. We believe this is unprecedented.

21st January 1826 (Carlisle Patriot)
An inquest (briefly noticed in our last) was held at Alston on Monday week, by Richard Lowry, Esq. upon the body of "Utrick Walton, aged 40 years, who died in consequence of a fracture received on the back part of the head, by a fall down a flight of stairs."—The deceased was attending one of those nocturnal meetings, falsely called in Alston "Days Works" held at John Pattinson's, Cross Key's public-house, on the 5th inst., where little else but drunkenness prevails. From the extreme state of intoxication in which this unfortunate man was at the time, it is supposed that he had, unconscious of being elevated above the ground floor, walked directly out of the room, the door of which is placed immediately at the top of a steep and high flight of stairs, and was thus precipitated down, and met with a premature end—Alston, Jan. 10.

28th January 1826 (Newcastle Courant)

A LEAD MINE AGENT

WANTED immediately, to undertake the entire management of a Lead Mine, at Bavington, Northumberland. He must be an active hardy man, not exceeding 40 years of age, perfectly acquainted with Lead Mining in all its branches, able to write a good hand, and keep correct accounts; to such a person, a liberal salary will be offered. Applications to be made to Mr Thomas Milner, Newcastle upon Tyne.
NB. None need apply who cannot produce a good Character Writing, for Ability and Honesty, from his last Employers.
Newcastle, 18th Jan. 1826.

The Law Advertiser for the year 1830, gives John Berkley, and Francis Ewart, as owners of Bavington Lead Mine.

25th February 1826 (Newcastle Courant)
Inquest
An inquisition was held on Saturday week, at Alston, before Richard Lowery, Esq., coroner, on the body of Ralph Martindale, who was found dead on the preceding day on Nenthead Common, without marks of violence on his person, or any indication that his death was otherwise than natural. Verdict to that effect.
Ralph Martindale married Elizabeth Lee 14th February 1807, at St Augustine's Alston. The funeral of Ralph Martindale, took place 12th February 1826 aged 66, at the Independent Chapel, Alston. The funeral of his wife Betty took place 16th July 1837, aged 74, at the Independent Chapel, Alston.

25th February 1826 (Durham County Advertiser)

29th July 1826 (Newcastle Courant)

VALUABLE LEAD MINES.
TO BE SOLD BY PRIVATE CONTRACT,

FIVE THIRTY-SECOND SHARES of all that valuable LEAD MINE called CUPOLO FIELD, near Cupolo Bridge, in the Manor of Whitfield, County of Northumberland.

Also, FIVE THIRTY-SECOND SHARES of CARLING FIELD LEAD MINE, near Cupolo Bridge, in Staward Manor, Northumberland.

These Mines are upon the same Veins on each Side of the River Allen, where Machinery may be applied to a considerable Extent. There are several other Veins with Ore in the same Leases near to these Veins. That Part of the Vein in Whitfield Manor is raising Ore, at a very low Rate, with two or three Partnerships of Men, in the main Limestone, and the Ground is all *Maiden Ground* never having been worked before. In Staward Manor, the Vein is near being, and is expected to be equally as good as the other Mine.

Also, FIVE THIRTY-SECOND SHARES of NEW STREAK LEAD MINE, at Pike Law, in Teesdale, Durham, held under Lease of the Earl of Darlington.

For Particulars, apply to Mr Donkin, Solicitor, Hexham; or Mr Ingledew, Solicitor, Dean-Street, Newcastle, who are authorised to treat for the same, and with whom Plans may be seen.

5th August 1826 (Carlisle Patriot)
Thomas Smith of Alston, labourer, was committed on Friday last, by the Rev. Benj. Jackson, to Carlisle gaol, for having on Wednesday the 19th ult., upon the high road between Alston and Garrigill, made a most wanton assault upon George Gargate, a servant man in the employ of Mr J. Watson, of Garrigill, by throwing several stones at him without any provocation, one of which wounded him severely in the back part of his head. The young man was for some days

after at times in a state of delirium, and is not yet pronounced out of danger by the surgeons. *See 21st October 1826*

19th August 1826 (Carlisle Patriot)

A Correspondent informs us that the Receivers of Greenwich Hospital paid the whole of the workmen in their employ at Alston on the 16th June, and that the proprietors of mines who had sold lead to these gentlemen received payment for it on Thursday last.

Another Correspondent says: −We are happy to announce that the distress alluded to by us in a former paper as prevailing at Alston, in consequence of the casual suspension of the accustomed pays by the receivers of the Greenwich Hospital, is now entirely removed, such payments having been made to the satisfaction of all parties interested; and knowing, as we do, the highly respectable character of these gentlemen, we are well aware that their exertions would not have been wanting had they suspected that it would have occasioned the slightest inconvenience to the public. We likewise understand that no specified time of payment had been fixed upon by the Receivers, but only reckoned upon by the public at the usual period, which certainly exonerates them from any imputation or blame.

31st August 1826

Death of George Craft

Although I have not as yet found a newspaper record relating to the death of George Craft, there is a Memorial Stone at St Mary's Abbey Church Yard, Blanchland. Robert Craft married Mary Kidd 4th July 1809 at Hexham.

16th September 1826 (Durham County Advertiser)
A melancholy accident happened yesterday se'nnight, in one of Col. Beaumont's lead mines, in the neighbourhood of Stanhope. As one of the workmen, named George Rain, was in the act of repairing a dangerous part of the roof of the mine, it suddenly gave way, and he was buried under a large mass of rubbish. After 13 hours' hard labour the unfortunate sufferer was got out a lifeless corpse. He has left a widow and four children to lament his loss.

George baptised 8th September 1822, died 2nd September 1835
Thomas baptised 5th December 1825, at Stanhope

30th September 1826 (Durham County Advertiser)
Deaths
At Egglestone, on Tuesday the 19th inst., in the 78th year of his age, Mr. John Barnes, lead mining agent to the Earl of Darlington, which situation he has filled under the late and present Earl for a period of 55 years, to the great satisfaction of his employers, and the comfort of the workmen engaged in the Teesdale mines. The feeling of respect universally entertained for him was fully testified by the numerous attendance at his funeral, of all classes in the neighbourhood. *See 27th December 1823*

21st October 1826 (Carlisle Patriot)
Thomas Smith was indicted for a gross and wanton assault upon George Gargett a youth about sixteen, in the parish of Alston—The facts detailed by the prosecutor were as follows: He was riding his master's pony along the road near Alston, and close by where the defendant was at work with others in a building, when the defendant said, “Whose cow is that?” — (it seems there is some vulgar meaning attached to this question peculiar to Alston)—to which the prosecutor made no answer. The defendant then said, “D—n thee. I'll make thee speak” and immediately threw a stone, which hit the prosecutor on the elbow; and not satisfied with this, he instantly threw another, which nearly took a fatal effect on the back of the head, by fracturing the skull. The poor lad was confined to his bed for two months, —and it was by the aid of a good constitution that he recovered at all. His evidence was corroborated by his father, who proved that the neighbours had been called in three times, when he was thought to have been dying; and the Jury, without a moment's hesitation, pronounced a verdict of Guilty. Sentence: Three months imprisonment in Carlisle gaol. *See 5th August 1826*

9th December 1826 (Durham Chronicle)
Marriages
At Alston, Mr Thomas Cain, of Nenthead, to Miss Proud, straw Hat Maker.
Thomas Cain married Frances Proud, at St Augustine's Church Alston, 23rd November 1826. See 16th July 1858, & 3rd January 1863.

TO BE SOLD

ONE-FORTIETH SHARE of BLAGILL LEAD MINE, on Alston Moor. Apply to Mr John Brown, Attorney, Newcastle, who is authorised to treat for Sale.

3rd November 1827 (Carlisle Patriot)

In last week's paper, we stated the death of Mr Wm Liddle, of Hayring, near Nenthall, Alston, by drowning in the Nent. His body, it appears, was discovered within a short distance of Foreshield Bridge. He left Alston, at eleven o'clock on the night of Saturday week, on his way home. He called at East Skelgill Gate-house, where he was strongly pressed to stay all night, as it rained heavily and was exceedingly dark, but refusing, he was supplied with a light for his lantern, and, after talking some time cheerfully with the gate keeper, he proceeded. The river Nent, on the east end of Nenthall-bridge, runs for 20 or 30 yards, very near the road, which is protected by a warren, but there is no wall nor paling between the road and the river. — At this spot it is supposed the deceased stumbled into the water. The lantern was found firmly grasped in his left hand bruises of consequence were discoverable on his body, and his money and papers were untouched in his pockets. Mr Liddle was agent at Grassfield and Galligill Syke North Vein Lead Mines, and of the latter he possessed a share. On the day of his decease he was appointed at Blagill Lead Mine; he was also extensively connected with many other mines in the manor of Alston Moor. In his occupation he was remarkably expert, and most willing at all times to give information or render assistance to others. His kind disposition and integrity of character gained him the love and esteem of all who knew him.

William Liddle of Hayring was buried at Alston, 23rd October 1827, aged 55.

6th November 1827 (Northumberland and Durham Gazette)

Married

At St Peter's, in Allendale, Northumberland, on the 31st ult. the Rev. Wm. Walton, incumbent of St Peter's, and chaplain to Col. and Mrs Beaumont, at Allenheads, to Jane, youngest daughter of the late Thos. Crawhall, Esq. of Allenheads.

15th December 1827 (Newcastle Courant)

VALUABLE

COLLIERIES AND LEAD MINES.

TO BE LET,

… Also, for such a Term as may be agreed upon, SEVERAL LEAD MINES, and VEINS of LEAD ORE, within the extensive Forest of Lune, where considerable Quantities of the finest and purest Ore are now raising, and may be seen, either at the Mines, or at the newly-erected Smelting Mills of Messrs Sherlock and Co,, at Newbiggin, near Middleton in Tees dale, who will furnish any further Particulars as to its Quality, and in the adjoining Manors of Lune, Holwick, Crosthwaite, Lonton„ Mickleton, Hunderthwaite, and Cotherston, in the Parish of Romaldkirk, and Northwest Part of the County of York, boundered by the River Tees, and the Marquis of Cleveland, on the North, and Maize Beck, with the Earls of Lonsdale and Thanet, on the West.

All the above Collieries are situated within a very short Distance of the Darlington Rail-Road.
Charles Raine, the Bailiff for the above Manors, residing at Lonton, near Middleton, will, on Application, shew the above Lead Mines and Boundaries.
For Particulars apply to Richard Dobson, at the Office of Streatlam Castle; or to Edward Steel, Colliery Viewer, Low Fell, near Gateshead; either o whom will receive Proposals until the 31st December next.
Streatlam Castle, near Barnardcastle, 8th Nov.1827.

29th December 1827 (Newcastle Courant)

TO MINERS

TO BE LET

THE FREEHOLD VEINS called HAREHOPE GILL, with two others, leading through the Farm called Sunnyside, situated in the Parish of Wolsingham.
For Particulars, apply to Mr William Little, Mining Agent, at Healey Field; or to Mr Jonathan Wooler, the owner. —Wolsingham, Dec. 18th 1827.

16 February 1828 (Durham County Advertiser)

AT a MEETING of the Inhabitants of Stanhope, held in pursuance of public notice, at the National School Boom, on Friday the 8th day of February, 1828, CUTHBERT RIPPON, Esq. in the Chair,

It was unanimously Resolved

That this Meeting views with serious alarm, the gradual and continuous decline in the price of lead.

That in the opinion of this Meeting, this depreciation is mainly produced by the increased advantages afforded to the importation of foreign lead and lead ore, by the reduction of duty, and the late commercial regulations.

That during the last ten years, the lead mines of this parish have afforded moderate profits to the adventurers, at an average price of £22. per ton, all of which save the richest (which description doth not include one-third part of those now working), must at the present price of £16. 10s. per ton be entirely abandoned.

That nine-tenths of the 8000 inhabitants of this parish are wholly dependent on the Mines, that a considerable reduction has already been made in the wages of Miners and Smelters, though in no relative proportion to the reduced price of lead; and while we acknowledge with gratitude this noble sacrifice on the part of the principal Mining Proprietors, we are aware such can only continue for a short time.

That a reduction has taken place in the numbers of workmen, whose sole refuge is in the poor rate; the demands' on which, and the Savings Bank, have, during the last year, steadily increased, and the fact is undoubted, that unless some relief be speedily afforded to the Mining Interest, the claims on the former will exceed the utmost value of the rateable property within the parish.

That to avert such calamity, to save our parish from general pauperism, and prevent the degrading necessity of applying to public charity, it is expedient to present Petitions to the two Houses of Parliament, praying them, without delay, to take our case into their serious consideration, and most especially to examine the propriety of increasing the duty paid on the importation of Foreign Lead and

Lead Ore, thus affording to the British Miner fair protection from the ruinous rivalry of foreign competition.
That Petitions, founded on these resolutions, be prepared and signed by the inhabitants of the parish.
That a copy of these resolutions be sent by the Chairman to T. R. Beaumont, Esq., and the Governor and Company for Smelling Lead, and to such other Noblemen and Gentlemen whose connexions with the county, or the mining interests, may warrant the intrusion of our situation on their notice.
That a copy of these proceedings be inserted in the following Newspapers, viz.: — Durham County Advertiser, Durham Chronicle, Newcastle Chronicle, Newcastle Courant, and York Herald.
That all expences attending these applications be defrayed out of the poor rate of the parish.
(Signed) CUTHBERT RIPPON.

1st March 1828 (Carlisle Patriot)
From a Correspondent: — "There is no class of society in the kingdom so likely to feel the full effects of the free trade or reciprocity system as the inhabitants of the mining districts; —we allude more particularly to the lead mines in our immediate neighbourhood, Alston, Garrigill, Weardale, Teasdale, &c. where nine-tenths of a population of thirty-five thousand are entirely maintained by working these mines. One of the measures of Mr. Huskisson's liberal system is a repeal of the duty on foreign lead, and a consequent reduction of price in the market of from £25 to £17 per ton. A few of the richest mines only can afford to raise ore to meet this price; —the greater number will be compelled to suspend their works altogether, and thousands of industrious men will be thrown out of employment without any resource but the scanty relief afforded by the parish. In Weardale the want of labour is more apparent than in the adjoining dales, and it is affirmed that if the present system be continued for a period of two years, the whole rental of the land in the dale will be insufficient to maintain the poor. It is not our intention to arraign Mr Huskisson's system of trade; it may be in the-end, for aught we know, beneficial to the nation at large; but we contend that the alteration should be gradually and gently introduced. In the present instance, the shock is too sudden to be averted, and its consequences too disastrous even for the mighty benefits contemplated. A giant oak is sometimes rent asunder in an instant by a stroke of lightning; but it can also be severed, and to a more useful purpose, by the gentle and scientific power of man."

15th March 1828 (Carlisle Patriot)
The distress in the lead-mines district continues to increase, and seems pregnant with the most alarming consequences to the small tradesmen, shopkeepers, and even farmers, in the range of its operation. The sufferers in and around Alston have prepared a petition to Parliament, praying for a revision of the laws relating to the importation of foreign lead and lead-ore. We hear of similar proceedings in Weardale. In a short time, an increased number of hands will be thrown upon the parish-rates or upon the public.

29th March 1828 (Newcastle Courant)
An inquest was held on Friday last, at Hunstanworth, on the body of Matthew Elliott, a miner, who, in going to his work, being nearly suffocated by the foul air

in a mine at Hunstanworth, had fallen down a shaft and was killed. Verdict—Accidental death.

Matthew Elliott, of North Gate, was buried at Stanhope 22nd March 1828, aged 36 years.

2nd April 1828 (The Times)

House of Commons Tuesday April 1st

Foreign Lead and Lead Ore

Lord LOWTHER presented a petition from a most respectable class of persons connected with the lead mines situate at Alston Moor, in the county of Cumberland, complaining of the depreciation in the value of British lead, in consequence of the low rate of duty payable on the importation of foreign lead ore. … He was aware that the importation of foreign ore was not the only cause of the depreciation complained of; it might in some degree be attributed to the general stagnation of trade, but the petitioners believed that the chief cause was the admission of foreign ore at a low duty.

Mr. C. GRANT said, his noble friend himself had the candour to allow that other causes than the importation or foreign ore had led to the distress complained of; and indeed, there were other causes, sufficiently obvious, which abundantly accounted for it. Circumstances which affected other speculations would also affect that of lend mining, and would cause a depreciation in the value of the article. One real cause, however, of the depreciation was, that other countries were now capable of supplying neighbouring states. This country used to supply many parts of Europe with lead, which now drew their supplies from Spain. France, Italy, and Holland, who formerly received their supply from England, for the last few years, had it from Spain. But still notwithstanding this competition, England continued annually to export 14,000 tons of lead. Now, when it was recollected that this country produced 40,000 tons of lead yearly, and exported 14,000 tons, while only 5,000 tons were imported, surely they could not say that the trade was in such a very deplorable state. Under all the circumstances, it appeared to him that the complaint of the petitioners was founded in misconception.

After a few words from Mr. P. THOMSON, Mr. WARBURTON, Lord LOWTHER, and Mr. HUME, the petition was laid on the table and ordered to be printed.

Parliament

House of Lords

Lead Mines

Lord W. POWLETT presented a Petition from the proprietors of lead mines in the county of Durham, to which he wished to call the particular attention of the Right Hon. Gentleman opposite. The Petitioners complained that the population in that part of the country, who chiefly subsisted by working those mines, were plunged in the deepest distress, in consequence of a clause in a recent Act of Parliament, by which the duty on the importation of foreign lead ore was reduced, and they prayed for relief. When he stated, that in Durham and the neighbouring county there were between 40,000 and 50,000 persons whose subsistence depended entirely on the mines, the subject would at once be recognised as one of considerable importance. The Petitioners stated that Spanish ore to a considerable amount was imported into this country, and he

was informed that the Spanish ore was of a much finer quality than the ore of this kingdom; and they wished to call the attention of the Right Hon. Gentleman to the inequality between the duty on lead ore imported, as compared with that charged on manufactured lead. The duty on the former was 10s. a ton; on the latter, It was upwards of 40s. They were desirous that these duties should be equalized. He must, however, in candour observe, that there had been so small an importation of the raw material for some years, that be did think it could base operated against this country. He believed the real cause of the depression arose from a very considerable quantity of the Spanish ore being sent to South America, which shut us out of that market. The mines of Spain yielded 40,000 tons of lead per year; and of that quantity 20,000 tons were exported. The subject was, however, well worthy of consideration, since the British mines employed an immense number of persons who had no other means of subsistence whatever.—Mr HUSKISSON said, an alteration had undoubtedly been made in the law on this subject; but he did not attribute the depression complained of to that circumstance. The scale of duty had been lowered with reference to lead ore; and an additional duty bad been placed on the manufactured article. That plan was adopted because it gave an opportunity for the employment of British capital, and the exertion of British industry, in the manufacture of the raw article. The importation had been, however, so small, that he could not attribute that as the cause of the depression which he, in common with the Noble Lord, deplored; and which he (Mr Huskisson) would immediately remedy, if he knew any means of doing so. In 1825 a prodigious quantity of lead ore was in the market; but in consequence of a stop being put in a great degree to building speculations, a considerable depreciation took place in the price. This was one of the results which ordinarily occurred in the alternations attendant on excessive speculation, and did not rise from the alteration in the law, the principle of which had, generally speaking, operated beneficially. He could not consent to repeal the law, a course which would not relieve the parties, and which would, in fact, seem like a recall of those measures with respect to the commercial policy of this country, in the propriety of which the House had agreed with him. — Mr WARBURTON observed, that lead mines of peculiar richness had been discovered in Spain, and from those mines she supplied the world with this article. That being the case, it was impossible that anything could be done by the Government to effect the change required by the Petitioners.

10th May 1828 (Durham County Advertiser)

Parliament

House of Lords

FRIDAY.

The Marquis of Cleveland presented a Petition, signed by 1000 persons connected with lead mines in Stanhope, in the county of Durham, against the importation of foreign lead.

10th May 1828 (Carlisle Patriot)

Inquest: May 7, at Alston, on the body of John Lee, landlord of the White Swan Inn there, who hung himself on Monday in his own hay loft by a rope fastened to a beam. He had shewn signs of mental derangement before committing the fatal act; the jury, therefore, returned a verdict of Lunacy.

21st June 1828 (Newcastle Courant)
Births
On the 13th inst., at Nenthead, the wife of Mr Isaac Hornsby, Lead Mining Agent, of a daughter, being her 20th child. *See 22nd June 1811*

26th July 1828 (Carlisle Patriot)
STATE OF THE NORTHERN COUNTIES
(from Bell's Messenger)
…I have travelled to this place from Penrith along the unfrequented route over Alston-moor, in order to visit the mining districts. As almost all travellers from Loudon to the north, and vice versa, choose the mail-coach road through Carlisle, the astonishing improvements made, during the last two years, in that dreary country, are scarcely known, yet they ought to be known. From the village of Mellerby, or Melmerby, about eight or nine miles short of Alston, the old road ascended the side of a lofty fell (as the mountain-moors of this country are termed), and was not only difficult and dangerous, but sometimes impracticable for many vehicles. Mr. McAdam has here commenced his new road, which winds round this fell to Alston. Beyond the town it begins again, crosses Alston-moor, and the extensive moors called West Allendale, falls into the old road at Whitfield, close to the fine mansion of Mr. Ord. the member for Morpeth, (whose estate, comprehending the whole parish, is an oasis in a desert, and contains some of the noblest timber, perhaps, in the world.) and recommences at the rocky heights beyond the river Allen, traversing East Allendale, and continuing nearly to Hexham, a distance of 20 miles. At
the end of Whitfield where the river divides East and West Allendale, the enterprise was appalling. The old road was frightful, rough, rugged, and precipitous. Carriages hardly ventured the descent, and the carts from the mines or mills unloaded the ore, and made several trips before the whole could be got up. A safe zig-zag road up the face of the heights, constructed with great skill and judgment, having an inclination of only about 1 in 15, now supersedes the former. This part of the road, besides its utility, adds greatly to the picturesque beauty of the scenery here. Its several terraces command a noble view of the rich landscapes in Mr. Ord's estate. From below, the aspect of the hill is like that of a vast fortress. The scarped rock rising perpendicularly to a prodigious height; the river, resembling a wide fosse, close to its base; the declivity, or glacis, on the other side; and the zig-zag road turning off successively at acute angles, and defended by parapet walls of masonry, give back to the mind the image of a Gibraltar—

"Where arrowy frize and wedged ravelin
"Weave like a diadem their tracery round
"The lofty summit of the mountain green."

This magnificent road is mostly constructed in the following manner: —The surface of the moors, to the depth of several feet, is peat-moss. Upon this substance timber is laid, then earth, then a layer of broken hayle (which is a sort of freestone), and lastly compact limestone, of the colour and of nearly the texture of flint, broken into small angular fragments. All these materials (except the timber) are at hand. Owing to the springy nature of the bed, the road in some parts (*mirabile dictu*) is actually elastic,—that is, it bends under a heavy weight,

though perfectly solid and secure. Substantial and even handsome stone bridges are erected over the torrents that descend from the heights, and the small rills are collected into neat semi-circular cisterns, formed of stone without cement, for the convenience of cattle, and even passengers. In all dangerous places, and, indeed, along the greater part of the road, walls constructed of oblong pieces of stone adjusted to each other, without cement, are built at the edge; and posts, painted black and white, are fixed at equal distances
as marks during the winter. It is a surprising work, and will be a lasting memorial of the talents of Mr. McAdam. Its value to the mines is incalculable.
The contiguous portions of the counties of Cumberland, Northumberland and Durham, subsist upon these productive sources of our national wealth. My object in visiting this wild country was to inspect the lead mines in the Alston district, which are little noticed by travellers. The mode of working them differs from that employed in Cornwall; but the Alston miners are now adopting many of the practices of their Cornish brethren with obvious advantage. One of the most valuable lead mines I entered; and you may not be displeased with some account of it.
The mine is the property of Greenwich Hospital, the grantee of this and other portions of the valuable estates forfeited by the Earl of Derwentwater. In consideration of a rent of one-fifth of the net produce, a lease of this (and other mines in the district) is given to a Company, who bargain with the miners to work out and wash the ore ready for the smelting-mill at so much per bing, which is 64 stone, or eight hundred weight. These bargains are important transactions. They take place every quarter, and as the rate depends upon the prospects of the mine (being les if favourable, and greater otherwise), much finesse and altercation precede the adjustment. The late bargain for this mine was 8s per bing, which is almost the lowest known rate; it has been as high as 50s.

22nd July 1828 (Tyne Mercury; Northumberland and Durham and Cumberland Gazette)

On Saturday, Sunday, and Monday week, it rained incessantly at Alston Moor, where the waters were greatly swelled, and some large trees carried several miles down the South Tyne by the violence of the flood. The river Nent, near its junction at Alston falls over a precipice of limestone into a narrow valley, where large masses of rock have fallen from the effect of similar floods. The bed of the river, and the tremendous rushing of so great a volume of water through so confined and rugged a channel, formed a terrible and sublime spectacle.

30th August 1828 (Newcastle Courant)

VALUABLE AND EXTENSIVE LEAD MINES,
SMELTING MILL FOR SALE.

Shortly will be put up for SALE by public Auction,
Unless previously disposed of by private Contract,

ALL the LEAD MINES, SMELTING MILL, ENGINES, and other Machinery and Utensils, with the FREEHOLD & LEASEHOLD LANDS & GROUNDS belonging to the “British lead Company,” situated at Brandon Walls, Rookhope, Muggleswick Common, Stotsfield Burn, and Thorney Brow, &c. &c. in the Parish of Stanhope, in the County of Durham.

Further Particulars may be known on Application to Messrs Forster, Solicitors, Library Place, Newcastle, who are authorised to treat for the Sale of the Premises; or to Mr John Walton, the Agent on the Premises, who will show the Property.

23 September 1828 (Tyne Mercury; Northumberland and Durham and Cumberland Gazette)

A small vein of lead ore has been lately discovered near the top of Yadmoss, by Messrs. Price, Featherston, Teasdale, & Co. of Newcastle, in the manor belonging jointly to the Commissioners and Governors of Greenwich Hospital and James Burnett, Esq. of Ovington. It is worked in a limestone stratum, called the Scarr Limestone, and contains a rib (from two to six inches wide) of a peculiarly refractory species of ore, which, on being reduced, yields lead containing 95 oz. of silver per fodder. This is the richest lead ore at present worked in the north of England.

11th October 1828 (Durham County Advertiser)

TO BE SOLD BY AUCTION,

At the Crown and Thistle Inn, Groat Market, Newcastle, on Thursday the 23d day of October instant, at 12 *o'clock at noon.*

(Mr THOMAS YOUNG. Auctioneer)

ALL the valuable LEAD MINES, for various terms of years, and SMELTING MILL, with the FREEHOLD and LEASEHOLD LANDS AND GROUNDS, in the parish of Stanhope, and county of Durham, belonging to the "British Lead Company," in the following lots : —

Lot 1. A LEAD MINE, called Stotsfield BURN.

Lot *2.* A LEAD MINE, at Brandon Walls, with a PARCEL OF FREEHOLD GROUND, small PLANTATION of Fir Trees, Agent's and Engineer's DWELLING HOUSES, Smith's and Joiner's SHOPS, STABLES, &c.

Lot 3. A LEAD MINE, at Thorney Brow.

Lot 4. A LEASE-LENGTH of the rich VEIN called MIDDLE HOPE. VEIN, situated at Boltsburn; and an unexpired term of 15 years in Mr Smith's MINING GROUND at Rookhope, through which pass some rich veins of lead ore.

Lot 5. A LEAD MINE, called Six Darg Mine near Wearhead.

Lot 6. A valuable SMELTING MILL, called FELDON MILL, and the DWELLING.HOUSES and OFFICES belonging thereto; together with TWENTY EIGHT ACRES OF LAND, or thereabouts, held by Leave of the Dean and Chapter of Durham.

N.B. All the Engines, Mills, and other Mining and Smelting Utensils and Apparatus, belonging to each Lot respectively, to be taken by the purchasers at a valuation.

Lot 7. THIRTY FIVE ACRES OF CUSTOMARY FREEHOLD LAND, called BOG ESTATE, with right of Pasturage over 400 acres of Common.

Further particulars may be known on application to Messrs FORSTER, Solicitors, Library Place, Newcastle; or to Mr JOHN WALTON, of Brandon Walls, the Company's Agent, who will shew the property.

4th November 1828 (Tyne Mercury; Northumberland and Durham and Cumberland Gazette)

Deaths

At Alston, aged 20, deeply lamented, Miss Walton, only daughter of Mr Jonathan Walton, formerly of Nest, near that place.

Mary Walton buried 26th October

At Alston, suddenly, aged 56, Mr John Haldon, innkeeper, much respected.

22nd November 1828 (Carlisle Patriot)

An extract from "History, Directory and Gazetteer of the Counties of Durham and Northumberland, published by Parson & White, 1828.

"THE LEAD DISTRICT is a bleak and rugged region of mountains, extending from Northumberland and Durham into Cumberland and Westmorland, and thence to the extremity of Derbyshire, being about 160 miles in extent but in this space the veins lie so low that they are not worth winking, except in the five counties just mentioned, and in the north western extremity of Yorkshire.

"The different coal strata rise and crop out east of the Derwent, where the uppermost strata of the lead measures are supposed to burst from beneath the lower coal seams. The lead sections are more regular than those of coal, and each individual bed is anticipated with great certainty by practical miners. From Healyfield and Blanchland on the Derwent, the mines first become of importance, and continue so to the very summit of Cross Fell. The richest mining fields in Northumberland are at Allenheads and Coalcleugh, where the mine measures dip to the north east, about one yard in twenty-seven. These, with the other five lead mines in the parish of Allendale, are the property of Colonel and Mrs. Beaumont, and produce on an average about 2,500 tons of lead per annum. The Manor of Alston, in Cumberland, contains 69 lead mines, which are, or have been worked; they are the property of the Commissioners and Governors of Greenwich Hospital, and are let to the London Lead Company, and private adventurers, who pay one fifth of the ore raised in. them for rent. Including Cross Fell, these mines yield on an average 7,600 tons of lead, yearly. In Weardale there are 36 mines, belonging to the Bishop of Dot ham, and principally occupied by Colonel and Mrs. Beaumont, they produce about 6,800 tons of lead per annum. The 38 mines in Teesdale are the property of the Marquis of Cleveland; and produce on an average 3,200 tons of lead every year. The adjacent mines in Westmorland, belonging to the Earl of Thanet, yield 620 tons per annum; so that the whole average produce of this rich portion of the mining districts amounts to no less than 20,720 tons of lead per annum, exclusive of a considerable quantity of silver which is extracted from the ore at the different smelting furnaces. Every ton of lead ore produces, on an average, about 9 or 10 ounces of silver, and in the year 1820, it is supposed, that 63,686 ounces of silver were extracted from the lead ore, at Langley smelting mill. Hutchinson says, "that one sort of lead which was brought to Newcastle for sale yielded between 30 and 40 oz. of silver per ton."

"In the lead formation, according to Dr. Thompson, there are seven beds or sills of coal, nineteen of limestone, sixty of plate or slate clay, and fifty of sandstone; but Mr, Winch, in his section, makes twenty-one limestone beds, of which the aggregate thickness is 96 fathoms. Some of the beds agree with those of the coal-field, viz. coal, shale, and sandstone; but other rocky masses also attend the lead measures. The sandstone and shale beds first rise from

beneath the coal formation. The slate sill is of a grey colour, and Is used as a roofing slate; the millstone grit is one of the uppermost strata on the Derwent, and is quarried for millstones; the grindstone sill, a fine grained yellowish sandstone, is the uppermost bed at Coalcleugh and Allenheads; hazle, tuft, and a variety of other Sandstones prevail, particularly in the lower part of the lead measures. The richest mineral depository is the rake vein; the principal veins in Northumberland extend nearly east and west, whilst the cross veins run from north to south, and are very irregular in their depth and breadth. The most remarkable cross vein, is called the Great Burtreeford and has been traced from the east Allen river, below Cation in Northumberland, to Lunedale, in Yorkshire. It throws more than eighty fathoms to the west, and the mines on the east side of it are generally of a softer nature than those on the west. The Whetstone Mea cross vein, divides into two branches southward of the west Allen; the eastern branch throws down to the west about 24 fathoms, and the western branch 18 fathoms to the east: they cross and intersect the mining field of Coalcleugh, through which three or four other veins pass in a parallel direction. At the west end of this mining field runs a rich vein, called the Bounder end. The next veins in succession to the west, are, the Moss, and Old Carr's cross veins, and the Black Eshgill, and Sir John's veins, which are followed by the Great Backbone, or sulphur vein, containing pyrites blended with copper ore. The flat or dilated veins, lie between two layers of stone, and are frequently discovered by the miners whilst they are working downwards in the rake veins. Sometimes when the miners have cut a drift through a twitch, the vein opens in a large and wide belly of pure and solid ore. Cavities have been found in the great limestone stratum that have yielded upwards of 1000 bings of lead. (A bing is 8cwt) But the ore is not always in a pure and solid slate, for the veins are frequently separated longitudinally into two or more divisions by a hard and heavy stone vein, which is technically called a rider. The most prevalent stone in mineral veins Is spar, of which there are four kinds, viz. Calcareous, Fluor, Cauk, Quartz, the latter of which is frequently very beautiful, being so fine and smooth as not to exhibit any grain, and so hard as to cut glass like the diamond. Fluor spar also occurs in a great variety of colours; but green, white, yellow, violet, red, and brown, are its most prevalent hues. Cauk, or barytic spar is commonly of a dull yellowish, brownish, or reddish white, and is very difficult to separate front the metallic ores. Large caverns are frequently met with In the lead mines. The insides of these cavities are frequently met with in the lead mines. The insides of these cavities exhibit all the variety, beauty, and splendour of the most curious grotto work, being formed by the variegated spar, shot into a diversity of figured crystals. But these caverns are never-so magnificent as when there is less or more of yellow copper ore, or of pyrites or black Jack in them, as these ores are found to produce in hard veins the most beautiful colours in the world.

“When it is ascertained that ores exist in any particular place, and can be worked to advantage, a shaft is sunk in the ground, or, if the situation will admit, a level, or adit, is driven. Means are also employed to remove water and destructive fluids from the mine. Choak damp is very common in lead mines; but the fire damp has not been met with, except in the Grand Aqueduct Levels called Nent Force, where it has been twice exploded. The level of Nent Force, from Old Hagg’s engine shift, is a stupendous adit, more than four miles in length; strangers, who wish to explore it, may be accommodated with boats and guides by applying at the Lowbyer Inn, near Alston.

"Besides the district just described, lead ore Is found in come of the northern parts of Northumberland. A strong vein is now worked near Fallowfield, that was drowned, but recovered about fifteen years ago. Strings of ore have been discovered on the coast at Ellwick, and on the eastern side of Holy Island. Arsenic is found in lead mines, but no Copper, as has been erroneously stated by some historians.

"The washing of lead ore, &c., has been greatly facilitated during the last thirty years by the introduction of crushing machines, stamping mills, slime pits, dollying, &c.; but a variety of circumstances combine to render the mines very uncertain as to the profit of the adventurers. They are, however, wrought with great spirit, and are not only productive of much wealth, but also give employment to a numerous class of industrious workmen. …"

2nd December 1828 (Tyne Mercury; Northumberland and Durham and Cumberland Gazette)

Marriages

At Alston, on the 26th ult. by the Rev. Edward Bigland, Mr Luke Pearson, of Allendale Town, Northumberland, to Jane, eldest daughter of the late John Little, Esq. of Raise House, near Alston, Cumberland.

10th January 1829 (The Times)

Public Sales

A fine Corn Estate, near Newcastle and Durham, lying well together. Intersected by the river Derwent, 15 miles from Durham, Newcastle, and Hexham, containing together about 3,200 acres of fine land, and let to respectable tenants, at rents producing about £2,700 per Annum. —By Mr. HOGGART, at the Mart, in February next, unless an acceptable offer should be made by Private Contract, by direction of the Executors and Trustees for Sale under the Will of the late Thomas Walker, Esq.,

THE Manor or Lordship of Waskerley, with the estates thereto connected, forming together a very Important and valuable property for investment of capital; containing altogether about 3,200 acres of fine land, the chief part in arable, producing abundant crops of corn, and near to the best markets, and from whence it is shipped for the London markets; the poor-rates and Assessments moderate, the tenants respectable, the farm-houses and buildings in good repair, the estate well stocked with game, and the River Derwent affording excellent fishing, as well as the miner streams and rivulets which Intersect the estate. There are about 400 acres of woods and plantations, of a most thrifty description, and rapidly increasing, so that in a few years the timber upon the estate will form no small feature of its value; a considerable income is already derived by the underwoods and thinnings. The property Is subdivided into farms in the chapelry of Shotley and parish, of Bywell, St. Andrew; a chief part in the county of Northumberland/ and the remainder in the county of Durham, comprising Waskerley Farm, Sanshllis and Hill Top, North and South Shotley and Mill, Field Head, North Snods, Shotley-hall (the residence of Thomas Walker, Esq.), South Snods, Bollisher, and Airyholme, and Snows-green. The farm-houses of a most substantial and superior description. This beautiful property lies nearly within a ring fence, under a fine system of cultivation, for which the agriculturists in these counties are

so justly distinguished; a portion of the pastures, meadows, and feeding grounds is attached to each farm. Particulars will be ready in due time; and any person now wishing to treat may have all inquiries satisfactorily answered, on application to Messrs. Lowdham, Park, and Freeth, Llncoln's Inn-fields; or to Mr. Hoggart, of Old Broad-street, Royal Exchange, where a map of the estate may be inspected.

7th February 1829 (Newcastle Courant)
On the 29th ult., Mr. Hugh Gill, of Garrigill Gate, near Alston was unfortunately killed in a lead mine, near the head of the South Tyne, by a quantity of rubbish falling upon him. He was a most worthy, and industrious young man.
Hugh Gill was buried at Garrigill 31st January 1829, aged 31 years.

10th June 1829 (The Scotsman)

ORGANIC REMAINS OF PLANTS.

To the Editor of the Scotsman.
Sir. —The interest you lake in every thing likely to advance the science of Geology, encourages me to solicit a small space in your widely circulated newspaper, to record what accidentally came under my view when lately at the river Derwent in the county of Durham.
To the ardour of M. A. Brongniart in the researches he has so successfully made in collecting materials for the physical history of the formations, which compose the crust of our planet, every geologist must feel deeply indebted. Although the world feel under many obligations to Cuvier, Sternberg, Boue, Brown, M. D'Urville, &c., for their able and unremitting exertions in this ancient and dark field of early existence, it has been reserved for this eminent young naturalist to present to the public a classification so natural and clear as greatly to facilitate the labours of those who interest themselves in such pursuits, and to aid them in recording the particulars which may accidentally come under their immediate notice. Impressed with the importance of this object I availed myself of the kindness of Mr. Dolphin, head agent to Messrs. Hall and Co., who solicited me to explore a vein called Jefferies Rake, in the Derwent mines, near Blanchland, in the county of Durham. Accordingly, on the 22d of April, Mr. Dolphin, a few friends, and myself, proceeded to our undertaking. Having travelled up the Adit about three quartets of a mile, we began to descend by the assistance of ladders. At the depth of about 55 fathoms below the surface, in a bed of sandstone 40 fathoms thick, to our astonishment we were gratified by the sight of some magnificent specimens of an ancient flora belonging to M. A. Brongniart's first period of vegetable creation. The two varieties I saw appear to belong to his third class, the "vascular cryptogamic." The first were Stigmariae (Lycopodiaceae). The second were magnificent specimens of great circumference of Sigellariae (Felices.) One of these last named specimens, which is situated in the space cleared out to get at the lead ore, stands erect, and its roots are firmly embedded in a thin stratum of bituminous shale, much carbonized. I should think the height of this prodigious fern stump may be about five feet, and its diameter probably exceeds two.
It has, I understand, been the opinion of some gentlemen, who have visited these ancient relics, that they have been washed into and deposited in their present situation by some aqueous revolution. To this conclusion I must object,

for two reasons: first, because the roots are firmly embedded in the shale, as if they had remained undisturbed in their original earthy envelope; and secondly, because you may discover in each cheek of the vein, other trunks of these members of the ancient flora in the solid ruck, the position and appearance of which are most consistent with the supposition that they grew on the spot where they are now found. The confused heaping, fracturing, and violence, which characterise alluvial action, are not seen here.

The essential character of this first vegetation is the predominance of vascular cryptogamic plants; and we have here a most striking example of the great development which the species in question had attained in this first period of vegetable creation, when the two principal agents, heat and moisture, had evidently exerted an extraordinary influence.

If the attention lately paid to the study of fossil conchology has been so highly instrumental in clearing up the many doubts respecting the different sedimentary formation—if the works of Cuvier and others, founded on the early observations and views of Werner, have afforded us so many interesting proofs of successive creations, from those of the early inhabitants of the deep, up to the most perfect formed quadrupeds may we not expect equal pleasure and instruction from an application to the study of these ancient vegetable remains, which will, when properly examined, greatly facilitate our knowledge of the forms, character, and qualities of the plants peculiar to each successive period, and of the degree of temperature and humidity which must have existed at the same time ?

I could say much more upon this instructive subject, and in praise of the natural way In which M. A. Brongniart accounts for the phenomena of the successive periods of creation as developed in its animal and vegetable tribes; but for the present I conclude by expressing my sincere wish that the views of this ingenious philosopher may be forwarded by the manifestation of a corresponding zeal among the promoters of this branch of the science in our own country.

I remain, Sir, your obedient Servant,

14, Great King-street. HENRY WITHAM.

11th July 1829 (Newcastle Courant)

Marriages

On the 1st inst., at Alston, Mr. Joseph Little, of Stanhope, in Weardale, to Miss Mary Millican of Nenthead, near the former place.

Joseph Little was born 15th December 1786, son of Joseph and Sarah Little of Tynehead, christened at Redwing Congregational Chapel, 1st January 1787.

Joseph Little married Lucy Pearson, 3rd October 1807, at Lanchester, Durham.

Children of Joseph and Lucy Little:

Sarah born 3rd April 1808, baptised, 4th September 1808, at Muggleswick, Durham. Sarah married Frederick Fenwick on the 15th of September 1829 at Stanhope.

Lucy Little died 21st October 1809, buried 23rd October 1809, aged 23 years, at Muggleswick, Durham, living at Watergate.

Joseph married Ruth Stagg 23rd April 1811 in Alston, St Augustine's, Joseph is listed as widowed.

Ruth Little died at Hillhouse, 28th December 1811, aged 27 years.

Joseph married Jane Fenwick 12th February 1816, at Gateshead St Mary's.

Children of Joseph and Jane Little:
Phoebe baptised 21st September 1817, died on the 10th of November 1824 aged 8 years
Mary Jane baptised 23rd November 1822,
William Fenwick, baptised 23rd November 1822, died on the 5th of December 1822, aged 11 months.
Jane Little (nee Fenwick) died 20th November 1822, aged 29 years.
Mary Millican was the daughter of John Vipond Millican and Francis Tinniswood, she was born 23rd January 1801.
Joseph Little and Mary Millican had two children:
John Tinniswood, baptised 2nd December 1829, died 16th June 1898 in Iron Bridge, Gladstone Twp., Algoma District, Ontario.
Francis Lucy baptised 5th July 1834 (died 16th July 1834), both at Stanhope.

The minute books of the Governor and Company for Smelting down lead with Pit Coal and Sea coal show:
12th July 1810 Joseph Little is appointed as agent to Stanhope mill at a salary of £130 per annum to commence from Midsummer last. (Replacing Robert Stagg who had been appointed to Stanhope Mill 13th April 1809). In 1812 Joseph is referred to as also being assistant to the Company Cashier.
The 1841 census shows at Nenthead Low Hill Top, John Millican, Lead mine agent, aged 60, his son John Millican, smelting lead agent, 30, and his wife Sarah Millican aged 30, and Mary Little, of Independent means, aged 40 (died 9th February 1851, aged 50, at Nenthead), and servants, Ann Tinniswood aged 15, and Elizabeth Tinniswood aged 10.
See 2nd March 1816, and 2nd September 1876.

TO MILLWRIGHTS AND OTHERS

PROPOSALS to be sent in to Mr Joseph Price, Glass Works, Gateshead, for a WATER WHEEL, of 24 Feet Diameter, 2½ Trod, the Difference between cast Iron and the best Memel Timber; to be constituted with three Stampers on one Side, and a Pair of fluted and plain Rollers on the other; the Rollers to be 14 Inches Diameter, for crushing Lead Ore, to be proportionally strong to the Wheel, and to be finished in a workman-like Manner, (subject to the Survey of two Millwrights, to call in an Umpire, if thought necessary); to be finished and to be put up by 20th March, 1830; at a Place called Yadmoss, in Alston Moor; the Wheel Case, &c. the Company will make ready for putting up the wheel at their own Expense; all the other Parts by Proposal as stated above.

Newcastle, 26th Nov. 1829

23rd February 1830 (Cumberland Pacquet and Ware's Whitehaven Advertiser)

A Petition was presented to the House of Commons last week, by Sir J Graham, from the owners and workmen of the Lead Mines at Alston Moor, in this county, complaining of severe distress. Lord Lowther, and Lord Wm. Powlett supported the petition, and bore testimony to the ruinous condition of the mining interests, and the consequent sufferings of the workmen.

An inquest was taken before R. Lowry, Esq. coroner, at Nenthead, in the parish of Alston, on the 11th instant, upon the body of Tamar Armstrong, aged 41 years. The deceased was subject to violent spasmodic affections, and in consequence of one of these attacks she died very suddenly.

Verdict—Died by the visitation of God.

Tamar Armstrong of Nenthead, aged 41, was buried 11th February 1830, at St Augustine's Alston

10th April 1830 (Newcastle Courant)

PARDON ASKED

WE, the Undersigned, JONATHAN THOMPSON, JOHN PATTINSON, & GEORGE PATTINSON, all of Nenthead, in the County of Cumberland, Lead-ore Miners, having on the 24th and 26th Days of October last past, assaulted Featherston Hodgson and Thomas Bowman, two of the Game-watchers for Mrs Beaumont, of Bretton Hall, whilst in the Discharge of their Duties, and for which Assault a Prosecution has been commenced against us, but in Consideration of our giving Security for our future good Behaviour, and thus publicly begging their Pardon, such Prosecution has been kindly withdrawn. Witness our Hands this 30th Day of March, 1830.

JONATHAN, THOMPSON, JOHN PATTINSON, His GEORGE X PATTINSON mark.

Witness, Chas. Head.

24th April 1830 (Newcastle Courant)

Births

On the 16th inst., at Nenthead, near Alston, the wife of Mr. Isaac Hornsby, of a daughter, being his 21st child by two wives.

See 22nd June 1811, 19th December 1835, 13th February 1869, 1st May 1869, 31st December 1870, 1st April 1882, and 23rd February 1901.

24th April 1830 (Westmorland Gazette)

EMIGRATION. —During the past week several families have passed through Penrith to proceed to Maryport for the purpose of emigrating to America and the British Settlements. Such is the anxiety of individuals to quit "the envy of surrounding nations," that the poor are petitioning their respective parishes to grant them aid, and which in a great number of instances has been complied with. The population of Knock, Dufton, and some of the adjoining townships, now begin to experience a decrease in the population. Numbers are now preparing in and about Alston Moor, and to all appearance this will be a memorable year emigration.

19 June 1830 (Newcastle Courant)

TO BE SOLD BY AUCTION,

At the Crown and Thistle Inn, Groat Market, Newcastle, on Monday, 28th June, 1830, at 12 o'clock at Noon,

At Alston, on the 21st ult. Mr. Tinniswood Millican, of Nenthead, to Miss Lucy Little, of the Bails, near the former place.
See 17th August 1844, 12th July 1865, 2nd September 1876, 24th August 1878, 5th April 1879, and 8th February 1896, 26th June 1897, & 12th March 1898.

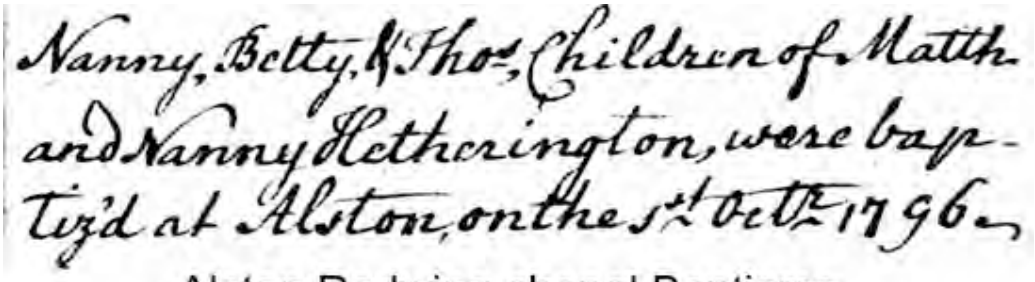
20th October 1830 (Cumberland Pacquet and Ware's Whitehaven Advertiser)
Marriages
At Trinity chapel, in this town on the 22nd Mr Henry Yeats, miner, Alston Moor, to Miss Elizabeth Craig.
Henry Yeats born 21st December 1806, baptised 25th January 1807, at Redwing, Alston Independent Chapel, son of Thomas & Mary Yeats, of Fairhill, Alston.
In 1831 & 1832, Henry Yeats, lead ore miner and his wife Elizabeth were living at Nattrass Gill.
Children of Henry & Elizabeth Yeats:
Mary born 21st February 1831, baptised 6th March 1831, at Redwing
Thomas born 28th August 1832, baptised 2nd September 1832, at Redwing
Ezekial born about 1838 at Penrith, died 1st qtr 1875, aged 37, at Newcastle.
Isabella born about 1840 at Penrith
Henry born 2nd qtr 1843 at Newcastle
George born about 1847 at Workington
In 1851, at Alloa, Clackmannnanshire, Scotland, Henry Yeats, Methodist Minister, aged 44, his wife Elizabeth 40, children, Mary 20, Ezekial 13, Isabella 11, Henry 7, and George 4. In 1851, Thomas Yeats aged 18, was visiting Robert Barron, cheese monger, aged 35, and his family at Lambton Street, Gateshead.
Thomas Yeats married Hannah Thomasine McCree 2nd qtr 1857, at Newcastle.
In 1861, at Napier St, Newcastle, Thomas Yeats, commercial traveller for Bacon Factory, aged 28, his wife Hannah T aged 24, children, Henry 3, Margaret J 1, brothers, Ezekiel, grocers assistant, aged 23, Henry, mechanic in iron foundry, aged 18, George, railway clerk aged 15, and sister Isabella 21.
In 1871, at Barrasford, Northumberland, Henry Yeats, widower, clerk & timekeeper, aged 61, born at Fairhill, Alston.
Probable death of Henry Yeats, 14th May 1878, aged 72, at Diana Street, Newcastle.

1st January 1831 (Newcastle Courant)
TO BE SOLD BY PRIVATE CONTRACT,
AN excellent, modern-built Freehold DWELLING-HOUSE, called MARTON HOUSE, furnished, and ready for immediate occupation with Coach-House, Stabling, out-Offices, and other Conveniences proper for the

Accommodation of a Gentleman's Family together with Gardens well stocked with Fruit Trees, and about sixteen Acres of Meadow and Pasture Land, including Belts of Plantations immediately adjoining.
The above Premises are situate near the Village of Longmarton, in Westmorland, within a Mile of the London and Glasgow Mail Road, and distant from Appleby 8 Miles, from Temple Sowerby, 5 Miles, and from Penrith, 12 Miles.
The Dwelling-House commands most delightful and extensive Views of the adjoining picturesque Country, and is well worthy the Attention of any Sporting Gentleman, being in the immediate Neighbourhood of excellent Grouse Moors, and the Vicinity abounding with other Game.
These Premises are equally well adapted for a Family desirous to possess a particularly healthful and pleasant Retreat, being situated in a fine Champaign Part of the Country, and at a convenient Distance from the Westmorland and Cumberland Lakes.
The Premises may be viewed by applying to the Gardener on the Spot; and further Particulars may be known on Application to Mr. Stagg, Middleton House, near Barnard-Castle or to Messrs R. and W. Bainbridge, Solicitors, Alston, near Penrith, either of which Parties will, at any Time previous to the 1st of March next, be ready to receive Offers from Persona desirous of purchasing. —Middleton House, Dec 22, 1830.

22nd January 1831 (Newcastle Chronicle)
Deaths
At Alston, on the 18th inst., aged 84, Mr John Dodd, formerly agent to the lead company, and merchant in Alston.
John Dodd aged 82, was buried at Alston 21st January 1831.
See Thomas Dodd & Family

25th January 1831 (Cumberland Pacquet and Ware's Whitehaven Advertiser)
Deaths
At Low Byer, near Alston, Thomas only son of Matthew Hetherington, of the Low Byer Inn, aged 34.
Thomas Hetherington, son of Matthew Hetherington and Ann Walton, (Matthew Hetherington and Ann Walton, married 15th September 1793, at St Augustine's, Alston)baptised 1st October 1796



Nanny, Betty, & Thos, Children of Matth. and Nanny Hetherington, were bapt. tiz'd at Alston, on the 1st Octr 1796.
Alston Redwing chapel Baptisms

Thomas Hetherington married Sarah Bulman 13th March 1817, at St Augustine's, Alston. See 4th February 1832

25th February 1831 (Durham County Advertiser)

On Friday evening last, some villain discharged a gun through the window of Middleton House, the residence of Robert Stagg, Esq., agent of the London Lead Company. Fortunately the family had retired to rest, and no further damage was done than the breaking about 7 squares of glass. A reward has been offered for the detention of the perpetrator of this diabolical outrage, but hitherto without success. Mr. Stagg bears a good character amongst the miners, for kindness towards them, and a disposition to alleviate their distress as far as lies in his power.

26th February 1831 (Newcastle Chronicle)

TOLLS TO BE LET,

5th March 1831 (Newcastle Courant)

Marriages

On the 22nd ult., at Alston, Mr. James Vipond, of Garrigill Gate, shopkeeper, to Miss Walton *(Elizabeth)* youngest daughter of Mr. Jonathan Walton, formerly a clogger at Alston.

James son of James Vipond (baptised 30th May 1761 at Garrigill) and Ann White (baptised 10th October 1762, married 16th September 1784), baptised 19th September 1803, James burial is recorded at Garrigill, 30th June 1838, aged 35.

In 1841, at Garrigill Gate, Elizabeth Vipond, aged 35, grocer, James 9, Walton 8, and Ann Vipond, aged 79, Independent.

Elizabeth died 19th December 1843, buried at Garrigill 21st December 1843, aged 42 years. Ann Vipond was buried at Garrigill 14th January 1844, aged 82 years.

In 1851, James, aged 19, and Walton aged 17, were working as lead miners, and lodging at Skydes, Garrigill, with Thomas Spark.

In 1851, Thomas Spark (son of Hugh Spark and Nancy Vipond), lead miner & farmer, aged 41, his wife Elizabeth (married at Alston 26th January 1837, daughter of Ralph & Elizabeth Winskill, baptised 7th April 1816) aged 34, children Vipond 13, Elizabeth 16, son Aeneas aged 1, lodgers James Vipond, lead miner, aged 19, Walton Vipond, lead miner, aged 17, and servant Elizabeth Dixon 15.

In 1861 at Garrigill Village, James Vipond, draper and grocer aged 20, his wife Ann aged 20 (Shaw, daughter of Thomas Shaw, married 24th June 1860), son Thomas W 4 months (died 13th March 1862, aged 15 months), brother Walton Vipond, assistant grocer, aged 28, domestic servant, Catharine Barron aged 26, and lodger May Ann Carrick, teacher reading, writing, arithmetic, aged 28 born Haltwhistle.

James and Ann had a son Jonathan who died 12th October 1869 an infant.

In 1871, at Garrigill Gate, James Vipond aged 39, draper, grocer and landowner, his wife Ann aged 30, children Elizabeth A. 9, Thomas W. 7, James 5, Mary E. 3, Minnie S. 5 Months, and servant Ann Watson 18.

In 1881, at Garrigill Gate, James Vipond aged 49, draper and grocer, his wife Ann 40, children Elizabeth A. 19, Thomas W. watchmaker, aged 17, James 15, Mary Eleanor 13, Minnie S. 10, Lillian 8, Isabel 7, Georgina B. 4, Clara M. age 1

In 1891, at Garrigill, James Vipond, draper & grocer, aged 59, his wife Ann 50, children Minnie S. 20, Lillian 18, Clara M. 11, and Hilda E. 9. James junior was at Hesley Well Row, West Allendale, listed as an insurance superintendent, aged 26.

James died 5th February 1900, aged 68, his wife Ann died 26th September 1913, aged 73.
In 1891, at Stanhope Street, Arthurs Hill, Newcastle, Thos. W. Vipond, watchmaker, jeweller, aged 27, his sister Mary E Vipond, dressmaker, aged 23, sister Georgina B Vipond 14, and visitor Elizabeth A Laws, (sister) married aged 29. Elizabeth Ann Vipond married William Laws, at Alston, 2nd quarter of 1881.
In 1891, at Front Street, Alston, William Laws, chemist's assistant, aged 40, children Karl A. 9, Sydney V. 7, Lybert A. 5, visitor Isabella Vipond 17, and boarder Mary P Laws 19. In 1901, at Market Square, Alston, William Laws, grocer on own account, aged 51, his wife Elizabeth A. 39, children Sydney V. grocer 17, and Hilda L. aged 7.
In 1901, at Garrigill, Ann Vipond, widow, living on own means, aged 69, children James, grocer & sub postmaster, aged 35, Isabel 27, and Clara Maria, 21(married William John Little, a traveller, born Alston, 4th quarter of 1905).
In 1911, William and Clara were living at South Tyne Cottage, Alston.
Mary Eleanor married Joseph Thomas Pragnell, in 1911, Joseph Thomas Pragnell, aged 50, a shipping clerk, born Yeovil, Somerset, his wife, Mary Eleanor aged 43, and son Thomas 3 years, living at 20 Whitley Road, Whitley Bay.
In 1911, at 36 Grove Street, Newcastle, Ann Vipond, widow, aged 70, son Thomas Walton, watchmaker, shopkeeper, single, aged 47, daughters Lillian Vipond, single, aged 38, Hilda Evelena Vipond, telephone operator, aged 28 Tybert Aubourne Laws, grandson,shipowners clerk aged 25, born Alston.

10th June 1831 (Durham County Advertiser)
The Pitmen. —The men belonging Hetton Colliery, and who were recently bound to the Owners of that concern, have again quitted their employment, on account of some half dozen or eight lead-miners from Weardale having been set to work in the pits, and whose discharge they insist upon. This dictation on the part of the pitmen to their employers is sufficiently bad, but we understand it does not stop here, for the Hetton men and some others are at this moment actually attempting to fix the prices which the farmers shall charge for their wheat, butter, milk, &c., and in some cases the rent which the landlord shall receive! They also require that women employed in the fields shall be paid two shillings and sixpence per day during harvest and not less than one shilling per day at all other times; and they threaten punishment to the women if they accept inferior terms. What the next demands of these unreasonable men will be, we are at a loss to imagine, but it appears to us certain that if they persevere in their present illegal course, they will ere long bring down upon themselves the vengeance of the offended laws of their country.

25th June 1831 (Carlisle Patriot)
Inquests held before R. Lowry, Esq., coroner: At Nest, in the parish of Alston, on Sunday last, in view of the body of Teasdale Stephenson, aged 15 years, who was accidentally killed, on the Friday preceding by falling from the top of a waggon (which he was driving in a mine called Hudgill Burn), the wheel of which

passed over his head, and so severely fractured his skull that he died instantly.. Verdict accordingly.
Joseph Stephenson married Hannah Todd 17th May 1804, at St Augustine's, Alston.
Children of Joseph and Hannah Stephenson:
William born 2nd February 1806, 1st son of Joseph Stephenson, Alston miner, by his wife Hannah daughter of William Todd.
Ann born 21st August 1809, 1st daughter of Joseph Stephenson, Hudgill miner, by his wife Hannah daughter of William Todd.
Joseph born 20th February 1812, 2nd son of Joseph Stephenson, Hudgill miner, by his wife Hannah daughter of William Todd.
Teasdale baptised 24th February 1817, Teasdale Stephenson of Low Nest, aged 15, was buried 19th June 1831, at St Augustine's, Alston.
Possible Children of Joseph and Hannah Stephenson:
Elizabeth baptised 10th March 1822
Mary baptised 10th March 1822
Hannah baptised 30th January 1825
Sarah baptised 25t November 1827
Jane born 2nd September 1830, baptised 29th November 1830, at Alston Wesleyan Chapel.

2nd August 1831 (Cumberland Pacquet and Ware's Whitehaven Advertiser)
Deaths
At Cumberland Row, Newcastle upon Tyne, Ruth wife of Mr Joseph Dickinson, of Alston, aged 39.
Ruth Dickinson aged 39 was buried at Alston, 24th July 1831.
Joseph Dickinson married Ruth Rowell 28th October 1823, at St Augustine's, Alston.
Ruth Lancaster Dickinson, daughter of Joseph and Ruth Dickinson, was baptised 26th August 1824 at St Augustine's, Alston.
In 1851, at Townfoot, Alston, Joseph Dickinson, widower, land surveyor, aged 54, and servant, Catherine Pearson, house servant, aged 24.
See Administration of Joseph Dickinson 1854.
In 1861, at Main Street, Alston, Ruth L. Dickinson, landed proprietor, aged 36, and servant Jane Hill, domestic servant, aged 24.
In 1871, at Beaconsfield, Little Woolton, Lancashire, Daniel James, widower, merchant, aged 68, born New York, USA, 3 sons, aged 19, 17, and 16, visitors, Ruth Dickinson, 46, Lucy Arrow, widow, aged 45, and Lucy M Arrow 18, and 5 servants.

Ruth Lancaster Dickinson, married Daniel James, (his 3rd wife) at Alston, 5th July 1871.
See 18th July 1871
Daniel James died 27th November 1876, probate shows effects of £45,000.
In 1881, at Beaconsfield, Little Woolton, Lancashire, Ruth L. James widow, annuitant, aged 56, and 5 servants.
In 1891, at Coton House, Churchover, Rugby, Warrwickshire, John Arthur James, living on his own means, aged 38, his wife Mary V aged 29, stepmother, Ruth L. James, widow, living on her own means, aged 66, niece, Helen M James 1, Mother in Law, Prudence P Cavindish Bentich, married,

aged 64, cousin Mary Leslie aged 32, visitors, Isabel Faquhar aged 32, Helen L Faquhar 31, and 23 servants.

Ruth Lancaster James of Beaconsfield, Little Woolton, near Liverpool, died 4th April 1907, probate to George Wright Mumford, and John Arthur James, effects £54,836 6s 8d; re-sworn, £56,300 11s 8d.

23rd September 2006 (Cumberland and Westmorland Herald)
Spotlight on history of threatened hospital

Ruth Lancaster James Cottage Hospital, Alston
Paper presented by Alastair Robertson to the Alston Moor Historical Society:

…The first initiative came in 1895 from Miss Ada Richardson, who wrote to the RDC asking for consideration to be given to the provision of a trained nurse for the Alston area. The request was turned down as the RDC had "no means at their disposal" for furthering the objective. However, in 1898, the RDC decided to apply for urban powers under the Public Health Acts of 1875 and 1890.
In 1902, the isolation hospital committee recommended that a site be sought for a new hospital and that, in the interim, a temporary building be found. Haltwhistle Council was invited to join the project. While in modern times Alston has little affinity with Haltwhistle, it was then the easiest large town to get to as it was at the end of the railway line which was the main mode of transport in and out of Alston. Many workers in the Alston area lived in Haltwhistle and used the train to get to work.

NOT HAPPY
A year later, a plan supported by both councils was prepared for a joint isolation hospital. However, the medical officer was not happy with the proposed site and asked for the whole plan to be reconsidered. By the end of 1903, after the consideration of a number of existing buildings, only a house at High Shield Hill was regarded as suitable but it was in need of repair. A further report was requested.
At this point in the story, a woman called Ruth Lancaster James was called upon to play a major role. She was a resident of Woolton, Liverpool, but owned estates on Alston Moor and was very generous to local good causes, one of her most significant gestures being the paying off of a large debt on the Fairhill recreation ground.
She was anxious to do more and responded positively to a petition she received for the building of a hospital.
In 1906, plans were drawn up for a cottage hospital and, in 1907, permission was granted for a sewage drain to be laid beneath the road to the cemetery. One feature of the new building was the provision of modern-style flush toilets a novelty at the time.
Mrs. James had endowed the project with £5,000 for building and upkeep. This inspired other legacies to be made. The cost of the building was £2,026 and it was duly opened in 1908 by Lady Mabel Howard. Mrs. James did not live to see it open as she died in 1907.
Some of the money was used to purchase a three-acre field in front of the new building and this proved to be an inspired move as there were

soon to be buildings on the other three sides, but the frontal views were preserved for posterity.

INSURANCE SCHEME

Treatment was not free at the point of delivery. To help ease the burden of payment, a form of insurance facility known as the Recommend Scheme was introduced in the 1920s. Organisations were able to join by payment, on behalf of their members, the sum of eight guineas per annum. Individuals were also able to join by paying one penny per week. At that time, staying in the hospital cost two guineas per week and an operation cost 11 guineas. There was an element of means testing as anybody with an income over £250 per annum was subject to an additional levy.

The first doctor was a local man, Stewart Carson, who worked on the Moor for 45 years and was a prime mover of the hospital project. In 1928, after he died in 1925, the building of a memorial was inaugurated by a donation of £200 from local businessman Isaac Walton. The appeal was to reach the target of £1,200.

The demands placed on the hospital grew and there were many accidents in the mines and quarries. It was clear that an extension was required and this was opened in 1929. While main contractors Craig Brothers and Keartons did much of the work, they were assisted by Vieille Montagne miners (who had the benefit of their own hospital fund) in their spare time. The company donated a great deal of material. …

FATAL EXPLOSION. —A dreadful accident happened at the Long Clough lead mine, near Alston, on Friday last.. As a young man, named Thomas Dickinson,

was in the act of blasting a stone in the mine, a sudden explosion took place, and a large piece of the stone striking him upon the head, he was so much injured that he died instantly. An inquest was held upon the body of the unfortunate youth, on Saturday, when a verdict of "accidental death" as returned.

Thomas Dickinson, aged 18, was buried at St Augustine's, Alston 11th September 1831.

19th November 1831 (Westmorland Gazette)

BLACK LEAD MINES OF SEATTER *sic (Seatoller)* **FELL.**

About seventy years ago, a person who possessed a part the mountain contiguous the mines determined to obtain a share of the rich mineral. Here, with great labour, he sunk a shaft, which carried diagonally till he entered the mines, and with secret joy continued his depredations for some time undiscovered. At length his fraud was detected, and he was tried at Carlisle. The peculiarity of his case had no precedent. He saved his life; but an Act Parliament was passed 1752 to secure this valuable property; by which the stealer and receiver are both subjected the same punishment as for felony. Wad, or, as is improperly called, black lead, is not found in regular veins, but in lumps and irregular masses, several of which weigh four or five pounds. Some of these pieces are hard and gritty, and of little value; others are soft, and of a fine texture, and worth four guineas a pound. It is described as lying in the mine in the form of tree, having a body or root, from which proceed veins or: branches in all directions; the body is the finest wad, and the branches are an inferior quality. Such is the richness of the mines, that in the space of half hour, a single workman can obtain as much of the mineral will sell for one thousand pounds. When the mines are opened, sufficient quantity is procured to answer the demand. The wad of the best quality is packed in barrels, and conveyed under a strong guard to Kendal, whence it is sent to London by waggons, the proprietors of which give a bond for its safe delivery. The inferior sort is conveyed by land to Ulverston, whence it is shipped for the metropolis. Of late years apprehensions have been entertained that the supply of this useful article would fail; but larger quantities have since been procured, and the mines have proved more productive. Dr. Merret and some others, have supposed that these are the only wad mines in the world but that is not the case. A mineral of similar nature, though of inferior quality, and obtained only in small quantities, has been discovered in Scotland, Spain, Germany, and the East indies. The principal consumption of the mineral consists what all called blacklead pencils, which have acquired so much reputation abroad under the title of *Crayons d' Angleterre*. It is bought by the pencil-makers in London, who attend a sale of it in Essex-street, on the first Monday in every month,— *Guide to the Lakes*.

26th November 1831 (Carlisle Patriot)

Mr. Beaumont, M.P. for the county of Northumberland, who on the recent death of his mother, Mrs Beaumont of Portman-square, succeeded to her immense freehold estates, as well as valuable lead mines, in the north of England, will, it is said, shortly be raised to the dignity of the peerage.

30th December 1831 (Durham County Advertiser)
On Saturday last, some hundreds of pitman from the neighbouring coal-mines assembled at Waldridge Colliery, near Chester-Le-Street, where they forcibly stopped the steam engine, and threw several metal tubs down the shaft; their object being to deter a party of lead-miners who had been brought to supply the place of some refractory colliers, from working. It was found necessary to apply for the assistance of a military force, and a troop of the 2nd Dragoons or Queen's Bays having in consequence arrived, the pitmen took their departure, and the lead-miners now pursue their labours unmolested, under the protection of the military.

28th January 1832 (Carlisle Patriot)
An inquest was held at Nent Head, in the parish of Alston, on Sunday last, upon the body of Joseph Hayton, aged 52 years. He was found dead in bed in the King's Head public house, at Nent Head; and no marks of violence appearing upon his body, the Jury returned a verdict of "Died by the visitation of God."
Joseph Hill Hayton, of Nenthead, was buried 2nd January 1832, aged 52, at Alston.

Robert Hayton, born about 1747, died 1820, buried 8th November 1820 aged 73 at Alston, married Ann Hill (daughter of Jonathan and Mary Hill, baptised 30th May 1748 at Lanchester, Durham) on 15th February 1771 at St Thomas, Stanhope, Durham, witnesses Ra. Westgarth and Jno. Hill.
1. Mary baptised 16th January 1771, at St Thomas, Stanhope,
2. Ann baptised 3rd January 1773, Stanhope, Durham.
3. Robert baptised 25th December 1774, Stanhope, Durham.
4. Jonathan born about 1777
5. Joseph Hill born about 1780
6. Jane born about 1782

Ann Hayton nee Hill buried at Alston 27 April 1795 aged about 46 years.

4th February 1832 (Carlisle Patriot)
On Tuesday last an inquest was held at Alstone, before R. Lowry, Esq., coroner, in view of the body of Mr Edmund Bulman, blacksmith there, aged 66, who whilst at work the preceding day, fell down in a fit of apoplexy, and suddenly expired. Verdict—Died by a visitation of God. Mr Bulman was an old inhabitant of Alstone, and highly respected.
Edmund Bulman buried 1st February 1832, at St Augustine, Alston, aged 66.
Edmund Bulman married Sarah Walton 30th May 1790 at St Augustine, Alston.
Children of Edmund and Sarah Bulman:
Joseph baptised 24th June 1792, at St Augustine, Alston
William baptised 5th January 1794, at St Augustine, Alston
Sarah baptised 31st January 1797, at St Augustine, Alston.
See 25th January 1831

Sarah Bulman snr. died 28th December 1851, aged 75, at Alston

10th March 1832 (Carlisle Patriot)
Inquest: —On Wednesday last, at Welgill Dyke-heads, in the parish of Alstone, (also before R. Lowry, Esq) in view of the body of John Armstrong, aged 64

years. The deceased was found dead, on the day preceding the inquest, on a common public highway, leading from Nenthead to Brownley Hill. There were no marks of violence upon the body of the deceased; and how or by what means he met his death, could not be ascertained at the inquest. Verdict—Died by the visitation God.

John Armstrong of Welgill Dyke Heads, was buried 8th March 1832, aged 64, at St Augustine, Alston. Possible baptism, John, son of John Armstrong of Nentsbury, baptised 15th August 1767, at St Augustine, Alston.

24th March 1832 (Carlisle Patriot)

CHILD BURNT.— A most distressing accident occurred at Nenthead in the parish of Alston, a short time ago. Mary Bond, a little girl about six years old, had been left along with another child in her fathers house, and, whilst playing near the fire, her clothes caught fire, and she was so dreadfully burnt that she lingered in great agony until Saturday last, when she expired. An inquest was held upon the body, by R. Lowry, Esq. coroner, and a verdict of "accidental death" returned.

7th April 1832 (Newcastle Courant)

EMIGRATION. The Commissioners appointed to enquire into the subject of emigration to the British colonies in North America, have issued a notice, dated from the Colonial Office, in which they give some useful information to persons desirous to emigrate. They commence by stating the nature of the assistance which will be afforded by government to emigrants, and proceed to remark upon various other subjects connected with our North American possessions. Government, they state, will not grant any pecuniary aid to emigrants nor will they, after their arrival, be provided with grants of land, gifts of tools, or a supply of provisions. The land which is for sale will be open to public competition, and therefore the price must depend upon the offers made; generally speaking it will hardly fetch less than from 4s. to 5s. per acre; indeed, in good situations, it has lately realised 7s. 6d., 10s., and even 15s. Government, however, though declining to afford pecuniary assistance, have been at some pains to afford facilities to emigrants upon their arrival, and with this view agents are to be maintained at the principal colonial ports, who will gratuitously give every requisite Information to persons upon their first landing to protect them against imposition, and point out to them the most advantageous line of conduct to be pursued according to circumstances. In cases, also, where a private engagement cannot immediately be obtained, these agents will procure employment in some of the public works in progress in the colonies. In order to provide against, frauds, and also to prevent an improper expenditure at the first moment of arrival, it has been arranged that money may be mode payable there, instead of giving it into the hands- of emigrants in this country. Money may be paid into the hands of Messrs Smith, Payne, and Smith, who wilt give letters of credit, so as to enable the emigrant to reserve the amount in the Canadas. They will not, however, take a less sum than £20 on account of any one individual. The best months for leaving England are stated to be March and April, as those who emigrate later do not find employment so abundant, and have, of course, less time before the approach of winter. The Commissioners suggest, that persons proceeding to Canada should also be provided with the means of paying for the journey, which they may have to make after their arrival at

Quebec. The cost of conveyance will of course depend upon the distances but the average appears, to be at the rate of 180 miles for about 7s. Passages from London to Quebec or New Brunswick may be engaged either inclusive or exclusive of provisions. In the former case, the price is about £6; in the latter £8. But, from Liverpool, Greenock, and the principal ports of Ireland, it is a good deal lower. In fact, in March and April, the Commissioners say it may probably be obtained from Dublin for 35s., or 39s., but the prices increase as the season advances. The Colonies to which emigrants to North America can proceed with the most advantage are stated to be Lower Canada, Upper Canada, and New Brunswick. The following is a correct list of the prices of grain and wages in Lower Canada: — Wheat per bushel 4s. 6d., Rye about 3s., Maize 2s. 6d., and Oats 1s. 3d. Wages of labourers 2s. 6d. per day; shipbuilders, carpenters, joiners, coopers, masons, and tailors, 5s. per day. From a calculation made with respect to Upper Canada, it appears that the yearly wages of labourers there hired by the year, are from £27 to £30, monthly wages from £1 10s, to £3 10s; daily wages from 2s. to 3s. 9d. In all the above rates of wages, board and lodging ore found by the employer; without board, daily wages vary from 3s. 6d. out of harvest, to 5s. in harvest time. The wages given to mechanics may be stated to be from 5s, to 7s. 6d. per day. In New Brunswick, the expense of living, and the rate of wages, is somewhat the same as in Lower Canada; but it may be remarked that when labourers have became better acquainted with the work of a particular colony they may be able to get increased wages. The mechanics most in demand are those connected with house building. Shoemakers, tailors, and ship-builders also, find plenty of employment. The following are the prices of a few articles of necessity in New Brunswick: —Bread, the 4lb. loaf, 10d.; Beef, per stone, 3s. 3d.; Mutton, 2s. 6d.; Pork, 2s. 0½d.; Veal 2s. 4d., Salt Pork, £4 15s. per barrel. Coals are about 30, per chaldron. House rent at St. John's is from £5 to £6 for families occupying one room, and for families occupying two rooms, from £6 to £10.

14th April 1832 (Newcastle Courant)

TO BE SOLD BY AUCTION,

At the Low Byer Inn, Alston, on Thursday the Third Day of May next between the Hours of Four and Six o'clock in the evening,

ALL those SIX DWELLING HOUSES, with the Out-houses and Appurtenances, commonly called Over-Water-Houses, situated at Nenthead, in the Parish of Alston, in the County of Cumberland, and now in the Occupation of Michael Walton and John Walton, and their Under- tenants. And also, all that Croft behind the same, containing three Quarters of an Acre of Land, or thereabouts. And also, all that Allotment, or Parcel of Pasture Ground, situate near Nenthead aforesaid, containing 70 Acres, or thereabouts, and now also in the Occupation of the said Michael Walton and John Walton, or their Under-tenants. Further Particulars may be known, on Application to Mr Jasper Gibson, Solicitor, Hexham.

14th April 1832 (Newcastle Chronicle)

On the 6th inst. a coroner's inquest was held on the body of John, son of Mr. Thomas Lee, aged 22 years, of the Row, near Barhaugh, Northumberland, who unfortunately was killed at the bottom of a shaft in a lead mine near Barhaugh,

12 fathoms deep, by the falling of some stones out of a kibble, as some persons at the top were drawing it up. Verdict —accidental death.

In Kirkhaugh Church Yard:

Sacred
to the memory of
Thomas Lee of Low Row
who died June 5th 1846
aged 6- years
Also of Ann his wife who died
Dec 22 1844 aged 57 years
Also John their son who died
April 4 1832 aged 22 years
Also of Ann their daughter who died
August 8 1844 aged 31 years
Also of William their son who died
March 7 1826 aged 2 years
and was interred at Alston.

Source: Transcript at Newcastle City Library

17th April 1832 (Cumberland Pacquet and Ware's Whitehaven Advertiser)

Great numbers of the Alston Moor lead-miners are daily quitting that part of Cumberland for Newcastle, where they meet with instant engagement in the Coal-mines and make good wages.

21st April 1832 (Newcastle Chronicle)

CAUTION.

WHEREAS several Licensed Keepers of Public Houses and Retail Dealers in Spirits or Wines not residing at Allenheads, have been in the Habit of attending Allenheads at the Annual Ray Day of Mr. Beaumont, M. P. to his Workmen;

Notice is hereby given to all Licensed Keepers of Public Houses, and Retail Dealers in Spirits or Wines, who shall attend the said Pay Day at Allenheads, this Year, or in future, that according to the Excise Laws thereon, they render themselves liable to a Penalty, and that such Penalty is £50 for each Offence.

And Notice it further hereby given, that all such Penalties will be strictly enforced at the ensuing Pay Day, and on all future Occasions. —April 17, 1832.

11th May 1832 (Durham County Advertiser)

On Tuesday last, 63 pitmen and their families were ejected from their houses at Felling Colliery, and on the same day several were also turned adrift from Fawdon Colliery. No resistance was offered at either of these places, the military having been present at both. Several lead-miners have passed through this city since our last, on their way to Hetton and other Collieries, where they are engaged to work in the coal mines.

12th May 1832 (Newcastle Journal)

Alston Moor. During the last week upwards of a hundred individuals have left Alston for the purpose of emigrating to North America by the ship Samuel, now lying at Maryport, bound for Quebec. The persons thus expatriating themselves,

are chiefly miners, who, from the ruinous depression of the lead trade, have long been out of employment, exposed to a situation of extreme misery and want. They are sent from Alston by means of a subscription raised in their behalf, and many of the suffering heads of families feel that they are driven from their native home to seek a precarious subsistence in the gloomy forests of Canada. Thus are we, step by step, losing the real strength of our population, and well may the people of Alston Moor, who, though not Political Economists have at least common sense, exclaim, "So much for the Free Trade system, which within one twelve-months has deprived us of about two thousand of our inhabitants, who in better times used to diffuse plenty to all around, by spending their earnings amongst their neighbours!
The Ships List, see 2nd June 1832, below, indicates the "Samuel" sailed from Whitehaven, not Maryport.

19th May 1832 (Newcastle Journal)
Marriages
On the 12th inst., at Alston, Mr Thomas Hardy, lead miner, Fair Hill, to Miss *Jane* Craige, of Jolly Board-house, near Alston.
Christopher Hardy married Ann Green 26th December 1793, at Knaresdale.
Children of Christopher and Ann Hardy:
Mary baptised 4th April 1795, St Augustine's, Alston
Thomas born 9th August 1798, baptised 20th August 1798, St Augustine's, Alston
Ann baptised 19th July 1801, St Augustine's, Alston
Sarah born 14th March 1805, baptised 17th March 1805, St Augustine's, Alston
Thomas Hardy born June 27 1808, 2nd son of Christopher Hardy, Newshield, miner, by his wife Ann daughter of Thomas Green, St Augustine's, Alston
Hannah born 5th May 1811, baptised December 1811, St Augustine's, Alston
In 1841, at Fair Hill, Christopher Hardy, lead miner, aged 70, and his wife Ann aged 70.
Christopher Hardy died 1st quarter 1845.
Ann Hardy died 3rd quarter 1856.
In 1841 at Fair Hill, Alston, Thomas Hardy, lead miner, aged 30, his wife Jane 25, children, Christopher 8, Thomas 4, and John 1.
In 1851, at Melmerby, Thomas Hardy, gamekeeper, aged 42, his wife Jane (born Whitehaven) aged 38, children, Christopher, lead miner, aged 18, Thomas, lead mine labourer, aged 14, Ann 8, Frances 6, and William 3.
In 1861, at Melmerby, Thomas Hardy, gamekeeper, aged 52, his wife Jane 49, children, John, post messenger, aged 21, Frances, house servant, aged 16, and Lillah 8.
In 1871, at Gale Hall, Melmerby, Thomas Hardy, gamekeeper, aged 62, his wife Jane aged 59, and daughter Lillah aged 18.
In 1881 at High Aimshaugh, Leadgate, Alston, Thomas Hardy, retired gamekeeper, aged 72, and his wife Jane aged 69.
Thomas Hardy died 17th June 1890, aged 83.
In 1891, at Leadgate, Jane Hardy, widow, living on her own means, aged 80, daughter Lillah Greenup, widow, aged 36, and visitor Mary Ellison, aged 17.
In 1901, at 3 Regent Street, Lancaster, John Hardy, widower, book keeper, aged 61, and his sister Lillah Greenup, widow, house keeper, aged 47.
See 21st June 1890

22nd May 1832 (Cumberland Pacquet and Ware's Whitehaven Advertiser)
THE LEAD TRADE.— No state of decay and ruin can possibly exceed that which now prevails, and has for some time existed, throughout the lead-mining district, extending over large tracts of country in the counties of Northumberland, Durham, Cumberland, Westmorland, and the North Riding of Yorkshire. Time was, when the raising and smelting of British lend afforded a source of wealth to numerous private individuals, and of ample wages to large bodies of labouring people; but the admission of Spanish and Italian lead at a duty which put the English producer out of the market, has brought about a lamentable change of scene. In 1825 pig lead fetched £25 per father of 21 cwt.; which has gone on rapidly decreasing, until, at the present time, the best lead will not fetch more than from £11 to £13, the value having fallen since 1825 fully one half! *Newcastle Journal*

The fine new schooner Lowther, sailed from Workington last week for Canada with a full complement of passengers, —125 in number, 90 of whom were men and women. They were principally we understand, from the neighbourhood of Alston Moor, were a most respectable body of people, and are supposed to have carried out not less than 3000 sovereigns, besides expending from two or three hundred pounds in Workington in such articles as they consider might be useful on their arrival in America.
The Brig Lowther, sailed from Workington on 18th May and arrived at Quebec on 9th July.

2nd June 1832 (Newcastle Journal)
EMIGRATION. —On Sunday last, the brig Nancy sailed from Whitehaven for Quebec, with upwards of 160 emigrants, a few of whom were from Penrith and other parts of Cumberland, but the great bulk of them were from Scotland. The vessel sailed with a favourable breeze from the S. E., and the passengers appeared in the best health and spirits. On leaving the harbour, they cheered their farewell most enthusiastically, which was replied to by the immense crowd assembled on the North Wall to witness their departure. We fervently hope that they may meet in the land of their adoption, better success in life than appears to have been their lot in this country. Two sloops, containing upwards of 180 emigrant passengers, arrived here on Saturday, from Annan, under the expectation of obtaining a passage in the vessel named above; but as she had previously secured her number, they met with disappointment. A vessel, we understand; will be fitted out with all possible dispatch, in order to convey them to their sighed-for country—the Canadas. —So says our respectable neighbour of the *Cumberland Pacquet*. It is truly lamentable to see so many of our able, talented, and wealthy population driven from their native soil by the effects of vicious legislation. The persons emigrating are chiefly farmers and lead-miners. The lead trade in particular continues, and so it must remain until the free-trade quackery is annihilated; in a state of ruinous depression.
Shipping records show that the Brig Nancy sailed from Whitehaven on 3rd June, carrying 108 settlers and coals, arrived at Quebec (Grosse Isle) 20th July 1832.

In 1832, it became a requirement for ships arriving at Quebec to complete a passenger list; this was the result of legislation, to raise taxes on emigrants entering the country payable by the ship captains:

C A P- XVII

AN Act to create a Fund for defraying the expense of providing Medical assistance for sick Emigrants, and of enabling Indigent persons of that description to proceed to the place of their destination.
[25th February, 1832.]

MOST GRACIOUS SOVEREIGN.
WHEREAS by Message from His Excellency the Right Honorable Matthew Lord Aylmer, Knight Commander of the Most Honorable Military Order of the Bath, laid before both Houses of the Legislature, His Excellency has been pleased to signify that in conformity to the instructions he has received from your Majesty's Government, he recommends the expediency of imposing a rate or duty payable by the Masters of vessels bringing Emigrants into this Province, for the purpose of creating a fund for defraying the expense of Medical care and attendance, for sick Emigrants, and of enabling indigent persons of that description to proceed to places of their destination, and it is expedient that provision should be made for carrying the said recommendation into effect: May it therefore please your Majesty, that it may be enacted, and be it enacted by the King's Most Excellent Majesty, by and with the advice and consent of the Legislative Council and Assembly of the Province of Lower-Canada, constituted and assembled by virtue of and under the authority of an Act passed in the Parliament of Great-Britain, intituled, "An Act to repeal certain parts of an Act passed in the fourteenth year of His Majesty's Reign, intituled, "An Act for making more effectual provision for the Government of the Province of Quebec, in North America," and to make further provision for the Government of the said Province;" —And it is hereby enacted by the authority of the same, that there shall be raised, levied and collected a rate or duty payable in the manner hereinafter prescribed, by the Master or person in command of every vessel arriving in the Port of Quebec or in the Port of Montreal, from any Port of the United Kingdom, with passengers or emigrants therefrom, and having been cleared of the Custom House at such Port after the fifteenth day of April, one thousand eight hundred and thirty-two, and such pate or duty shall be five shillings currency, for every such passenger or emigrant who shall have embarked under the sanction of His Majesty's Government, ascertained by a certificate from one-of the Officers of His Majesty's Customs at the Port at which such vessel shall have cleared, and ten shillings currency, for every such passenger or emigrant who shall have embarked without such sanction, and such rate or duty shall be paid by the Master or person in command of such vessel, or by such person on his behalf to the Collector, or other Chief Officer of the Customs at the Port at which such vessel shall be first entered, and at the time of making such first entry, which shall contain on the face of it, the number of passengers actually on board the vessel, and no such entry shall be deemed to have been validly made, or to have any legal effect whatsoever, unless such rates or duties be so paid as aforesaid..

II. And be it further enacted by the authority aforesaid, that for the purposes of this Act, two children each under the age of fourteen years, or three children, each under the age of seven years, shall be reckoned as one passenger: and that no child under the age of twelve months shall be reckoned among the number of passengers.

III. And be it further enacted by the authority aforesaid, that no Master or person having the command of any ship or vessel arriving in either of the said ports, shall permit any passenger to leave such vessel, until he shall have delivered to the Collector or other Chief Officer of His Majesty's Customs at such Port, a correct list of all the passengers on board such ship or vessel at the time of her arrival at such Port, nor Until such list shall have been certified to be correct, and a certificate of such correctness and a permission to allow his passengers to leave the vessel and a receipt for the duties payable by him under the provisions of this Act, shall have been given to him by the said Collector or other Chief Officer, under a penalty of twenty pounds currency, to be paid by such Master or person having the command, for every passenger leaving his ship or vessel contrary to the provisions of this Act: Provided always, that the said list shall contain the, name of each head of family or single person being a passenger on board such vessel, his profession or trade, his country and the place of his destination, and the number of grown persons and children belonging to his family on board such vessel.

Provided always that nothing in this Act contained, shall prevent the Master or person having the command of any ship or vessel, from permitting any passengers to leave the vessel at the request of such passenger, before the arrival of the vessel in the Harbour of Quebec, but in every such case the names of the passengers who shall so leave shall be entered in the manifest on the list of Emigrants made out at the time of the clearing of the vessel from the United Kingdom, and shall be certified under the signatures of the passengers so leaving the vessel: and if the number of passengers remaining on board on the arrival of the vessel in the Harbour of Quebec do not correspond with that mentioned in such manifest, after deducting the number who shall have so left the vessel, the Master or person having the command of such vessel shall incur a penalty of five pounds currency, for each passenger not found on board or entered on the manifest as having left the vessel as aforesaid. …

NEW EMIGRANT BILL
From the Quebec Mercury

The Emigrant Tax Bill, in conformity to the despatch from the Minister of the Colonial Department, has passed through both Houses of the Legislature. It imposes a tax of 5 shillings currency a head on each adult passenger or emigrant coming to Canada, from any port in the United Kingdom; two children under fourteen years of age and three under seven years of age, reckon as a grown person, children under twelve months do not reckon as passengers. The Bill has excited an extraordinary sensation in the mercantile body, who regard it as destructive of the shipping interest, and as the sure means of turning the route of Emigrants, even those whose ultimate destination is Canada, to New York, where a Company is generally said to be forming for the purpose of conveying Emigrants from the United Kingdom to that port, and forwarding them thence to Canada, at a lower rate than they can

obtain passage to Quebec, and be forwarded to the Montreal District and to Upper Canada, by the St. Lawrence.

The views of these speculators will be materially assisted by the proposed tax, and a large annual expenditure by British subjects, which ought to benefit British ship-owners, will be turned into the pockets of foreigners. The Board of Trade presented a strong Petition to the Legislative Council against the Bill and we understand that a similar Petition, from the same body, will be laid before His Excellency.

The Emigrant population also appear to participate deeply in the feeling against the Bill, and it is evident that the funds it will in the first instance create, (as Emigrants will not be apprized of the existence of such a law in time to change their plans this season, at least not in the early part of it.) will be far more than sufficient for the relief of any probable number of sick and indigent Emigrants which can arrive in one, two, or three seasons. But the chance is, that the law will kill the goose, and the golden eggs be lost forever, by Emigrants avoiding a British port at which they are taxable commodities.

One class, we know, will rejoice in the result this law must produce. It is that class which views with envy the prosperity attendant on the efforts of the industrious Emigrant and to whose feelings it is wormwood and gall to see the ragged bas de soie [silk stockings], late the subject of their scorn, transformed by the magic wand of severe industry, into the thriving, contented and happy cultivator, the produce of whose farm and dairy, from its superior quality, will always command a better price than the miserable productions of those who will not profit by example. This is the class who look upon Emigrants as foreign invaders of the soil, and who, instead of emulating their example, would throw every obstacle in the way, which might prevent a single Emigrant from the United Kingdom, be he possessed of capital or a pauper, be he Protestant or Catholic, from setting a foot in Lower Canada. In Upper Canada, the value of the Emigrant population is better understood and the rapidly augmenting population of that thriving Province may, when it is too late, teach the narrow minded exclusives of Lower Canada, that an Emigrant population established within its limits, and having common views and interests with themselves, is less dangerous to their rights and properties, than an overwhelming population of the same description inhabiting another Province, and that Province requiring free and unobstructed egress and ingress to and from the ocean, with some other points, in which her interests and those of Lower Canada do not, perhaps, on all respects, exactly tally. (*From the Quebec Mercury*)

The ships list, gives the following ships leaving Whitehaven and Maryport for Quebec in 1832.

Arrival	Ship	Captain	Departed	Port Left	Settlers
May 23	brig Dykes	Cockton	17 April	Maryport	156
June 01	brig Donegall	Matches	17 April	Maryport	128

23rd June 1832 (Carlisle Patriot)
on Saturday night last, about seven o'clock, a most desperate assault was committed near the Barracks, at Newcastle, upon Ralph Whitfield, Robert Storey, and Thomas Vipond, three lead miners, from Alston Moor, now employed as pitmen at Fawdon Colliery. Two of the aggressors, namely, Thomas Archer and Henry Hodgson, are privates of the 68th regiment of foot, now stationed there on the recruiting service; and this circumstance ave occasion for the propagation of a ridiculous rumour, that the military had refused to actagainst the pitmen. The other offenders are George Hall, a pitman at St Leonard's and Robert Preston, a notorious pick-pocket. They have been committed to gaol to take their trial for the offence.
The Newcastle Chronicle of 11th August 1832, reported that Archer was imprisoned for 14 months, Hodgson, Preston, and Hall for 12 months, and they were to enter into recognisance 50l each to keep the peace.

14th July 1832 (Newcastle Courant)
On Friday last, the inhabitants of the chapelry of Garrigill, in Alston Moor, met at the village of Garrigill Gate to celebrate the passing of the Reform Bill, by a Tea-drinking, on the Village-green, for which purpose a long range of tables, with seats was set out, of such length as to accommodate 180 persons at a time. At the ends and middle of the table baskets of flowers were placed, inscribed with the word "Reform;" and, at convenient distances round the tables, poles were fixed in the ground, decorated with woodbine, evergreens, and branches of trees, covered with foliage, with blue banners, ornamented at the corners with red ribbons, on which the following mottoes were inscribed: —The King, the People, and Reform; Long live our Patriotic Ministers, Grey, Brougham, Russell, and Althorp; Graham; Beaumont; Burdett: Russell; Durham; Hobhouse; Blamire; Cleveland; Howick and Althorp; Ord; Hodgson; Grey, Brougham, and the Bills; Success to the Lead Trade, &c. There was also a flag waving on the church steeple, with the motto "Union is strength." At a little before 4 o'clock, the first company sat down, consisting entirely of females, with the exception of three of the oldest men in the place, viz., at the foot of the table, Thos. Armstrong and James Robinson, the former upwards of 90, and the latter someway between 80 and 90 years of age; and, at the head, John Martin, with his wife Mary, who are each 102 years of age. The venerable couple have been married 80 years, and the good wife was dressed in her wedding gown, which had been so carefully kept that it is yet at good as new, and old John was seated on an armchair made of heart of oak 107 years ago! At half-past six, the whole company, amounting to 1121 persons, had partaken of the refreshment. When

the tables were set round the signal for beginning was announced by the firing of guns, the band playing all the time, and at interval paraded round the tables, a beautiful flag being carried in front, with the motto “God speed the Plough," and a suitable device. At the conclusion, excellent speeches were made by the Rev. Mr. Harper, Mr. Stephens, and others, who, after speaking of the particular object of the meeting, expressed their highest satisfaction at the manner in which it had been conducted. As a public rejoicing of this nature was probably never held here before, greet Interest was excited in the village and neighbourhood, and the day being favourable the scene was truly gratifying end delightful. The remnants of bread, &c., were next day distributed amongst the poor and the children.

WWW.parliament.uk

The first Reform Act

The Representation of the People Act 1832, known as the first Reform Act or Great Reform Act:

- *disenfranchised 56 boroughs in England and Wales and reduced another 31 to only one MP*
- *created 67 new constituencies*
- *broadened the franchise's property qualification in the counties, to include small landowners, tenant farmers, and shopkeepers*
- *created a uniform franchise in the boroughs, giving the vote to all householders who paid a yearly rental of £10 or more and some lodgers*
- *Limited change had been achieved but for many it did not go far enough. The property qualifications meant that the majority of working men still could not vote.*

25th August 1832 (Newcastle Chronicle)

Deaths

At St Ann’s House, on the 19th inst. Ann, daughter of Mr John Crawhall, Craig House, Allenheads.

4th September 1832 (Cumberland Pacquet, and Ware's Whitehaven Advertiser)

22nd September 1832 (Newcastle Journal)

Deaths

At Allenheads, on the 14th inst., of a sudden attack of apoplexy, aged 53, much and deservedly lamented, John Crawhall, Esq., of Craig House, Allenheads.

Son of Thomas and Ann (Bownas) Crawhall, baptised at Allendale St. Cuthbert's, 12th March 1774. On 9th March 1793, John married Dorothy Featherstonehaugh, Dorothy died 30th Jan 1806, aged 32. John married Margaret Dawson, eldest daughter of Jacob Dawson of Allenheads,, at Allendale 3rd December 1809.
Children of John and Dorothy Crawhall:
Fanny, born 18 December 1794
Albany, baptised 5 September 1797, died 26 February 1831.
Ann, born 23 June 1799, died 19 August 1832.
Thomas, born 20 March 1801, died 19 April 1831.
John, born 1 May 1803,
Dorothy, born 11 January 1806
Children of John and Margaret Crawhall:
Jane, baptised 2 December 1809, buried 29th May 1810, at Allenheads, St Peter's.
Margaret, baptised 5 January 1814
Betsy baptised 5 January 1814.
Jane, born 13 April 1817
Joseph, baptised 25 September 1819
William, baptised 17 May 1824
Maria, baptised 24 February 1827
Margaret Crawhall died at Crook, 8 September 1859, buried at Allenheads, St Peter's, 12 September 1859.
Hodgson in his History Of Northumberland states: "At present Barhaugh is an estate of John Crawhall of Craig House, near Allenheads, Esq., who obtained it by marriage with Dorothy, daughter of the co-heir of Albany Featherstonehaugh, whose ancestors had been seated here for several generations."

6th October 1832 (Carlisle Patriot)
Marriages
At Alston, on the 23rd ult., Mr Teasdale Lowes, to Margaret, daughter of Mr Joseph Walton, Bowsclose, Harewood, Durham. *See 28th June 1873*

3rd November 1832 (Newcastle Chronicle)
A melancholy accident happened last week in a lead mine, near Caldbeck, called Driggith Mine. In consequence of the late heavy rains, a considerable quantity of water had accumulated in the mine, greatly to the obstruction of the operations of the miners; and as they were endeavouring to let off the water, a sudden gush of it forced down the planks and bearers used in the work, whereby several of the men were thrown down with great violence, two of whom, we regret to say, were killed. They were John Harrison, upon whom the planks, bearers and a great quantity of stones and earth fell, which caused his instantaneous death; and Jonathan Simpson, who was carried down by the force if the water to the mouth of the mine, which occasioned such severe injuries on his head and other parts of his body, that he died on Sunday last. Inquests were holden on the bodies before H. Lowry, Esqr., Conroner, and verdicts returned, in both cases, of "Accidental Death."—*Carlisle Patriot.*

20th November 1832 (Cumberland Pacquet and Ware's Whitehaven Advertiser)

On Saturday afternoon week, about three o'clock, Alston and its vicinity were visited by one of the most tremendous tempests of wind and rain from the S. E. ever remembered. The storm continued till about ten o'clock in the evening, when it settled down to a calm and became a fine clear night. During the tempest Mr. Bainbridge, solicitor, Alston, had several trees torn up by the roots in a plantation near the town, and two young women had a narrow escape from being lost upon Hartside. They were crossing that boisterous Fell, and had ascended to near the top, when they were found by Mr Stone, road-surveyor, in quite an exhausted condition. Mr. S. humanely alighted from his gig, and, having helped them into it, took them to the Shaw House, where he had them taken care of for the night. The same afternoon, Mrs. Hannah Martin, of Redheugh, West Allendale, and her daughter, while crossing the fell from Alston, where they had been attending a hiring, were overtaken by the storm, and both perished. They were found on Sunday, within less than a quarter of a mile from home lying close together on the moor by Mrs. M.'s two sons, who are inconsolable for the loss of an affectionate parent and beloved sister, Mrs. Martin was the mother of fifteen children, and was much respected by all who knew her; she was upwards of sixty years of age. The young woman, when found, was nearly covered with sand, washed from the hills by the mountain torrents.

19th January 1833 (Newcastle Journal)

Deaths

At Garrigill Gate, near Alston, on the 15th inst., in the 63rd year of his age, much and deservedly respected, Mr Thomas Brown.

Thomas Brown of Ivy House Garrigill Gate, had been the bailiff for the Eshgill Estates, and Manors, under Robert Stagg Esq. See 21st November 1835

At Lowbyer, near Alston, on the 16th inst., aged 78, much and deservedly respected, Mr Dickinson, late principle agent of the Greenwich Hospital, in that district. *See 24th May 1865, and 25th January 1867*

John Dickinson was buried at Alston Redwing, the register for 21st January 1833 gives:

Mr John Dickinson, Lowbyer, Deacon of the Independent Church Alston ever since its formation in 1804, aged 78. He was the founder and most zealous promoter of the interest in the place a most liberal supporter of the cause of Christ and a firm friend of everything good.

His epitaph at the Congregational Church Alston:

Mary Bowman, aged 84 years, was buried at Garrigill 31st July 1843, the 1841 census gives at Garrigill Gate, Mary Bowman, widow, aged 74, and Thomas Bowman, teacher aged 25. Possible baptism of Mary Bowman nee Armstrong, 21st February 1768, at St John Armstrong, Garrigill, father John Armstrong.

13th July 1833 (Newcastle Journal)
Longevity. —There is now living at Ashgillside in the vale of Garrigill, near Alston, a venerable couple of the names of John and Mary Martin, both in their one hundred and second year, one being the senior of the other only by a few days. It is seventy-seven years since they were made "one twain" in the holy bands of matrimony, in which time they have reared a large family of men and women. These patriarchs are both in the enjoyment of health, with their faculties unimpaired. From the storehouse of memory, they occasionally entertain their visitors with stories of "langsyne," at the house of Mrs. Isabella Watson, their youngest daughter, with whom they now reside.
John Martin of Ashgill, burial at Garrigill, age 103, 21st April 1834.
Children of John & Mary Martin: Mary baptised 11th June 1773, Eleanor baptised 23rd July 1775, died 4th January 1805, John baptised 11 May 1777, died 27th December 1799, Henry baptised 11th February 1779, buried 23rd February 1779, Elizabeth baptised 15th January 1780, Henry & Thomas twin sons, baptised 23rd June 1782, Henry died 13th August 1782, Thomas married Ann Brown 8th November 1806; all at Knaresdale.
In 1841, at Ashgill side, Matthew Watson, farmer, aged 50, Isabella aged 55, Joseph, labourer, aged 20, Jane 15 (born 1st January 1826), Matthew 13 (born 2nd September 1827), and Francis 4.
In 1851, at Ashgillside, Matthew Watson, aged 61, farmer of 639 acres (part of which is common land), born Garrigill, his wife Isabella aged 68, born Knaresdale (baptised Knaresdale, 30th October 1785), Northumberland, unmarried son Joseph, lead miner aged 30, born Garrigill, married son Matthew, lead miner, aged 23, born Garrigill, his wife Jane , born Allendale, aged 26 (Jane Bell, married 1st Feb 1851, at Garrigill Gate), Mary Coats, orphan, servant, aged 13, and grandson Robert Watson, aged 9, born Garrigill.

In 1861, at Ashgillside, Matthew Watson, yeoman, aged 33, his wife Jane, aged 36, children Ellen 9, Isabella 8, Thomas 4, Jane 2 and mother Isabella Watson, aged 75, widow, annuitant.
See 19th November 1836, & 8th February 1851.

20th July 1833 (Newcastle Journal)
Yesterday week the first stone of a new bridge over the River Tyne, at Alston Brewery, was laid by Mr. Christopher Hodgson, bridge-master, under the inspection of two magistrates, and a number of country gentlemen, who attended on the occasion. After the stone was lowered into place, the workmen and numerous spectators were plentifully regaled with strong beer from the brewery, and the evening was spent in mirth and glee.

3rd August 1833 (Newcastle Courant)
To Be Sold By Auction

At the house of Mr. Thomas Shaw, Turks Head Inn, Alston, on Wednesday, August 7th 1833.
All that Current going LEAD MINE, situated within the Manor of Tynehead, and known by the name West Crossfell Lead Mine; together with all Engines and other Materials upon the premises. The sale to commence at six o'clock.
For further particulars enquire of Mr. Thomas Shaw.

3rd August 1833 (Carlisle Journal)
Married
At Penrith, on the 24th ult., Mr. Joseph Watson, High Rodderup, near Alston, to Miss Frances Bell, daughter of Mr. W. Bell, Blackcleugh, near Wearhead, Weardale.
In 1851, at High Rodderhope, Joseph Watson, landed proprietor, aged 61, his wife Frances 44, children Adah 16, William 15, John 12, Frances 10, Mary 7, Elizabeth 4, and Isabella 11 months. In 1861, at High Rodderhope, Joseph Watson, yeoman farmer 250 acres, aged 71, his wife Fanny 53, children Adah 26, John 22, Fanny 20, Mary 17, Elizabeth 14, and Isabella 11.
See 18th July 1862, 19th December 1865, 21st May 1869, 14th May 1870, & 13th December 1870

28th September 1833 (Newcastle Courant)
On Friday the 20th inst., a numerous meeting of ratepayers specially convened, was held in the National School Room, at Stanhope, to consider of a resolution adopted in May last, assessing the rents of the lead mines in that parish towards the relief of the poor. Joseph Little, Esq., was called to the chair, when Mr J, R. Featherston proposed that the assessment inserted in the rate book should be expunged, which was supported by Messrs B. Johnson and C. Harrison, and passed nearly unanimously. Mr Featherston then moved that no further monies arising from the poor rates should be applied to defray any legal proceedings respecting the assessment of the rents of the lead mines in the parish of Stanhope The Chairman was requested to sign on behalf of the meeting the proceedings of the day, and thanks were voted to him for the able manner in which he had presided.

12th October 1833 (Carlisle Patriot)
The first keystone of Alston Bridge Arch was set on Saturday last, by the Rev. Mr. Jackson, one of the County Magistrates, who expressed his great satisfaction at the work done, and the utility of the new bridge, when completed. He complimented the Bridge Master on the plan of the bridge, Messrs. Nixon and Denton on the execution of the work done, and the workmen on their attention and orderly behaviour; and the latter he presented with a quantity of ale. On Monday last, the arch was closed. The last stone was set by Anthony Wright, Esq., who made an appropriate speech on the occasion, expressing his satisfaction of the proceedings, and his willingness to assist as far as he could. He, with Mr. Wilson, Mr. Bainbridge, and other gentlemen, contributed liberally to entertain the workmen, who proceeded to the quarry, accompanied by the Alston band, returned with the quarrymen, and afterwards retired to regale themselves.

23rd November 1833 (Carlisle Patriot)
The western abutment of the new Bridge, over the Tyne, at Alston, was washed away by the flood on Thursday evening.—This beautiful structure consisted of only one arch, probably the largest in the county, and was nearly completed. The water came down with irresistible force, and getting behind the abutment, carried it away—the embankment not being finished.

4th January 1834 (Carlisle Journal)

ALSTON *remov.* STANHOPE *appel*.

This was an appeal against the removal of Margaret Hall and her two sons.
Mr. Armstrong, with whom was Mr. Rawlinson, appeared for the removants; and stated that the husband of the pauper (now deceased) was the son of John Hall, of Stanhope, in the county of Durham, where they had been relieved many times: and upon that relief he should now rely.
Mary Hall (a very old and infirm woman)—I had a son called Wm. Hall, who married a woman named Margaret. My husband's name was John. He came to Alston when he was a young man; and came with his father and mother from Weardale. In my husband's lifetime, we received relief from Stanhope: we were then living at Nent Head. After my husbands death I got relief from Stanhope. The overseers said they would take my sons to the poor house to find them work. I received relief from them for some time. William, the husband of the pauper, was living with me at that time. All the time I received the relief from Stanhope, I was living in Alston.
By Mr. Gregg—It was not in my husband's lifetime I received relief from Stanhope.
Margaret Hall (the pauper)—I am the widow of William Hall. I have three children; two of them have been removed with me. Whilst my husband and I were living in Alston, I applied to the overseer of Stanhope, and was relieved by him. We were allowed half a crown a week for a time; and then they rused to give us more, as my husband was making sufficient wages. We got first 5s., and then 2s. 6d.
By Mr. Gregg—The 5s. and 2s. 6d. were all I got. This Is fifteen years ago.
Mark Hall—I remember my father's death; and that my mother received relief from Stanhope, it was said. My mother received relief for 6, 8, or 10 months, I can't say which.

Mr. Gregg appeared for the appellants. The removants having secured the services of the two leading counsel of the Sessions Bar, the Bench would readily conclude that their case required a good deal of support. Had they made out a case to satisfy the Bench? He thought not; and after a few observations upon the case, he called
John Robinson—I am the overseer of St. John's Chapel, in Stanhope. I have the parish books with me, and have examined them particularly. There is no entry for the pauper or any of her family for fifty years back. If relief had been given it would have been entered. All other entries are here.
Mr. Armstrong replied. The parish books were no evidence for the appellants. There was no balance of evidence—it was all on one side; and he thought the Bench could not hesitate to confirm this order.
Order confirmed unanimously.

11th January 1834 (Carlisle Patriot)
John Scaif, committed Nov. 14, by the Rev. Benjamin Jackson for non-payment of a bastardy order, upon which there is £3 1s. 8d. due to the parish of Alston, to be imprisoned three calendar months and kept to hard labour, unless, &c.

11th January 1834 (Carlisle Journal)

CHARITIES IN CUMBERLAND

(Continued from our last)

(From the 5th Report of the Parliamentary Commissioners)

PARISH OF ALSTON with GARRIGILL

Fairhill Estate, including Mrs Graham's gift

By indenture dated 15th September 1739, between John Friend, of Annat Walls, of the first part; Thos. Vipont and others, churchwardens and overseers of the parish, of the second part; and Nicholas Whitfield and others of the third part.

Reciting, that there had theretofore been bequeathed to the poor of the parish of Alston, to the school in Alston, and to the poor and school within the chapelry of Garrigill, several sums of money, amounting in the whole to £217 5s., which there belonged: —

To the poor of Alston	£83	6	8
To the school in Alston	81	5	-
To the poor of Garrigill	27	13	4
To the school in Garrigill	25	-	-
	£217	5	0

And reciting, that the churchwardens, overseers, and inhabitants of the said parish, for the better securing the said charities, had contracted for the purchase of the premises thereinafter mentioned, and that they had ordered the same to be conveyed to John Friend in trust, to be by him assigned to such persons as should be by them afterwards appointed; and reciting, that Nicholas Whitfield and others, the third part, had been appointed by them trustees. It is witnessed, that the said John Friend, in consideration of five shillings, conveyed to the said trustees a messuage or tenement, with the appurtenances, at Netherfair Hill, in Alston Moor, being freehold property, and assigned to them a fourth part the pasture called Fairhill Pasture, Alston Moor, and an inclosure at Netherfair Hill, adjoining the messuage above-mentioned, being leasehold property, held for

the remainder of a term of 1,000 years, upon trust that they should let the same and apply the rents thereof in the following proportions:—

For the overseer the poor of Alston, for the use of the poor of the said parish	£4	3	4
For the schoolmaster of Alston	4	1	3
To the overseers of Garrigill, for the use the poor	1	7	8
To the schoolmaster Garrigill.	1	5	0

And if the rents should amount to more or less, that an increase or deduction should be made from each part in the like proportions.

It appears that the whole of the consideration money was £274, of which £68 was to be paid for the completion of the purchase, within six months after the death of Mary Wallis, as may be collected from a bond, dated 8th May 1738, and by indorsement thereon, the sum of £68 is stated to have been paid 4th September, 1756.

By indentures of lease and release, dated 30th April and May 1st, 1756, the trustees, churchwardens, and overseers mortgaged the premises to Ann Whitfield for securing the sum of £68, which was probably raised for the completing the purchase as abovementioned.

By indentures of lease and release, dated 19th and 20th June, 1797, reciting, that the trustees were entitled to the several premises above-mentioned upon certain trusts, by means whereof they had become chargeable with the payment of £68 to John Wallis, who had called upon the trustees for the same; and reciting, that the said trustees had borrowed £68 of Ann Graham, formerly Ann Whitfield, and had mortgaged the premises above-mentioned as security for the same; and further reciting, that the said Ann Graham, by will, dated 4th April, 1796, had directed her executor, George Mowbray, within 12 months after her death, to assure the £68 so secured above-mentioned, in such manner that the yearly interest might be applied towards the augmentation the salary of the master of the school at Alston.

It is witnessed, that the said George Mowbray conveyed and assigned the said freehold and leasehold premises to Joseph Thompson and other persons for the remainder of a term that had been vested the said Ann Graham, upon trust to apply the interest of the said mortgage in augmentation of the salary of the said schoolmaster.

On the inclosure of Alston by Act of Parliament, of 43rd George III., allotments were made to this property in respect of the freehold and leasehold interests; the former consisting of 43A. 1R. 32P., and the latter in two parcels (one 3A. 1R. 6P., the other 39A. 3R. 16P.,) amounting in the whole to 86A. 2R. 14P.

(To be continued)

18th January 1834 (Carlisle Journal)

CHARITIES IN CUMBERLAND

(Continued from our last)

(From the 5th Report of the Parliamentary Commissioners)

PARISH OF ALSTON

The above allotments (except about two or three acres) are let lease for years, from 1st May, 1811, to William Pearson, at £16 a year. The letting was by tender, public notice having been previously given. The tenant is to make boundary and sub division fences, and to lay not less than 2,200 Carlisle bushels of lime on the land within the last seven years of his term, and to keep all fences and gates in repair.

The original Fairhill estate, consisting of 22 acres, together with about two or three acres of the new, allotment, is let to Mary Yates for one year, at £36 10s. This estate has lately been let yearly to the best bidder, and generally let to the person who has the care of the poor, the workhouse being situate on this estate.

We have particularly inquired, whether this estate, is not let for less value, by reason that the person who takes the land also agrees to farm the poor at a certain rate, it appears, however, that this land is let at its full value, and that the allowance for the poor varies with the times. We find, that in 1818 the estate was let at £30 a year, the tenant farming the poor at 2s. 10d. per head per week. In 1819, £35 was the rent of the land, and the poor were taken at 2s. 8d. In the present year, as before stated, £36 10s. is the rent, and the poor are taken at 2s. 5d.; by which it appears, that the rent has increased regularly, whilst, the allowance for the poor has diminished. The poor-house is supposed to have been built long ago at the expense of the parish, by whom it is now repaired. No rent is allowed by the parish in respect of the occupation of these premises, which seem to supply the place of a farm-house for the land.

The application of these rents is very irregular, the whole having been carried to the general account of the parish poor-rate for several years. On the other hand, there have been payments made thereout to the school masters of Alston and Garrigill. For the - last few years these payments have been,

To the schoolmaster of Alston £26 4 0
To the schoolmaster of Garrigill 7 0 10½

Whilst the remainder has been improperly applied to the general purposes of the parish.

We could not discover by what calculation the schoolmaster received these several sums, which are not in proportion to the scale drawn out in the indenture of 1739. It does not appear whether interest for the sum of £68 given by Mrs. Graham, is included in the payment to the schoolmaster at Alston, but it probably forms part his salary.

For the last year nothing has been paid to either of the schoolmasters. A demand of about £70 has been made by the commissioners for the expenses incurred relating to the inclosure. A former demand of £69 9s. 6d. for the same purpose, was paid out of the poor-rate; but several of the parishioners have objected to the payment this second demand, and, until this question is settled, the payment to the schoolmasters has been withheld. But considering, that for several years the parish has received the benefit of the surplus, which ought to have been distributed in charity to the poor, we trust there will be no difficulty in

this respect, and that, in future, a more correct distribution will be made of the rents of this property, according to the scale laid down the trust-deed; first setting apart £3 8s. as the specific interest of Mrs. Graham's legacy, to be paid the schoolmaster Alston.

The Alston schoolmaster receives all children coming to him at a quarterage settled by the vestry, which is considered a lower rate than would paid if the school had no endowment. Six children were formerly taught free; but for the last four or five years the parish have not insisted upon the master teaching any children gratuitously.

No children are taught free for the share paid to, the schoolmaster Garrigill.

Since this report was drawn up, we have been informed by the vicar of Alston, that it has been agreed at vestry meeting, that the rent of the Fairhill estate, as far relates to the poor of the parish Alston, shall, in future, be applied, and given by the churchwardens and overseers, to such poor persons as have not received parochial relief; and that two persons are to be appointed to survey the estate and ascertain the rent, in order that each establishment may receive its due proportion.

Shield's Gift.

John Shield, of London, by indenture, dated 5th June, 1617, gave 40s. a year to the poor of the parish of Alston.

This sum is paid annually by the Cooks' company, London, and is distributed amongst the poor of Alston and Garrigill on Christmas-day, yearly; two-thirds being given to the former, and one-third to the latter place.

A more particular account of this donation will be given in our Report of the Charities vested or under the management of the Cooks' company.

Wilkinson's Charity

Robert Wilkinson, will, dated 24th February, 1685, gave £100 to the village of Garrigill, where his mother was born, to purchase lands the clear yearly value of £5, to disposed in the following manner—viz., 20s. a year to a schoolmaster at Garrigill, towards his maintenance, and 40s. a year to the said schoolmaster, for teaching six poor children of the poorest inhabitants of Garrigill, gratis, till they could read the Bible through, and then others to put in their stead; 10s. to a minister, for preaching a sermon every year in Garrigill chapel, upon, the 1st day of February; and 10s. to be distributed yearly to such poor inhabitants, in Garrigill, his trustees and their successors should judge most needful, in the said chapel, immediately after the said sermon; and the remaining 20s. a year to his four trustees, and their successors, to each of them 5s. a piece. Provided always, that if the said trustees and their successors should neglect or refuse to nominate and appoint six poor children, to be taught as aforesaid, for the space of one month after they should be desired by the said schoolmaster, then the said 40s. year, left for their learning, and the said 20s. a year, left to the said trustees, should, for ever after, paid to the said chapelwardens and overseers of the poor, and should by them distributed yearly and every year to the poor in the said chapel, upon the day of February, in manner aforesaid.

In 1689, this sum was laid out in the purchase of an annuity rent-charge £5, issuing out of certain premises situate Bowes, the county of York, for the uses of the said will, which now paid regularly by the Rev. John Headlam, Rector of Wycliffe, the owner of the property. Twenty shillings are paid the schoolmaster at Garrigill, and 40s. more for teaching six poor children there, gratis, who are appointed the trustees. The Vicar of Alston receives 10s. yearly for preaching a sermon the chapel of Garrigill; and that same day, 10s. are distributed to the poor people there. The remaining 20s. are retained by the trustees for their own use.

Stephenson's Charity.

John Stephenson, by will, dated May, 1759, desired his executor, Matthew Stephenson, out of the personal estate to which he would be entitled by the said will, to pay yearly and every year for ever, to and amongst 16 poor widows who should have legal settlements in the parish of Aldstone and chapelry of Garrigill, the county of Cumberland, 5s. each; and eight poor widows who should have legal settlements in the parish of Knarsdale; and also to eight poor widows who should have legal settlements the parish of Kirkhaugh, both the county of Northumberland, 5s. each; and for want of such a number of poor widows in the said chapelry and parishes respectively, his will and desire was, that such number might from time to time made and supplied, and the said respective annual sums paid to and amongst so many poor men respectively, having legal settlements in the said chapelry and parishes respectively, as the number of poor widows should respectively fall short, the same to them and every one of them at Aldstone, Knarsdale and Kirkhaugh respectively on the 25 day December in every year, by the minister and churchwardens, for the time being, of those places respectively. And he did also desire the said Matthew Stephenson, his executors and administrators, to distribute yearly and every year, on the 25th day of December for ever, to eight poor persons having legal settlements in the parish Boldon, in the county of Durham, 5s. a piece; and willed that during the life of his wife the proper and deserving objects of that charity might be determined by her and the said Matthew Stephenson. And to the end that the said charities before-mentioned might be continued for ever, the said John Stephenson did desire the said Matthew Stephenson would immediately after his death, charge the house in Westgate-street, in Newcastle aforesaid, tenanted by Mrs. Lyddell, with the annual sum of for ever, according to the directions of the Act of Parliament in that case made and provided, so that a perpetual fund might subsist for the aforesaid charities.

By indenture, dated 18th July, 1761, inrolled in the court of Chancery, the said Matthew Stephenson being desirous to fulfil the charitable intent of the said testator, granted to Ogle Wallis and William Peters, heirs and assigns, a rent-charge of £10 issuing out of all that brick messuage, burgage or tenement Westgate-street, Newcastle, purchased by the said John Stephenson of George Graham deceased, in trust, for the purposes mentioned in the said will.

The sum of £4 is regularly received from John Annerdale, Esq., who is the possessor of the house in Westgate-street, Newcastle; £2 are given to eight poor widows having settlements in Alston, and the same sum to eight in Garrigill chapelry under the direction of the vicar of Alston, who has regularly attended to the distribution for the last 30 years.

Langhorne's Charity.

Charles Langhorne by his will, dated 26th June, 1802, devised his messuage, dwelling house, and houses or tenement with the appurtenances, and two closes thereunto belonging, situate in Alston Moor, and all his bonds, debts, and other personal property of which he should die possessed, to Thomas Dodd, of Nent Head, in the parish of Alston, and John Pattinson, of Alston Town, and their heirs, be disposed of as thereinafter mentioned.

And he bequeathed several legacies to certain persons therein named; and the testator declared his will to be, his said trustees, or their heirs, should the 24th December in every year after his decease, pay or cause to be paid, all the income or interest the residue and remainder of his personal property that he should die possessed of, after paying all his legacies and other expenses to and amongst the poor having legal settlements in the said parish of Alston, living and residing Nent Water, that is to say, at and above Nent Hall, in the said parish, and nowhere else, according as his said trustees should think proper; and he declared to be his will, that the aforesaid tenement with the appurtenances should never be sold.

By grant, under the sign manual, dated 21st July, 1815, reciting the will of Charles Langhorne, and that the said will had been proved by the executors, that the said Charles Langhorne was born illegitimate, and died unmarried; and that his personal property consisted, amongst other things, of the tenement and lands mentioned the will which were held under a lease formerly granted by Henry Hilton, a former lord of the fee, for the residue of a term of 1000 years, commencing from the 9th September, 1621, and of sum of £100 secured by mortgage of certain copyhold lands in Hexham, and of a sum of £140 secured by mortgage lands in Alston; which said several parts of the said Charles Langhorne's estate, by virtue the statute 9th Geo. 2d ; and by reason the said Charles Langhorne's having died without kindred, devolved the crown, subject to the payment of so much of his debts and legacies as the other parts of his personal estate were insufficient to discharge. And further reciting a petition certain landholders of Alston, praying a grant of the said property upon the trusts of the said will.

The said messuage and lands, and the said mortgages, were granted lo Henry Charles Litchfield and Henry Hobhouse, Esquires, their executors, administrators, and assigns, upon trust, to sell the said premises, and with the produce thereof to pay, the first place, the expenses incurred, and to invest the residue the money so to be received the three per cent, bank annuities, the names Thomas Dodd, John Friend, John Dodd, Robert Teesdale, and Robert Bainbridge, who should hold the same trust to pay the dividends thereof the 24th December every year, to such poor persons having legal settlements in the parish of Alston, and residing in Nent Water, at and above Nent Hall, in the said parish, as should not have received parochial relief within one year then next preceding, in such proportions as to the trustees should seem meet. And it was directed that the trustees should execute an instrument, be approved of by the solicitor to the Treasury, declaring the said trusts, which instrument should contain power for the appointment of new trustees.

By indenture, dated 12 August, 1818, between Henry Charles Litchfield and Henry Hobhouse Esquires, of the one part; John Friend, John, Dodd, and

Robert Bainbridge, who had survived Thomas Dodd and Robert Teesdale, of the other part; reciting the warrant aforesaid, and the will of Charles Langhorne, and reciting, that in pursuance of the directions of the said warrant, the said Henry Charles Litchfield and Henry Hobhouse had sold the said messuage, and had received and got the said mortgages, and after making the several payments directed, there remained a balance in their hands of £611; and reciting, that Thomas Dodd and Robert Teesdale had died, leaving the parties of the second part surviving; that the said Henry Charles Litchfield and Henry Hobhouse had, on the 24th July preceding, invested the said £611 in the purchase of £777 2s. 1d. stock, in the three per cent, reduced, in the names of the said John Friend, John Dodd, and Robert Bainbridge; and that a draft of the said indenture had been submitted to George Maule, Esq., the solicitor of the Treasury, who had approved thereof, and signed his name there to.

It is witnessed, that the said parties of the second part declared that the said stock was held by them for the trusts aforesaid.

And it was thereby provided, that in case any trustee should die or become incapable or unfit to act, it should be lawful for the Vicar Alston, for the time being, or in case of his incapacity or refusal, for the churchwardens of the said parish, for the time being to nominate some other fit person as trustee, so that in no event the number of the trustees should be less than three; and it was also expressly agreed, that immediately after the execution of the said indenture, it should be lawful for the Vicar of Alston, and he was thereby forthwith required to nominate two fit persons the room of the said Thomas Dodd and Robert Teesdale; and that when any new trustees should be appointed, the said stock should be transferred to them.

By deed, dated 17th November, 1818, the Rev. Benjamin Jackson, Vicar of Alston, in pursuance of the before abstracted deed, appointed Joseph Dickinson, and Jonathan Walton to be trustees, together with the three former trustees, four of whom (into whose names the stock had been transferred) declared that they held it upon the trusts above-mentioned. The first dividend on the above-mentioned stock was received 10th October, 1818, and the first distribution took place on the 24th December following.
Public notice was given, on 21st December, that a distribution would made at the vestry-room the 24th. About £4 having been expended procuring two powers of attorney and other incidental charges; the remainder of the dividend, £7 10s. 1d. was divided amongst thirty-two poor persons, who had not received relief within the year, in sums varying from to 2s. to 6s.

A similar notice was given previous to the last 24th of December, on which day a year's dividends was distributed like manner to sixty poor persons, sums varying from 4s. 10s. The names of every person receiving this charity are entered in a book, with the number in family, and the sums they receive, which is signed by the Vicar and acting overseer. The accounts are kept with great exactness.

This charity is not given to any person receiving parish relief. It is confined to those living in the district Nent Water who have settlements the parish.

Chapelry of Garrigill.
Donor Unknown.

In the returns made to Parliament in 1786, a sum of money belonging to this chapelry, producing 10s. yearly as interest, is stated to be "lent a promissory note, and the security bad." No donor's name or date is given.

On inquiry we find that there was a sum of money lent on note, but that the person who had it died insolvent many years ago, and nothing could recovered.

Will of Charles Langhorn

Charles Langhorn
Nentsberry Green Ends
Died 31st July 1802 aged 67 years

In the name of God Amen

I Charles Langhorn of Craignook in the Parish of Alston in the County of Cumberland, miner being of sound mind, memory, and understanding (Blessed be God for the same) do make this my last Will and Testament in manner and form following that is to say.

First I Give, Devise, and bequeath all that my Mesuage Dwelling House and Houses or Tenement with the Appurtenances and two Closes, Inclosures or parcels of ground thereinto belonging and now therewith enjoyed situate, standing lying and being in Alston Moor, aforesaid, and commonly called and known by the names of George Carr's West Field and Isaac Walton's field, and also all my Bonds, Notes, Book Debts, Creditors and all other personal property, that I shall die possessed of unto Thomas Dodd the Elder of Nenthead in the Parish of Alston aforesaid and John Pattinson of Alston Town in the Parish of Alston Lead ore miner, and to their Heirs to be disposed of as herein after mentioned. I give and bequeath unto Thomas Dodd of Nenthead aforesaid the sum of Twenty pounds to be paid twelve months after my decease, also I give unto Mary Dodd, wife of the said Thomas Dodd the like sum of Twenty pounds to be paid at the end of twelve months after my decease; also I give unto Ann Carr of Craig Nook widow of the late George Carr, in case she survives me, the like sum of Twenty pounds to be paid at the end of twelve months after my decease also I give unto William Carr of Alston aforesaid, son of the late George Carr, the like sum of Twenty pounds to be paid at the end of twelve months after my decease, also I give unto George Carr of Appleby in the County of Westmoreland son of the said William Carr the sum of Five pounds to be paid at the end of twelve months after my decease; also I give Richard Pearson of Harris in the Parish of Enstable in the County of Cumberland, miner, the sum of Twenty pounds to be paid at the end of twelve months after my decease. And it is my further will, that my said trustees or their Heirs, shall on the twenty Fourth day of December in every year after my decease pay or cause to be paid all the Income or Interest of the Residue and remainder of my personal property that I shall die Possessed of, after paying all my personal Legacies just Debts, Funeral Expenses, and all other reasonable expenses to and amongst the poor having Legal Settlements in the said Parish of Alston, living and residing in Nentwater that is to say at and above Nenthall in the Parish, and nowhere else, according as my said Trustee shall think proper.

And it is also my Will that the Aforesaid tenement with the Appurtenances there into belonging shall never be sold. And lastly I do hereby, make, constitute, and appoint Thomas Dodd and John Pattinson aforesaid sole executors and

Trustees of this my last Will and Testament. In witness whereof I have hereinto set my hand and seal, and duly published and declared the same this Twenty Sixth day of June in the year of our Lord One Thousand Eight Hundred and Two. The words (and to their Heirs to be disposed of as herein) in the first page writ upon an Erasure- and the word (Carr) in the same page interlined being first made.

Will Proved at York 16th July 1803

22nd February 1834 (Newcastle Journal;)
Marriages
At Garrigill Gate, near Alston, on the 15th inst. Mr William Parmely to Miss E. Parmely, both of Snappergill.
In 1841, at Garrigill Gate, William Parmely, lead miner, aged 35, his wife Elizabeth 30, children, Jane 6, Elizabeth 4, and Mary 2.
William Parmely was buried 16th December 1848, aged 45, at Garrigill.
In 1851, at Gatefoot, Garrigill, Elizabeth Parmely, widow, aged 43, children, Jane 16, Elizabeth 14, Mary 12, Margaret 9, Hannah 7, and lodger, Joseph Scoaling, lead miner aged 30.

1st March 1834 (Newcastle Courant)

TO BE SOLD BY AUCTION,

At the House of Mrs. Bland, the Crown Inn, in Alston, in the County of Cumberland, on Saturday, the 15th Day of March, 1834, at seven o'clock in the Evening,

(Subject to Conditions, which will then be produced)

ALL those TWO MESSUAGES or TENEMENTS, one of which was formerly used as a Public House.

And also, all those CLOSES of Meadow and Pasture Land, containing together 25 Acres, or thereabouts, with the Stables, Byers, and Conveniences to the same belonging.

All of which Premises are commonly called or known by the Name of GREEN ENDS, and are situate in the Parish of Alston, in the County of Cumberland, and now in the Possession of Mr. Jacob Walton, as Tenant thereof.

A good Carriage-Road runs through the above-mentioned Premises to the Market Town of Alston, from which they are distant only four Miles. The Estate is capable of very great Improvement at a small Expense, as there is plenty of Limestone in the Neighbourhood.

The Premises may be viewed on Application to the said Jacob Walton; and further Particulars may be known, and a Plan seen, on applying to Mr. John Dunn, Solicitor, Durham, or to Messrs R. and W. Bainbridge, Solicitors, Alston.

See 1st June 1833, 14th May 1836, 13th June 1840, and 16th November 1864.

1st March 1834 (Newcastle Journal)

VEGETATION IN A LEAD MINE—SINGULAR FACT.—On the 20th instant, Jonathan Woodmass, Jun., a working miner, at Netherhurth Lead-mine, Alston, the property of Messrs. Shaw & Co., brought up a quantity of new potatoes, which had actually vegetated many fathoms below the surface. The potatoes were of; the light-red kidney sort, and some of them measured six inches in circumference, while many of the stalks were 18 inches long, and produced at the root from 16 to 19 of the vegetable. It appears that the workmen got a quantity of potatoes taken to the mine (which lays near the head of the river Tees) in the latter, end of last year, for their winter store, and took them down to preserve them from frost, and the crop of which we are now speaking, were produced from some small ones, which were cast aside as worthless, and which took root spontaneously, without any covering whatever. A quantity of the potatoes thus produced in the deep bosom of the earth, were cooked at the residence of Mr. Shaw, at Alston, and partaken of by a party of friends. Their flavour was excellent.

15th March 1834 (Newcastle Journal)

Longevity

John Martin and his wife Martha, living with Mrs. Watson, their eldest daughter, at Ashgill-Side, vale of Garrigill, Alston Moor, recently received the congratulations of their friends on the anniversary of their 103rd birthday. The venerable pair are well in health and capable of walking about, but the faculty of memory is much impaired in both since our record of them last year. In the primitive language of the mountaineers of Alston, “they have lived together, man and wife, upwards of 80 years.”

15th March 1834 (Carlisle Journal)

I**nquest.** — At Mill House, in the parish of Alston, on Wednesday last upon the body of Wm. Walton, aged 22. It appeared that the deceased had been working in Rotherup Fell Mine on the day preceding, when a large stone fell from the drift roof of the mine upon his right side, and injured him so much that he died shortly afterwards. Verdict, “Accidental death.”

William Walton aged 22, of Leadgate was buried at Garrigill 14th March 1834.

29th March 1834 (Newcastle Journal)

THE LEAD TRADE.

The mining district in this and a neighbouring county, for a considerable time past have been very much depressed owing to the state of the Lead Trade; and the town of Alston in particular, has been almost half depopulated by the circumstance, many of its inhabitants having emigrated to America, and others removed to the coal districts, in search of employment. The value of property has, of course, been greatly deteriorated, and there are said to have been 200 empty dwellings in the small town. We are happy to state that such an

improvement has lately taken place, as to afford hope of ultimate restoration of the town and trade of Alston Moor. Two years ago, Lead was as low as £12 per ton, and we understand it has lately been sold in the neighbourhood at upwards of £18 per ton.

5th April 1834 (Newcastle Journal)
Deaths
At Hudgill near Alston, suddenly, on the 28th ult., Mr. John Hudson, miner, aged 45 years, greatly respected.
John Hudson of Hudgill, was buried 30th March 1834, at Alston, aged 45.

5th April 1834 (Carlisle Patriot)
We have repeatedly had occasion to allude to the depressed state of the lead trade, and the consequent distress in the mining district of this and an adjoin county. We are told, so disastrous have been the effects of this depression in Alston Moor, that in the small town of Alston alone there were a short time since nearly 200 empty dwellings. We have much gratification in stating, however, that a great improvement has lately taken place in the trade, which is strikingly evinced by the fact that lead has been sold at £18 per ton, which two years ago brought only £12. There are prospects, therefore, of the town of Alston being restored to its former prosperity.

19th April 1834 (Carlisle Journal)
Inquest: At Alston, Townhead, on the 12th, in view of the body of Hannah Coulson, aged 8. The child had been left alone in her father's house on the 10th, when by some means her clothes caught fire, and she was so much scorched upon the neck and face, and other parts of her body, that she died six hours afterwards. Verdict, "Accidental death."

29th April 1834 (Cumberland Pacquet and Wares Whitehaven Advertiser)

See 9th February 1855, & 25th January 1856

Passenger Manifest of the Boanerges, 18th March 1862

Marvellous Escape From Death In A Mine—On the 12th instant, as Samuel White, Sen., of Alston, was engaged in making repairs in the low water-level of Thorngill East-end Leadmine, in Alston moor, a portion of the roof fell down and partially entombed him. On recovering his recollection, he discovered that the water was running over his shoulders, and would soon have drowned him. By a despairing effort, he first relieved his head and other parts of his body. On endeavouring to extricate his leg and foot, he found the bone was broken in two places, notwithstanding which he succeeded in crawling out of the level a distance of 200 fathoms, and in despite of the obstacles offered by a large stream of water. The compound fractured has been since reset by Mr. John Bell, and the sufferer is recovering.

4th October 1834 (Newcastle Journal)
Deaths
At Nenthead, on the 23rd ult. after a long and painful illness Mr. Thomas Madgen, aged 83, the oldest operative miner in Alston Moor.
See the Will of Leonard Madgin

11th November 1834 (Cumberland Pacquet and Wares Whitehaven Advertiser)
A young man named William Millican, who is employed as a miner at Greenside, in the vicinity of Keswick, met with a serious accident on Wednesday last. He was engaged with two other workmen boring a hole for blasting with gunpowder, which he ignited by a train, but had not got sufficiently far from the spot when the explosion took place, and the consequence was, that he was dreadfully injured in his face and arms, but is now pronounced to be in a fair way to recovery. He is a very industrious and deserving character.

5th December 1835 (Westmorland Gazette)
BORROWDALE BLACK LEAD MINES—These valuable mines have been inspected during the last week, by ———Banks, Esq., of London, the principal proprietor. Mr. B. expressed his entire satisfaction, with the manner in which the mines had been carried on and conducted by their steward, Mr. William Dixon, of Seathwaite, and also expressed an intention of re-opening the mines, which have been entirely closed for several months back.

31 Jan 1835 (Carlisle Journal)
Deaths

14th February 1835 (Carlisle Patriot)
TO STONE MASONS
To be LET, the BUILDING of a NEW STONE BRIDGE over the river SOUTH TYNE, near ALSTON, in the county of Cumberland.
A Plan and Specification, with Sections of the Bridge, may be seen at the CLERK of the PEACE'S Office, Courts, Carlisle, where tenders will be

received until the 22nd Day of FEBRUARY next, and the Contractor declared at the Petty Session's to be holden at the GEORGE INN, Penrith, on the 24th Day of February next. Clerk of the Peacee's Office, Courts
Carlisle, January 29th, 1835

21st February 1835 (Newcastle Journal)
Deaths
At Alston, the 17th instant, Elizabeth *(aged 76)*, relict of the late Mr. Thomas Walton, agent the Blagill Lead Mine.

11th April 1835 (Carlisle Patriot)
COUNTY BUSINESS
The new Bridge at Alston had been let for £850, to be completed by the 31st August next. It will be commenced with immediately.

18th April 1835 (Carlisle Journal)
The Postmaster General has given directions for the establishment of a daily post between Penrith and Hexham, through Alston and Haydon Bridge, an arrangement which will be a great accommodation to the district.

18th April 1835 (Westmorland Gazette)
A shocking accident befel young man, named, Coulthard, a miner, at Greenside, in Patterdale, on Thursday last. It appears that whilst attending a water-wheel, one of the bolts in the shaft of the axletree became loosened, and in attempting to fasten it, the unfortunate youth was caught by the coat neck, and carried five or six times round with the wheel before it could stopped. Both his thighs were broken— one them in two places—and he is now in state extreme danger.
On Friday week, a young man, twenty years of age, named Joseph Bowman, a miner at Greenside, in Patterdale, met his death under the following circumstances: —He was engaged to blast a large stone at Wallthwaite, and completed his boring, was in the act of putting down the powder, when it exploded—in consequence, most probably, of his instruments having become heated by friction. The man was so dreadfully injured about the head and throat that he died in a few days.
Joseph Bowman aged 21, buried at St Mary, Threlkeld, 7th April 1835

2nd May 1835 (Westmorland Gazette)
Marriage
At Alston, Mr P. Bainbridge, of Patterdale Cumberland, to Jane, youngest daughter of Mr Archer.
Peter Bainbridge married Jane Archer 16th April 1835, at St Augustine's, Alston.
Peter Bainbridge, born 10th January 1808, 2nd son of John Bainbridge, Alston miner, and his wife Mary, daughter of William Beadle.
In 1841, at Barton, Westmorland, Peter Bainbridge, lead miner aged, 30, his wife Jane 30, and son William 1.

Jane Bainbridge, died 1st quarter 1848, registered at West Ward, Westmorland.
Peter Bainbridge of Patterdale married Elizabeth Richardson, 1st September 1849, at Gretna Green.
In 1851, at Hartsop, Patterdale, Peter Bainbridge, lead miner, aged 43, born Alston, his wife Elizabeth 48, children William 11, Joseph 8, Mary 6, and Jane aged 4.
In 1861, at Green Bank, Patterdale, Peter Bainbridge, miner, aged 53, his wife Elizabeth 58, children, William, miner, aged 21, Joseph, miner, aged 18, May A 16, and Elizabeth 10. Elizabeth Bainbridge died 4th quarter 1868, aged 66.
In 1871, at Low Hartsop, Patterdale, Peter Bainbridge, widow, miner, aged 63.
In 1881, at Holme Ground, Hawkshead, Coniston, John Brunskill, slate quarier, aged 34, his wife Elizabeth 28, children Mary 10, Margaret 3, Jane 6, and boarder, Peter Bainbridge, widow, labourer, aged 73.

16th May 1835 (Carlisle Journal)
A new daily post, conveyed by mail cart, has commenced, by authority of the Postmaster General, from Penrith over Alston Moor to Hexham, where it arrives in time for the mail coach to Newcastle, and as this post returns to Penrith immediately on the arrival of the Newcastle and Carlisle mail at Hexham, reaching Alston at 1 o'clock, it has opened a direct and very expeditious communication between Newcastle, Shields, and other important places on the eastern side of the kingdom and Alston, while the London and South letters are received at the latter town, via Penrith, before 7 o'clock in the morning.
Deaths
At Keswick, on the 28th ult., Mrs. Ann Calvert, formerly of Alston Moor, in her 88th year. She was much respected through life by all who knew her, for her industry, perseverance, and integrity; she was a widow 45 years, and although left with numerous offspring, and was frequently recommended to apply for assistance from the parish to which she belonged, yet her noble and independent disposition still refused, and, with care and attention, she reared her family in a most respectable manner.

23rd May 1835 (Newcastle Journal)
Deaths
At Craig House, near Allenheads, on the 15th inst., aged 31 deeply and deservedly regretted by a very numerous circle of relatives and friends, Mr John Bownas.

26th May 1835 (London Gazette)
Derwent Mines Company.
NOTICE is hereby given, that the second Annual General. Meeting of the Shareholders of the Derwent Mines Company will be held at their Office, 2, Turnwheel-lane, Dowgale-hill, on Thursday the 4th day of June next at one o'clock in the afternoon precisely, and that it will be proposed at such meeting (in addition to the usual business of the day) to. declare a dividend, and also to make certain alterations in the amount of capital and number of shares in the said Company. — Dated this 23rd day of May 1835.
Joseph Symm, Clerk to the said Company

24th June 1835 (Derby Mercury)

WIRKSWORTH
VALUABLE LEAD MINES
TO BE SOLD BY AUCTION

By Mr Brearey

At the Greyhound Inn Cromford, in the county of Derby, on Saturday the 11th day of July, 1835, at Six o'clock in the evening

TEN EIGHTEENTH SHARES of the Goodluck and Diana Mines and Bank Close Scrins, situate in the Soke and Wapentake of Wirksworth, belonging to the London Lead Company.

The advantages attached to the title of the Goodluck Veins are as follow:

A splendid work of Ore, comprising two broad ribs of Lead, that have been worked within the last three years, the richness of which is so well known, that it may be justly considered as the most eligible and promising of all the Veins contained in the rich Valley of Wirksworth.

The Soles of the Mine are 13 yards above the level of the Cromford Sough at Hands Hollyhole Shaft, which 13 yards will be laid dry by the level at present driving from that Shaft towards Goodluck Mine.

The Goodluck Vein is forward of the Field, therefore in addition to the known goodness of this Vein, all discoveries will belong to the proprietors of the Goodluck Vein, which discoveries the best of miners speak with confidence will produce a fortune.

The situation of the principal Shaft at Goodluck is highly advantageous for the erection of a Steam Engine, being in the lowest part of the Valley of Wirksworth, and the depth being only 20 fathoms.

In consequence of the above advantages the London Lead Company have entered into an agreement with the Cromford Soughers, that in the event of the former giving relief to the Mines (at present under water) in the Valley of Wirksworth, the Cromford Soughers resign their right to a certain composition which, they are entitled to receive, the London Company paying them a fourth part of the alienated composition. The composition is one sixth of the Ore raised in the various mines in the Valley of Wirksworth, which are relieved from water by the Sough or Engines.

In order to carry into effect, the agreement between the Cromford Soughers and themselves, the London. Company have driven a level in the solid stone 6 feet by 4 from the Hands Hollyhole Shaft to the Little Diana Vein, a distance of nearly 300 yards. The level in future will be continued in the Vein, and consequently driven at a trifling expence.

The Diana Mine is now getting a considerable quantity of Ore, with every prospect of increased profit; there are between 30 and 40 fathoms of stone dry, with 30 meers of whole ground in the forefield.

The Goodluck and Diana Mines have good engine and climbing shafts in complete repair; waggon gates fitted with rails; two engine gins, nearly new; warehouse, coes, and every necessary building and implement for carrying on a large concern.

The Shares of the London Lead Company are eighteenths instead of twenty-fourths, which are customary. Ten Eighteenths (the Shares to be sold) are equal to 13-24ths and 1-72.

For further particulars, which will be printed in a few days, and for a plan of the whole property, application to be made (post-paid) to Mr. Brearey, Summer Hill, Derby.

29th August 1835 (Carlisle Journal)
Deaths
At Dufton, near Appleby, Mr William Dalton, agent to the London Lead Company, aged 40 years, Mr D. was author of Travels in America, and a highly respectable local preacher in the Wesleyan Methodist Society, and generally beloved.

19th September 1835 (Newcastle Courant)
On Friday se'nnight, as a young man named William Walton, of Dykeheads, near Alston was employed in wheeling limestone in a quarry at Nenthead; he had to cross a plank from one embankment to another, and in one of his trips it is supposed the barrow had slipped from the plank, and having lost his balance, he fell amongst some large stones beneath, and fractured his skull, which caused death in a quarter of an hour.
The coroners report gives the age as 21 years. Alston Transcripts give his burial on 6th September 1835, aged 25.

19th September 1835 (Carlisle Journal)
On Tuesday Last an inquest was held at Alston, on view of the body of Adam Walton, a miner. The deceased was engaged with another man in making a shaft in one of the lead mines near Alston, and in ascending he omitted to take the usual precaution of tying the rope around his thigh when about eight yards up the shaft, he lost his hold and was precipitated to the bottom. His companion went down immediately, and found him quite dead. His head was much bruised, and the skull was fractured. Verdict—accidental death.
The coroners report gives the age as 23 years, Alston transcripts give Adam Walton buried 16th September 1835, aged 53.

31st October 1835 (Newcastle Journal)
Marriages
At Alston, on the 22nd inst., Mr. Isaac Armstrong to Miss Mary Black, both of Nenthead.
In 1841, at West Nenthead, Isaac Armstrong (son of Robert & Hannah Armstrong, baptised 27th August 1814), lead miner, aged 27, Mary 23, Dinah 5, and Mary Ann 3 months. In 1851 at Nenthead, Isaac Armstrong, lead miner & farmer aged 36, his wife Mary aged 32, children, Dinah aged 15, employed at home, Joseph 8, Hannah 4, Isaac 2, Ann 2, and Mary 7 months. In 1861, at Dyke Heads, Nenthead, Isaac Armstrong, lead miner, aged 46, his wife Mary 44, children Joseph, lead miner, aged 18, Hannah, house servant, aged 15, Isaac 12, Mary 9, and Thomas Rutherford, grandson, aged 4 months.

21st November 1835 (Carlisle Journal)
Deaths
At Alston, on the 17th inst., Mr. John Woodmas, aged 68 years.
At Ivy House, Garrigill Gate, on the 9th inst., Mr. Westgarth Forster, mineralogist, aged 63. His modest unassuming manners caused him to be beloved and

respected, and his extensive knowledge in mining operations made his Company to be sought after by persons employed in that pursuit to whom his mind was ever open.

Son of Westgarth and Lucy Foster (Emerson married 9th June 1766, at St Margaret, Durham) of Coalcleugh, baptised at Alston 8th December 1772.
Westgarth FORSTER of Unthank Hall in the County of Durham, died 1st February 1797, aged 58, Lucy his wife, died 7th September 1806, aged 63.
Children:
Mary baptised 6th September 1767 at Garrigill, died 13th February 1814, aged 47.
Susan born 14th April 1769, baptised 14th April 1771, at Garrigill
Lucy baptised 14th April 1771, at Garrigill.
Westgarth baptised 8th December 1772, at Alston.
William baptised 2nd August 1780 at Allendale, died in London 20th April 1812, aged 32.
Phoebe baptised 1 May 1778, at Allendale.
Phoebe married Thomas Brown (Merchant) at Garrigill 26th October 1806,
Thomas died 15th January 1833, at Garrigill, aged 62
Phoebe died 11th November 1836, aged 58 (buried at Garrigill 14th November 1836).
See, 19th January 1833, and 19th November 1836

Their son Thomas baptised 27th July 1808, married Hannah Watson, 12th May 1834 (Hannah died 18th July 1838, aged 30, buried at Garrigill, 21st July 1838).
Their son John baptised 17th July 1812, at Garrigill, married Elizabeth Bell, 21st December 1837, at Garrigill.
In 1841, at Garrigill Gate, John Brown, lead miner, aged 25, Elizabeth aged 25, and Phoebe aged 1 year. Their children, Jane, buried 23rd May 1846, aged 2; John buried 31st May 1846, aged 4 weeks; Susanna, buried 30th March 1847, aged 2. John died 16th March 1846, buried 18th March 1846, at Garrigill, aged 33; his wife Elizabeth born 25th April 1813, died 5th June 1879.
In 1851, at Ivy Cottage, Garrigill, Elizh Brown, widow, proprietor of houses, aged 37, daughters, Phebe 11, Sarah 9, and son, William Bird 8.
In 1851, at Laing, William Bird, aged 63, landed proprietor, his wife Sarah (Vipond married at Alston 14th December 1813, died 6th September, buried 9th September 1855), aged 64, servant, Robert Hawthorn, widow, farm labourer, aged 41, Mary Slack, house servant, aged 22.
In 1861, at Ivy House, Garrigill, William Bird (died 31st January, buried 5th February 1870), widow, landed proprietor, aged 73, born Skirwith, nieces Phebe Brown, aged 21, house maid, Sarah Brown, dairy maid, border Rob Hawthorn, widow, carter, aged 56, born Scotland, and Ann Bell, servant, aged 18.
In 1861, William Bird Brown aged 18, is listed as a schoolmaster, and is lodging at Beltingham, Northumberland.
In 1871, at Ivy House, Garrigill, Elizabeth Brown, widow, aged 58, annuitant, son William B. aged 28, farmer of 255½ acres, farm servant John Smith aged 15, and also at Ivy House Mary Bird, widow (Second wife of William Bird, Mary Slack aged 59, married William Bird aged 76, 20th December 1863, at St John, Garrigill), aged 67, annuitant (died at Howburn, Haltwhistle, 28th April 1875 aged 71, burial recorded at Garrigill 1st May 1875).

In 1881 at Ivy House, William B. Brown, farmer of 144 acres, employing 1 boy, aged 38, his wife Sarah aged 33, children Julia P. 8, Lucy F. 7, Evangeline 2, Sarah E. 6 months and farm servant Thomas W. Atkinson aged 15.
See 14th September 1855, 8th July 1876, & 13th February 1875.

Redwing Epitaphs give the following information: —

The children of William and Sarah Brown of Ivy House Garrigill,
Phoebe and Rebecca born and died 6th February 1875.
Josephine Pickering born 26th January 1876, died 29th June 1876.
Josephine Elizabeth born 30th June 1877 died 16th January 1878.
"For of such is the Kingdom of Heaven."

& LUCY FORSTER DIED 9TH NOV 1835
AGED 63 YEARS

Source: Garrigill Transcripts Newcastle City Library

The following is from CAPELLA de GERARDEGILE by CAESAR CAINE 1908, sourced from the Wordsworth Collection of Cornell University.

> Westgarth Forster. … His father occupied the post of Manager of the Allendale Mines, and upon his death in 1797, his son was appointed his successor, and continued to hold the post till 1807. He then resigned his occupation as mine agent, and, together with his sister Susan, occupied Ivy House, Garrigill, alternating the duties of a farmer with researches for his book which appeared in 1809.
> In 1810 he became mine surveyor, and laboured in his profession with enthusiasm until 1833. A second edition of his "Strata" appeared in 1821.
> During this period his energies led him far beyond the mineral areas of the North. We find him in Wales, distant English counties like Somerset, and also in the mining regions of Spain and America. He met with a measure of financial success, and in his most prosperous days his income ran easily into four figures. But reverses set in, and the closing years of the life of this clever man were saddened by successive losses, caused by what has been called a mania for mining speculations.
> At the "winning of the hay" in 1833 he walked into Garrigill practically a penniless man. Repeated misfortune had undermined his health, and he died poor and depressed in spirit.

In 1834 he parted with his plate, pictures, and books, for daily sustenance, and expired at Ivy House as recorded on his tomb stone, Nov. 9th, 1835.

IVY House, Garrigill ("The Hivin")

Wallace says it was built in 1790, but it was, in part standing a hundred years before this. One portion bears the date 1694

28th November 1835 (Carlisle Patriot)
The elegant bridge at Alston was opened to the public on Saturday last, although not quite complete, for the erection of the parapets is necessarily delayed until the spring. By connoisseurs in architecture we understand this bridge is pronounced one of the most complete of the kind erected in the north of England, and reflects much praiseworthy credit on the undertakers, Messrs. John Griensthwaite and Co., of Penrith. Mr Milton, the Bridge Surveyor, it is

said, is highly gratified at the workmanship, and entertains no doubt of its durability. The improvement in the old road approaching thereto shows the bridge to great advantage, and must likewise prove a great benefit to the town of Alston.

5th December 1835 (Newcastle Journal)
Marriages
At Alston, on the 25th ult., Mr. Joseph Cowing of Foulard Farm House, to Mrs. Mary Cowing of Overwater Houses, near Nenthead.
William Cowing (son of Thomas Cowing & Elizabeth Hetherington, married 25th May 1775) married Mary Nanson, of Brough, Westmorland, 13th December 1812, William died at Alston, buried 30th November 1832, aged 54. In 1841, at Donks Hall, Joseph Cowing (son of William Cowing and Jane Thompson, baptised 26th September 1789) aged 50, carrier, Mary aged 50, and Michael aged 9, baptised at Nenthead Primitive Methodist Chapel, Nenthead 13th August 1832, born 25th May 1832 (son of William Cowing and Mary Nanson).
In 1851, at Cab End, Nenthead, Joseph Cowing, annuitant from a club, aged 61, born Alston, his wife Mary aged 60, born Brough, Westmorland, step son Michael Cowing, aged 18, cart driver, born Alston.

16th April 1836 (Carlisle Patriot)
CUMBERLAND EASTER SESSIONS
The Bridge Master's report was next read; of which the following is a copy :—
"Cockermouth, 5th April, 1836.
"GENTLEMEN,—I beg to report to you, that Alston Bridge is at last completed, with the exception of the fencing of posts and rails at each side of the road, at the west end thereof, and the finally clearing away the eastern abutment of the old bridge, and some stones out of the river's course; and I think I may take upon me to say, that after great perseverance and determination to carry the contract fully into effect, the work is well executed— will bear inspection in any part of it—and I hope give satisfaction. I ought to have stated, that it was opened out and made passable in November last, and is at this moment, I believe, without the slightest yielding, or settlement. The old bridge gave the contractors no trouble of taking down, as about a month since it fell down, and very fortunately, at a time when no one was upon it, for had it occurred half an hour earlier, I fear the accident would have proved serious, as several persons were then standing upon it. I am afraid the account for the extra work at this bridge, now before the Court, may appear large—but against which there is a considerable set off— nothing short, however, of the quantity, in my opinion, could have done, so heavy and extensive have all the embankments been— both river and land to provide against, and still there are some who think I ought to have done more to protect their property, which the alterations for the new bridge left exposed and occasioned expenses. The contractors are in court, and wish, I believe, to make some statements of the loses they have sustained in consequence of the deficiency of the workmanship in the stones of the late new bridge not being available for the present bridge, as well as the loss in the quantity of stones, which have been carried too far down the river by the floods to justify the expense with which the recovery of them would have been attended; this disappointment, together with the high rate of wages they were obliged to give to get men to work in that part of the county, has, I fear, reduced

their contract to a considerable loss. I am sorry for this, as really the bridge is soundly and substantially executed, and will, I believe, last for centuries to come without any material expense to the county. …"

30th April 1836 (Kendal Mercury)
A short time ago, a lead mine was commenced on the Westmorland side of the Lake of Ullswater at a place called Swathbeck, with every likelihood of success. Eagle Crag mine is also re-opened and the shares gradually advance. Greenside is in a most flourishing state.

30th April 1836 (Newcastle Journal)
Deaths

See 1st June 1833, 13th June 1840, and 16th November 1864

14th May 1836 (Carlisle Journal)
A young man of the name of Thos. Phillipson, of Alston, met with his death very suddenly on Saturday last. He was employed in burning a lime kiln at Newshield. The kiln was filled with coal and limestone to within four feet of the top and had been lighted. Shortly after laying on a fresh supply of coal, the deceased had it is supposed, got down into the mouth for the purpose of breaking some large pieces of limestone, when, becoming suddenly overpowered by the carbonic acid gas rising from the heat of the kiln, he had fallen down and been suffocated. He was found about two hours after he had gone to work, lying upon the burning material quite dead. The deceased was very industrious and well conducted man, and is much lamented by his family and all who knew him. An inquest was held upon the body, and a verdict of "Accidental death" returned.
Thomas Philipson aged 30, of Alston was buried at Alston 9th May 1836.

4th June 1836 (Carlisle Journal)
Suicide.— On Friday night last, Mary Low, the wife of James Low, a miner in Alston, put a period to her existence by cutting her throat with a razor. The deceased had for two months and upwards been in very bad health, and at the time of her death was in the last stage of consumption. She was subject to occasional attacks of despondency. In the evening in question her husband was at a public house drinking, and during his absence a young man of the Methodist persuasion called as usual to pray with her. He appears to have laboured to convince her of the joys and happiness which was in store for her in the next world, and of the cares and toils which we are doomed to suffer in this life, and there is little doubt that the subject had been impressed deeply upon her mind that she had formed the resolution of taking her own life, for immediately after he left the house she sent her servant girl and the children on an errand into the town, and then having fastened the outer door had preceded to a room upstairs, and after preparing her self with a razor, had got into bed and then cut her throat. In a short time the girl returned, and finding the door locked she alarmed the neighbours and sent for the husband, who upon going into the room upstairs found his wife quite dead. Her throat was cut from ear to ear, and the bed clothes saturated with blood. The deceased was 35 years of age, and has several young children. An inquest was held upon the body before W. Carrick Esq., on Saturday last, and after a long investigation before a highly respectable jury, a verdict was returned, that the deceased committed suicide during a fit of temporary insanity.
Mary Low aged 35, was buried at Alston 29th May 1836.

17th June 1836
Coroners Inquest (Carlisle Archives TCR 2)
Inquest held on the 17th June 1836 on the body of William Robinson aged 16, verdict accidental death.
Depositions of Hugh Hutchinson & John Dryden.

Hugh Hutchinson, Nenthead miner. I knew the deceased he was about 16 or 17 years old. The last time I saw him alive was in Archer Level in Capel Cleugh lead mine. He was a driver of wagons in that level. 2 wagons were drawing by one horse. He left the far end of the level with 2 wagons laden with ore drawn by a horse the property of the Gov. & Co.,

when they started he sat upon the first waggon the fore part he sat upon the end and his legs hung down behind the horse. I saw the men were sitting upon the hinder waggon. We sat with our backs to him, having our faces looking back in the direction we had mined. The horse started quicker than usual. I don't know the reason. After going about a quarter mile the waggons crossed a switch rail which caused more noise and I think the horse had been frightened at that as he went off at a quicker pace and the driver did all he could to stop him by shouting at him this appeared to make the horse go faster. In about 20 fathoms one waggon was thrown off the rails and that stopped the horse. I got off and saw deceased lying upon the level floor. Both waggons had crossed over his body. He was dead the blood was flowing from the head. We took him up until an empty waggon came I took him out and he was carried home. I don't think he struck the horse to make it run away. He had new reins. It is usual to drive with reins. I have known the horse 3 months. I think he has been at that work about that time. I have heard it said that he has made attempts before to run away but never got off. He was at a swift trot when the accident happened.

John Dryden. I work in this mine I have known the horse about a year. He has worked at his drawing work during that time I never have been his driver but I have been in the habit of seeing him at his work. He went under the character of being a sl _ _ _ ish horse in his temper. When he had a heavy load by throwing himself to it and going off very fast. I never knew him to go off in a trot or gallop. I never heard of him running away before. I think it was safe to entrust him to the deceased and have done so with a child of my own of that age. I never heard of any complaint being made to the steward about the horse.

18th June 1836 (Carlisle Patriot)
Deaths
At Hesket-New-Market, on Saturday last, Mr Jonathan Iveson, aged 84; many years agent for the Duke of Portland's lead mines, on Caldbeck Fell.

9th July 1836 (Carlisle Journal)
A poor woman was struck by lightning at Nattrass, near Alston, while sitting in her house, which set her clothes on fire; and before she was discovered they were nearly burnt off. She is now lying in a dreadful condition. A watch, which was hanging upon a shelf in the same room, was melted from the nail upon which it hung.

15th July 1836 (Durham County Advertiser)
Marriages
At St John's Chapel, Weardale, 2nd inst., Mr. Thomas Gardiner, Mount Pleasant, to Miss Anne Robinson, of Windy Side.
At Heathery Cleugh, Weardale, Mr. Thomas Hodgson, of Nenthead to, Miss Ann Pattinson.

6th August 1836 (Carlisle Journal)
A man named Thomas Slater was drowned in the Caper Cleugh *(probably Capelcleugh)* mine, Alston, whilst engaged in driving a level, by the bursting

in of an old working, on the 26th ult. His son, who was working with him, had a narrow escape. Verdict of the coroner's inquest, accidental death.

13th August 1836 (Carlisle Journal)
STEAMER ON ULLSWATER LAKE.—The spirited mining company, who are now working the lucrative lead mines in Patterdale, have resolved to put a steam boat on Ullswater Lake, for the purpose of conveying pig lead down to Pooley Bridge, a distance of nine miles, instead of conveying it by the slow operation of carts, a distance of not less than ten miles. The steamer on conveying down the lead, will return laden with the most useful of all articles to a mining establishment, viz. coal.— We think the day cannot be far distant when pleasure-boats, for the accommodation of tourists, will be propelled by steam, on all the larger lakes, such as Windermere, which is 13 miles in length, and Ullswater, which is nine miles in length.—*Cor*.

10th September 1836 (Newcastle Journal)

OBITUARY
Death Of Oldest S.A. Customs Agent
Mr. Edward Vipond Little, the oldest customs and shipping agent in South Australia, and probably in the Commonwealth, died at his home. Torrens road, Woodville, recently, at the age of 86. Mr. Little was recognised as one of the best-informed men in the State on coastal shipping. He was born at Penrith England, and, a week before leaving for Australia in the ship Drumpark on August 28, 1877, was married to Miss Janet Robson (21st August 1877). He arrived at Melbourne on November 26, 1877 and, after a year in Victoria, he came to South Australia, and entered the firm of Morgan, Connor and Glyde, shipping and general agents, and flour millers, of Port Adelaide.

Later he started the business of E. V. Little, customs and shipping agents, and. with his son, Mr. K. V. Little, was connected with the office for 55 years.
Except for a few years at Semaphore, he lived at Woodville during the whole time he was in South Australia. Mr. Little was devoted to music. He was choirmaster and organist at the Semaphore Baptist Church for many years, and later Mr. E. V. Little, jun., followed his father as organist in this and other churches in the Port Adelaide district. Mr. E. V. Little, jun.. died some years ago. and his wife died two years ago.
Mr. E. V. Little left one son Mr. K. V. Little (Port Adelaide) and two daughters. Mesdames P. H. Jones (Toorak Gardens), and E. Judd (Mosman, Sydney).

4. John Little married Sarah Walton 17th October 1795, at St Augustine's, Alston.
See 2nd December 1837 and 21st August 1857.
Children of John and Sarah Little:
4a. William baptised 12th February 1796, son of John & Sarah Little of Flatt, Garrigill.
4b. George born 5th May 1798 2nd son of John Little of Dryburn, Miner, by his wife Sarah daughter of John & Sarah Walton.
4c. John born 22nd November 1800, 3rd son of John Little of Dryburn, farmer, by his wife Sarah daughter of John Walton of Sillyhole.
4d. Mary born 18th March 1803, 1st daughter of John Little of Flatt, agent, by his wife Sarah daughter of John Walton of Sillyhole. Mary died 13th June 1820 aged 17, buried at St John Garrigill
4e. Jane born 9th January 1805, 2nd daughter of John Little of Flatt, agent, by his wife Sarah daughter of John Walton.
4f. Edward born 16th February 1807 son of John Little of Raise, yeoman, by his wife Sarah daughter of John Walton of Sillyhole.
4g. Sarah born 29th July 1810. Sarah died 21st August 1820 aged 10, buried at St John's, Garrigill.
4h. Diana born 12th February 1812
4i. Elizabeth Tamer born 23rd October 1815

John Little of Raise House, Alston, died 9th July 1821, aged 47, at Allonby, where he had gone for his health. Buried at Garrigill 13th July 1821.

The Will of John Little of Raise House, Alston:

The last Will and Testament of John Little of Raise House in Alston, Cumberland, Gentleman.
To wife Sarah Little yearly sum of £25, paid half yearly while she remains a widow, also use of all my household furniture, plate, china, bedding and linen, and have my dwelling house called Raise House and the garden and field called Home Field, and 2 stints or Cattle Gates on the Moor or stinted pasture called Crookburn Moor with necessary out-housing and byers without paying any rent.
To my wife yearly and every year by half yearly payments of £14 for each of my children who shall be under 18 years of age and reside with their mother. In case of second marriage or death, the Executors are directed to pay £14 to children under 18 as they see fit.

To my son William Little, the dwelling house and buildings called the Shot Manufactory and pastures in which it is situated extending to Hall Hill pasture for his natural life. After his decease the same premises to go to the eldest son of William Little who may be living, if there is none then it goes to my own eldest son still living.
I direct my Executors within 12 months to sell all my stock of cattles, hay, grass, farming crop and utensils belonging to my several farms in the parish of Alston and let my several farms to best advantage and to carry on my several shares of Lead Ore Mines or Veins to best advantage and to apply the money arising for the purpose of this will.
As soon as my youngest child attains the age of 18 the Executors shall sell and convert to money all my Leasehold Estates and Effects, Shares of Lead Ore Mines or Veins and other personal property except the premises at Raise and Cattle Stints given to my Wife and the Shot Manufactory bequeathed to my son William Little and also except my household furniture, plate, china, bedding and linen, and to apply the money arising towards paying just debts and to place out at interest upon good security sufficient sum of money to pay the annuity of £25 to my Wife and to pay and apply the residue amongst my several children -
William, George, John, Jane, Edward, Diana, Elizabeth Tamer and Thomas Little – each childs share £800 if there is that much, if not in equal proportion, and the residue, if any, equally divided amongst my sons only - to be paid when the children reach the age of 21 years.
After the second marriage or death of my Wife, the property at Raise and Cattle Stints, househod furniture, plate, china, bedding and linen and the money that paid her annuity, fall into the hands of the Executors for the benefit of my children. Household furniture, plate, china, bedding and linen to be equally divided amongst my children. Premises at Raise and Cattle Stints to be sold and money to be divided equally amongst children.
I recommend to the Executors to allow my shares of Lead Ore Mines called East Cross Fell and Long Kate Lock Mines to be carried on to the extent of the present lease by my son William Little. After the expiration of the lease the Executors to either carry on or dispose of them.
I give to my son John Little my Gold Watch provided he give the Gold Watch he hath to my son Edward Little
If money is available, Executors can advance up to £200 to each son for their advancement in the World from their legacies.
£10 to each Executor and their reasonable expenses from the estate:
Executors -
Joseph Salkeld of Randal Holme in Alston
George Hope of New Mills near Brampton
Two nephews - Edward Vipond Little of Alston and John Coulthard of Low Rotherhope of Alston

TO BE LET
And entered upon at May-day next

ALL that extensive LEAD WHARF, together with a substantially well-built WAREHOUSE, and DWELLING HOUSE, situate at Stella, at present in the Occupation of the Governor and Co. for smelting down Lead.
And also, the PREMISES adjoining the above, lately in the Occupation of Messrs Edington and Mark, and used by them as a brewery and Malting.
Both the said Premises adjoin the Newcastle and Carlisle Railway on the one Side and the River Tyne on the other; from and to which Goods can he sent or received at a very trifling Expense.

The Warehouse having been lately built and constructed of the very best Materials, is well calculated for a Steam Mill, or any other Thing of the Kind, where Strength and Durability are requisite.
Mr. Latimer, the Agent at the Lead Wharf, will, on Application allow the Premises to be viewed: and further Particulars may be known by applying to M. W. Dunn, Esq., Hedgefield House, near Ryton.
Hedgefield House, Feb. 1, 1837.

18th February 1837 (Carlisle Journal)

SHARES in LEAD MINES.

TO be SOLD, by AUCTION, at the

Swan Inn, PENRITH, Cumberland, on Tuesday, the 21st FEBRUARY instant, at Six o'clock in the Evening. Lot 1,—Two 64th SHAKES in the rich and highly improved LEAD ORE MINE, called EAGLE CRAGG, situate in GRISEDALE, near Patterdale, Westmorland.
This mine is working by a respectable Proprietary, with great success; the Lead Ore is found in strata similar to the fortunate Greenside Mine, from which Eagle Cragg is but a short distance. The purchasers of these shares will be entitled to participate in the Lead Ore now on Bank, estimated to be worth £450 or thereabouts.
Lot 2.—Two 64th SHARES in the WYTHBURN COPPER MINE, situate in the Manor of Wythburn, in Cumberland, now working with every prospect of success, by a respectable Company.
Lot 3.—One 64th SHARE in the SWARTHBECK LEAD ORE MINE, near to Pooley, in Westmorland, with the right of searching for Mines and Minerals in an extensive Mining District in Martindale.
Apply to Mr. E. HEYLIN, of Penrith, Secretary to the Eagle Cragg Mining Company; or to Mr. MACHELL. Solicitor, Penrith.
Penrith, 2nd February, 1837.

3rd March 1837 (Newcastle Courant)

Newcastle Spring Assizes

Thomas Spoors (aged 25), James Richardson (aged 17), Thomas Widdrington (aged 20), Joseph Jobling (aged 18), were arraigned on a charge of stealing lead from the White Hart Yard, on the 6th February; and Ann Black on a charge of receiving the same, knowing it to be stolen.
Thomas Spoors and Joseph Jobling pleaded Guilty to this charge; Jobling also pleaded Guilty to three other charges on his being previously arraigned. The other prisoners all pleaded Not Guilty, and the Court proceeded to try them accordingly.
Mr. WILKINSON opened the case, and called
James Lounds who deposed: —I am the agent of the Cross-fell Lead Mines, of the firm of John Spedding and Co. I reside at Brandling-place. John Errington, the carrier, brings lead to my lead-yard in the Close; the value of lead is about two pence per pound and a fraction. I am not authorised to sell the lead until it is brought into my yard, and I get an order from my employers.
John Errington deposed: —Jane Errington is a common carrier between Alston and Hexham; she carries the lead to Hexham, and I carry it to this town. I carried 53 pigs of lead from December down to the 6th of February, eight were put in

the High Crane, and the remaining 45 in the White Hart yard. It was the custom to leave them there.
John Pitkethley deposed: —I am a labourer employed by the last witness. On the 4th of February last, I put 6 pigs in the White Hart yard under the window. It had the mark "Cross-fell Mill," and the number.
Philip Oxley (an accomplice of the prisoners, and who had been admitted King's evidence,) was then called, and being sworn, deposed as follows: —I am a Cartwright, and I know the four young men at the bar. Jobling lives in the Pudding-chare. On the 4th of February I went to his house, and asked him for a saw. I got it, and left it at the Wheel of Fortune public-house in the Cloth-market. On Sunday the 5th of February, I saw Spoors at the Wheel of Fortune public-house. Jobling, Richardson, and Widdrington were present; I said to Spoors that I was going to take the saw home again that night. He said, mind Philip, it is not here. Widdrington, Jobling, Richardson, and himself, had had a pig of lead that night; they had been sawing it up at the foot of Wilson's yard, and had been down at Black's with it about ½ past eight the same evening. Spoors said, in the presence of the other prisoners, that they had got another pig of lead at Wilson's low house, and the saw was with it. He said I had a right to a share of it. On the Monday night we all met at the Wheel of Fortune again. Spoors said, he went down about 11 o'clock on the Sunday night, took up a pig of lead, and went down with it, and put it half-way through the big door, and then went the other way, and hid it in Wilson's low-house amongst some dirt. We all came out of the door, and went down the front yard, and met at the foot of Wilson's yard, Spoors said, he would go and saw the two pigs. Some of them said, if he sawed them there he would be catched. Jobling, Widdrington, and I, went up Wilson's yard to the opposite side of the street. Spoors said, if we had a wheel-barrow we could wheel them down the street. Richardson said he had got a wheel-barrow before at the Black Bull public-house in the name of Forster. Widdrington and Jobling agreed to go for it. They brought it, and set it down near to Boyce's cook-shop. One of them said we had better wheel the barrow down the yard above (Parrott's). Widdrington wheeled it down the yard, I stood at the head of the yard, and the other four went for the lead. They were away about five minutes, and returned without the lead, Richardson asked me how far the barrow was down the yard, I said, about half-way. He went down and fetched it, and wheeled it down Wilson's yard. We were all standing at the foot of the yard. I came up the yard; saw Spoors, Widdrington, and Richardson, and I agreed to take the lead that night, Spoors, went down Wilson's yard, went into the house, and brought out a pig of lead to Richardson, Spoors, and myself. Widdrington and Jobling bad gone away. Richardson went in and fetched the other pig of lead, and Spoors and I went to fetch the saw. Spoors took it into the new buildings, and cut it in two. I went back to the Wheel of Fortune and on returning Widdrington and Jobling had come back. Spoors finished sawing, Richardson put one of the pieces into a poke, and went away to Black's with it. Spoor's gave me the saw and I also went to Black's. I met Richardson at the head of Dean-street; he returned with me to Black's. Widdrington and Jobling came to Black's about ten minutes after, with each a piece of lead. One went out and brought the fourth piece of lead. Jobling and I cut the four pieces into eight in Black's back room. Mrs. Black weighed them; she said they were worth Id. per pound, and gave us 18s.; she laid down half-a-sovereign and 8s. in silver. Two got 3s. each. I took up the remainder, and we went out. I gave it to Spoors.

We went into a house in the Side with red curtains, and got a pot of rum. Spoors laid down half-a-sovereign, and paid for the rum. When we came out, Spoors got 5s. 6d., and we got 3s. each. We went to the Head of the Side. Widdrington and Jobling went away; and Spoors, Richardson, and myself, went to the Wheel of Fortune. Spoors, and a friend of mine named Robinson, and I, went to the Bee-hive. I gave the saw to a servant, and told her to let it stop until I came down stairs. The public-house in the Side is kept by Bell —Cross-examined by Mr. INGHAM—I have been in the gaol, and have given evidence against the prisoners to get clear myself. I have been taken up before for stealing lead with Cook. I never gave evidence before. The lead was weighed in separate pieces,
Thomas Ridley deposed: —I keep the Black Bull public house. On the night of Monday the 6th of February, two persons came for the loan of a wheel-barrow for Mr. Forster, who keeps the Wheel of Fortune. I said they might have it.
Elizabeth Hall, servant at the Three Tuns, in the Cloth Market, saw a pig of lead lying inside the bar window of the lower house, and a wheel-barrow on the outside. She wheeled it up the yard, and saw Widdrington and Jobling come into the yard and take it away.
George Bell, remembers about three weeks ago five men coming into his house in the Side, and calling for a pot of rum. They put down a half sovereign, and he gave them 9s. 6d., in change.
Wm. Robinson remembers being with Oxley and Spoors at Forster's, on the 5th Feb. They were afterwards together at the Bee Hive, and staid there till 11 o'clock.
Ann Cuthberts, servant at the Bee Hive, remembers Oxley bringing a saw there with him.
Edward Tweedy was employed by the prisoner, Thomas Black, to drive his cart, about Christmas. Mrs. Black had an oval pan, which was used for melting lead.
Wm. Baker searched the house of the prisoner Black, and found some pans, which appeared to have been used for melting lead. He also found a saw and some pokes: the saw appeared to have been used for sawing lead.
Wm. Savage had been a lodger for the last two years with the prisoner Black. He had seen the prisoners Spoors and Richardson there, but never saw them with lead. He had seen Mrs. Black melting lead.
Mr. John Brown, Clerk to the Magistrates, was present when Widdrington was examined before the Magistrates. He then said "All that Spoors has said about me is a parcel of lies; Oxley has spoken the truth about me."
Mr. INGHAM, who defended Black, contended that there was no evidence against her to go to the Jury, as the testimony of the accomplice was not sufficiently substantiated by corroborating circumstances.
The other prisoners, Richardson and Widdrington, on being called upon, only persevered in their plea of not guilty.
His Lordship then summed up, and observed that in a case like the present, where the principal evidence was that of an accomplice, it was necessary to have strong corroborating evidence. It did not appear to him that there was any material confirmation of Oxley, the accomplice, except as it concerned the prisoner Widdrington, in what he had stated before the magistrates, as given in evidence by Mr. John Brown. The witnesses called on the part of the prosecution to confirm the truth of Oxley's story, only proved that the whole of it was not an invention—but in his Lordship's judgment they did not give a sufficient corroboration to prove the charge against the prisoners.

The Jury, after a brief consultation, returned a verdict of not guilty against all the prisoners except Spoors and Jobling, who had pleaded guilty.
JOHN TURNBULL, JOHN COOK, and JAMES RICHARDSON, were charged with stealing a pig of lead on the 29th of December, and ANN BLACK with receiving the same. The evidence in this case as in the former was principally that of the accomplice, Oxley, with little confirmation, except that he stated when he went to the back part of Black's house he saw Cook cutting some lead in the back room. On the prisoners being asked what they had to say, Turnbull and Richardson said they had no remarks to make, but Cook admitted that he was at Black's on the night in question, but that Oxley did not see him when he came from the back part of the house, and that he was not cutting lead at the time. The jury found Cook guilty, and acquitted the other prisoners,
TURNBULL, COOK, RICHARDSON, BRIAN, and JOBLING were tried on another charge, but acquitted.
THOMAS BLACK, and ANN BLACK, his wife, were then charged with receiving lead knowing it to have been stolen, Oxley's evidence was again gone into at great length, but the only criminating evidence was the admission of Ann Black before the magistrates, wherein she admitted buying four pieces of lead of Oxley, She was found guilty, and her husband acquitted.
Several other cases of a similar nature against the same prisoners and others connected with them were gone into, but there was not sufficient substantial evidence to convict them. His Lordship, on passing sentence on those found guilty observed, that he could not help stating that there seemed to have been a very extensive system of robbery going on for a great length of time, and although some of them had escaped for the present, there was every likelihood of their someday or other getting their just punishment. Joseph Jobling was sentenced for the first and second charges, to which he had pleaded guilty, to be transported seven years for each offence, and for the two other charges to two months' imprisonment previous to being sent out of the country. Thomas Spoors and John Cook seven years each, and Ann Black fourteen years.
Turnbull, Richardson, and Oxley were again taken into custody, and sent to be tried at Durham, on a charge of robbing a shop in Gateshead, and Thomas Black for receiving the stolen goods.

11th March 1837 (Newcastle Journal)
Marriages
At Alston, the 4th inst., Mr. John Elliot, of Fumess, Garrigill, to Miss Frances Stephenson, of Hudgill, Nentwater.

4th April 1837 (Cumberland Pacquet, and Ware's Whitehaven Advertiser)
Died
At Seathwaite, in Borrowdale, near Keswick, on Thursday last, at the great age of 83 years, Mr. William Dixon, who for nearly half a century was steward to the proprietors of the far-famed Black Lead Mine, in Borrowdale. Mr. Dixon was universally regarded as one of the noblest monuments of God's handy work—an honest man. The most unbounded confidence was placed in this gentleman the owners of the important work he long and faithfully superintended, and that confidence they have had abundant reason to know was not misplaced. He died as he had lived, high in the esteem of every person by whom he was known.

22nd April 1837 (Carlisle Journal)
An inquest was held before William Carrick, Esq., coroner, at Low Rodderhope, near Alston, on the 15th instant, on the body of Thomas Palmerly, aged 45. The deceased was killed in Rodderhope Fell Head Mine, by the fall of an immense quantity of earth upon him while working in the drift. At Nenthead, on the 16th inst., aged 82, Mrs. Mary Richardson. This women was the oldest servant in the London Lead Company's Works at Nenthead.

9th September 1837 (Carlisle Journal)
LEAD.—In the present depressed mining interest, it affords us much gratification to be able to announce any circumstance calculated to afford relief, or to enhance the value of any portion of our mineral produce. Our friends in the mining districts of the principality will, therefore be glad to hear that the Spanish Government has issued a decree to stop the working of the Spanish lead mines for one year certain, and for a further period, should the price of lead remain so

low as not to leave, after the expences are deducted, a reasonable profit. The importance of this measure to our mining interests may be estimated from the fact, that whilst Great Britain produces annually about 45,000 tons of lead the produce of the Spanish has latterly averaged about 25,000 tons per annum, and that, in consequence, of this decree, it is expected not more than 3000 ton will be brought to sale during the next twelve months. We may, therefore, congratulate the British Miner on the removal of a competitor in the foreign market which has so long depressed the value of his labour, and we trust no long time will elapse before the price of lead once more affords to the miner and smelter a fair profit.

21st October 1837 (Carlisle Patriot)

Bridge Master Report

The bridge over Nent-Water was next alluded to in the Bridge-masters report. It was stated to have been built in 1794, and the chairman said that from that fact, alone he had no doubt it was a county bridge. Mr. Milton stated that heretofore the trustees of the road had repaired it. Mr. Hasell remarked, that in 1803 an act had been passed to prevent bridges whether well or ill built, being adopted by the county, as previous to that time many abuses had occurred as to the manner in which bridges became chargeable to the county. The chairman remarked, that he had just met with a section of the act which seemed to provide for the case under consideration, from which it appeared that the county was liable; and as the inhabitants of the county are indicted, he supposed the order must be made. About £50 was stated by Mr. Milton as being requisite to be immediately applied. Something was said about referring the matter to a subsequent session, but on Mr. Milton stating that repairs to the extent he had named must be immediately made —Mr. Hasell observed, I can see no impropriety, if the county be liable, but rather should conceive it is our duty immediately to set about making the repairs.

4th November 1837 (Northern Liberator)

On Friday week, as John Charlton, lead miner, was clearing away an old level, in the Derwent Lead Mine, the side of it suddenly gave way, and killed him. He was 42 years of age, and has left a widow and six children.

John Charlton of Nookton, aged 42 was buried at Hunstanworth 23 October 1837

10th November 1837 (Newcastle Courant)

The son of Thomas Lee, clogger, Alston, who is only three years of age, on Saturday week, fell into the Mill-burn, which runs through the town. The burn is conveyed through a conduit, and furnishes waterpower in its course for three mills. The poor little fellow, who was playing with another child, fell into the water close to the mouth of the conduit, which was swollen by the rain. A young man, named Hownam, with great presence of mind, instantly ran down the street to the end of the conduit, where he arrived just in tune to catch the boy when he was washed out. Life appeared to be extinct, but proper remedies being instantly resorted to, animation was restored. The boy is much cut and bruised in his face head and body, but is now recovered. The conduit through which the child was carried by the force of the stream has a very rapid descent, and is about 300 yards long.

2nd December 1837 (Newcastle Journal)
Marriages

23rd July 1838 (Carlisle Journal)
Inquest: On the 21st, at Alston, on the body of Joseph Bowman, aged 51 years. Deceased was a miner, and on the 2nd instant, was working in Dryburn Level with another man, when an immense weight of stone and clay fell upon him, and produced extensive injuries on the spine, which caused his death. Verdict accordingly.
Joseph Bowman, son of John Bowman, baptised at Alston 10th June 1787.
Joseph Bowman aged 51 was buried at Alston 23rd June 1838.

28th July 1838 (Newcastle Journal)
Deaths
On the 18th inst. aged 33, Hannah, wife of Mr Thomas Brown, of Ivy-house, Garrigill-gate, much respected. *See 21st November 1835.*
At Weardale, on the 22nd inst. aged 36, Mr Emerson of Hott's Cottage, at West-gate, on the 19th inst. aged 29, Nicholas, son of Mr William Atkinson, tailor.

31st July 1838 (Cumberland Pacquet, and Ware's Whitehaven Advertiser)
THE BLACK-LEAD MINE in BORROWDALE
We this day fortnight announced the sale of certain shares in the far-famed Black Lead Mine, Borrowdale, near Keswick, late the property Charles Bill, Esq., Sydenham, Kent, and latterly of Robert Barbor, Esq to whom they were bequeathed by the first-named gentleman in the year 1809. The sale was under order the Court of Chancery, and took place at the auction mart, London, on Wednesday last. The mine in Borrowdale being the only one of the kind the kingdom, and this being the first instance, we believe, of any shares it having been brought to the hammer, a very lively interest was excited, and a smart competition took place. At the close of a spirited bidding numerous intending purchasers, the shares were knocked down to Mr. Cranch, solicitor, for Messrs. Banks, Foster, and Co., black-lead pencil manufacturers, Keswick, who along with the interest in the mine obtain their proportion of the stock on hand of this valuable mineral. —Even our own immediate neighbourhood comparatively little, we believe, is known of the Black-lead Mine in Borrowdale; the following particulars, therefore, which we extract from Mr. Otley's interesting account of will not perhaps be considered devoid of interest:—

> The mineral substance from which black lead is manufactured has successively been known by the several names of wad, black-cawke, black-lead, plumbago, and graphite. The names of plumbago and black-lead, although still retained in common use, tend to convey an erroneous idea of the subject, lead forms no part of its composition, which is found to be principally carbon combined with a small portion of iron: and graphite, perhaps the least objectionable term, has scarcely yet obtained currency. This mineral occurs in various parts of the world, and in rocks of different formation; but in no place has it been met with equal in purity to that produced from Borrowdale, in Cumberland, where it lies in a rock of intermediate formation.

We have no account of the first discovery, or opening of this mine, but from a conveyance made in the beginning of the seventeenth century, it appears have been known before that time. The manor of Borrowdale said to have belonged to the Abbey Furness and having at the dissolution of that monastery, in the reign of Henry the Eighth, fallen to the Crown, it was granted by James the First to William Whitmore and Jonas Verdon, including and particularising among other things, the "*wad-holes* and *wad*, commonly called black-cawke, within the commons of Seatoller, or elsewhere within any of the wastes or commons of the said manor, now or late in the tenure or occupation of Roger Robinson, or his assigns, by the particulars thereof mentioned to be of the yearly rent or value of fifteen shillings and fourpence" By a deed bearing date the twenty-eighth day November, 1614, the said William Whitmore and Jonas Verdon, sold and conveyed unto Sir Wilfred Lawson, of Isel, Knight, and several others therein named to the number of thirty-six, chiefly inhabitants of Borrowdale, "all the said manor of Borrowdale, with the appurtenances of what nature or kind soever, excepted and reserved unto the said William Whitmore and Jonas Verdon, their heirs and assigns, all those wad-holes, and wad, commonly called black-cawke, within the commons of Seatoller, or elsewhere within the commons and wastes of the manor Borrowdale aforesaid, with liberty to dig, work, and carry the same, and other their appurtenances whatsoever. In consequence of which reservation the wad or black-lead has been ever since held distinct from other royalties of the said manor, one moiety thereof belonging to Henry Banks, Esq. the other half being sub-divided into several shares.

This mine is situated about nine miles from Keswick, near the head the valley of Borrowdale, in the steep side of a mountain, facing towards the south-east, and has been opened at different places were the wad probably appeared on the surface.

Formerly this mine was worked only at intervals, and when sufficient quantity had been procured to supply the demand for a few years, it was strongly closed up until the stock was reduced; but of late, it has been obtained less plentifully, and the demand being greater, the working has been continued for several years successively.

An old level which was re-opened in 1769. was found to have been cut through this very hard rock, without the help of gunpowder; and a kind of pipe-vein which had produced a great quantity of wad, having been pursued to the depth one hundred yards or more, much inconvenience was experienced in working it: obviate which, in 1798, an adit or level was begun in the side of the hill, which the length of 220 yards communicates with the bottom of the former sinking; since which time the works have been carried internally through various ramifications; a survey of which was made few years since by the late Mr. Farey. Through this principal level the water now passes off, and the produce and rubbish are brought out upon railway in a small waggon; and over its mouth a house is built, where the workmen are undressed and examined as they pass through it on leaving their work.

Owing to the great value of this mineral, and the facilities afforded for disposing of it in an unmanufactured state, the greatest precaution has sometimes been found scarcely sufficient to keep the workmen from

pilfering, and those appointed overlook them have not always escaped suspicion; yet, it is but justice to the present manager to state, that for upwards of fifty years that he has been employed, he has always sustained an unimpeachable character —[Mr. Otley here alludes to the late Mr. Dixon, and never was compliment, we believe, more justly merited. His son succeeded him as superintendent of the mine, and deservedly enjoys the full confidence of the company, who regard him as faithful servant, and as trust-worthy as his late esteemed father.]

To prevent the depredations of intruders, it has sometimes been necessary to keep a strong guard upon the place; and for its better protection an act of parliament was passed 25th Geo 2d. cap. 10th, which an unlawful entering any mine, or wad-hole of wad. or black-cawke. commonly called black-lead, or unlawfully taking or carrying away any wad, &c. therefrom, as also the buying, receiving the same, knowing it to be unlawfully taken, is made felony.

Black-lead is used for various purposes, but its principal use is in the manufacture pencils, for which Keswick has long been famed. It was formerly used without any previous preparation; being only cut with a saw to the scantlings required, and thus enclosed in a suitable casing of cedar wood: but generally being too soft for some purposes, a method of hardening it had long been a desideratum and a process has at length been discovered, by which it may rendered capable of bearing finer and more durable point.

The specific gravity of the best wad, or black lead, is, to that of water, as two to one nearly; the coarser kind is heavier in proportion, as it contains more stony matter. It comes from the mine in pieces of irregular shape, and of various sizes, requiring no process to prepare it for the market, further than freeing the pieces from any stony or extraneous matter, which may adhere to them. It then assorted according to the different degrees of purity and size, and thus packed in casks to be sent off to the warehouse in London, where it is exposed to sale only on the first Monday in every month.

In the year 1803, alter tedious search, one of the largest bellies was fallen in with, which produced five hundred casks, weighing about one hundred and 3 quarter each, and worth thirty shillings a pound and upwards; besides a greater quantity inferior sorts; and since then several smaller sops have been met with in the year 1829, a sop produced about half dozen casks; the best part of which was eagerly bought up at thirty-five shillings pound. For three or four years the quantity raised was trifling but in 1833, they succeeded in filling a few casks, the best part of which has sold at forty-five shillings a pound.

By an account published in 1804 the stock then on hand was valued at £54,000, and the annual consumption stated to be about £3,500. This afforded a clue the assessors of the property tax. which soon after came into operation and this mine—which 200 years ago hadl been valued at fifteen shillings and fourpence—was accordingly rated at £2,700.

Such are a few of the interesting particulars given by Mr. Otley, relative to this productive mine, which, for ages past, appears to have attracted so much attention as even to induce the legislature to pass an act for its especial protection. It appears that Messrs. Banks, Foster, and Co., exclusive of Mr.

Banks's share, have purchased an eighth of the mine, and they are the only persons connected with the pencil trade who hold shares, it will doubtless be the means of enabling them to extend the high reputation their goods have enjoyed in London, Birmingham, Sheffield, Manchester, Liverpool, and different parts of Yorkshire; as well as in Glasgow, Edinburgh, Aberdeen, and indeed throughout the whole of Scotland, almost from the moment they commenced business. We congratulate the firm on the purchase they have effected, and as it was no doubt chiefly, if not altogether, made with a view of enabling them to prosecute their business with greater advantage, there can be no fear, we think, but their most sanguine hopes will be realised.

18th August 1838 (Newcastle Journal)

THE BISHOPELEY AND DRYBURN CONSOLIDATED LEAD MINING COMPANY. Capital £10,000, in 1,000 Shares of £10 each.

PROVISIONAL DIRECTORS.

W. GREENWELL, Esq„ Greenwell Ford, Lanchester.
Mr. TAYLERSON. South Shields.
NICHOLAS GREENWELL, Esq., Lanchester.

Perhaps no Period ever presented so great encouragement as the present, for the Profitable Working of lead Mines: the steady Rise in the Price of that Metal, coupled with the facilities offered by its ready Transit on the Stanhope and Tyne Railway, which passes the vicinity of those Mines, and which have hitherto been almost shut out from any Place of Shipment.

And by the said Railway, Coals can now he obtained at a most reasonable Cost for the Working of any Steam Engine that may be required for Pumping Water, lifting the lead Ores, &C., form together a Chain of fortuitous Circumstances almost unparalleled.

The Bishopley and Dryburn Consolidated Lead Mines are situate in the Rich Mineral District of Weardale, near Frosterley, in the Parish of Stanhope, in the County of Durham, and with the above Advantages, are not for Local Situation and Intrinsic Worth, surpassed by any Mines in the Kingdom.

The Berks Mine being one of the Bishopley Mines, is on the South Side of the River Wear, at Frosterley, and is held under a Lease for 18 Years; it adjoins the Mill House Estate, consisting of 150 Acres, the Royalty of which is also Leased to this Company for 31 Years, at a very moderate Rate. On this Estate the Directors purpose Opening Two more Mines.

East Dryburn Mines are situate on the North Side of the River Wear, and adjoining the Mill House Estate. Two Veins may there be Worked by a Level, which is now driving, and will Cut the said Veins in the short Distance of 110 Fathoms.

It would be superfluous to here enter more fully into Detail of the many Advantages and great Veins of these Mines, as Mr. Sopwith, of Newcastle, an experienced Mining Surveyor, who is well acquainted with the District in which he has made numerous and vary extensive Mining Surveys, and whose Report hereto annexed, fully embraces every Particular.

REPORT ON MINERAL VEINS IN BISHOPLEY AND MILLHOUSES ESTATES, NEAR FROSTERLEY, IN THE COUNTY OF DURHAM.

Royal Arcade, Newcastle-upon-Tyne,
14th August 1838.

SIR, —Agreeably to your request that I would furnish you with, an Account of the Mineral Veins in the Estates of Bishopley and Millhouses, I beg to hand you the following particulars which have been derived from a general view of the Property, and from an inspection of the subterranean works, so far as the same can be explored at the present

The annexed Plan shows the direction and relative position of the Mineral Veins in Bishopley Estate, and the section, in like manner, exhibits the various Strata. Both as regards the general productiveness of Veins in this District and the produce of the Veins traversing this Property, where they have been worked in other Places, there Is every reason to consider this Property as a very eligible field for Mining Adventure, and as such I consider it well deserving of the confidence of the Parties interested.

The Birk's Vein has a bearing nearly East and West, being S. 85 W. It hades to the South at the bottom about one foot in ten while passing through the Limestones and Hazels, but in the Slate Beds its hade is more than doubled. It throws up the north cheek about nine feet—its matrix is a brown rider and fluor spar, and it stretches through the longest direction of the Bishopley and Millhouses Properties. For about 500 yards in length this Vein appears to have been worked in the Great Limestone, and there is every appearance of its having yielded a large quantity of lead. It appears to have been drained by a small Water level under the Great Limestone, but a Level at a deeper random, or Machinery, is essential to its being worked with profit. There have apparently been some trials made by means of Shafts, which have been abandoned on account of the quantity of Water, but no effectual trial has been attempted on an extensive scale.

From the same cause, a Shaft sunk in this Vein in Millhouses Estate was abandoned, the Parties not having capital sufficient to prosecute a proper Level for Drainage—the appearances were such as to afford the most reasonable expectations of the Vein being productive. A Level was commenced near the side of the River Wear, at the East Boundary of Millhouses Estate, and continued upwards of 170 Fathoms, at a cost of nearly £1,000, when want of Capital compelled the Parties to abandon it.

There is strong reason for believing that it would lie a highly desirable and profitable undertaking to continue this Level, as it would prove all the East and Went Veins, and effectually drain the Birks Vein, where it has been so productive in the Great Limestone taking off the water from the Quarry Hazle—Four Fathom Limestone-Nattrass Gill Hazle, and Three Yards Limestone, making in ail Fifteen Fathoms of Sill likely to carry Ore. This Vein has been found very productive in the adjacent District.

The Markeel Vein does not appear to have been tried in this Property, but as it has been very productive in Bollihope, and traverses the best Sills, it seems a very desirable trial. It could be worked by means of the Low level already mentioned.

The Harehope Gill Vein has been productive for many Miles in the neighbouring District—there is an abundant supply of Water at hand, which might be of material use for working this Vein.

There is also a tract of Mining Ground at East Dryburn, on the North side of the River Wear, near Frosterley. A level has been commenced which will cut Dryburn Vein at the bottom of the Great Limestone, and this will probably also

be found a fair Mining speculation, inasmuch as large quantities of Ore have been raised from it in the immediate Neighbourhood.
From the circumstances here detailed, it may, I think, be fairly inferred that a due amount of Capital is alone required to effect a complete trial of these Veins, and though Mining at the very best is attended with much uncertainty, yet in the present instance the Expenditure of a considerable Sum is fully warranted by the nature, extent, and relative position of the several Veins. The Ore produced by them and other Veins in the immediate District is certainly a strong motive to encourage adventure, and the frequent failures which occur from insufficient Capital being employed, points out the necessity of making a full and persevering search of this Mining Property.

I remain, Sir. your very obedient Servant,

Robert Taylerson, Esq. THOMAS SOPWITH.

Above 300 Shares have already been taken, and as soon as Two-thirds are filled up, a MEETING of the SHAREHOLDERS will be called, to appoint the necessary Officers, and to frame the Rules and Regulations upon which the Company shall be conducted.
As soon as Two-thirds of the Shares are taken, a Copy of the Rules or Regulations, intended to be submitted to the Meeting of Shareholders, will be sent to each Subscriber for Consideration.
Application for Shares to be made to Mr. Walker, at the Company's Office, two Doors below the Turk's Head; Grey-Street, Newcastle-upon-Tyne, where Attendance will be given daily from Eleven till Three, and Plans of the Mines and other Information can be obtained.
Mr. Sopwith has consented to take the Engineering Department of the Mines, if approved of by the shareholders.

8th September 1838 (Carlisle Journal)
Deaths
At Alston, on the 2nd instant, aged 24 years, Miss Diana Bland, daughter of Mrs. Bland, of the Crown Inn.

15th September 1838 (Carlisle Journal)
An old silver coin was found last week, by Mr. Emanuel Nattress, the ore-washer for the London Lead Company, at White Syke lead mine, in Alston Moor, it is about the breadth of a halfpenny of the present day, and has been coined in the year 1575, in the reign of Queen Elizabeth; and although it must have lain amongst the mineral and rubbish of that old-wrought mine for a great number of years, it is in good preservation, and before E. Nattress discovered it in his washing operations it had passed twice through the crushing mill, and yet, strange to say, it came out at the last uninjured by the process.
In 1841, at Jolly Board Lane, Alston, Emanuel Nattrass, lead miner, aged 40. In 1851, at Butts, Alston, Emanuel Nattrass, lead miner, aged 53, his wife Jane, aged 40, and daughter Anne 2 years. Emanuel Nattrass died 2nd quarter of 1851.

5th October 1838 (Newcastle Courant)
Mr Thomas Bell, of Hexham, and Mr Robert Hutchinson, have opened a lead mine at High Green, in this county. The ore is nine feet in breadth.

27th November 1838 (Cumberland Pacquet, and Ware's Whitehaven Advertiser)
Marriages
At Crosthwaite Church, Keswick, on Thursday last, Mr Henry Dawson, to Mary, eldest daughter of Mr. Dixon, steward of the Black-lead mine at Borrowdale.

26th January 1839 (Carlisle Journal)
Deaths
At Park, near Alston, on the 18th instant, aged 63, Mr. Edward Parmerly.

5th February 1839 (Cumberland Pacquet, and Ware's Whitehaven Advertiser)
Marriages
At Crosthwaite Church, Keswick, on Thursday last, Mr John Dixon, son of Mr John Dixon, steward of the Black-lead mines in Borrowdale, to Miss. A. Staveley, both of Borrowdale.

9th February 1839 (Newcastle Journal)
The Duke of Cleveland, with a liberality which does him infinite credit, has directed his agent, Mr William Barnes, of Eggleston, to purchase Wheat Meal, at his expence, and to furnish all his workmen in the mining and smelting district of Teesdale, with bread at the rate of 1s. 6d. per stone, being about half the present price only. The London Lead Company have resorted to a similar act of charity as respects their workmen in Teesdale.

16th February 1839 (Carlisle Journal)
Deaths
At Alston, on the 1st Instant, aged 19 Betsy, eldest daughter of Mr. John Pattinson, Cross Keys Inn.

2nd March 1839 (Newcastle Journal)
Deaths
At Nenthall, near Alston, on the 21st ult., very suddenly, Mr. John Walton, miner, much respected, aged 32. *See 4th May 1860*
At Alston, lately, aged 32, Ann, wife of Mr. Jonathan Walton.

9th March 1839 (Newcastle Journal)
Deaths
At Alston, on the 26th ult., after a protracted illness, which supported with great fortitude, Mr. Joseph Lowes, many years grave digger at Alston, and assistant attendant at most the funerals, aged 45, leaving a family to lament his loss

23rd March 1839 (Carlisle Journal)
Inquest Before Mr. Carrick
At Nenthead, Alston, on the body of Thomas Irwin, a miner, who was killed by the fall of a large stone from the roof of Smallcleugh Mine.
Verdict accidental death.
Buried at Alston 19th March 1839, aged 44 years.

25th May 1839 (Carlisle Journal)
Deaths
At Alston, on Sunday, the 12th inst., Mrs. Isabella Thompson, relict of Mr. John Thompson, chemist and druggist, after a short illness; much and deservedly esteemed by a large circle of friends.

22nd June 1839 (Northern Liberator)
Marriages
At Alston, on the 15th inst. Mr Isaac Walton, of Nenthead Field, to Miss Ann Thompson, of Moor-cock Hall.
See 24th March 1877.
At Bowes, on the 12th inst., Mr. Cuthbert Bainbridge, of Howl John, Weardale, to Miss Mary Laidman, of Gilmonby, Yorkshire.
Cuthbert Bainbridge born 16th August 1804, baptised at Stanhope, 26th December 1804, son of Cuthbert Bainbridge (died at Redgate House, Weardale 13th September 1850, aged 77) and Mary Muschamp (died at Redgate House, Weardale 19th December 1850, aged 76).
In 1841, at Bishop Wearmouth, Cuthbert Bainbridge, independent, aged 35, Mary aged 32, and daughter Mary H. aged 12 (daughter of Cuthbert and Ann Bainbridge, baptised 28th June 1829, Cuthbert married Nanny Bell, 31st October 1826 at Hunstanworth).
In 1851, at Redgate, Cuthbert Bainbridge, farmer of 195 acres, aged 46, his wife Mary aged 42, and daughter Mary H. aged 22.

29th June 1839 (Carlisle Journal)
An Inquest was held before Mr. Carrick, on the body of John Dickinson, at Alston, on Monday last. Deceased was a butcher and had been attending at his stall in the market all day, until seven o'clock when he went into Mr. Charlton's with another person to settle an account, and while engaged in conversation he fell from his seat, and died instantaneously. Verdict, "Natural death."

27th July 1839 (Carlisle Journal)
INQUEST —An inquest was held at Alston on Saturday last, before Mr. Carrick, coroner, on view of the body of Thomas Walton, aged 22 years *(of Mill House, buried at Garrigill, 22nd July 1839)*. Deceased was a lead miner, and on the 19th instant, was employed along with a fellow-workman, named Vipond, in digging and leading away rubbish out of the level in Rodderhope Fell Lead Mine. In removing the earth from what is called the rise (a shaft about five feet in diameter, down which the earth is thrown from the workings into the level for removal out of the mine) it was discovered, after the lower part had been cleared, that the remainder of the earth had become firmly wedged in the upper part of the shaft, so as to prevent its descending. Deceased, against the, advice of his companion, crept up the inside of the rise, and whilst attempting to dislodge the mass above him, the whole came away, and buried him underneath. He continued to talk for about a quarter of an hour to Vipond, who in the meantime was busily engaged in endeavouring to extricate him, when another rush of earth succeeded—after which his moans only were for a short time audible. The body of the unfortunate man was got out in about an hour

and a half after the accident occurred. When found, he was completely covered with earth, and life totally extinct Verdict, "accidental death from suffocation."

6th August 1839 (Cumberland Pacquet, and Ware's Whitehaven Advertiser)

A youth 12 years of age, son of Mr Joseph Fearon, miner, lost his life at the lead-mine, in Loweswater, yesterday week. The ill-fated boy was employed near the water wheel, and accidentally coming in contact with it whilst in motion, dashed his head against a post with so much violence as to occasion death. An inquest was held next day, on view of his remains, before Wm. Bragg, Esq , coroner, when the jury returned a verdict in accordance with the above facts.

31st August 1839 (Carlisle Journal)

Deaths

At Nenthead, near Alston, on the 25th inst, Mr. James Shaw, surgeon, aged 35 years.

21st September 1839 (Carlisle Journal)

Inquest. — At Alston, on the 7th, on the body of John Jackson, carrier, who committed suicide the preceding day, by hanging himself in his hay loft. Verdict, “Insanity.”

28th September 1839 (Carlisle Journal)

VALUABLE LEAD AND COAL MINES.

TO be SOLD, by AUCTION, at the House of Mr. John Hope, Blue Bell Inn, HEXHAM, on Monday, the 7th day of October, 1839, at Two o'clock in the Afternoon, by Messrs. STAINTHORPE and LORAINE, Auctioneers, subject to such Conditions as shall be then and there produced:—

Lot 1. Seventeen Thirty-Second PARTS or SHARES of and in all that valuable current-going LEAD MINE, called HIGH GREEN, in the Manor Wark, in the Pariah of Bellingham, and County of Northumberland, held by an Agreement for 21 Years, from the 19th day of April, 1838, under MORTON JOHN DAVISON, Esq., at the Rent of one-seventh part of the Lead Ore produced.

Also. Seventeen Thirty-Second Parts or SHARES of and in all MACHINERY, &c, consisting of a 26 feet Water Wheel, and 12 fathoms of nine-inch Pump, Crushing Mill, and Washing Apparatus complete. Hand Crane, Wheelbarrows, Work Tools, &c. &c., the whole of which are in most excellent condition, being nearly new. And also Seventeen Thirty-second Parts or Shares of and in all the LEAD ORE, lying at Bank, both washed and unwashed, and of and in all the Mining and other TIMBERS in and upon the said Premises.

Lot 2. Also Fourteen Thirty-second Parts or Shares of and in all that Lead Mine called EAST DONKS, in Alston Moor, in the County of Cumberland.

Lot 3. Also One Thirty-second Part or Share of and in all that Lead Mine called WEST DONKS, in Alston Moor aforesaid.

Lot 4 Also, all those current-going Seams of COAL, lying within and under the Manor or Royalty of Gunnerton, the County of Northumberland, and called or known the name of GUNNERTON COLLIERY, held by an Agreed under the Rev. CHRISTOPHER BIRD, for Twelve Years, from the 12th day

of May, 1838, at the certain Rent of £40 per annum, with privilege to work and carry away 1600 Fothers of Coal, each Fother to consist of 216 Gallons, Winchester Dry Measure, and Sixpence per Fother to be paid for all Coal sold over and above that quantity.
The Trams, Tram Plates, and other Work Gear upon the Premises, and used working the said Colliery, will be Sold along with this Lot.
Lot 5. Also, One Eleventh and One Tenth Part of One Eleventh Part or Share of and in all those current-going Seams of Coal, lying at and under that part of the Barony Langley, called HONEY CROOK COLLIERY, near Haydon Bridge, in the said County of Northumberland. Further Particulars may bad on application to Mr. DONKIN, or Mr. STAINTHORPE, Solicitors, Hexham; and on applying at the Premises the respective Lots may be viewed at any time prior to the day of Sale.

28th September 1839 (Newcastle Journal)
Marriages
At Alston, on the 26th inst. Wm. Bainbridge, Esq. solicitor, to Miss Elizabeth Emerson, of Brewery House.
In 1841, at Temple Croft, Alston, William Bainbridge, solicitor, aged 55, and his wife Elizabeth aged 45, also at Temple Croft, Ann Grey, family servant, aged 40, and Jane Crawhall, aged 15.
In 1851, at Temple Croft, Alston, Elizabeth Bainbridge, widow, annuitant, aged 56, house servants, Ann Gray aged 53, and Elizabeth Moffatt aged 16.
In 1861, at North Bailey, Durham, Margaret Crawhall, widow, landed proprietor (Widow of Joseph Crawhall, merchant), aged 65, son George Edward Crawhall, rope manufacturer, aged 28, daughters Fanny 33, Margaret 29, Mary Elizabeth 25, sister Elizabeth Bainbridge, widow, landed proprietor, aged 66, granddaughter Elizabeth Darnell Crawhall 2, waiting maid Martha Harris aged 27, cook Ann Kearney aged 21, and kitchen maid Phillis Jane Stephenson aged19.
In 1871, at Temple Croft, Alston, Elizabeth Bainbridge, widow, annuitant, aged 76, domestic servants Phillis Craig 25, and Sarah Vipond 28.
William died 26th March 1846, aged 60, and Elizabeth died 22nd October 1877, aged 83. See 4th April 1846, and 27th October 1877.

19th October 1839 (Carlisle Journal)
Deaths
At Loveladyshield, near Alston, on the 10th instant, Mary eldest daughter of Joseph Dickinson Esq., aged 26 years.

9th November 1839 (Newcastle Journal)
Deaths
At Nattress Gill Toll Gate, near Alston, on the 30th ult. in his 55th year Mr. Isaac Rutherford, many years a lead-ore washer at Hudgill Burn Lead mine.
Isaac married Mary Maugham, at Caldbeck on 1st March 1817.
Children: —Elizabeth, baptised 8th February 1818, at Caldbeck, Thomas, baptised 4th June 1820, Isaac, baptised, 25th August 1822, Isaac, baptised 8th May 1825, buried 14th July 1826, aged 1 year, George, baptised, 2nd March 1829, buried, 30th March 1829, aged 8 weeks, Mary baptism, 30th May 1830,

buried 1st April 1832, aged 2 rears, William, baptised 28th March 1833, buried 28th April 1833, aged 10 months, all at Alston.
In 1841, at Physic Hall, Alston, Mary Rutherford, widow, aged 50, daughter, Elizabeth aged 20, and son Thomas, lead miner, aged 20.
In 1851, at Butts, Alston, Mary Rutherford, widow, washerwoman, aged 54, her son Thomas, lead miner, aged 30.
In 1861, at Main Street, Alston, Thomas Rutherford, lead miner, aged 38, his wife Margaret (Forster, married 3rd quarter of 1856) aged 27, children Isaac 5, Tom 3, and Joseph 1 year. Thomas snr. died the 4th quarter of 1867.
In 1871, at Front Street, Alston, Margaret Rutherford, widow, provisions dealer, aged 37, children Isaac, apprentice to wool weaver, aged 15, Thomas 13, Sarah A. 8, and Margaret 4 years.
In 1881, at Alston, Front Street, Thomas Ramsay, lead miner, aged 41, his wife, Margaret, grocer, aged 45, step son, Thomas Rutherford, tailor, 23, step daughter Sarah Rutherford, domestic servant, aged 18, step daughter Margaret Rutherford, aged 14, son John Jos. Ramsay, aged 14, and daughter Annie Mary Ramsay, aged 10. Isaac Rutherford is a boarder, at Deleval Terrace, Benwell, in Newcastle, William Richardson, coal miner, aged 32, his wife Frances aged 28, both born Alston, and Isaac Rutherford, Boarder, Coal miner aged 25.
The family of Joseph Haldon aged 35, coal miner, his wife Jane, aged 28, and children James Wm. 5, Lizzie J. 3, and Margaret aged 1 year, of Alston, are living next door.
See 25th November 1864

29th October 1839 (Cumberland Pacquet, and Ware's Whitehaven Advertiser)
In our last week's brief and somewhat hurried notice of the lead-mine near Great Braithwaite, we stated that Mr. J. Walker, jun., had been engaged to superintend the concern. The name of the gentleman thus engaged is Mr. Walton, jun., late of Greenends, near Alston, under whose superintendence we are glad to learn the work is still going on most prosperously.

16th November 1839 (Newcastle Journal)
Marriages

28th December 1839 (Carlisle Journal)
A miner of the name of James Dickinson, aged fifty four years, lost his life on the 18th inst., in Rodderhope Fell Lead Mine, near Alston, by the fall of a large quantity of earth from the roof of the drift. His fellow workman very narrowly escaped the same fate. An inquest was held at Alston on the following day, on view of the body, before Mr. Carrick, coroner, when the jury returned a verdict of "accidental death."
Rotherhope Fell mine, owned by John & Jacob Wilson, their agent being Thomas Wilson.
At the inquest, James Kearton of Rice, Alston, informed the court that they were sinking into the vein with a bunnion, shield above their heads to prevent the roof from falling. One of the supports for the shield gave way and let the shield down, and the rubbish above fell upon the deceased. "About six feet thick, he was under the rubbish 3 hours, all his body buried. He spoke once and said "oh dear". … He was dead when he was taken out. … I saw the danger and told deceased this was immediately before it fell. … He had not time to get out after I told him. He has left a wife and children." (Carlisle Archives TCR 2/2)

James Kirton married Mary Mason, 26th February 1801, at St Augustine's, Alston, witnesess, Thomas Walton and John Mason.

Possible children of James and Mary Kearton:
1. Margaret born 25th December 1801, baptised at St John's, Garrigill, 1st daughter of James Kirton, Craig, miner, by his wife Mary daughter of John Mayson.
2. Mary born 27th March 1804, baptised at St John's, Garrigill, 2nd daughter of James Kearton, of Middle Craig, by his wife Mary daughter of John Mayson.
3. John born 27th March 1807, baptised at St John's, Garrigill, 1st son of James Kearton, Middle Craig, miner, by his wife Mary daughter of John Mayson. John was buried at St John's, Garrigill 5th March 1808, aged 1 yr.
4. Ann born 30th January 1809, baptised at St John's, Garrigill, 3rd daughter of James Kearton, Middle Craig, miner, by his wife Mary daughter of John Mason.
5. Esther baptised 1st February 1821, at St Augustine's, Alston
6. Hannah baptised 19th December 1813, at St Augustine's, Alston
7. James baptised 19th December 1813, at St Augustine's, Alston
8. Jane baptised 3rd November 1816, at St Augustine's, Alston

9. James Kearton, baptised 23rd November 1817, at at St Augustine's, Alston
10. Thomas baptised 14th September 1823, at St Augustine's, Alston
11. Elizabeth baptised 17th July 1825, at St Augustine's, Alston

Possible death of James Kirton of Rice, 15th March 1832.

In 1841, at Rice View, Alston, Mary Kirton, aged 60, children, Jane 25, James, lead miner, aged 20, Esther 20, Thomas 18, and John 1.

PARISH OF ALSTON WITH GARRIGILL.

THE CHURCHWARDENS and OVERSEERS of the Parish of ALSTON with GARRIGILL, will in pursuance of the Order of the Poor Law Commissioners for England and Wales, proceed on the 26th day of March now instant, to the ELECTION of Thirteen GUARDIANS of the POOR for the year ending March 25, 1841.

Any Person entitled to vote in the Parish may propose as Guardian or Guardians, any number (not exceeding the number to be elected) of persons who are severally rated to the Poor-rate of the Parish, in respect of property of the annual value or rental of Twenty pounds.

The Proposal must be Written, and must state the Names, Residences, and Callings of the Persons proposed, and the Name of the proposer, and must be delivered to one of the Churchwardens and Overseers of the Parish on or before the 18th day of March now instant.

Owners of rateable property in such Parish, as well as rate-payers, are entitled to vote, provided their Names are on the Register of Owners, or if they send in to the Churchwardens and Overseers before the day of Election their claims to vote, with a statement of their Names and Address, and a description of their Property.

Owners may also vote by Proxy; but Proxies must make the statements the originals or attested Copies of their Appointments.

In case of a contest for the Office of Guardian in the said Parish, the votes will be given in papers to be left by the Churchwarden and Overseers, two days at least before the day fixed for the Election, at the house of those residents of Perish who are entitled to vote. All residents out of the Parish, and all persons who become entitled after that day, must apply to one of the Churchwardens and Overseers for voting papers on the day of Election.

The Form of Nomination Papers, Statements of Owners, and appointment of Proxy, may be seen and copied by voters at the Board Room in Alston. WM. BAINBRIDGE Clerk to the Board of Guardians. Alston, March 3, 1840.

13th March 1840 (Newcastle Courant)

18th July 1840 (Carlisle Journal)
Inquests—before Mason Stephenson, Esq., coroner,
An inquest was held before the same gentleman on the 14th inst., on view of the body of Thomas Parkin, of Knock, near Appleby. It appeared from the evidence that the deceased, who was a miner, aged 72 years, on Saturday, the 4th instant, was employed at Dufton Fell mines, along with his son, pushing a loaded waggon down an inclined plane, and having run before the waggon for the purpose of taking out the burr, he was struck across the face by a stick, which had been carelessly thrown aside, and knocked down in front of the waggon; on being taken up it was found that he had received a severe crush on his side; he was taken home, where he lingered on until Monday morning, the 13th, when he died. Verdict, “accidental death.”

4th September 1840 (Newcastle Courant)
As Robert Ellerly *(Ellerington),* **and John Rowell,** miners, were descending the shaft of the lead mine at Fallowfield, Near Hexham, on the 28th ult., they got entangled in the ascending rope, when Ellerly was precipitated to the bottom and killed on the spot; Rowell caught hold of the ascending rope and was drawn up unhurt.

11th September 1840 (Newcastle Courant)
CLINTS HALL AND DEMESNE.
(THE BIJOU OF THE NORTH RIDING OF YORKSHIRE),
WITH THE MANORS OF CLINTS AND SKELTON, AND THE LEAD MINES THEREIN,
Situate in the Parish of Marske, near, Richmond,
EXTENDING TO 1883 ACRES or THEREABOUTS, ALL WITHIN A RING FENCE, EXCEPT 20 ACRES
TO BE SOLD BY PRIVATE CONTRACT,

THE WHOLE of this singularly Picturesque and desirable ESTATE is Freehold, and the MANSION, called Clints Hall, was formerly the Residence of the noted Sir Charles Turuer, Bart., who there, trained some of the most famous Racers of the Day. Recently it has been for a few years the sporting Residence of Charles Attwood, Esq.

600 Acres or thereabout are principally Heath, and being contiguous to extensive Moors, and otherwise advantageously situated, the Quantity of Grouse bred thereon is usually very considerable, affording good sport for two Guns.

The Estate is divided chiefly into Six convenient Farms, each having a Farm House and suitable Outbuildings attached, and the actual net Rent, exclusive of the Mansion, Gardens, Hothouse, Greenhouse, Lead Mines, Game, and six Cottages Rents, is £821 a Year, which, from recent Valuations, is considered very low.

The lands, both in Clints and Skelton, are free from Hay-Tithe, on Payment of Moduses, amounting together to £1 15s. 3d. a Year The Owners of this Estate seem always to have had an unaccountable dread of Mining Adventures, for the Mining Ground has recently been examined, and it has been pronounced that there in great reason to suppose that very valuable and extensive Veins of Lead pass through the Estate.

Productive Lead Mines are now working at a short Distance, and the Duty reserved on some petty Workings in this Estate, has, during the last three years, produced about £250.
The Parish Church of Marske is less than Half-a Mile from the Hall, and the Owner of this Estate and its Tenants have the Enjoyment of a large Family Pew and of Nine smaller ones.
The Woods mid Plantations comprise about 100 Acres, and are beautifully scattered over the Estate and the Wood has lately been valued at £3,133.
The Limits of an Advertisement are much too small for an Attempt to be made to describe the Scenery of this Romantic District; the Hills Mills, the Vales, the Crags the Rocks, the Hanging Woods and Waterfalls, must be actually seen, (either from the Mansion, the Lawn, or some other favoured Spot on the Estate) before any adequate Impression can be made, by such a rare Combination of terrestrial Beauty and Sublimity.
CLINTS is five Miles from Richmond, eight from Leyburn, and five from Reeth, all Market Towns.
Plans of the Estate, and further Particulars will shortly be ready for Distribution; and in the Meantime the Price and further information may be obtained at my Offices, in Richmond.
G. T. FIELDING.
N.B. Mr Wm. Scaife, at Clints Hall, will send a Person to shew the Estate.
Richmond, 31st August. 1840.

10th October 1840 (Durham Chronicle)
On Thursday last, an inquest was held at Stanhope, on the body of Joseph, son of Joseph Bainbridge, aged 10 years, who was killed by getting entangled among the machinery at Harehope Gill Crushing Mill, whilst he was feeding the grinder. —Verdict, accidental death.

31st October 1840 (Newcastle Journal)

Deaths
At Alston, on the 23rd inst., aged 71, Mr. William Archer.
See the Will of William Archer.

28th November 1840 (Kendal Mercury)
Lead Mine at Threlkeld, near Keswick. —The productiveness of a mine for lead ore, which has been worked the above place scarcely twelve months, has been such that it has paid 20 per cent, to the shareholders, and the ore procured - of the very best sort. The mine is under the management of Mr Chamley, of Penrith, who is also agent, and it is bidding fair for improving considerably. Many of the shareholders sold out a short time after the opening of this mine, thinking it would prove a losing concern, for which no doubt, they will now feel regret.

11th December 1840 (Newcastle Courant)

UNTHANK FARM, containing by Ad-measurement 230 Acres, of which about 32 Acres is in Tillage, the Whole of the Remainder in Grass; a great Portion is old Sward, of first-rate Quality. This Farm enjoys a largo Number of Stints upon Bollihope Common, with a good Farm House, Garden, Orchard, and all necessary Out-buildings, pleasantly situated near Stanhope, in Weardale.
Also, will be LET, along with the above, HORSLEY FARM, containing 202A. 1R. 16P., distant from Un-thank about two miles; this Farm is all in Grass, and well calculated for Moor Stock, having a largo Proportion of Stints, either separate or together, with the other Tenants upon Westernhope Moor; both Farms are now in the Occupation of Mr. Joseph Currah, as Tenant.
ALSO, TO BE LET,
And entered upon at May-day next,
HOWL JOHN FARM, situate in the Parish of Stanhope, and laying contiguous to the Turnpike Road between the Town of Stanhope and East Gate, containing 132 Acres of Arable, Meadow, and Pasture Land, with a Right of Pasturage upon Stanhope Common; a fair proportion of the Land is in old Grass, the Arable is a rich Turnip and Barley Soil, with Limestone and Draw Kiln upon the Promises. The House and Out-buildings are large and commodious, now in the Occupation of Mr. Cuthbert Bainbridge, Jun., as Tenant.
Further Particulars may be known on Application to Mr. Jos, Roddam, Land Agent, of Newton, Stanhope, who will send a Person to show the Farms. Proposals in Writing will be received by J. P. Sowerby, Esq., Solicitor, Stokesley; or by the said Jos. Roddam, until Wednesday the 30th December 1840, not binding themselves to accept the highest offer. Newtown, 9th Dec., 1840.

19th December 1840 (Newcastle Journal)

LEAD MINE

A rich Lead Mine has been opened in the manor of William Ord, Esq. M.P., of Whitfield, near Haydon Bridge. After a perseverance of some years duration, and an expenditure of about £1,700, the Directors of the mine, William Lee and Thomas Clemenston, Esqrs., of West Allendale, have succeeded in their object, and are now raising lead ore abundantly, through a judicious system of encouragement to the workmen employed by the company. The speculation, it is now believed, will amply remunerate the shareholders.

Deaths

At Hudgill, on the 14th inst., Mr. Jonathan Clementson

See 20th July 1860, 24th August 1860, 29th March 1890, 28th July 1894, and 5th April 1902

9th January 1841 (Carlisle Journal)

Deaths

At Alston in this county, on the 25th ult., in his 51st year, Mr. John Snowdon, stone mason, a celebrated musician, being able to play in a superior manner upon most every instrument, he was much respected in Alston and its vicinity, and his death is greatly regretted by a numerous circle of friends.

23rd January 1841 (Carlisle Journal)

An accident occurred at Rattenrow, near Caldbeck, early on Friday morning last, the particulars of which are as follows: —A person of the name of Hodgson, a miner, previous to his starting for the lead mine, was engaged in filling a bag with gunpowder for blasting, and had about five pounds of it on a table beside him, near which his wife and child were also sitting, when, by some mischance, the whole exploded violently, and blew out the windows of the house, shifted the rafters from their position, the partition walls, and injured the building so much that it is feared it will be necessary to take it down. The parties in the room escaped with fewer injuries than might have been expected; their hands and faces have been severely burned; but they are in a fair way of recovery. It is usual for most of the miners to buy a cask (containing 25lb) of gunpowder at one time, which they generally keep in their cottages; and in the present instance, the cask, about half filled and open, was in the bed-room above that in which the explosion occurred. How much better it would be for the proprietors of the mines to have a powder magazine near their works, where their men might be supplied at the same rate as at the shops, rather than allow the lives of the miners and their families to be kept in continual danger by having such great quantities of gunpowder exposed in their small dwellings.

13th February 1841 (Carlisle Journal)

Deaths

At Alston, on Monday, the 8th instant, aged 70 years, Mr. John Fultan, innkeeper, Miners Arms, and barber. He has left a numerous family to lament his decease, and was deservedly esteemed by a large circle of friends. He afforded pleasure, as long as he could attend to business, to be surrounded by his select party of villagers, who nightly congregated at his shop to hear him read the news of the day, and listen with surprise and pleasure at the lengthy and shrewd comments, which he invariably gave. He bore a trying and

distressing illness in an exemplary and patient manner for nearly two years, the complaint in the end assuming a dropsical turn.

27th February 1841 (Carlisle Journal)
Marriages

10th April 1841 (Newcastle Journal)
Death in a mine.
A serious accident happened at Gallegill Syke Mine, near Alston, on Monday last, by which Mr. Joseph Hornsby, a miner lost his life. The deceased and his partners were employed in blasting; they had ignited the fusee and retired to a considerable distance for safety, but notwithstanding the precaution taken a piece of the rock was driven with great force against the head of Hornsby, and fractured his skull so dreadfully, that he died very shortly afterwards. *(Aged 26)*
Marriages
At Alston, on the 5th instant, Mr. Joseph Wood, to Miss Mary Hebson.
Deaths
At Alston, on the 5th inst., aged 74, Mr. John Bell, the celebrated bone setter: the deceased had practised in that capacity for upwards of forty years with great success, and such was his reputation that his house on a market day had more the resemblance of a hospital than a private dwelling.

17th April 1841 (Carlisle Patriot)
Lord Lovatt has leased out to an English gentleman, Mr. Thomas Dodd, the lead mine lately opened on his Lordship's property in Strathglass. The mine consists of lead ore and barytes, is five miles in length, by two and a half in width, The object of Mr. Dodd is to form a company for working the above mine, by raising a capital of £4,000 in shares of £4 each.

1st May 1841 (Carlisle Journal)

Know all Men by these Presents, that we, William Bainbridge of the Borough of Newcastle upon Tyne Esquire Banker and John Foster Gentleman of Alston in the County of Cumberland Attorney at Law and Joseph Dickinson the younger of the same place Gentleman

H. S.

H. S.

DPRI/3/1846/A 151

are held and firmly bound unto the Right Reverend Father in God, EDWARD, by Divine Providence, Lord Bishop of Durham, and to the Right Worshipful James Baker, Clerk, Master of Arts, his Vicar General and Official Principal, lawfully constituted in the Sum of Three Hundred Pounds, of good and lawful Money of England, to be paid to the said Reverend Father in God, his said Official, or to their certain Attorney, their Executors, Administrators, or Assigns; To which Payment, well and truly to be made, we oblige ourselves, and each of us by himself, jointly and severally, for the whole, our and every of our Heirs, Executors, and Administrators, firmly by these Presents, sealed with our Seals, dated the twenty-first Day of December in the Year of the Reign of our Sovereign Lady Victoria by the Grace of God of the United Kingdom of Great Britain and Ireland, Queen, Defender of the Faith, and in the Year of our Lord One Thousand Eight Hundred and forty-one.

THE CONDITION of this Obligation is such, that if the above bounden William Bainbridge the Creditor and by Decree of Court,

Administrator of all and singular the Goods, Chattels, Rights, and Credits of William Ridley late of the Parish of Alston in the County of Cumberland and Diocese of Durham, Gentleman deceased,

do make or cause to be made a true and perfect Inventory of all and singular the Goods, Chattels, and Credits of the said Deceased, which have or shall come to the hands, possession, or knowledge of him the said Administrator or into the hands and possession of any Person or Persons for him and the same so made, do exhibit or cause to be exhibited into the Registry of the Consistory Court, at Durham, at or before the seventeenth Day of May next ensuing; and the said Goods, Chattels, and Credits, and all other the Goods, Chattels, and Credits of the said Deceased, at the Time of her Death, which at any Time after shall come to the hands or possession of the said Administrator or to the hands of any other Person or Persons for him do well and truly administer according to Law.

And further do make or cause to be made, a true and just Account of his said Administration, at or before the twenty-first Day of December in the Year of our Lord One Thousand Eight Hundred and forty-two. And all the Rest and Residue of the said Goods, Chattels, and Credits, which shall be found remaining upon the said Administrator's Account, the same being first examined and allowed of by the Judge or Judges for the Time being of the said Court, shall deliver or pay unto such Person or Persons respectively, as the said Judge or Judges by his or their Decree or Sentence, pursuant to the true intent and meaning of a late Act of Parliament, made in the two and twentieth and three and twentieth Years of the Reign of our late Sovereign Lord King Charles the Second, intitled *An Act for the better settling of Intestates' Estates*, shall limit and appoint. And if it shall hereafter appear, that any last Will and Testament was made by the said Deceased, and the Executor or Executors therein-named, do exhibit the same into the said Court, making request to have it allowed and approved accordingly, if the said Administrator above bounden, being thereunto required, do render and deliver the said letters of Administration, Approbation of such Testament being first had and made in the said Court, then this Obligation to be Void, or else to remain in full Force and Virtue.

Signed, sealed and delivered (being first duly stamped) in the Presence of
Hugh Salvin
Surrogate

3rd June 1842 (Durham County Advertiser)
A Coroner's inquest was held at Noah's Ark, in the parish of Stanhope, on Monday last, on the body of Joseph Vipond. The deceased was a miner, and was engaged, in his usual employment, at the Stanhope Burn Lead Mine, on the previous Wednesday. While sitting in a part of the mine, a large portion of hard clay fell from the roof upon his back, and from the severe injuries he received he only survived until the following Saturday. No blame could be attributed to the agents of the mine, as no apprehension of danger was entertained. Verdict, "Accidental death." The deceased was 43 years of age.
In 1841, at Noah's Ark, Joseph Vipond, lead miner, aged 40, his wife Mary aged 40, children, Joseph, lead miner, aged 20, John, lead miner, aged 15, and Isaac

aged 10. In 1851, at Crawleyside, Mary Vipond, widow, aged 53, sons, Joseph, formerly schoolmaster (blind), aged 30, John, lead miner, aged 24, and Isaac, masons apprentice, aged 19.

24th June 1842 (Newcastle Courant)
COLLIERIES OF NORTHUMBERLAND AND DURHAM,
A few weeks ago, we gave some rather long extracts from the newly-issued report of the Children's Employment Commission, illustrative of the state of

collieries considered with reference to the country generally. —These were accompanied by the conclusions at which the commissioners had arrived. It may now be useful to notice the report of Mr Leifchild, the sub-commissioner, whose labours were confined to this county and the North of Durham. …
"By the returns from Mr Beaumont's lead-mines at Allenheads, in the county of Durham (which I believe to have been filled up with considerable care), where 252 males under 18 years age are employed, it would appear that very nearly the whole of them can read an easy book, and attend public worship, and that a very large proportion can write their names, and attend Sunday-schools. Yet, even in this very favourable case, a most competent witness, on whom I could place full reliance, observed, "The people with very few exceptions, do not seem to have a wish for much education at least they do not embrace the opportunities afforded them for their improvement. When once children leave school to go to work they seem to have no more inclination for instruction, even where they might attend school without the least inconvenience; but the error of course rests more with the parents than the children."
"The returns from Mr Beaumont's mines in the neighbouring parish of Stanhope, where 180 males under 18 years of age are engaged, do not exhibit these particulars in so favourable a light. …"

2nd July 1842 (Carlisle Journal)
Deaths

22nd July 1842 (Newcastle Courant)
At Winlaton, on the 20th inst., a pocket communion service of plate, together with a surplus in cash amounting to £23. 2s. 6d., was presented to the Rev. Blyth Hurst, by his friends and neighbours, on his leaving his native village of Winlaton to enter upon his ministerial duties at Garrigill. Mr Hurst was a blacksmith, and has lately been ordained a minister of the Church of England by the Bishop of Durham on account of his great learning.

23rd July 1842 (Westmorland Gazette)
APPLEBY.
EXTRAORDINARY OCCURRENCE—TWO MEN SHUT UP IN A MINE FOR THREE DAYS. —On Friday last, the 15th inst., Robert Slee and John Hutchinson, two of the workmen employed in the lead mines, belonging to the London Company, at Murton, near Appleby, were about leaving their work, when they were unfortunately shut up in the mines, owing to the falling in of a large portion of the works. As soon as the circumstance was made known, their fellow workmen were indefatigable in their exertions to save, if possible, the lives of the two men, who were doomed, as they thought, to be either dead amongst the ruins, or if otherwise, would meet a lingering death. Fortunately they were successful. After most laborious and dangerous working, from Friday evening to Monday morning, at half past four o'clock, they accomplished the object of their search; the two men were once again permitted to see the light of day, though greatly weakened through want of food and the fear of being buried in the earth. Much praise is due to Mr. Mark Armstrong, the eminent surveyor of the mines, who, on the melancholy occasion taking place, was sent for to his residency at Middleton, in Teasdale. From the plans in his possession, he formed the scheme of digging downward, to where the workings of an old shaft came in contact with the one in question. Had Mr. Armstrong's plan been resorted to at first, the men would acquired their liberty some hours sooner. Mr. Dinwoodie, surgeon, of Appleby, the medical gentleman employed by the London Company, was in close attendance from Sunday till half past four o'clock on Monday morning. The men's appearance at first was weakly, and they complained much of hunger. The surgeon's orders were, that they were to be supplied with gruel, and that only in small quantities for sometime. They were enabled to walk with assistance to their residence, and it is hoped that a little time will enable them to resume their occupation. One of the men, whilst in his dismal abode, had-eaten three candles, of which there were several pounds left in the mine. The other had not partaken of anything. On Sunday evening the prayers of the congregation assembled in St. Lawrence Church, Appleby, were requested by the Rev. Joseph Milner, vicar, for the safety of the two unfortunate men, at that time immersed within the bowels of the earth.
In 1841, at Murton, Elizabeth Hall, farmer aged 60, Thomas Hall, lead miner aged 30, Mark Hall aged 25, and John Hutchinson, lead miner, aged 15.
In 1851, at Murton, Mark Hall, lead miner and farmer, aged 37, mother Elizabeth Hutchinson, widow, aged 70, and brother John Hutchinson, lead miner aged 27.

Mark Hall married Mary Blenkinship, 29th October 1853, at St Michael's, Appleby.
In 1861, at Murton Village, Mark Hall, lead miner, aged 48, his wife Mary 36, daughters, Mary Ann 6, and Elizabeth 2.
In 1871, at Murton Village, Mark Hall, lead miner, aged 58, his wife Mary 45, daughters, Mary Ann 16, and Elizabeth 12.
In 1881, at Murton, Mark Hall, farmer of 11 acres, aged 68, his wife Mary 55, and daughter Elizabeth, dressmaker, aged 22.
Mark Hall died 3rd quarter of 1881, aged 69, registered at East Ward, Westmorland.
In 1891, at Murton, Joseph Earl, farmer, aged 31, his wife Elizabeth 32, children, Mark 8, Margaret 6, Mary Elizabeth 1, father, Joseph Earl, widower, farm labourer, aged 77, mother in law, Mary Hall, widow, retired farmer, aged 65. Mary Hall died 3rd quarter 1899, aged 74, at East Ward, Westmorland.

In 1841, at Hilton, Thomas Slee, lead miner, aged 59, his wife Ann (Bellas, married 12th November 1814, at St Michael's, Appleby) 50, William, carter aged 20, John, lead miner, aged 14, and Elizabeth 8 years.
Thomas Slee was buried 17th May 1844.
In 1851, at Murton, John Slee, lead miner, aged 24, mother Ann Slee widow, aged 62, brother, William, deformed, aged 30, sister Margaret, grocer aged 33, niece, sisters daughter, Ann Slee, aged 2, and Aunt Jane Bellas, unmarried, retired servant, aged 65.
John Slee married Jane Readshaw, 29th October 1857, at St Michael's, Appleby.
In 1861, at Hilton Village, John Slee, lead miner, aged 34, his wife Jane 24, daughters, Mary Ann 3, and Mary Jane 1.
In 1871, at Hilton Village Murton, John Slee, lead miner, aged 44, his wife Jane 34, and daughter Mary Jane 11.
In 1881, at Brough, John Slee, lead miner, out of employment, aged 54, his wife Jane, bread baker, aged 44, daughter, Ada 13, Fred 10, Florence 6, and Minnie 3.
John Slee died 3rd quarter 1827, aged 55, registered at East Ward, Westmorland
Jane Slee married John Tuer 4th quarter 1884, at East Ward, Westmorland.
In 1891, at Warcop, Appleby, John Tuer, railway plate layer, aged 57, his wife Jane, 54, and daughter Florence Slee 16.
In 1901, at Rock Cottage, Bondgate, Appleby, John Tuer, railway plate layer, aged 66, and his wife Jane, aged 63.
In 1911, at Scattergate, Appleby, John Tuer, old age pension, aged 77, his wife Jane, 74, and grandson, Harry Slee aged 8.
John Tuer died 4th quarter 1911, at East Ward Westmorland.
Probate 1918: Jane Tuer of Scattergate, Appleby, Westmorland widow died 4 July 1918. Administration Carlisle 12 August to Mary Ann Atkinson, widow. Effects £82 16s 6d.

13th August 1842 (Carlisle Journal)
Deaths
At Alston, on the 7th inst., Mrs. Ann Salkeld, aged 88 years.

20th August 1842 (Carlisle Journal)
Marriages
At Alston, on the 16th inst., Mr. Anthony Dodd Brown, to Miss Elizabeth Hetherington, both of Nenthead. *See 15th February 1873.*

26th August 1842 (Newcastle Courant)
A dreadful thunder-storm passed over Alston-moor on Wednesday week last. Nineteen, men, women and children sought refuge from, the storm in the Smithy belonging, to the Bloomsbury lead-mine, when the agent entered the smithy with a horse, and the electric fluid struck the building, burst beneath the animal's belly, and instantly killed it on the spot, while the agent had his arm much injured. Four or five women and boys were more or less hurt, but none of them fatally.

3rd September 1842 (Carlisle Journal)

12th November 1842 (Carlisle Journal)
Inquests
At Nenthead, near Alston, on the 8th instant, on the body of Matthew HUNTER, miner. The unfortunate man had risen very early in the morning of Saturday ---- for the purpose of going upon the Moor to shoot grouse, and, as is supposed, had drawn the charging shot and part of the powder, after which he had rested the stock upon the floor and a lighted candle near the touch-hole; he had then blown down the barrel to ascertain if the charging was entirely removed, the powder then ignited and exploded, inflicting a most extensive injury in his throat and chest, which terminated his life in 24 hours. Verdict accordingly. *Aged 34. Matthew Hunter married Hannah Irwin, 1st quarter 1841, registered, at Alston. In 1841, at High Galligill, Matthew Hunter, lead miner, aged 30, his wife Hannah aged 30, and son William aged 1 year.*

Thomas Crozier married Hannah Hunter, 28th February 1847, at St John's, Nenthead.
In 1851, at High Galligill, Thomas Crozier lead miner, aged 38, his wife Hannah aged 42, and son William Hunter aged 9.
Thomas Croser, died 2nd quarter 1855, registered at Alston.
In 1861, at Chapel street, Alston, Hannah Crosier, widow, aged 50.
Hannah died 2nd quarter 1862.

Inquest At Alston, on the body of Robert Walton, aged 39 years, who was killed on Tuesday, by the explosion of gunpowder introduced into a rock, caused by the touch being ignited before he had time to withdraw to a place of safety. Verdict, "Accidental death."

Deaths

At Nenthead, on the 6th instant, Mr. Joshua Percival, aged 48 years.
See 1st July 1876

17th November 1842 (Newcastle Courant)

The Committee and Shareholders of the New Gas Works just erected at Alston, lighted for the first time on Friday evening last, met to celebrate the event at Mrs. Errington's, the Blue Bell Inn, where upwards of 30 sat down to dinner. J. Wilson, Esq., of Alston House, presided; the vice-chair was filled by T. Dickinson, Esq., of Spency Croft. Among the company were the Rev. Mr. Salvin, Wm. Bainbridge, Esq., solicitor, J. Dickinson, jun., Esq., solicitor, J. Walton, Esq., C. Arnison, Esq., E. Emerson, Esq., T. Elliot, Esq., Mr. Jno. Cowper, Mr. Jno. Dryden, Mr. W. Grey, Mr. Robt. Walton, Mr. Utrick Vipond, Mr. Wm. Dickinson, Mr. Wm. Gill, Mr. Robt. Walton Jun., Mr. Jno. Thompson, Mr. Edwd. Campion, of the Hareshaw Iron Works, the engineer and sole contractor, &c, &c. After the usual loyal toasts were given, the health of Mr. Smith Stobart, of Hexham Abbey, was drunk, he being the originator of the works, and his spinning factory at Alston being lighted with gas. Praise was also given to Jno. Grey, Esq., of Dilston, through whose influence the ground was obtained of the Greenwich Hospital, on which the works are erected.

19th November 1842 (Carlisle Patriot)

William Vipond, Robert Rain, and David Smith, all of Alston, were fined 12s. and 8s. costs each, for poaching near that town, or in default one month's imprisonment.

17th December 1842 (Newcastle Journal)

ALSTON.—The Rev. Blyth Hurst, Curate of Garrigill-gate, in the parish of Alston has been presented by his hearers, residing in the village of Nenthead, with a handsome crimson velvet cushion for the pulpit, and the London Lead Company who have extensive mines in the district, have also furnished a new quarto bible and prayer book. It is worthy of notice as, evincing the zeal and talents of this respected clergyman, that at Nenthead where there is no church or chapel of the establishment, and where the services of the Church of England have only been introduced a few months, upwards of seven hundred persons frequently attend the service conducted by the Rev. Mr. Hurst in a school-room, and at Garrigill-gate also, the attendance at church has been increased more than tenfold.

24th December 1842 (Carlisle Journal)
Marriages

William Wanless married Francis Dawson, 6th March 1852, at Ray County, Missouri.
William Wanless married Mary Odell, 23rd December 1858, near Richmond, Ray County, Missouri, 6th March 1852, at Ray County, Missouri.

The following information is from: All Utah, Our Pioneer Heritage, Volume 3
The Lonely Trail, The Independent Family, A Tribute
"Jackson Wanless, Sr. and William Bell were both miners by trade. They were honest, hard working, home loving people and it was in this peaceful environment the children grew to maturity. When William Wanless was twenty-two he married a beautiful girl by the name of Isabella Bell. They were blessed with four lovely children, but as each little spirit came into the world, it was only privileged to stay a little while. The eldest child, a boy, lived to be six. The

mother, stricken with grief at the loss of her children, passed away two years later; so William broke up his home and went back to live with his parents. By this time Jackson had married Sarah Bell, and they were blessed with two children, a boy and a girl. The boy, who was christened William after his uncle, passed away at eleven months, and a year later the mother died, leaving her husband with one little girl, Mary, age three."
"William had lost his family and had no dependents, he decided to go and try his luck in America. He sailed across the ocean and finally took up his abode in Richmond, Ray County, Missouri in the year 1850. A year or two after his arrival he helped finance the passage of his brother, Jackson, and family. Jackson, by this time, had married his wife's older sister, Jane Bell, and they had been blessed with two children, Jackson and Sarah. This little family, together with Mary, who was now eight years of age, decided to migrate to America *(in 1853)* and join William"

The following newspaper article gives further information about this family.

The Lehi Banner 19th March 1896
Lehi City, Utah
Funeral of Mrs. Ellen Sharp
The funeral services over the remains of Mrs. Ellen Wanlass Sharp were held on Friday, March 18th; at the residence of William R. Sharp where a large number of relatives and friends gathered to pay their last respects to the departed. The speakers on the occasion were James Kirkham, A. R. Anderson and Bishop T. R. Cutler of Lehi and Francis Armstrong of Salt Lake
The following sketch of the life of the deceased was read
Ellen Wanlass Sharp, daughter of Jackson Wanlass and Ann White Wanlass, was born December 8, 1828 at Alston county, Cumberland, England.
Her father, mother, brothers and sisters, then old enough, were of the first fruits of the first mission to England in 1837 they receiving baptism under the hands of Elder Isaac Russell *(the Newcastle Journal of 28th October 1837, reported that "A crazy enthusiast, who calls himself Isaac Russell, and who pretends he has recently voyaged from Canada, has taken up his abode in Alston. …")*, of that mission. Sister Sharp received the gospel later, being baptised on the 25th of November by Elder David Candland.
With her husband, Robert Sharp and family she left England sailing from Liverpool on May 10, 1856 on board the "William Tapscott" for Canada. They remained in Canada for three years and from there, with her family, she came to Ray county, Missouri, in the fall of the year 1859, where her brothers William and Jackson Wanlass were living at that time. From Missouri with her husband, she came to Utah, arriving in Lehi, March 7,1889.
Sister Sharp died at Lehi, Thursday March 12,1896, leaving a husband, Robert Sharp, a son, William R. Sharp, a daughter, Mrs. Mary Ellen Long and eight grand children, all of Lehi.

At Alston, on the 19th inst., Mr. Joseph Whitfield, of the Swan Inn, aged 57 years.
At Clargill Hall, on the 18th inst., very suddenly, Mrs. M. Watson, housekeeper to the Rev. O. James.

28th January 1843 (Carlisle Journal)
INQUESTS. —An inquest was held before Mr. Carrick, County Coroner, at Clargill Hall, near Aston, on the body of Margaret Watson, servant to the Rev. Mr. James, Curate. The deceased, on the 18th instant, was sitting upon the end of the bed sewing, when she, without any previous symptoms of illness fell back and died instantly. Verdict— “Natural death."
At Windy Hill, near Alston, on the 21st instant, on the body of Joseph Hall, aged twenty-three years. Hall was a lead ore miner in the service of the London Lead Company, and on the 17th instant, was proceeding up the drift upon the outside of one of the waggons, when his head and body, owing to the lowness or the roof, became jammed between it and the top of the waggon. He called out and the waggons were, stopped without a moment's delay, and the poor man was recovered from his dangerous situation and carried home, but on examination by a medical man it was discovered that his spine was very much injured, from which, and other internal injuries, be died on the following day, after enduring most excruciating pain. His fellow workmen deposed that the accident was entirely attributable to the rashness of the deceased, who exposed himself to almost certain death in despite of their expostulations. Verdict—Accidental death; deodand, one shilling. It was stated on the inquest that deceased was to have been married on the following Sunday. *In 1841 at Windy Hall, Ann Hall, aged 60, independent and Joseph Hall aged 20, lead miner.*

11th February 1843 (Carlisle Journal)
GREENSIDE MINES.—The Greenside mines, in Patterdale, are at present very rich in ore, the low level having exceeded the expectations of the shareholders. Should the projected railway between Penrith and Carlisle go forward, the company contemplate running a steamer on Ullswater Lake in order to expedite and economise the carriage of the lead; they having recently purchased pieces of ground at each extremity of the lake for that purpose.

18th February 1843 (Carlisle Journal)
Marriages
At Alston, on the 16th instant, Mr. Joshua Walton to Miss Mary Dowson, both of Nenthead. *See 10th April 1880*
At Alston Church, on the 16th inst. Mr. George Hutchinson to Miss Catherine Barron.
In 1851, at Lane End, Nenthead, George Hutchinson, lead miner, aged 30 (son of George and Elizabeth Hutchinson, in 1841, living at Dykeheads Nenthead, with George Hutchinson, lead miner, aged 65, and Ann Hutchinson aged 20), his wife Catherine aged 34 (daughter of George and Isabella Barron, in 1841, Catherine was living in Alston Workhouse), children Isabella aged 10, and George aged 5.
In 1861, at Wardway Foot, Nenthead, George Hutchinson, lead ore miner, aged 43, his wife Catherine aged 45, George 15, Elizabeth 6, Sarah A., 3, and boarder, Jane Swindle, lead smelters, widow, aged 65.
George Hutchinson, was killed in an explosion, see 25th December 1867.
In 1871, at Whitehall, Nenthead, Catherine Hutchinson, widow, aged 54, formerly general servant, son George, no occupation, aged 25 (Decrepit), and nurse child Joseph W. Blacklock, aged 3 years.

In 1881, at Whitehall, Mary Baron, widow, aged 61, grand daughter, Mary Ann Barron, aged 5, boarder, and George Hutchinson, unable for any work, aged 38.
George Hutchinson, died 31st December 1887.
See 25th December 1867, 7th August 1880, and 31st December 1887.

24th February 1843 (Newcastle Courant)

ACCIDENT.

As two men, named Jonathan Bradwell, and William Collinson, were working at Lodgesike lead mine, near Middleton in Teesdale, on the 15th inst., part of the works gave way, and a large quantity of stones fell upon them. Several workmen came to their assistance, and extracted Collinson alive, though much hurt. Bradwell, a fine young man, was a lifeless corpse. An inquest has been held upon the body, verdict "Accidental death".
In 1841, Middleton in Teesdale, Jonathan Bradwell, lead miner, aged 50 Hannah 50, Mary 25, Jonathan 15, Jacob 15, Thomas 14, George 10, William 9, and John 6 months.
In 1851, Hannah Bradwell, widow, aged 52 (her husband had died 3rd quarter of 1849), Thomas, lead miner, aged 23, George, lead miner, aged 20, William, home, aged 17, and John, grandson, aged 10.
Hannah died in the 3rd quarter of 1851.

4th March 1843 (Newcastle Journal)

29th April 1843 (Newcastle Journal)
The adventurers in Bruntlesheelhaugh Lead Ore Mine situate in Hexhamshire, have succeeded in cutting a vein upwards of fourteen feet wide, which will no doubt prove a source of great profit to the owners, Messrs. Smith, Welford, and Co. of Hexham, and afford employment for the mining population of the district.

6th May 1843 (Newcastle Journal)
LEAD MINE.—There was a slight error committed last week In a paragraph relating to the Bruntlesheelhaugh Lead Ore Mine, wherein the width of the newly cut vein was said to he upwards of fourteen feet wide, instead of forty-four feet, as it is in fact. It appears that since the month of December last levels and cuttings have been driven to the extent of forty fathoms, and it is now intended to cut to the old vein by a cross section, and discover the width and thickness of solid treasure left for the spirited mining adventurers at Bruntlesheelhaugh.

6th May 1843 (Carlisle Journal)
Deaths
At Alston, on the 2nd instant, Mr. Joseph Bainbridge, aged 55 years.

Inquest Before Mr Carrick

Thursday week, at Dryburn, Garrigill, near Alston, on the body of John Rain, aged three years, whose death was occasioned by drinking boiling coffee, from the spout of the coffee pot. Verdict, “Died from inflammation of the chest”
On Friday, at Newlands, near Hesket-new-Market on the body of Zacchias Holmes. The unfortunate deceased was a miner in the flourishing mine called Roughten Gill, and on Wednesday was seated underneath a large block of stone in conversation with a fellow workman, when it detached itself from the roof of the workings and fell upon the deceased who was killed instantaneously. The stone weighed upwards of four tons, and occupied six or eight men two hours in its removal. When the body was extricated, it was found that the skull was broken in every part and the brains forced out, the ribs on his left side were also fractured. The deceased bore an excellent character, and has left a wife and numerous family of young children. The stone had been examined by the overlooker on the day before the melancholy accident occurred, and was then considered perfectly safe Verdict. " Accidental Death "
Baptism of Zaccheus Holmes 25th February 1796, at Alston, parents Thomas and Elizabeth Holmes.
Zaccheus Holmes married Isabella Midcalf, 24th May 1828, at St Augustine’s, Alston.
See 18th December 1841.

In 1851, at Mickley, Northumberland, Joseph Robson, coal miner, aged 27, born Erdington, Cumberland, his wife Isabella, aged 36, born Workington, children, Thomas, coal miner, aged 20, Zaccheus, putter, aged 17, William, putter, aged 15, George, putter, aged 13, John, putter, aged 12, (previous children all born at Alston), Elizabeth 10, born Midgeholm, Cumberland, Isabella 8, born Escot, Cumberland, Isaac 7, born Escot, Cumberland, Mary Jane 4, born Shotley Bridge, and Joseph 2, born Midgeholm, Cumberland.
In 1861, at Great Lumley, Durham, Joseph Robson, coal miner, aged 36, his wife Isabella 45, children Thomas, coal miner, aged 28, George, coal miner, aged 22, Elizabeth Holmes20, Isaac, coal miner, aged 17, Mary J 13, Joseph, 12, and grandson George Holmes, 5 months.
In 1861, at Belmont Colliery, Pittington, Durham, Ezekias Holmes, coal miner, aged 26, his wife Sarah 24, children William 5, and Isabella 3.

1st July 1843 (Carlisle Journal)

APPEAL.

STANHOPE IN WEARDALE, APPEAL. — ALSTON RESPOND

This was an appeal against the order of removal of Jane Vipond, and her three children, from Alston to the parish of Stanhope in Weardale.
Mr. Bell appeared for the appellants, and Mr. Ramshay and Mr. Fawcett for the respondents. The case set up by the respondents was that Thomas Vipond had gained a settlement in Stanhope by service under an indenture of apprenticeship to Thomas Robinson of Windyside. The indenture, however, was not forthcoming although it was shown that the most diligent search had been made for it. Mr. Bell raised a number of objections to the answers given

by the respondents, —amongst others—that there had been no indenture, or, if there was, that it was not duly stamped. These objections were over turned; and Mr, Robinson, of Windyside, having proved that Vipond was bound to him, and that he served an apprenticeship of 5½ years, —the Court confirmed the order of removal, with cost.

Marriages

At Alston Church, on the 28th instant, Mr. Isaac Walton, of Brownside, to Miss Eleanor Richardson, of Hill House. *See 30th September 1893*

Deaths

At Nenthead, on the 15th inst., Mr. Matthew Armstrong, aged 57 years.

25th August 1843 (Newcastle Courant)

On Saturday last, a piece of very handsome plate, manufactured by Messrs Reid and Sons, of Newcastle, was presented to Mr Thomas Teasdale, by the miners, workmen, and friends of the Silver Tongue Mine Adventure, at Greenhead, Derwent. The day was particularly fine, and about one o'clock a number of the miners and friends of Mr Teasdale, accompanied by an excellent band of music, met Mr and Mrs Teasdale at the mine, from whence they proceeded to the place of presentation at Greenhead, the band playing appropriate airs as they proceeded; previous to reaching Greenhead, the horse was taken from the phaeton, and Mr and Mrs Teasdale were drawn by the miners to a very pretty lawn in front of the Golden Lion Inn. The plate, which bore the following inscription, viz: — "This coffee pot, together with bason, jug, gold watch, &c., was presented to Thomas Teasdale Esq., by the miners, workmen, and friends of the Silver Tongue Mine Adventure, in testimony of their esteem for his abilities as a miner, and conduct as a man, August 10, 1843," was now shown to the assembled crowd. John Dolphin, Esq., of Hunter-house, chairman of the committee, in the name of the subscribers, presented the plate to Mr Teasdale in a long and eloquent speech, descriptive of mines and mining, and the worthiness of that gentleman to such a, mark of their esteem. Mr Teasdale, in reply, expressed his thanks for their kindness, and in a very neat and appropriate speech described his arduous undertaking at Silver Tongue Mine, and the many difficulties he had had to encounter and surmount. The ceremony of presentation being over, the committee with their friends retired to the inn, where Mr and Mrs Richardson had provided a most sumptuous dinner for the occasion, consisting of almost every delicacy of the season. Mr Dolphin took the chair, with Mr and Mrs Teasdale on his right; after dinner the usual, loyal and patriotic toasts were drunk with great enthusiasm.
See 15th November 1844

1st September 1843 (Newcastle Courant)

17th February 1844 (Carlisle Journal)

Alston. —The landowners in this neighbourhood have been very busy during the week, procuring signatures from their tenants and others dependant upon them, to a petition in favour of the existing Corn Laws.

Presentation. —The London Lead Company's workmen at Alston Moor, have recently presented to Mr. John Millican, sen., on his retirement from the agency of that district (which he has held for twenty seven years) a copy of Bagster's Bible and Heapla, accompanied with an appropriate address, expressive of their high respect for him. The bible is handsomely bound, and bears the following inscription on a plate of silver: -

"Presented to Mr. John Millican, on his retirement from the office of a district agent to the Lead Company in Alston Moor, by the Company's workmen therein, as a token of their affectionate regard and esteem, and of their grateful rememberance of his unvarying kindness, and of his services in the promotion of their best interests."

Mark of Respect. —On the 5th instant, the inhabitants of Allonby presented to Mr. Utrick Walton, custom-house officer, lately stationed there, but now of Oban, a very handsome and valuable writing desk, bearing the following inscription: —

"Presented to Utrick Walton by the inhabitants of Allonby, as a mark of respect and esteem for his gratuitous and unwearied services in the cause of education, morality, and religion."

See 27th December 1844 and 21st November 1885

Shocking Accident. —On Wednesday, the 7th inst., a melancholy and fatal accident occurred at Overheath Lead Mine, near Dufton, Westmorland, to a young man named John Ion, son of Joseph Ion, of Knock. It appears whilst working in the mine, a portion of the roof suddenly gave way, and a large stone, measuring about four yards in length and four feet in depth, fell upon him. Some other miners who were near immediately went to his assistance, and found a portion of the stone lying on his head, his body being protected by a wagon which the stone had partly fallen on—but it was not until four hours had elapsed that it could be removed. The young man exhibited signs of life for about half an hour after the accident. His head was much mangled, and there was also a severe wound on his breast. An inquest was held on the body on the Friday following, before G. Thompson, Esq., coroner, and a verdict of "accidental death" returned. Deceased was 20 years of age, and much respected.

Joseph Ion married Emma Willan 1st October 1821, at Long Marton.
In 1841, at Knock, Long Marton, Joseph Ion, publican, aged 40, his wife Emma 35, children, John 15, Joseph 14, Mary 12, Thomas 9, Ann 4, and William 1.

In 1851, at Knock, Long Marton, Thomas Chambers, farmer of 40 acres, aged 31, his wife Mary 23, children, Emma 2, Joseph 1, brother in law, Thomas Ion, Ag Lab, aged 19, brother in law William Ion 10, and sister in law Anne Ion 14.

In 1861 at Knock, Long Marton, Thomas Chambers, farmer of 40 acres, aged 41, his wife Mary 32, children, Emma 13, Joseph 11, John Ion 9, William 7, Thomas 5, and Mary 1.

In 1861, at Knock, Long Marton, Thomas Ion, Inn keeper, aged 29, and sister Ann, house keeper aged 24.

In Memory of
Joseph Ion late of Knock
who died May 27 1844
Aged 42 years.
Emma his wife
who died May 7 1843
Aged 41 years
And of John their son
who died Feb^{y} 7 1844
Aged 20 years
And of Joseph their son
who died Nov 22 1846
Aged 20 years
And of Thomas their son
who died June 8 1875
Aged 43 years.

In 1871, at Knock, Long Marton, Thomas Chambers, farmer of 50 acres, aged 50, his wife Mary 42, children, Emma 23, Joseph, freestone quarryman, aged 21, John, joiner, aged 19, Mary 12, granddaughter Jane Chambers 4, and brother, Thomas Ion, land owner, aged 39.

Mary Chambers died 25th March 1876, aged 47.
In 1881, at Long Marton, Thomas Chambers, widower, farmer of 68 acres, aged 61, daughter Mary 20, and granddaughter Jane Chambers aged 14.
Thomas Chambers died 15th February 1896, aged 76 years.

In 1871 at Ardwick, Manchester, Richard Cole labourer, aged 48, born London, his wife Ann 49, born Long Marton, son William, warehouseman, aged 21, born Ardwick, father in law, William Dargue, aged 74, born Long Marton, mother in law, Mary Dargue, 72, born Long Marton, and Lodger William Ion, house joiner, aged 30, born Long Marton.

Inquest. —At Grass Field, near Alston, on the 10th inst., on the body of John Irwin, aged 40 years, whose death was occasioned by reason of an explosion of gunpowder in Fire Stone Lead Mine, belonging to the Governor and Company of Nenthead Mines. Verdict "Accidental death."

John Erwin, married Hannah Spark, 14th June 1827, at Alston.
In 1841, at Grassfield, John Erwin, lead miner, aged 35, his wife Hannah aged 30, children Robert 12, Betsy 7, John 4, Ridley 2, and Mary 3 months.
Betsy died 4th quarter of 1843.

In 1851, Hannah Irwin, widow, occupier of land, aged 42, children, Robert, lead miner, aged 21, John, lead miner, aged 14, Ridley 12, Mary 10, and Hannah 8.
In 1861, at Nentsbury, John Irwin, unmarried, lead miner, aged 24, brother Ridley, lead miner, aged 22, and sister, Hannah, dress maker, aged 17.
See, 24th February 1844, 27th April 1866, and 1st June 1866.

Samuel White died
See

24th February 1844 (Carlisle Journal)

Inquests: —An inquest was held before Mr. Lee, the deputy coroner, on the 19th instant, at Roughside, in the parish of Alston, on the body of William Black, aged 14 years, who was found on the 8th instant at Roughside Plantation, about 200 yards distant from his father's dwelling house. He was suspended from a tree, with his feet resting upon the ground. He had been missing from about two o'clock on the previous day. When he was last seen he was making a box trap; he was as cheerful as usual, and talking about matters of business that he intended to do in the course of a few days. He had not had any previous quarrel with any one, nor evinced any depression of spirits. It appeared that he had a strong propensity for snaring and trapping wild rabbits and vermin. Shortly before his death he caught his brother by the neck in a snare suspended from the mine in which they worked. On another occasion he tried an experiment upon one of his playfellows, to ascertain, as he said, how long he could hang without being hurt. He placed his playfellow upon a stool, and hung him from a beam, — kicked the stool from under him, and allowed him to hang a short time before he released him. On another occasion he and the same boy were in a wood when deceased drew from his

pocket a rope and said he would let his companion see him hang himself. The boy ran off and left him. The jury, from the evidence, were led to conclude that the deceased had been accidentally hanged whilst trying an experiment upon himself, and returned a verdict accordingly.

FATAL ACCIDENT NEAR ALSTON.—On Friday morning week, a fatal accident befel a poor man named John Erwine, of Grassfield, while working in the Lead Companys mines at Nenthead. He had prepared what is technically called "a shot," with a train attached to it, for the purpose of blasting a portion of the mine, when by some accident it exploded while he was standing upon the spot, and he was instantly killed. The poor fellow was mutilated in a shocking manner. The left side of his face was taken off, one of his arms was shattered, and left hanging by a piece of skin, and his body was otherwise dreadfully injured, he was a sober, industrious, and pious man, much respected by his fellow workmen. He has left a wife and six children to lament his untimely end. *See, 17th February 1844, & 1st June 1866.*

Deaths

At Aimshaugh near Alston on the 16th inst., Mr. John White, aged 81 years.

4th May 1844 (Carlisle Journal)

BORROWED TRIFLES,

AN EPITAPH. — A curious epitaph on a tombstone in Alston churchyard, in this county, to the memory of a Cobbler of the name of Jefferson:—

My cutting board's to pieces split,
My size-stick will no measures meet,
My rotten last's turned into holes,
My blunted knife cuts no more soles,
My hammer head's flown from the haft,
No more Saint Mondays with the craft,
My nippers, pinchers, stirrup, and rag,
And all my kit have got the bag;
My lapstone's broke, my colour's o'er,
My gum-glass froze, my paste's no more,
My heel's sewed on, my pegs are driven,
I hope I'm on the road to Heaven.

4th May 1844 (Carlisle Journal)

Inquest before J. Lee, Esq., Deputy Coroner

On the 20th ult., at Clog Hall, Alston, on the body of Mary Ann Hardy, aged eleven months. She was found dead in bed. Verdict, Natural Death.

11th May 1844 (Newcastle Journal)

VALUABLE FREEHOLD AND LEASEHOLD ESTATES & LEAD MINES FOR SALE.

TO BE SOLD BY AUCTION, at the House of Mr. Jacob Crawhall, the Phoenix Inn, in Stanhope, in the County of Durham, on Friday the 31st Day of May, 1844, at Three o' Clock in the Afternoon, (by the Mortgagee under a Power of Sale.) either together or in the following Lots:—

Lot 1. STOTSFIELD BURN ESTATE and LEAD MINE, situate at Rook hope, in the Parish of Stanhope, containing a good Dwelling House, with suitable Outbuildings, and several Cottages, and 32a. 3r. 13p. or thereabouts, of Arable, Meadow, and Pasture LAND, as now occupied by Mr. Thompson, and others.

Lot 2. PASTURE HOUSE and THORNEY-BROW ESTATE and LEAD MINE, situate at Rookhope aforesaid, comprising a good Dwelling House, and suitable Outbuildings, and 33a. 1r. 31 p. or thereabouts, of Meadow and Pasture LAND, as now occupied by Mr. John Hogarth, and others.

The above Property has an unlimited Right of Pasturage upon Stanhope Common, is in the immediate Vicinity of Mr. Beaumont's extensive Lead Works, and is all well Watered and Fenced, and within a short Distance of Coal and Lime.

The Lead Mines have already been wrought to considerable Advantage, with every Prospect of Increase, and the Property abounds with Iron Stone.

The respective Tenants will show the Premises, and further Particulars, and a Plan of the Estates, may be seen on Application to Mr. HEAD, Solicitor, Hexham. Hexham, 8th May 1844.

6th July 1844 (Carlisle Journal)
GARRIGILL FRIENDLY SOCIETY.—On Friday last, the 28th ult., the members of this society held their annual meeting at Garrigill, near Alston, in this county, when a large number of the members sat down to excellent dinner, provided by Mr. John Thomason, innkeeper. The general business of the day having been gone through, the members formed a procession, and, having walked through the village, accompanied by the Nenthead musical band, they

repaired to the Church, when the Rev. Blythe Hurst, Curate of Garrigill, delivered impressive discourse from Cor., ch. 8, v. 9, to a crowded audience, who showed, their deep attention, how much they were interested in the truths so beautifully illustrated and ably enforced by the reverend gentleman. The above society, although only recently established as November, 1832, in a small country village, has now upwards 480 members enrolled in its books, and a capital of £1,132. Such has been the prosperity of the society during the past year, notwithstanding the great mortality among a mining population, that the number members is 27 advance of the number contained in the last year's report; and although the sum of £148 has been paid to sick members and for funerals in the course of the past year, its funds have increased £102.

13th July 1844 (Newcastle Journal)

Deaths
At Alston, on the 25th inst., Mary, wife of Jonathan Walton, Esq., aged 63 years. *See 5th June 1857*

3rd August 1844 (Carlisle Journal)
Deaths
At Alston, on the 29th ult., Mrs. Mary Taylor, aged 83 years.

9th August 1844 (Carlisle Patriot)
Edward Percival (aged 37) charged with assaulting George Martin, of Nenthead, constable, whilst in the execution of his duty.
Mr. Fawcett conducted the case for the prosecution.
George Martin—I am a constable at Alston. On the 4th of July last I had a warrant against the prisoner, issued by Mr, Hodgson, a magistrate. It was against him and his cousin Anthony. I and Joseph Millburne, another constable, went for him. The warrant was read to him (The warrant was then produced and read in court,) When the warrant was read, I took hold of him: and another constable had hold of Anthony, who sprang from him. Percival tried to get away, and struck me on the breast. He flung me backwards over, and got on the top of me. I rose and sought some other assistance. When we returned we found the prisoner standing with something in his hand that he said was a pistol, and he threatened that no one should take him that night. We went for him next day, but could not find him. On Sunday, the 7th of July

he gave himself up. The reason we did not apprehend him at first was on account of his violence.
Henry Robinson—I live at Alston I remember the prisoner being apprehended on the 4th July. I saw the prisoner strike the constable, who struggled with him and fell. The prisoner tried to get away from him.
The depositions before the magistrates were then handed in and read.
Utrick Bainbridge—I am clerk to the magistrates at Alston. The depositions produced are those taken during the examination of the prisoner.
His Lordship summed up, and the Jury returned a verdict of Guilty, with a recommendation to mercy.
The learned Judge said that from the circumstances of the case he could take no notice of the recommendation of the jury.
Sentence: To be imprisoned for one calendar month, with hard labour.
In 1841, at West Nenthead, Hannah Percival, aged 70, children, Edward, lead miner, aged 30, John, lead miner, aged 30, Robert, apprentice shoe maker, aged 25, and granddaughter, Hannah Percival 9.

16th August 1844 (Newcastle Courant)
Deaths
At Newhouse, Weardale, on the 8th inst., aged 26, Margaret, daughter of the late, Mr. John Harrison.

Deaths
At Nenthead, near Alston, on the 19th instant, aged 39, Lucy wife of Mr. Tinniswood Millican, agent for the Governor & Co's Lead Mines at Nenthead.
Tinniswood Millican married Lucy Little 21st September 1831, at Alston.
In 1841, at West Nenthead, Tinniswood Millican, lead mine agent, aged 35, his wife Lucy aged 35, children Frances 8, Sarah 7, and John 3.
In 1851, at New House, Nenthead, Tinniswood Millican, widow, lead mine agent, aged 47, children Frances 18, Sarah 17, Hannah Teasdale, house servant, aged 26, and Ann Cousin, house servant, aged 18.
In 1851, at Croft House School, Brampton, John Millican aged 13, pupil.
See 1st October 1831, 12th July 1865, 2nd September 1876, 24th August 1878, 5th April 1879, and 8th February 1896, 26th June 1897, & 12th March 1898.

24th August 1844 (Carlisle Journal)
Deaths
At Nenthead, on the 19th instant, Mrs. Hannah Hutchinson, aged 65 years.
Hugh Hutchinson married Hannah Wilson, 11th October 1806, at St Augustine's, Alston.
Children of Hugh and Hannah Hutchinson:
Thomas born 21st June 1807, 1st son of Hugh Hutchinson, Nenthead miner, of Allendale, by his wife Hannah daughter of Robert Wilson.
Robert born 23rd January 1809, 2nd son of Hugh Hutchinson, Nenthead miner, of Allendale, by his wife Hannah daughter of Robert Wilson.buried 9th June 1816, aged 7.
In 1841, at Hill Top, Nenthead, Hugh Hutchinson, lead miner, aged 61, and his wife Hannah aged 61.
Hugh Hutchinson died 21st February 1842, See 26th February 1842.

21st September 1844 (Carlisle Journal)

MINING.—ALSTON.

A case, which has for many years been in dispute between the mining companies on Alston Moor, was brought before Mr. Armstrong, barrister-at-law, as arbitrator between the parties, at the Coffee House Inn, in this city, on Tuesday last. The matter in dispute is in respect to the working of certain lead-mines in Alston Moor: the plaintiffs are the Hudgill Burn Mining Company; the defendants the Galligill Syke North Vein Company.

Mr. WATSON, Q.C., appeared as counsel, and Mr. Chas. Head, of Hexham, solicitor for the plaintiffs; Mr. BAINES, counsel, and Mr. Harrison, of Kendal, solicitor for the defendants.

Mr. WATSON opened the case for the plaintiffs at some length. It appeared from his statement that the manor of Alston belongs to the Greenwich Hospital, the directors of which are owners of the mines, granting leases either of mines worked, mines discovered, or mines expected to be discovered, in 1813 the Hudgill Company were exploring a piece of ground which had since been called the Hudgill Burn General Grant; and about the same time the parties who became the Galligill Well Company were making explorations in the same district, and in January, 1844, they obtained a lease, from the Hospital, of the Galligill Syke North Vein, which was one of the matters in dispute. In the month of March 1814, the Hudgill Company obtained a "general grant." The leases granted by the Hospital were of three kinds. The first was called a "lease length" by which a vein is granted, by name, from a given point, for twelve hundred yards in length, and forty yards on each side of it. The second was like the lease which the Galligill Company obtained, where you have a vein from a certain point to a certain point— that is to say, a vein supposed to run east and west, of which a lease is granted with forty yards on each side, which defined exactly the territories upon which the lessees are entitled to work. Such was the nature of the ground to the defendants of Galligill Syke North vein, which extends from the middle of Galligill Syke-Runner to the east border of Thomas Walton's allotment. The third species of grant was called a "general grant," such as that which the plaintiffs obtained, —and in the following manner. The Governors of Greenwich Hospital appointed upon its estates several local agents called "receivers." On Alston Moor, there was a sub-agent who was termed "Moor Master," who overlooked the mining operations, and to whom application for all grants was made. A proposal was made to him, and signed by the applicant and if attested by the Moor Master it was forwarded to the receivers, and if they disapproved of it there was an end of the matter; if they approved of it it was sent to the Commissioners, who in almost every case granted a "lease" or a "grant," according to the proposal, and in accordance with the recommendation of the receivers. A general grant is a grant of the right to explore a certain piece of ground, and if a vein of ore was found within seven years the grantee could claim a lease for 21 years of the vein so discovered— that right, however, being forfeited in the event of application not being made within three months of the time of the discovery. On the 1st of March 1814. Mr. John Wilson, of Nent Hall, made application for a lease for 21 years, subject to certain specified conditions, of all the mines or veins of lead ore which he should cut or discover in seven years, within certain boundaries set out in his application, which, on the 28th of March, in the same year, the Commissioners were

recommended to grant. Proposal, acceptance, and possession, were all that was required in a grant of this kind: a deed was required only after the discovery of veins. An exploration was made, and as early as May,
1815 plaintiff cut a vein within the general grant, and obtained a lease of it, for 21 years, from the 15th of the month in which it was discovered. Two other veins— Hudgill Burn Sun Vein and the Sun Vein—were found, and similar leases granted. The general grant expired in 1822, and was, on application, renewed. It expired a second time, in 1829, and was a second time renewed. And here came the point in dispute. The Galligill Syke North Vein runs from point L to point C on the map produced—East and West. The plaintiffs cut a vein at E, under the general grant. At the same time, the defendants, professing to work under their lease, cut a vein at D. Now D, he (Mr. Watson) contended, was within the bounds of the plaintiffs' general grant. The defendants made their cutting at D before the plaintiffs cut E, and they asserted that E was a part of Galligill Syke North Vein, and that they had, consequently, a right to work it. They asserted also that D was part of the same vein, and that they had a right to work it also. The plaintiffs, on the other hand, contended that E was no Part of their grant, and that the defendants were wrong doers in cutting at D. Disputes arose between the parties. The Moor Master and the receivers were applied to, and (most strangely and unaccountably, as he contended) decided that both D and E were part of the Galligill North Syke Vein. The Moor Master gave that as an opinion without having explored the vein.

It had since been worked out by the defendants. It was now discovered that the lease under which it was claimed was a lease from point to point, and not a lease of length; and this being the case, he should show that the defendants had no right to work at D and E for it was quite clear that these two points were within the Hudgill Burn general grant. An examination of the vein had been made, and it was found that the vein at D and the vein at E were separate and distinct veins, and not, as was contended, one and the same. The next matter in dispute was the Hudgill Burn Fourth Sun vein, which the defendant cut during the existence of a grant to the plaintiff's, which entitled them (the plaintiffs) to it. A dispute arose, a meeting took place, and the receiver (Mr. Taylor) decided that defendants were not entitled to it; but they were suffered to remain in possession of it on certain conditions. After a good deal of correspondence, a bill was filed in the Court of Chancery; it was amended and re-amended; and finally an arbitration was agreed on. The points to be decided upon by Mr. Armstrong, the Arbitrator, being: —

1. Whether the Galligill Well Company are or are not, or ever were, according to the terms of the lease or grant of the Galligill Syke North Vein, or otherwise, entitled to work any veins or strings of lead ore within or under the plot of ground comprised in the Hudgill general grant of the 1st March, 1814, or of the 4th June, 1822.
2. Whether the vein cut at D and E, (the first cut by the defendants, the second by the plaintiffs) are or are not a continuation of and the same as the Galligill Syke North vein.
3. Whether the Galligill Syke Company are or are not, or ever were according to the terms of their lease or grant of the Galligill Syke North vein, or otherwise, entitled to work the said veins so cut, as aforesaid, D and E, or either of them.

4. Whether the same company are or are not, or ever were, entitled to Fourth Sun vein by the terms of the said lease, or otherwise.
5. Whether the Hudgill Bum Company, as between themselves and the Galligill Syke Company; have not been or are not entitled to all veins or strings of lead ore within or under the said plot of ground comprised in the said Hudgill Burn general grants of 1814 and the 4th June, 1822, respectively
6. Whether the Hudgill Burn Company have not been or are not entitled to the said veins cut as aforesaid, at points D and E, and also to the Hudgill Burn Sun vein.
7. That in case the Arbitrator shall determine that the Galligill Well Company are not entitled to all or any of the said points D and E, or to the said vein called Sunny Vein, or, to any string or veins worked within the limits of the Hudgill Burn general grant, to determine what sum of money ought to be paid on the part of the Galligill Well Company to the Hudgill Burn Company for any such veins.
8. And also to determine whether the Hudgill Bum Company have at any time heretofore been working any veins of lead or other minerals, which, by the custom of the manor, belong to the Galligill Well Company.
9. And also to determine such other questions as are raised in the pleadings, so far as such questions affect the conduct and proceedings of the Hudgill Bum and Galligill Well Companies.

Such were the points to be decided. The learned Counsel having stated his reasons for contending that the decision ought to be in favour of his clients, said the principle of compensation was the next point to be determined on, and that had been settled by the case of Powell v. Morgan, in which it was decided that the plaintiff, in such cases, was entitled to recover the value of the ore at the bottom of the pit. The ore at the pit mouth was worth a certain sum. To that sum, minus the cost of raising it from the mine, the plaintiffs would be entitled.

The learned Counsel then recapitulated his arguments. Witnesses were called, and the examination for the plaintiffs had not closed on Thursday night.

VALUABLE LEAD MINE AND COLLIERY
FOR SALE
The Lease of the valuable LEAD MINE of FALLOWFIELD, near Hexham, with all the machinery now in full operation and raising a considerable quantity of Ore. The establishment is very complete with pumping, drawing and crushing engines, washing apparatus, smelt mill with two hearths and air furnace, and every other requisite for carrying on the Mine upon an extensive scale and situated within two miles of the Newcastle and Carlisle Railroad.
Also, the LEASE of the FALLOWFIELD COLLIERY, adjoining the Lead Mine. The winning is nearly new, with an excellent seam of very fine

coal, for which there is considerable Sale to Hexham and the neighbourhood.
For further particulars, apply to Mr. HENRY SMITH, at MR. WATSON's High Bridge, Newcastle upon Tyne; or to Mr. John Henderson, at the Mine.

5th April 1845 (Carlisle Journal)
GREENSIDE.—During the course of last week an accident occurred at the Greenside Lead Mines, by a portion of the roof in one of the grooves falling in, which might have been attended with serious consequences, there being four persons within a very little of the enormous mass of rock, which had fallen upwards of ten fathoms. Only two of the men were injured, —Peter Bainbridge and John Coulthard; the former had his foot severely mutilated, and the latter his hand. It appears by an account obtained from the Mines, that they were working in a place denominated a stoup, and the roof directly above had been considerably shaken from previous blasting. They had themselves a short time before fired a shot. It never had been suspected by any of the miners, that there was any defect. This is the second time poor Coulthard has had a misfortune. A few years ago, he had both his thighs broken, besides other serious bruises, at the Crushing Mill. It must be a long time before these two men will be able to work again; and having nothing but labour to depend upon, it is hoped that the directors will put forward a helping hand.

6th April 1845 Coroners Inquest (Carlisle Archive TCR 2)
Joseph Hind aged 21, of Nentsbury, Alston, accidental death by a fall of lead ore and stone.
See 1st May 1841 and 1st July 1893.

11th April 1845 (Newcastle Courant)
The Brownley Hill Company, consisting of Messrs Walton, Shaw, Whaley, Welford, and others, have within the last few days, cut one of the richest veins of lead in the old mine of Brownley Hill, situated on Alston Moor.

12th April 1845 (Carlisle Journal)

30th May 1845 (Newcastle Courant)
To Be Let
The making of a RESERVOIR or WATER DAM, in the Lead Company's Priorsdale Estate, in the parish of Alston, in the County of Cumberland.

The reservoir will be about 1000 yards in length and 30 yards in breadth, and the works have to be completed by the 30th September next.
For further particulars applications may be made at the Lead Company's offices at Middleton in Teesdale, near Barnard Castle, and at Nenthead, near Alston, where plans and specifications are lodged.
Tenders for the execution of the works will be received at the former office, up to the evening of Monday the 9th June, and at the latter office, up to the evening of the following day. Nenthead House, 29th May, 1845

31st May 1845 (Newcastle Journal)

NENTHEAD CHURCH.

THE Foundation Stone of the New Church at Nenthead, in the Parish of Alston, was laid on the 29th of April, in the presence of between Three and Four Hundred of the Parishioners. A suitable Form of Prayer was read by the Rev. H. Salvin, Vicar of Alston, and the foundation Stone was laid by R. Bainbridge, Esq. of Middleton in Teasdale, Agent of the London Lead Company, who have liberally contributed towards the Undertaking, and for the Benefit of whose numerous Workmen this Church is principally designed, Nenthead being an extensive Mining District, and Five Miles distant from the Parish Church of Alston. The Church is expected to be reedy for Consecration about the middle of August; the Style of Architecture is the Decorated English, after Plans furnished by Messrs. Bonomi and Cory, the Architects. The Building has been contracted for at £620, but numerous additional expenses will raise this Sum to upwards of £100 more. The Contributions, on Account of which is subjoined, have hitherto been most satisfactory for so remote a District and it is hoped, will not be allowed to fall short of the requisite Amount. The Church is to contain 301 Sittings. Two Houses adjoining each other, which were given by the London Lead Company by way of Endowment, have been, by the help of some Alterations, converted into a small Parsonage House, with a Garden and Field adjoining.

14th June 1845 (Carlisle Journal)

Marriages

At Alston, on the 7th instant, Mr. Joseph Philipson, Teddam, in Allendale, to Miss Phillis Richardson, of Bailes, near Alston.

20th June 1845 (Durham County Advertiser)

NOTICE IS HEREBY GIVEN,

THAT in pursuance of a Writ issuing out of the Petty Bag Office in the Court of Chancery, directed to the Chancellor of the County Palatine of Durham, whereby he is commanded and strictly injoined, "that by her Majesty's Writ, under her Seal of her said County Palatine of Durham, duly to be made, by the command of the Sheriff of her Majesty's said County of Durham, that, by the oath of honest and lawful men of his County, by whom the truth of the matter might be best known, he diligently enquire whether or no it will be to the damage or prejudice of her said Majesty, or any other, if her Majesty should grant to George Crawhall, of New-House, in the Parish of Stanhope, in the said County, Esquire, and Joseph Beck, of Cows Hill, in the same Parish and County, Miller, and their Heirs, licensed to hold, at the Chapelry of Saint John,

in the higher part of Weardale, in the Parish of Stanhope aforesaid, on Saturday in each and every week, a MARKET, and also on the third Wednesday in April and the second Wednesday in September, in each and every year for ever for the future, a FAIR for the buying and selling, both at the said Market and Fairs respectively, of all manner of living Cattle, Hardware, and all other Goods, Wares, and Merchandizes usually sold at Markets and Fairs, and if it will be to the damage or prejudice of her said Majesty, or of any other, or to the hurt of the neighbouring Markets or Fairs, then to what damage or prejudice of her said Majesty, or of any other, or to what hurt of the aforesaid Markets or Fairs, and of whom, and how, and in what manner," the Sheriff of the said County has appointed WEDNESDAY, the sixth day of August next, at eleven o'clock in the forenoon, at the Town-Hall in the Town of Wolsingham, for the execution of the said Writ, when and where a Jury will be summoned in pursuance of the said Writ; and all Persons interested in the grant of the said License for holding the said Market and Fairs will have an opportunity of attending.
Wolsingham, June 18th, 1845.
Letters patent were granted to hold a weekly market and a biannual fair at St. John's Chapel in the parish of Stanhope, 20th January 1846. See Ref: D/X 1321/1, Durham County Record Office.

21st June 1845 (Carlisle Journal)
Deaths
At Nenthead, on the 16th inst., Mr. William Johnston *(Johnson)*, agent, aged 54 years. *See 23rd February 1856*

28th June 1845 (Carlisle Journal)
Inquest
On the 18th instant, at Alston, on the body of John Coulson, aged 60 years, who was found dead in bed on the previous morning. He had for some time laboured under asthma, and had been a casual pauper of Alston parish, and had several times been urged by the Board of Guardians to go to the workhouse, where he would have been much more comfortable than in the miserable hovel where he resided alone. On Saturday last, he was again urged to go to the workhouse; he however, as he had always done before, obstinately refused. The Relieving Officer then, in pursuance of the decision of the Union, gave him an order for one shilling a week in kind, which he accepted, but which he had not used. On examining the house it was ascertained that at the time of deceased's death he had a loaf of wheaten bread, five cakes of yeasted bread, a quantity of sugar and coffee, and four-pence-halfpenny in copper. The friends of deceased wished to impute blame to the parochial authorities. The jury, however, unanimously agreed in acquitting them of all blame, and returned a verdict of "natural death."
Marriages
At Alston, on the 26th inst., Mr. Thomas Lee, of Nenthall, to Miss Ann Spark, of Garrigill.
William Lee, married Elizabeth Emerson, 21st June 1798, at St Augustine's, Alston.

Joseph born 17th December 1798, 1st son of William Lee, Alston, miner, by his

wife Elizabeth daughter of Joseph and Hannah Emerson, native of Allendale.
William born 27th August 1801, 2nd son of William Lee, Alston, miner, by his wife Elizabeth daughter of Joseph Emerson, of Allendale; buried 23rd December 1801
William born 1st December 1803, 3rd son of William Lee, Alston, miner, by his wife Elizabeth daughter of Joseph Emerson.
John born 24th April 1806, 4th son of William Lee, Alston, miner, by his wife Elizabeth daughter of Joseph Emerson
Wallis born 22nd November 1809, 5th son of William Lee, Nenthall, miner, by his wife Elizabeth daughter of Joseph Emerson
Thomas born 29th June 1812
Emerson baptised 2nd July 1815
Hannah baptised 20th December 1817
William Lee of Nenthall was buried 1st October 1823, aged 51.
In 1841, at Nenthall, Elizabeth Lee, widow, farmer, aged 65, children, Wallace, lead miner, aged 30, Thomas, lead miner, aged 25, and Hannah 20.
In 1851, at Nenthall, Elizabeth Lee, widow, grocer, aged 75, son Thomas Lee, lead miner, aged 38, his wife Ann (Spark, married 26th June 1845, Alston) aged 31, grand children, Elizabeth 5, Anne 3, and William 1.
Elizabeth Lee died 6th March 1856, aged 79, at Nenthall.
Thomas Lee died 3rd quarter 1856, registered at Brampton.
In 1861, at Nenthall, Ann Lee, widow, grocer, aged 41, children, William 11, George 9, and Wallace 6.
In 1871, at Nenthall, Ann Lee, lead miners widow, aged 51, children, William, lead miner, aged 21, George, lead miner, aged 19, Wallace, general servant, aged 16, and George Spark, lead miner, aged 40.
In 1881, at Nenthall, Wallace Lee, coal miner, aged 26, his wife Elizabeth (Carr, married 4th qtr 1876, at Alston) aged 23, children, Thomas 4, and Florence A 2. Also Ann Lee, lead miners widow, aged 62, and her brother George Spark, lead miner, aged 50.
In 1891, at Waterloo, Blenkinsopp, Haltwhistle, George Lee, coal miner, aged 39, his wife Hannah, aged 32, children, Thomas 9, Elizabeth 7, Ann 5, Mary Jane 3, Matthew 2 months, and mother, Ann Lee, widow, aged 71.
See 14th June 1873, 16th December 1882

4th July 1845 (Durham County Advertiser)
Marriages
At Middleton in Teesdale, 25th ult., Stewart Carson, Esq., M.D., Nenthead, to Miss—Sherlock, second daughter of Mark Sherlock, Esq., *(Lead Merchant)* of the former place.
In 1851, at Hillersdon Terrace, Nenthead, Stewart Carson, general practitioner, surgeon, aged 42, born Scotland, his wife Margaret aged 31, children Mary Margaret 4, Mark Sherlock 3, and Jane Stewart 1.

19th July 1845 (Carlisle Journal)
Inquest before Mr. Carrick, County Coroner.
At Alston, on Thursday, on the body of a child, named Barbara Moody, aged 5 years, whose death was occasioned by drowning. It appeared from the evidence that the proprietors of the woollen manufactory had raised the dam conveying the water to their works, so as to bring it nearly level with a road running by the side of it; and that owing to the want of a

protecting wall, the public passing that way were exposed to much danger, particularly during floods and in dark nights; the deceased had been playing there along with other children about the same age, and was carried away against the breast of the dam. An alarm was raised in a very short time, the sluices were opened, and the body in passing through was caught by her father. The Coroner and Jury viewed the place, and agreed that it was, in its present state highly dangerous. The coroner at the request of the jury drew the attention of the foreman of the establishment, (in the absence of his masters) to the matter, and expressed a hope that no time would be lost in putting up a sufficient protecting wall, and cautioned him that in the event of a similar accident occurring from the same cause a serious responsibility would immediately fall on the culpable parties

9th August 1845 (Carlisle Journal)

Deaths
At Skelgill, near Alston, on the 15th inst., aged 67, Mr. Wm. Gibson.
See 20th November 1841

6th September 1845 (Newcastle Journal)
The new Church at Nenthead, in the parish of Alston, was lately consecrated by the Lord Bishop of Durham. The petition for consecration was presented to the Lordship by the Rev. Hugh Salvin, Vicar of Alston. The church, which is built in the style of decorated English, was crowded on this interesting occasion. Nenthead is five miles distant from the parish church of Alston, and divine service has been performed during the last two years in the schoolroom licensed for that purpose. Prayers were

offered by the Rev. H. Salvin, and an appropriate sermon preached by the bishop. The following clergymen were also present: Rev. H. Maltby, Chaplain to the Bishop; Rev. John Collinson, Rector of Boldon, who officiated as Chancellor, vice Rev. James Baker; Archdeacon Scott, Rector of Whitfield; Rev. John Blackett, Vicar of Heddon-on-the-Wall: Rev. Blythe Hurst and Rev. Joseph Hudson, Curates of Alston; Rev. Edward Bigland, Rector of Kirkhaugh; Rev Octavius James; Rev. Mr. Reed, of West Allen; and Rev. W. Walton, of Allenheads.

6th September 1845 (Carlisle Journal)

Inquest

At Alston, on the 3rd instant, on the body of John Halden, shoemaker, aged 47 years. On the Sunday preceding his death, deceased had been drinking, and about one o'clock on Monday morning was assisted to his house, which was approached by outside stone stairs. The person who assisted him home, left him on the landing of the stairs at his own door, deceased having declined further assistance. About half-past three o'clock of the same morning, he was found lying at the foot of the stairs with a severe wound upon his head and unable to speak. Deceased shortly afterwards became sensible, but could give no account how the accident happened. Medical assistance was procured, and on examination deceased was found to have likewise sustained severe spinal injury. The jury were of opinion that deceased had sat down upon the parapet of the stairs, fallen asleep, and tumbled over. Verdict — "Accidental death."

Marriages

At Alston, on the 31st ult., Mr. David Cunningham, of Shotley Bridge, to Miss Mary Richardson, of Nenthead.

29th November 1845 (Newcastle Journal)
TESTIMONIAL TO GEORGE CRAWHALL, ESQ
OF NEWHOUSE, WEARDALE.
A chaste and handsome Silver Tureen, with an elegant Salver, of the value of one-hundred and fifteen sovereigns, were presented on Thursday in last week, by the miners and gentlemen of Weardale, to George Crawhall, Esq. in token of the high regard and deep respect they entertained towards him, during the long period he held the important and responsible situation of chief agent for the mines of Thomas Wentworth Beaumont, Esq., and his late father, Col. Beaumont, in the parishes of Stanhope and Wolsingham. The subscribers assembled on the lawn in the front of Newhouse, at three o'clock in the afternoon, and soon afterwards, Mr. Crawhall made his appearance, accompanied by his brother, Isaac Crawhall, Esq. his brother-in-law, the Rev. Mr. Long. Vicar of Lythe, George Sowerby, Esq., of Old Park, and a select party of

personal friends who had been specially invited to partake of an excellent and substantial dinner. The Tureen and Salver were placed upon a table, when the Rev. James Green, the officiating clergyman of the chapelry of Saint John, Weardale, stood forward and with much earnestness and feeling, said:

Mr. Crawhall, I have been requested to present to you in the name and on the behalf of the miners and other inhabitants of Weardale, on the resignation of the office which you so long so ably, and with unsullied integrity, filled, this testimonial of their respect and esteem. Very cheerfully do I comply with the request and become their spokesman on this occasion, for it affords me great pleasure to witness so good a feeling to subsist between master and workmen, In the relation in which I stand to both parties, I conceive it to be my duty to promote this good feeling to the utmost of my power, and I think when such demonstrations are not abused to mere display, they ought not to be altogether discountenanced; for, in a good understanding between employer and the employed their own comfort and the prosperity of the community greatly depend, and as this proof of respect was spontaneous on their part and unsolicited on yours, it must enhance the value of it in your estimation, and be highly grateful. But this pleasurable feeling is not unmingled with regret in which I believe all present participate. We have been long accustomed to identify Newhouse and George Crawhall. In our common conversation, they have been employed as synonymous and convertible term. And we regret that these long cherished associations are now to be broken up and dissolved. I shall lose an old, hospitable neighbour, the miners a master, whose professional judgment and experience while none, can dispute, the miners alone can appreciate. However, our cordial good wishes shall follow you into your retirement, and when released from the cares and anxieties of office, I do sincerely hope that you will find great comfort and increasing satisfaction in cultivating those habits and attending to those duties which age and retirement naturally suggest, and which no prudent man will neglect. I mean, Mr. Crawhall, those habits and duties by which you may not only approve yourself to men, but to the Being who tries; the hearts and weighs the actions of men, and by which you may secure to yourself at last when riches and the opinion of the world can avail you little, the reward of the wise and faithful steward who improved the talents intrusted to him. With these expressions of kind wishes for your welfare, allow me to conclude with one good wish for Weardale, where you and I have long laboured in our different avocations, and my wish for Weardale, is this. — May sobriety, industry, contentment, and good feeling always characterize its inhabitants—may honest labour always find employment, and employment meet an ample remuneration, so that virtuous habits and temporal prosperity may flourish together.

Mr. CRAWHALL, under deep emotion replied—Brother Miners and Gentlemen, I feel quite overpowered and unequal to the task of returning thanks in adequate terms for the splendid and unlooked for token of your kindly feeling and regard. Nearly half a century has elapsed since I became an agent in the Lead Mines of the late Col. Beaumont, and during the twenty eight years that I have been intrusted with the management or Mr. Beaumont's mines in Weardale, it has always been my most anxious

wish and endeavour, not only to secure the interest of my employer, but also, as far as lay in my power, to promote the comfort, prosperity, and welfare of the miners. That my endeavours (whether crowned with success or not) have been duly appreciated by you, brother miners, this handsome testimonial of your friendly feeling towards me, affords ample proof, and I beg to assure you now, on retiring into private life, that, wherever I may fix my future residence, the prosperity of the mines, and the comfort, and well-being of the miners will ever be to me an object of the deepest interest, and it will always afford me the most heartfelt satisfaction to know that you are doing well. Gentlemen and Brother Miners, for this elegant and noble token of your good will and esteem, I again offer you my most sincere thanks, and I assure you it will be regarded by me with pride, and preserved as one of my most valued treasures to the latest hour of my existence. With my heartfelt wishes for the prosperity of the mines, and the comfort of the miners, I sincerely pray that God may bless you all.
The miners and neighbours who had attended the presentation were afterwards plentifully regaled with refreshments and ale at Mr. Crawhall's expense and invitation, and they returned to their respective homes, highly gratified with the day's proceedings. The plate bears the following inscription neatly engraved upon it: — “Presented as a Testimonial of their respect by the Miners and other inhabitants of Weardale, to George Crawhall, Esq. of Newhouse, on his resignation of the office of Principal Mining Agent, which office he ably and honourably filled tor the period of twenty-eight years.”

20th December 1845 (Carlisle Journal)
Deaths

PRESENT

The Queen's Most Excellent Majesty in Council.

WHEREAS Her Majesty's Commissioners for building new churches have, in pursuance of the sixteenth section of ah Act, passed in the fifty-ninth year of the reign of His Majesty King George the Third, intitled "An Act to amend and render more effectual an Act, passed in the last session of Parliament, for building, and promoting the building, of additional churches in populous parishes" duly prepared and laid before Her Majesty in Council a representation, bearing date the seventeenth day of December One thousand eight hundred and forty-five, in the Words following, viz.
"Your Majesty's Commissioners for building new churches, appointed by virtue of an Act, passed in the fifty-eighth year of the reign of His Majesty King George the Third, intituled "An Act for building, and promoting the building, of additional churches in populous parishes" continued by an Act, passed in the seventh and eighth years of the reign of His Majesty King George the Fourth, intituled "An Act to amend the Acts for building, and promoting the building, of additional churches in populous parishes;" and further continued by an Act, passed in the first year of your Majesty's reign, intituled "An Act to prolong, for ten years, Her Majesty's Commission for building new churches, "beg leave humbly to represent to your Majesty, that, having taken into consideration all the circumstances of 'the parish of Alston otherwise Alstone moor, in the county of Cumberland, and within the diocese of Durham, it appears to them to be expedient, that a particular district should be assigned to the church recently erected and consecrated, and called Saint John's Church, situate at Nenthead, in the said parish of Alston otherwise Alstone moor, under the

provisions of the sixteenth section of an Act, passed in the fifty-ninth year of the reign of His Majesty King George the Third, intituled "An Act to amend and render more effectual an Act, passed in the last session of Parliament, for building, arid promoting the building, of additional churches in populous parishes;" and that such district should be named, "The Chapelry District of Nenthead" and be bounded as follows, that is to say :
"The district is bounded on the north east by the county of Northumberland; on the east by the county of Durham; and on the remaining part by the said parish of Alston otherwise Alstone moor, from which it is divided by proceeding from Nagg's Head in a north westerly direction, along the ridge of Middle-fell, as far as a rivulet, called Hudgill-burn, and following the course of that rivulet, north easterly, till it falls into the river Nent; it then proceeds, north westerly, down that river, as far as a bridge across the river Nent', called Foresheel-bridge; and thence up the road leading by Foresheel-grains to Moap or Mohope-, in the parish of Allendale, in the county of Northumberland, as the same is more particularly delineated on the map or plan hereunto annexed and thereon coloured yellow:
"That baptisms, churching's, and burials should be solemnized and performed in the said church; and that the fees arising there from should be paid to and belong to the Minister thereof for the time being:
"That the consent of the Right Reverend Edward Bishop of Durham has been obtained thereto, as required by the above-mentioned section of the said Act, passed in the fifty-ninth year of the reign of His Majesty King George.

3rd January 1846 (Carlisle Journal)
FATAL ACCIDENT. —A fatal accident occurred on Monday last, at the Ironstone Works on Haltwhistle Common, by a fall of earth in one of the drifts. One man was killed, and another was very much hurt. They had been warned only an hour or two before by one of their fellow-workmen to put some timber into the drift, to support the roof, which, unfortunately they neglected to do, and this appears to have been the cause of the accident.

14th January 1846 (Carlisle Journal)
Deaths
At Patterdale, on the 21st ult., Mr. John Errington mining agent, aged 62 years.
In 1841, at Eagle, Patterdale, John Errington, lead miner, aged 57, his wife Mary 55, sons, John, lead miner, aged 20, Thomas, lead miner, aged 15, and Henry, lead miner, aged 15; the family originate from Grassington, Yorkshire.
At Alston, on the 5th inst., aged 44, Mr. Jon. Tatters.
In 1841, at the Butts, Alston, Jonathan Tatters, labourer, aged 26.
At Garrigill, on the 9th instant, Grace, wife of Mr Joseph Winskill, aged 36 years.

21st February 1846 (Carlisle Journal)
INQUESTS BEFORE MR. CARRICK, COUNTY CORONER.
At Garrigill, near Alston, on the 12th instant before the same gentleman, on the body of Mrs. Grace Winskill, wife of Mr. George Winskill, lead ore miner, aged 36 years.

It appeared that deceased had been a delicate person for many months, but during the last three weeks she had been apparently improving, on Sunday night she retired to bed in her usual health; about six next morning she was seized with a violent pain in her head with sickness. She however, did not consider herself too severely held to prevent her going down stairs and prepare for breakfast. After she went down into the kitchen her, sickness increased, accompanied by violent vomiting. Her husband thereupon immediately rose and went to her, when he found her sitting in a chair, pressing her head between her hands, and suffering excruciating pain. She complained of being cold and shivery; the husband prepared her a cup of coffee, and she then returned to bed; shortly afterwards he gave her 1 tea-spoonful of tincture of ginger, which she said considerably relieved her. The hour having arrived when Winskill ought to go to work, he proposed that he should remain at home with her; she however objected, saying she was better, and that she had been visited with more severe attacks of a similar kind before. He then left her. In the course of the forenoon, a neighbour-woman went in and found her in bed very ill; others also came in during the forenoon, and gave deceased every attention, until she died at twelve o'clock at noon, after severe suffering in the way first stated.

The circumstances giving rise to the investigation were the severe illness and suddenness of the death, coupled with the fact that Winskill keeps a medicine chest, containing 50 or 60 different, kinds of drugs, which he disposes of as a matter of trade in his neighbourhood, and some of which, of a poisonous nature, it was believed he had administered to his wife, by mistake or wilfully; also, that he is looked upon by a few as a man of eccentric character.

The gossips of the district very readily availed themselves of these materials to make out a case of dark suspicion, and rumour, with her thousand tongues and magnifying powers, had, before it reached the town of Alston, exaggerated It into “a dreadful murder."

The husband having learnt the extent of the rumour expressed a wish to have an inquest, and Mr. White, the registrar, accordingly gave notice to the Coroner.

From the evidence of the husband and other witnesses, and a post mortem examination, made by Dr. Gill, and Mr. Routledge, surgeon, Alston, the Jury without hesitation returned a verdict that deceased had died from natural causes, — disease in her heart and bowels of long standing. The Coroner coincided in the verdict, and added that the husband had great cause to complain of the reports which had been circulated, for his neighbours had shown that he bore a most unexceptionable character; had always treated his wife with the greatest kindness and affection; and that the only eccentricity exhibited by him was a taste for reading and anxiety to acquire a knowledge of Chemistry and other sciences, which was highly creditable to a man in his situation.

Grace Winskill, was buried at Garrigill 12th February 1846, aged 36.

21st February 1846 (Mining Journal)

Alston Moor Works

Mr. J. Thompson, late manager of the Hodbarrow Iron Mines, Millom, died suddenly when about to commence his labours at the above works.

28th February 1846 (Carlisle Journal)
Marriages
At Alston Church, on the 21st inst., Mr. John Nall, of Nenthead, to Miss Jane Forster of Alston.
In 1851, at Holmes Foot, Nenthead, John Nall, lead miner, aged 30, his wife Jane 28, children Hannah 4, and Sarah 6.
In 1861, at Overwater, Nenthead, John Nall, lead ore miner, aged 40, his wife Jane 38, children Hannah 14, Sarah 12, Matthew 8, Elizabeth 4, and Israel 10 months.
John Nall, died 2nd quarter 1863, registered at Alston.
In 1871, at North Side, Haydon Bridge, Jane Nall, widow, aged 48, sons, Mathew, lead miner, aged 18, and Israel 10.
In 1881, at Byers Green, Auckland, Jane Nall, widow, aged 58, son Israel, coal miner, aged 20, and boarder, John Stobbs, shoe maker, aged 35.
Jane Nall died 4th quarter 1896, at Auckland.

6th March 1846 (Newcastle Courant)
Durham Assizes
RAINE AND OTHERS V JOHNSTONE AND ANOTHER.
Mr Watson and Mr Unthank were counsel for the plaintiffs; Mr Knowles and Mr Otter appeared for the defendants, the plaintiffs in this case were lead miners, and the action was brought to recover for driving a shaft in the Coves lead mine in the county of Durham. The defendants are two solicitors at Newcastle, and it appeared that for some time they had acted as the solicitors for Mr Walker, the owner of the mine, and had advanced him sums of money to carry on the works. The manager, who had employed the plaintiffs to execute the work, was employed by the defendants, and it seemed that they had issued instructions as to the manner in which the works were to be carried on. The question at issue was whether the defendants or Mr Walker were the party liable. For the plaintiffs, a person who had formerly acted as manager of the lead works, was called, who deposed that he had been engaged by the defendants, and received his instructions from them. On the other hand, it was contended that the defendants merely acted as the solicitors of Mr Walker. — Mr Knowles, in addressing the jury for the defendants, said that this action was an experiment in which it was sought to fix this debt upon the defendants, and that if it succeeded they might depend that many others of a similar description would follow. Mr Walker was called by the defendants, but during his examination the learned judge stopped the case, and the jury found a verdict for the plaintiff for the amount sought.

14th March 1846 (Carlisle Journal)
Deaths
At Alston, on the 7th, Mr. Edward Hudspith, aged 40.
In the Workhouse, Alston, on the 8th instant, Mr. William Hodgson, aged 63 years.

21st March 1846 (Carlisle Journal)
Deaths
At Alston, on the 14th instant, aged 29 years, Mr James McGregor, earthenware dealer.

At Alston, on the 14th instant, aged 45 years, Mr John Beatty, innkeeper.
At Alston, on the 15th instant, aged 21 years, Miss Isabella Bowman.
At Nenthall, near Alston, on the 14th inst., aged 44 years, Isabella, wife of Mr. Jonathan Hymers.
Jonathan Hymers married Isabella Scott, 19th October 1825, at St Augustine's, Alston.
In 1841, at Nenthall, Jonathan Hymers, lead miner, aged 35, his wife Isabella 35, children, Sarah 14, John 12, William 10, Mary 7, and Hannah 5.
Jonathan Hymers died 3rd quarter 1848.
In 1851, at Nenthall, John Hymers, lead miner, aged 23, brother, William, lead miner, aged 20, sisters, Mary 17, and Hannah 15.

28th March 1846 (Carlisle Journal)
Deaths
At Nenthead, on the 17th, Mr. Thomas Graham, aged 65.
Possible marriage of Thomas Graham to Margaret Sanderson 9th December 1805, at Allendale
Children of Thomas and Margaret Graham, all baptised at Allendale:
Ann born 2nd June 1806, baptised 5th July 1806
Mary baptised 22nd July 1810
William baptised 22nd July 1810
Thomas, baptised 27th July 1815
Adah baptised 27th July 1815,
Mary born 13th August 1818, baptised 6th May 1827
John born 3rd February 1821, baptised 6th May 1827
Joseph born 3rd August 1823, baptised 6th May 1827
Margaret baptised 6th May 1827
In 1841, at Pry House, Thomas Graham, wood cutter, aged 60, his wife Margrat 55, children John, smelter of lead ore, aged 20, and Margret 15.
In 1851, at Pry House, Margaret Graham, farmer of 12 acres, common 20, aged 66, born Allendale, sons John, unmarried, smelter of lead ore, aged 30, Joseph widow, wood cutter, aged 27, grandchildren, Addiah Stephenson 10, John Stephenson 21, and servant, Rebecca Walton 20.
Margaret Graham was buried at Nenthead 30th November 1858, aged 74.
See 31st October 1840, 2nd November 1844, 23rd September 1871, 13th July 1872, 11th December 1875, 27th April 1878, & 22nd April 1882.
At Hudgill, near Alston, on the 20th instant, Miss Hannah Spark, aged 18 years.

4th April 1846 (Newcastle Journal)
Deaths
At Alston on the 26th ult., aged 60, William Bainbridge Esq. universally and deeply lamented. *See 28th September 1839, and 27th October 1877.*

11th April 1846 (Carlisle Journal)
Deaths
At Alston, on the 2nd inst., Mr. Thomas Armstrong, mason, aged 82 years.
At Alston, on the 4th inst., Catherine, wife of Mr. John Nanson, aged 23 years.
At Sandhill, near Alston, on the 3rd instant, Mr. Thomas Teasdale, miner, aged 51 years.

At Annetwalls, near Alston, on the 8th instant, Mr. Thomas Kearton aged 74 years.
Thomas Kirton married Mary Shaw, 23rd January 1800, at St Augustines, Alston.
Children of Thomas and Mary Kearton:
James born 5th July 1800, baptised 10th August 1800, at Redwing Chapel, Alston.
Thamar born 20th July 1802, 1st daughter of Thomas Kirton, Shieldhill, miner, by his wife Mary daughter of Thos Shaw.
Thomas born 31st December 1804, 2nd son of Thomas Kirton, Shieldhill, miner, by his wife Mary daughter of Thos Shaw.
James born 9th October 1807, 2nd (sic) son of Thomas Kirton, Shieldhill, miner, by his wife Mary daughter of Thos Shaw.
Mary born 22nd May 1810, 2nd daughter of Thomas Kirton, Shieldhill, miner, by his wife Mary daughter of Thos Shaw.
Hugh baptised 19th December 1813
John baptised 3rd November 1816
Ruth baptised 22nd October 1820
Mary Kearton of Annatwalls, was buried 25th September 1839, aged 62, at St Augustine's, Alston.
Thomas Kearton married Tamar Coulthard, 25th August 1838, at St Augustines, Alston.
Tamar Kearton died 2nd quarter 1840, registered at Alston.
In 1841. At High Annatwalls, Thomas Kearton, farmer, aged 65, Thomas Kearton, lead miner, aged 35, and Thomas Kearton aged 6.
Thomas Kearton died 3rd quarter 1848, registered at Alston.
Alston Church Yard Transcripts:

In Memory of
Thomas Kearton of Annatwalls who
Died April 8th Aged 74 years
And of Mary his wife who died Sep 18th 1839
Aged 62
Also James their son who died Jan 9th 1802
Aged 1 year
And of Tamer their daughter who died June ___ 1819 aged 16
Also of Ruth, who died Dec 26th 1820 aged 1 year
Also of Tamer wife of Thos Kearton jun
Who died Aprill 11th 1840 aged 26 years

See 18th October 1884

18th April 1846 (Carlisle Journal)
Deaths
At Garrigill, on the 10th instant, Mr. Joseph Pearson, aged 56 years.
Jonathan Pearson married Hannah Dodd 4th April 1789, at St John, Garrigill.
Joseph Pearson, born at Middle Houses, 11th April 1790, baptised 9th May 1790, at Redwing Chapel, son of Jonathan and Hannah Pearson.
At Alston, on the 13th inst., Mr. George Medcalf, aged 67.
In 1841, at Circus Lane, Alston, George Midcalf, Roaster at Mill, aged 60, his wife Eunice (Tatters, married 8th March 1800, at St Augustine's, Alston) aged 60, and son George, lead miner, aged 25.

22nd May 1846 (Newcastle Courant)
Marriages
At Stanhope, on the 17th inst., Mr. Thomas Rodham, of Westgate, Newcastle and Weardale Carrier to Miss Mary Walton, daughter of Mr. Jos. Walton, of Westgate, farmer.
In 1851, at Westgate, Thomas Roddam, Carrier, aged 31, born, Bywell, his wife Mary aged 27, and daughter Ann aged 2.

13th June 1846 (Carlisle Journal)
Inquest
On the 8th instant, at Blaygill hilltop, near Alston, on view of the body of William Jackson, miner aged 21. It appeared that on the 6th instant, deceased and a companion, neither of whom could swim, were bathing in the pool below High Nentforce Waterfall, which is very deep and about ten yards wide. Deceased in attempting to throw himself across the pool, went too near the waterfall, and was drawn in by the whirlpool occasioned by the falling water, and drowned before his companion could render him any assistance. Verdict, “accidental death.”

20th June 1846 (Newcastle Journal)
THE ALSTON MINING CASE—FINAL DECISION. —
HUDGILL BURN COMPANY v. GALLIGILL WELL COMPANY—This long pending suit has just been brought to a close. The facts are as follows: —The Hudgill Burn Company, in January, 1833, filed a bill in Chancery, and a supplementary bill in 1834, against the defendants, the Galligill Well Company, claiming the Galligill Well Mine, and all the ore they had been getting since 1824, amounting in value to several thousand pounds sterling, and the Hudgill Company prayed the Lord Chancellor to grant an injunction, or prevent the Galligill Company from working their mine, and that a receiver might be appointed, &c &c.
To these bills the Galligill Company answered and denied altogether the claim set up by the Hudgill Company. After tedious proceedings in the Court of Chancery, it was perceived that in that court no result could ever be come to; therefore, with the view of obtaining a decision of the question, it was determined to submit the matter to reference, and Mr. Benjamin Johnson was chosen by the Hudgill Company; and Mr. Crossby by the Galligill Company; Mr. Johnson leaving the country, a new reference became necessary, and it was ultimately agreed to refer the matter to Robert B. Armstrong, Esq. Q. C. Recorder of Manchester. The learned arbitrator held his court at Carlisle, in September 1844, and sat upon the arbitration nine days hearing evidence, the Hudgill Company being represented by Mr. Watson, Q.C. and Mr. Bainbridge; and the Galligill Company by Mr. Baines, Q.C and Mr. Drinkwater. In December, 1845, the arbitrator made his award that the Galligill Company had a clear right to their mine—that the Hudgill Company's claim was quite unfounded (except for a portion of ore, amounting in value to £326, got by the Galligill Company in an adjoining vein, in the same way as the Hudgill Company had in 1827, got some ore belonging to the Galligill Company, which they had to pay for and return); and that the Hudgill Company were to pay all their own expenses, and all the law expenses of the Hospital incurred about the matter, and that they were to pay the Galligill Company £1100. The Hudgill

Company being dissatisfied, they obtained a rule in the Court of Queen's Bench in January last, to set aside the award, and it came on for argument on Thursday the 4th of June instant, when Lord Denman and the Court of Queen's Bench confirmed the award made by Mr. Armstrong, which decision, in favour of the Galligill Company, ends the proceedings in the Court of Chancery and Queen's Bench in this long pending suit.

27 June 1846 (Newcastle Guardian and Tyne Mercury)

THE TYNESIDE MANUTFACTORIES—No. X

The Gallowgate LEAD-WORKS.

The proximity of Newcastle to several Lead-mines naturally gives facilities for the manufacture of that metal to the various useful purposes to which it can be applied. We have, consequently, sundry factories, in the town and neighbourhood, known as lead-works, in which the metal is refined, and made into both red and white leads. These processes, together with the making of small shot, for the sportsman, are conducted on a very extensive scale, at the Gallowgate Lead-works, the property of Messrs. Locke, Blackett, & Co.

To a stranger, the shot-factory not unfrequently proves the most interesting part of the works. Happily, however, the shot of the Gallowgate works is not for the warrior, but for the more agreeable occupation of the sportsman. The largest kinds are cast in a matrix, like printing types, by a very simple process; but the smaller size, named patent-shot, is made by what is called “granulation," and is an exceedingly ingenious and beautiful adaptation of art to utility. The metal is mixed with a slight proportion of arsenic, to give it sphericity, and, when in a liquid state, is poured, in small quantities, into a colander, the lower part of which is pierced with holes, like a sieve. Passing through this vessel, it falls down a shaft, two hundred feet in depth, and while thus! descending, in small globules in the air, it acquires| solidity and form, the holes in the colander having partially shaped the size of the shot. At the bottom of the shaft, the shot falls into water. From the water, it is taken to steam-heated iron plates, on which it is dried, it is then sifted, and the sizes separated. In order, however, to secure the perfectly spherical form of the shot, it is submitted to another test. An iron table, slightly elevated at one end, is erected, and the shot made to flow gradually along the table into a box below. The imperfectly-shaped, or oval globules, are separated by this means, the good alone being able to reach the box, which is placed a few inches apart from the table. The shot is next coloured by plumbago or black-lead, which is rubbed into it by the friction received while shaken together in a part of the machinery made for the purpose. After this, it is tied up in small canvas bags, containing two stones each, and, in that way, sent to market.

The process of manufacturing the red and white leads will be less easily understood by general readers, but it is a branch of very great importance, and one that, equally with any other, shows the value of practical chemistry. White-lead, which is chiefly used by painters and potters, is a carbonate of the metal; but the manner in which this carbonate is obtained, is rather curious. The metal is first melted in a large pot, then cast into sheets about twenty inches long, four or five broad, and about an eighth of an inch in thickness. These sheets are next weighed, and subjected to the following process:

In large commodious buildings, a series of strata are built up one over the other, to the height of twenty-five feet. At the bottom of all this, is a layer of

tanners' spent bark, two or three feet thick; then a layer of earthen pots, about five inches in diameter, and containing each a pint of weak vinegar; then a layer of leaden plates, six in depth or thickness, laid over the open mouths of the pots; then a covering of common deal boards; next, a second bed of spent tan, a second layer of pots with vinegar, a second layer of leaden plates, and so on, till a "stack," as it is called, is built up, to the height of more than twenty feet. There are about sixteen hundred pots ranged in each layer or heat; and four tons of lead in each heap laid on the pots. The door of each room, if we may call it a door, is as high as the room itself; and each layer of the materials form a floor on which the women stand and walk, either to empty or to fill the stack. After this has been done, the rooms are closed; up for six or eight weeks. During this time, the bark ferments, giving a sufficient quantity of heat to cause the evaporation of the vinegar in the pots. By this vapour, the surface of the lead is first converted into an oxide; this oxide is formed into an acetate by the vinegar; and this again changed into carbonate by carbonic acid gas yielded by the fermenting bark. The stack, after remaining the necessary time, is taken down piecemeal, by removing the uppermost sheets of lead, then the earthen pots (which have lost a good deal of their contents by evaporation), then a layer of bark, then a Layer of boards, then a second tier of lead and of pots, then the next lower layer of bark, until the stack is entirely removed and the room emptied. The thin pieces of lead, when thus removed, are perfectly white and earthly at the surface, but metallic in the centre, the acid gas not penetrating the entire mass. The two substances are next separated, the metallic being used for casting and again entering the stack, and the carbonate taken to a grinding mill and subjected to various processes. It is subsequently dried in a stove-room and sent into the market, either as a thick paste, ground with linseed oil, for painters, or, as a dry earthy substance, for potters.

The agency by which metallic lead is converted to red lead is another process of fully equal importance and interest. The pigs of lead (after the silver has been extracted from them) are put into furnaces not unlike bakers' ovens. A man stands at each furnace, stirring the metal to bring it freely in contact with the air which is admitted at the entrance. This continues for five or six hours uninterruptedly, by the lead loosing its fluidity and becomes a grey yellow powder. In order to remove the metallic lead which may still remain, another process is necessary. The contents of the furnace are put into a mill, and ground with water into a fine paste, after which the whole is diffused in water in a cistern. The water thus coloured of a bright yellow, (for the greenish tinge has been caused by the blue lead mixed with the yellow powder) flows through a series of tanks and troughs, till its sediment of yellow oxide is collected. That is again collected, heated again, and by obtaining a larger portion of oxygen in the furnace, becomes red lead, or minum, On being removed from the furnace a second time, it is ground to fine powder, and packed for sale. Thus, heat and air are the main elements for changing the metallic to the red lead.

The refinery is in a Separate part of the works. There the pig-lead, after coming from the ore, is melted, and the silver extracted. This is done by a patent process invented several years ago, by Mr Pattinson, of this town. The lead, containing silver, is melted in large pots, and then suffered to cool slowly, a workman, all the time, stirring it with an iron tool. On cooling, crystallization

takes place, and the solid particles of lead that fall to the bottom are withdrawn by a perforated ladle. These panicles are re-melted, and by several repetitions of these crystallizations, the silver is concentrated into one-tenth or one-twentieth of the original bulk of lead, while the remaining part is almost, entirely deprived of the precious metal. The rich metal being next heated to a high temperature, and exposed to a blast of air, oxidises; while the silver remains in solid cakes of great beauty. The oxide is called “litharge,” and Is used either in the making of flint-glass, or in preparing the salts of lead, which are much employed in dying and calico-printing, or when mixed with coal and heated in a furnace, it parts with the oxygen, and resumes the metallic form, and is called refined lead.
In these several processes, a great proportion of the hands employed are females; and, yet, though white lead is known to be highly poisonous, they seem to suffer little from their vocation, the proprietors wisely adopting every available precaution for the maintenance of their health. Above one hundred of both sexes are employed in these works.
*A gentleman in the neighbourhood is said to have discovered a method of making white lead, by which, if it can be carried out, an immense saving of time and money will be effected. Instead of six or seven weeks being occupied, as is the case by the present method, a fortnight will be sufficient for the new process. A committee of chemical gentlemen are investigating, we believe, the value of this new discovery.

4th July 1846 (Newcastle Journal)
Marriages
At Nenthead Church on the 1st inst., Mr. J. C. Cain, of Galligill, Mine Agent to Miss Lee, of Nenthall *(Hannah).*
See 21st March 1845, 8th April 1853, 4th April 1856, 7th March 1868, 13th July 1872, 23rd January 1875, 28th August 1875, 7th September 1895, and 6th April 1901.

18 July 1846 (Newcastle Journal)
The most fearful mining calamity ever known in Cornwall occurred on Thursdays week, at East Wheal Rose lead mine, in the parish of Newlyn, near Truro; a thunder storm of unprecedented violence, attended with a flood which resembled rather the bursting of a waterspout than the heaviest rain, broke over the neighbourhood; the torrents collected towards the valley, where the mine is situated, and rushing in torrents down the shaft, quickly filled every level: forty-three were drowned in the mine.

25th July 1846 (Newcastle Guardian and Tyne Mercury)
Marriages
At Alston, on the 18th inst., Mr William March, to Miss Mary Ann Walton.
Deaths
At Alston, on the 21st inst., aged 66, Mr John Borrow.
John Borrow, baptised 16th July 1780, at St Augustine’s, Alston, son of Thomas and Mary Borrow.
John Borrow married Ann Scott, 18th May 1805, at Alston.
In 1841, at the Butts, Alston, John Borrow, lead miner, aged 60, his wife Ann 47, children, Elizabeth 13, and Francis 8.

In 1851, at Front Street, Alston, Ann Borrow, widow, washerwoman, aged 57, born Allendale, daughters, Elizabeth, factory girl, aged 22, and Frances, factory girl aged 17.
Ann Borrow died 3rd qtr 1853, aged 60, registered at Alston.

8th August 1846 (Carlisle Journal)
PATTERDALE. —Metal of the value of more than £200 was washed away by the flood of Wednesday night last, from the Greenside Lead Mines, where other damage to a great extent was sustained.

22nd August 1845 (Carlisle Patriot)
Testimonial to Wm. Crawhall, **Esq**.—A splendid Silver Tureen and Salver, bearing the following inscription. have been presented to Wm. Crawhall, Esq., on his retiring from office as Mining Agent to Thomas Wentworth Beaumont. Esq., at Allenheads: —" Presented to William Crawhall, Esq. by the Lead Miners of East and West Allendale, as a token of the high estimation in which they had held him as a master, for a period of thirty-three years, and of their deep regret at his departure from Allenheads. August, 8th, 1845."—
Newcastle Journal
Newcastle. —Thomas Sopwith, Esq., civil-engineer (who has been recently elected a Fellow of the Royal Society of London), has received the appointment of Mining Agent to Thos. Wentworth Beaumont, Esq., at East and West Allendale, vacant by Mr. Crawhall's retirement. — *Mercury.*
In 1841, at Allenheads, William Crawhall, lead mine agent, aged 55, and Ann Crawhall, independent, aged 55.

5th December 1846 (Carlisle Journal)

Inquests

Before W. Carrick, Esq., County Coroner.

On the 22nd ult., at Farnberry, near Alston, on the body of William Robson, lead ore miner, aged 19 years. Deceased incautiously descended into what is called the drift under-level of Whigelty Mine, for the purpose of procuring a spade, though warned of the impurity of the air within it, and was suffocated by the noxious gas. Verdict accordingly.
In 1841, at Low Farnberry, Mathew Robson, lead miner, aged 30, his wife Hannah (Pickering, married 29th April 1837, Alston) aged 25, daughters Mary 3, and Margret 1, also Elizabeth Robson 35, William Robson 13, and Margaret Robson 3 years.
In 1851, at Low Farnberry, Mathew Robson (born Lambley), lead miner, aged 40, his wife Hannah 36, children Mary 12, Margret 10, Hannah 7, William 3, and Tamar 11 months.

> ***The Nature, Causes, and Means of Prevention of the Diseases incident to Lead Miners. By William Swart, Surgeon, Wigton. — 8vo., pp. 31. 1846.***
>
> It is not our wont to dabble in medical literature, but when we meet with an essay like this of Mr. Ewart's in which technicalities are discarded and plain practical views are entertained, we have less hesitation in taking up the subject, for the purpose of pointing out what appears commendable or otherwise in the work before us. The title of Mr. Ewart's essay is one calculated to claim attention in this county, as every one knows that tho load mines of Cumberland are of great extent, and that a large body of artisans (having too often wives and families to support) are engaged in them. It is pretty well known, too, that longevity is not often met with amongst lead miners, and that causes exist in these "underground" occupations, which interfere materially with life. …

See 28th June 1844, and Appendix

5th December 1846 (Newcastle Guardian and Tyne Mercury)
Deaths
In Newgate Street, on the 30th ult., aged 34, much respected, Mrs. Hannah Hartree, eldest daughter of Mr. John Roddam, of Westgate, Weardale, and niece of Thomas Rodham, High Bridge.

Joseph Bramwell was buried 12th March 1830, at St Augustine's, Alston, aged 59.

23rd April 1847 (Carlisle Patriot)
Inquests
On the 27th instant *(sic)* at Nenthead, near Alston, on the body of James Fawcett, a miner aged 41. On the preceding day deceased was engaged in the sump of Dowgang mine, about 60 feet in depth, of which 12 feet at the bottom was filled with water. Deceased was standing on a cross beam, about 12 feet from the top, engaged in steadying a ladder, which was being raised by windlass at the top. He was heard to exclaim "oh!" and immediately afterwards to fall down the sump. Assistance was promptly rendered, and the body, after a short interval, was found in the water at the bottom of the shaft. The skull was frightfully fractured; the substance of the brain oozing out of the ears. In the descent the body had broken through a strong scaffolding, where no doubt the severe injury to the head had been received. It is supposed that he had been seized with a fit of giddiness, a complaint to which he was subject after smoking tobacco—and had fallen from the beam.—Verdict, "Accidental Death."
In 1841 at Low Dykeheads, Nenthead, John Richardson, lead miner, aged 40, Sarah Richardson aged 30, and James Fawcett, lead miner, aged 30.
See 30th November 1864

31st July 1847 (Carlisle Journal)

Also Mally his wife who died June 6th 1848 aged 56 years
And Thomas their son
Who died October 1st 1836 aged 6 years

8th January 1848 (Newcastle Journal)

Salubrity of Alston

It appears from the records of the Registrar of Births and Deaths for the Parish of Alston, the population of which is nearly seven thousand, that the births and deaths for the months of October, November, and December last were, births fifty-five, and deaths sixteen. Alston is one of the market towns in England

that is placed at the greatest height from the sea, and there are probably few districts where the mortality has been so light for the last three months, thus indicating the salubrity of the district.

14th January 1848 (Carlisle Journal)
Deaths
At Garrigill, on the 10th inst., Mr John Dobson, aged 64 years.

25th February 1848 (Carlisle Journal)

Alston

The lead trade appears to be an exception to the condition of almost every other interest at this moment. The miners of Weardale and Alston Moor are in full employment and earning good wages and the price of lead is understood to be remunerative and satisfactory to the various proprietors in those districts. Several very rich mines are being worked at present in Weardale.

11th March 1848 (Newcastle Guardian and Tyne Mercury)

Deaths

At Newlandside Hall, near Stanhope, on the 24th ult., aged 55, Mr Joseph Ord, *lead miner.*

5th May 1848 (Carlisle Journal)

Inquest

At Penrith, on Tuesday, the 4th instant, the body of Joseph Wilson, aged 35 years. The deceased was a miner in Greenside lead-ore mine, in Patterdale, and on Wednesday was working a drift, between which and a lower drift other workmen were driving what is called “a rise"; the last charge of gunpowder had been applied to effect an opening, and deceased having received a warning withdraw, he and his fellow workmen retired out of danger. After waiting few seconds an explosion was heard, which deceased mistook for that which he was expecting; he therefore came out of the recess and went forward to see the result of the shot which he expected to have gone off. He had approached sufficiently near to discover his error the very moment when the explosion took place, which forced the rock upward, part of which struck him on the forehead, fracturing his skull so that great part of his brain protruded. He was removed from the mine with all speed, and having been carefully laid upon ladder and wrapped in bed-clothes, was carried to the public road, where he was placed in a carriage of Mr. Geldert, and brought towards Penrith; he however died while they were passing Glencoyn Park. The case was one of pure accident, and the jury returned a verdict to that effect.

20th May 1848 (Newcastle Journal)

LEAD AND SILVER MINES,
IN THE COUNTIES OF NORTHUMBERLAND AND DURHAM.
TO BE SOLD BY PRIVATE CONTRACT,

All those Valuable and Current-going LEAD and SILVER MINES, belonging to the Bulbeck lead Company, called Silver Tongue, in the County of Northumberland, and Hysop, in the County of Durham, with the Engines for pumping and for washing the Ores. Offices, Cottages, Mine Shops, Materials, and Utensils belonging to the same, situated upon the River Derwent, in the immediate vicinity of Shotley Bridge, about Sixteen Miles from Newcastle-upon-Tyne, and near the Wear Valley Railway.

Those Mines are divided from each other by the River Derwent, which here forms the Boundary between the Counties of Northumberland and Durham, but are connected by Levels of Communication for the Convenience of unwatering the Workings, and of washing the Produce at Central Washing Floors. The Silver Tongue Mines are held by Lease from the Lord of the Manor of Bulbeck, and the Hysop Mines from the Dean and Chapter of Durham. The Royalty Dues payable for the former are highly favourable, and for the latter are moderate. The Leases are renewable according to Custom. The Engines for unwatering the Mines, and for crushing and washing the Ores, are driven by Water, and in the best Order and Efficiency. The Right of Working extends over a Tract of Mining Ground through which many Veins of Lead are known to run. Four only have been partially worked, and yield large Quantities of Ore, rich in Silver, and are converging towards a Point of Intersection with other Veins, where a considerable Accumulation of Ore is expected. From the known Productiveness of the lower Strata in the very ancient Derwent Lead Mines, there can be no doubt but they will here be equally productive.

The Castle Side Smelting Mill, with Machinery, Horizontal Chimneys, and every Convenience for Smelting and Refining the Ores from this and other Mines, is situated in the immediate Vicinity.
Mr. WILLIAM WATSON, the Agent on the Premises, will shew the Mines, and further Particulars may be known and Plans seen, by applying to JOHN DOLPHIN, Hunter House, Riding Mill.

9th June 1848 (Carlisle Journal)
Marriages
At Alston, on the 2nd inst., Mr Zaccheus White, of the Rise, to Miss Isabella Dixon, of the Hermitage.
In 1841, at Fewsteads, Alston, Zaccheus White, lead miner, aged 65, his wife Margaret 50, children, William, lead miner, aged 25, John, lead miner, aged 25, Elizabeth 20, Margaret 15, and Zaccheus 13.
In 1851, at Blackburn Banks, Alston, Zaccheus White, lead miner, aged 23, his wife Isabella 38, and daughter, Mary 1.
In 1861, at Blackburn Banks, Alston, Zaccheus White, lead miner, aged 33, his wife Isabella 48, children, Mary 11, Zaccheus 8, Eliza J. 5, and boarder, John Millican, lead miner, aged 24, born Scotland.

Zaccheus White snr., died 3rd qtr., 1887, aged 60, registered at Penrith
Probable death of Isabella White 3rd qtr., 1900, aged 88, registered at Cockermouth.
Deaths
At Nenthead, near Alston, on the 25th ult., Miss Judith Liverick, aged 23 years.
Lancelot Liverick married Betsy Hewetson 1st February 1812, at St Augustine's, Alston.
Betsy Laverick of Nenthead died 21st March 1814, aged 24.
Ann Whitfield married John Stephenson 16th July 1808, at St Augustines, Alston.
Children of John and Ann Stephenson:
Hannah born 26th April 1809
Thomas baptised 9th July 1813
William born 25th April 1815, and baptised 21 November 1814, at Alston Wesleyan Chapel.
John Stephenson aged 34, of Galligill, was buried 20th November 1816, at St Augustine's, Alston.
Lancelot Liverick, widower, married Ann Stephenson, 26th November 1825.
Children of Lancelot and Ann Liverick:
Nancy baptised 8th April 1825
Lancelot baptised 8th April 1825
Betsy baptised 23rd December 1825
Judith Liverick baptised 8th April 1825
Tommy baptised 30th October 1827
Mary baptised 28th July 1837

(Lancelot Liverick died 3rd quarter of 1840),
In 1841, at Nenthead Village, ~~Nancy Stephenson~~, Thomas Stephenson, lead miner, aged 25, William, lead miner, aged 20, Judy 15, and Thomas 14.
In 1841, at Nenthead Village, Lancelot Liverick, lead miner, aged 30, Mary Liverick aged 25, and Sarah Liverick 21. Also, Thomas Liverick, lead miner, aged 30, his wife Jane (Forest, married 18th February 1830, at St Augustine's, Alston), children, William 11, Thomas 9, Ann 6, Bella 4, Lancelot 2, and John 11 days.
In 1851, at Nenthead, Ann Liverick, widow aged 60, sons Thomas Stephenson, lead miner aged 37, Thomas Liverick, lead miner, aged 23, granddaughters Hannah Liverick 16, Ann Liverick 7, and lodger John Jones, book seller, aged 33.
In 1861, at Nenthead, Ann Liverick, miners widow, aged 71, son Thomas Stephenson, lead miner, aged 47, son Thomas Liverick, lead ore miner, aged 32 (died 26th June 1867, aged 39), granddaughter Ann Liverick, servant, aged 17.
In 1871, at Nenthead, Ann Stephenson, pensioner of Painless Starvers ,L.Co., blind, aged 80 was living with her son Thomas Stephenson, lead miner & farmer of 9 acres, aged 55, and granddaughter, Ann Stephenson, domestic servant, aged 18. See 31st January 1874

24th June 1848 (Newcastle Guardian and Tyne Mercury)

FATAL ACCIDENT IN A LEAD MINE.

On Thursday, a man named Thomas Horn, with his son, were working together at the Hudeshope Head Lead Mine, belonging to the London Lead Company, near Middleton in Teasdale. They had begun to work about two o'clock in the afternoon, when they found it necessary to blast the mine with gunpowder. Having done so, they waited at a distance about ten minutes on account of the smock. The son went back first, and the father followed, when the former heard something fall down the hopper or shaft, and a voice crying "oh dear."

He immediately went back, and not seeing his father, shouted for him, when the latter called on him to be quick and come down. He accordingly went down the ladder, and found his father lying at the bottom. Assistance being procured, he was taken out, and medical aid obtained, when his left arm was found to be broken, and also his two right ribs, and he complained much of his stomach. He only survived about nine hours after the fall, and was sensible to the last. The hopper is a compartment of the mine for the lead ore to be thrown down to the level drift, and the other compartment is a way-gate, for the men to go to and from work by means of ladders. The hopper was covered over with planks at the top, with the exception of a hole, which at the wide end is eighteen inches, at the small end seven inches, and two feet and a half in length. The deceased had fallen down this hole, and it was thought that from absence of mind he had slipped in. He would fall about forty-three feet. He had frequently gone over the same place before. An inquest was held at the Cross Keys, Middleton, before Wm. Trotter, Esq., on Saturday last, on view of the body, when the above facts were proved in evidence, and the jury returned a verdict of " Accidentally killed." The deceased was about 65 years of age.

7th July 1848 (Carlisle Journal)
Presentation. —A splendid silver lever watch, with gold appendages, was presented, on the 16th ult., to Mr. Joseph Walton, mining agent, Garrigill, as a testimony of esteem for his efficient services in draining and watering the villages of Garrigill. Several gentlemen partook of tea on the occasion. Mr. W. Paul was called to the chair; and W. Gray, on behalf of the inhabitants, presented the testimonial. Appropriate speeches were delivered by the Rev. J. Harper, of Alston, and Messrs J. Walton, J. Irving, R. Dent, and W. Gill of Garrigill.

28th July 1848 (Carlisle Journal)
Deaths
At Garrigill near Alston, on the 25th, Elizabeth, wife of Mr John Blacklock, shoemaker, aged 28 years.

14th August 1848
Death of Mark Noble
Although I have not as yet found a newspaper record relating to the death of Mark Noble, there is a Memorial Stone at St Mary's Abbey Church Yard, Blanchland.

St Mary's Abbey Church Blanchland

ERECTED IN MEMORY
OF
MARK NOBLE
OF SHILDON, WHO ACCIDENTALLY
FELL AND LOST HIS LIFE IN THE
NORTH
VEIN OF DEBORAH'S LEVEL, AUGUST
14TH
1848, AGED 18 YEARS
AND OF JOHN HIS BROTHER
WHO UNFORTUNATELY LOST HIS LIFE
WHILST BATHING JULY 4TH 1855
AGED 20 YEARS.
MARK THEIR FATHER DIED
JUNE 22ND 1860 AGED 65 YEARS

In 1841, at Red Gutter, Hunstanworth, Mark Noble, lead miner, aged 45, his wife Margaret (Thirlwell, married 25th November 1826, at Allendale) aged 45, children Thomas 14, Joshua 12, Mark 10, John 6, and Joseph 4.
In 1851, at Shildon, Blanchland, Mark Noble, lead miner, aged 50, his wife Margaret 55, children, Thomas, lead miner, aged 24, Joshua, lead miner, aged 22, John, lead ore washer, aged 15, Joseph 14, and house servant Margaret Noble 16, all born Allendale.

In 1861, at Shildon, Margaratt Noble, miners widow, aged 66, sons Joshua, lead miner, aged 31 (Joshua married Jane Eddy, 3rd quarter 1863, reg. Hexham), and Joseph, lead miner, aged 22.
In 1861, at Shildon, Thomas Noble, lead miner, aged 33, his wife Ann aged 29, born Blanchland, and children, Mark 6, and Mary Jane 4. In 1871, at Shildon, Thomas Noble, book canvasser, aged 43, his wife Annie 39, children Mark 16, Mary J 14, and John 8.

In 1891, at Castlegate, Berwick upon Tweed, Annie Noble, widow, drapers assistant, aged 59. In 1901, at Castlegate, Berwick upon Tweed, Annie Noble, widow, drapery saleswoman, aged 59.
Annie Noble died 1st quarter 1907, aged 74, at Berwick.

25th August 1848 (Carlisle Journal)
Deaths
At Garrigill, near Alston, on the 20th inst., aged 85 years, Mrs Ann Pickering.
Thomas Pickering married Ann Rumney, 25th August 1787, at St Augustine's, Alston.
Quaker records give Children, born at High Redwing, Alston:
George born 3rd May 1794, Sarah born 22 November 1796, Joseph born 31st October 1801, Thomas born 29th December 1804, and John born 17th June 1807.
Probable burial of Thomas Pickering, 9th August 1830, aged 63, at St John's, Garrigill.
In 1841, at Benfieldside, Lanchester, Durham, John Pickering, Ag. labourer, aged 33, Thomas Pickering 9, and Ann Pickering 75.

8th September 1848 (Newcastle Courant)
TO CAPITALISTS, PROFITABLE INVESTMENT
MESSRS. BELL AND WATSON
Are instructed to
SELL, BY AUCTION,
(without reserve,)
At the George Inn, Pilgrim Street, Newcastle-upon-Tyne, on Tuesday, the 26th Sept. next, at One for Two o'clock in the afternoon
(By order of the mortgages, under an absolute power of sale, unless previously disposed of by private contract, of which due notice will be given)
The Whole of these rich and extensive Lead Mines, or Veins of Lead Ore, lying or being within or under a certain portion of ground, part of the manor of Alston Moor, commonly called The Galligill Syke Lead Mines, Held and subject to the terms of a lease under the Commissioners of Greenwich Hospital, comprising the Mines under and above the ground, FIXTURES AND MATERIALS, CRUSHING-MILL, DRESSING OR WASHING MACHINE, TUBS, WAGGONS, WORKSHOPS, RAILWAY, and every other requisite for the produce and sale of lead ore.

These mines have been opened out during the last six years, and but partially worked, and the late proprietors have incurred very considerable expense in laying out the mines, and preparing them for the development of their valuable and exhaustless resources.

The supply of ore has, during the above period, been annually increasing; and, in the ordinary and profitable progress of working, will be for years to come capable of increased extension, during the last year producing a quantity only exceeded by three out of the numerous mines in this extensive and well-known mining district.

The quality of the ore of these mines ranks with the best, producing an unusually large portion of silver; and the mine has been, and is now, in profitable operation, and promising increased and large returns, by its further and more vigorous working.

Messrs. Bell and Watson are also authorised to Treat for the SALE of the said MINES by PRIVATE CONTRACT, and will receive any proposal or communication, with that view, until the 19th Sept. next, but not beyond that time, so as, in case of sale, to give sufficient notice to the public.

Messrs. Bell and Watson are further instructed to Sell, at the same time and place, those extensive Mines, known by the name of The Galligill Bents Mines, contiguous to the above, and subject to the same terms of lease. These mines have not been worked, and, from their extent, richness, and convenience of situation, afford a certain prospect of being profitably worked.

Further particulars may be had of, and all communications are requested to be addressed to, Messrs. Bell and Watson, auctioneers, Bank Buildings, Mosley Street, Newcastle-upon-Tyne.

The mines may be viewed on application to Mr. John Lathern, New Shield, near Alston.

Newcastle-upon-Tyne, August 24, 1848.

See 20th July 1889

22nd September 1848 (Newcastle Courant)

Deaths

At North Shields, 18th inst. aged 68, Sarah widow of Mr. Thomas Hetherington, miner, formerly of Alston Moor.

Sarah Bulman married Thomas Hetherington, 13th March 1817, at St Augustine's, Alston.

Thomas Hetherington, was buried 14th January 1831, aged 34, at St Augustine's, Alston.

24th November 1848 (Newcastle Courant)

A very fine testimonial was presented to T. Wilson, Esq., of Shotley Hall, on the 16th inst. by his partners in the Hudgill Burn Lead Mine, in acknowledgement of the valuable and gratuitous services which he has rendered to the company in the management of affairs, and as a token of their esteem and regard for him as an individual. It consisted of articles of plate, of great beauty, of the value of 200 guineas, which were manufactured by Messrs. Reid and Sons of this town.

Son of John Wilson (of Nenthall and Shotley Hall) and Mary (Bownas married 28th Oct 1790) baptised 16th February 1800, died 22nd April 1880, married Elizabeth Cunard, daughter of Sir Samuel Cunard.
See the will of John Wilson

8th December 1848 (Morning Chronicle)

OFFICE of the DERWENT MINES COMPANY,
34 Dowgate-hill, December 4, 1848

A SPECIAL GENERAL MEETING of the SHAREHOLDERS of this Company is summoned to be held at the Office on Tuesday the 19th instant, at Twelve o'clock.

By order of the Directors, B. O'Connor, Clerk of the Company.

22nd December 1848 (London Gazette)

Office of the Derwent Mines Company,
34, Dowgate-Hill, December 18, 1848.

To the Shareholders of the Derwent Mines Company.

Notice of Call.

THE Directors of the Derwent Mines company hereby give notice, that they have made a call of £1 10s. per share on each and every share in the Company's capital stock, payable at the Offices of the Company, 34, Dowgate-hill, London, on the 1st of February next, 15 shillings per share; and, on the 1st of May following, 15 shillings per share..

By order of the Directors
B. O'Connor, Clerk to the Company.

N.B. Shareholders must bring in their scrip certificates to be marked.

26th January 1849 (Carlisle Journal)

At Alston, on the 18th instant, Mr. Thomas Shaw, aged 69 years. The deceased was through life an ardent and persevering mining adventurer. He was a shareholder in, and at one period manager, of several lead mines, and as such occupied a respectable position amongst the conductors of mining operations in Alston. Mr. Shaw, according to his limited means, did more, perhaps, in his day towards furnishing the labouring classes with employment than any other man in the neighbourhood in which be lived; and in this respect he has left an example well worthy the imitation of many of his more wealthy and surviving neighbours. He was, moreover, a kind and helply neighbour, a friend to the poor, and consequently died much regretted.
See Durham Wills, Thomas Shaw 1830 & 1850

7th April 1849 (Newcastle Guardian and Tyne Mercury)

Funeral at Allendale. —The mortal remains of William Crawhall, Esq., of Staghaw House, near Hexham, (late of Allenheads,) were interred at the family burial-place, St. Peter's, Allendale, on Wednesday last. The workmen at Allenheads Lead Mines, to the number of more than five hundred, all the agents who had served under the late Mr C., and every respectable inhabitant of the neighbourhood within a distance of ten miles, joined the mournful procession, all anxious to pay the last tribute of respect and affection to the memory of one who, by his commanding talents and unblemished character, had endeared himself to all who knew him. Mr C. was for 33 years chief mining agent T. W. Beaumont, Esq.

William born 20th February 1784, son of Thomas & Ann (Bownas, [daughter of John Bownas, blacksmith, at Allenheads] married 21st November 1771, at Allendale) Crawhall. Thomas Crawhall was chief agent at the Allendale lead mines, William took over from him when he died in August 1812.

14th April 1849 (Newcastle Journal)
Deaths
At Shotley Bridge, at the Silver Tongue Lead Mine, on the 11th inst., aged 40, Mr. William Fairless, engineer.
William Fairless born 6th November 1807, baptised at Stanhope 14th November 1807, parents William & Mary Fairless.
William Fairless married Sarah Whaley, at Muggleswick 2nd November 1839.
In 1841, at Silver Tongues Mine, Shotley, William Fairless, lead miner, aged 30, his wife Sarah aged 40, children, John 6, and William 9 months.
William Fairless was buried at Muggleswick, 13th April 1849, aged 41.
In 1851, at Silver Tongue, Shotley, Sarah Fairless, pauper (lead miners widow), aged 49, born Muggleswick, son William aged 10 and daughter Hannah aged 8.
In 1861, at Castleside, Muggleswick, Sarah Fairless, widow, aged 59, son William, labourer, aged 20, and daughter Hannah, dressmaker, aged 18.
Sarah Fairless was buried at Muggleswick, 13th October 1862, aged 61.
In 1871, at Castleside, William Fairless, labourer, aged 30, his wife Mary 25, daughter, Sarah Ann 1, and lodger, Thomas Smith, police constable, aged 24.
In 1881, at Castleside, William Fairless, labourer, aged 40, his wife Mary (born Bywell) aged 36, children, Sarah A 11, William H 6, and Margaret E 4.
In 1891, at Castleside, William Fairless, platelayer, railway, aged 50, his wife Mary aged 46, children, Sarah, domestic servant, aged 21, William, general labourer aged 16, Margaret 13, Mary 9 and Hannah 6.
In 1901, at 10 Front Street, Healeyfield, Castleside, William Fairless, platelayer, aged 60, his wife Mary 54, William, labourer in ironworks, aged 26, Margaret, general servant, aged 23, and Mary, general servant, aged 17.
In 1911, at 10 Front Street, Healeyfield, Castleside, William Fairless, platelayer, aged 70, his wife Mary 67, William H, engineman stationary ironworks, aged 38, Margaret E, aged 32, Polly, aged 28, and granddaughter May Fairless aged 8.

20th April 1849 (Durham Chronicle)
Marriages
At Allendale, 19th inst., by the Rev. W. Sandford, of Crook, in this County, to Maria, fourth daughter of the late John Crawhall, Esq., of Allenheads.

20th April 1849 (Newcastle Courant)
FOR SALE BY PRIVATE CONTRACT
ONE THIRTY-SECOND PART or SHARE in the BURNHOPE LEAD MINE, situate in Derwent, near Blanchland, in the county of Durham, and contiguous to the rich and extensive Mining Fields of Derwent.
The Burnhope Lead Mines are a continuation of the same veins and strata to that of the Derwent Mines. This mine offers every facility to a Mine Adventurer. The above shares are the property of a Gentleman deceased.

Mr Wm. Robinson, the Agent, will show the Ground and give any information required, and for further particulars apply to Mr Wm. Craig, Mine Agent, Kettlewell, near Skipton, Yorkshire, who will treat with parties who wish to purchase.

27th April 1849 (Carlisle Journal)

AT a PUBLIC MEETING held in the Primitive Methodist Chapel at GARRIGILL, in the Parish ALSTON, Cumberland, on the 5th day of April, 1849. to take into consideration the contents of a Printed Circular representing the Inhabitants of Garrigill to be in an awful state of destitution as to Religious means, and soliciting Contributions for endowing the Episcopal Chapel in that Village, and erecting a Parsonage House:

Mr. JOSEPH WALTON in the Chair.

The Circular and the Notice concerning the Meeting having been read,
It was RESOLVED,—

1. That the Inhabitants of Garrigill feel themselves deeply aggrieved and wronged by the misrepresentations contained in a printed Circular Letter soliciting Contributions for a Parsonage House and Endowment in connexion with the Episcopal Chapel in the village, in which they are described as “rapidly sinking into stale of virtual Heathenism.— Moved by Mr. Irwin; seconded by Mr. Thos. Dobson.
2. That the Inhabitants of this District, although they are represented as having few of the comforts of this present world," cannot be in a very low condition in this respect, as in a population of 1500 persons, not 2000 as stated in the Circular, they will have little short of £4000 deposited in the Savings’ Bank, and they have the principal share of at least £1500 belonging to Friendly Society, which by their own prudence and management has been brought its present state of usefulness and prosperity—Moved by Mr. DENT ; seconded by Mr. GEO. ROBINSON.
3. That the state of morals in this District will bear a comparison with most others in the kingdom, as there has not been a case of committal to prison for any offence within the memory of the oldest inhabitant—Moved by the Rev. J. HARPER; seconded Mr. WM. THOMASON.
4. That the means of mental culture are enjoyed to a considerable extent, as besides Three good Day Schools there a Library containing upwards 300 volumes, and also access to the Governor and Company's Library at Nenthead, containing upwards of 600 volumes, of which the people diligently avail themselves.—Moved by the Rev. JOHN ROBERTS; seconded by Mr. GEO. EMERSON.
5. That in the Village and Chapelry of Garrigill, being about five miles in extent, and one and a half in the populated part of it, there are three Wesleyan Methodist Chapels, one Primitive Methodist, and one Independent Chapel, the average attendance at which for public worship out of a population of 1500, is 620 persons, besides 293 Sunday School Scholars, making total of 913, and the expense and labour supporting these means of religious instruction are voluntarily and cheerfully borne by the people themselves, without any aid from the Established Church or Government Grants Moved by Mr. WM. TURNER; seconded by Mr. THOS. BOWMAN.
6. That the people of this neighbourhood are well satisfied with their Spiritual Instructors, and deem it a privilege to contribute to their support; although in

the estimation of Puseyite intolerance they may not be duly qualified to administer the Holy Sacrament or preach the Gospel. Moved by the Rev. Mr. BUTTERWICK; seconded by Mr THOS. BAILY.
7. That the people of Garrigill prefer the Religion of the Holy Scriptures, which is one of power and vitality, before the lifeless and empty forms of Puseyism which are now prevalent in the Anglican Church, though clothed with the pompous garb of Apostolic succession and Sacramental efficacy.— Moved by the Rev. HENRY DEAN; seconded by MR. JOS. WARD.
8. That while, according to the statements of the circular in question, the established Church at Garrigill has failed to supply the spiritual wants of the people, though it has existed since the time of King John—upwards of 600 years—this Meeting is thankful in being able to declare that those wants for long period have been abundantly supplied by the Ministers of Dissenting Churches.—Moved by the Rev. Mr. ALDERSON; seconded by Mr. THOS. ARMSTRONG.
It was unanimously resolved that these Resolutions should be published in one more of the Public Papers. The Meeting was numerously attended, and all the resolutions cordially and unanimously passed, under the deep conviction that a document so unfounded should not be permitted to go forth to the world uncontradicted.

4th May 1849 (Carlisle Journal)
Deaths
At Nenthall, near Alston, on the 27th ult., Sarah wife of Mr Andrew Walton, aged 33.
See 16th July 1842 19th June 1869 and 15th January 1876
At Rotherhope-Side, near Alston, on the 1st Instant, Mary widow of the late John Walton, aged 39 years.
John Walton, of Ninebanks, married Mary Kearton, 28th May 1835, at St Augustine's, Alston.
In 1841, at Flowedge, Garrigill, John Walton, lead miner, aged 30, his wife Mary aged 30, children, Tamer 5, Jane 4, Christopher 2, Thomas 5 months, servant Mary Whitfield 14, and Hugh Kearton, lead miner, aged 25.
In 1851, at Roderupside, Garrigill, Hugh Kearton, farmer and carrier, aged 37, his wife Jane aged 37, daughter Mary 1 month, nephews, Thomas Walton 10, William Walton 7, John Walton 5, and wifes daughter Mary Vipond 6.
In 1861, at Rotherhope Side, Hugh Kearton, farmer, aged 47, his wife Jane 47, children, Mary 11, Thomas 8, Hugh 8, Jane 3, Nephews, William Walton, stone fence waller, aged 17, and John Walton, lead miner, aged 15.
See 4th February 1848

1st June 1849 (Carlisle Journal)
ALSTON, CUMBERLAND
VALUABLE LEASEHOLD PROPERTY FOR SALE.
TO be SOLD, by AUCTION, at the House of Mrs Bland, *Crown Inn*, in ALSTON, on Friday the 15th day of June, 1849, at Six o'clock in the Evening, (by virtue of powers sale contained in Mortgage Deed), Mr. JOHN WOODMASS Auctioneer, either together or in such Lots may be agreed Upon at the time a Sale, and subject to the conditions to be then read, all those FIVE excellent MESSUAGES, COTTAGES, or DWELLING HOUSES,

and PREMISES, (one of which contains a Grocer's Shop) situate at GARRIGILL GATE, (adjoining the Bridge-end), in the parish of Alston, in the County of Cumberland, with the Out-offices respectively belonging thereto, and now in the several occupations of Thomas Archer, Benjamin Wallace, Joseph Ward, Jane Parmley, and John Currah, as Tenants thereof.

The above Property is part of a Tenement called Loaninghead, in the Manor Alston, which is held by Lease for a Term of 1000 Years, commencing in the year 1621, under the Commissioners of Greenwich Hospital. The proportion of Annual Rent to which the above Property is subject is only 2d., and 20 times that amount, or 3s. 4d. every 21 years.

This will be found a safe and desirable investment. Garrigill Gate is the immediate vicinity of the Lead Ore Mines, the Houses are well built, in a good situation for business, and will readily command good Tenants at remunerative rents.

The respective Tenants will shew the Premises, and further information may be obtained on application to Mr WOODMASS. Auctioneer; or Mr. DICKINSON, Solicitor, Alston; or to Mr. HENRY W. ORNSBY, solicitor, Darlington. Darlington, May 28th. 1849.

To the Shareholders of the Derwent Mines Company.
Notice of Call.

THE directors of the Derwent Mines Company hereby give notice, that they have made a call of £1 10s. per share, on each and every share in the Company's capital stock, payable at the offices of the Company, No. 34, Dowgate-hill, London, on the 14 of July .

By order of the Directors,
B. O'Connor, Clerk to the Company.

N.B. Shareholders must bring in their scrip certificates to be marked.

29th June 1849 (Durham County Advertiser)

LEAD AND SILVER MINES,
IN THE COUNTIES OF NORTHUMBERLAND AND DURHAM
TO BE SOLD BY AUCTION,

On Tuesday the 3rd day of July, 1849, at the and Thistle Inn, Newcastle-upon-Tyne, at one for two o' clock.

MR. CHARLES BROUGH, AUCTIONEER

1st. ALL those Valuable and Current-going LEAD and SILVER MINES belonging to the Bulbeck Lead Company, called SILVER TONGUE, in the County of Northumberland; and HYSOP in the County of Durham; with the ENGINES tor Pumping and Washing the Ores; OFFICES, COTTAGES, MINE SHOPS, MATERIALS AND UTENSILS belonging to the same, situated upon the River Derwent, in immediate vicinity of Shotley Bridge, about Sixteen Miles from Newcastle-upon-Tyne, and near the Wear Valley Railway. Those Mines are divided from each other by the River Derwent, which here forms the boundary between the Counties of Northumberland and Durham, but are connected by Levels of Communication for the

convenience of unwatering the Workings and of Washing the Produce at Central Washing Flours.
The Silver Tongue Mines are held by Lease from the Lord of the Manor of Bulbeck, and the Hysop Mines from the Dean and Chapter of Durham. The Royalty Dues payable for the former are highly favourable, and for the latter are moderate. The Leases are renewable according to Custom. The Engines for unwatering the Mines, and for Crushing and Washing the Ores are driven by Water, and are in the best Order and Efficiency. The Right of Working extends over a Tract of Mining Ground through which many Veins of Lead are known to run. Four only have been partially worked, and yield large Quantities of Ore, rich in Silver, and are converging towards a Point of Intersection with other Veins, where a considerable Accumulation of Ore is expected. From the known Productiveness of the lower Strata in the very ancient Derwent Lead Mines, there can be no doubt but they will here be equally productive.
2nd. All that Valuable SMELTING MILL, situate at CASTLE SIDE in the immediate vicinity of the above, and also other Mines, and known as CASTLE SIDE Smelting Mill with ail the necessary Machinery, Horizontal Chimneys, and every Convenience for smelting Lead Ore; together with 2A. 3R. 2P. or thereabouts of Freehold LAND; and 2A. 2R. 7p. or thereabouts of Copyhold LAND.
Mr. WM. WATSON, the Agent on the Premises, will show the Mines, and further Particulars may be known and Plans seen, by applying to Mr. JOHN DOLPHIN, Mine Surveyor, Hunter House, Riding Mill, Gateshead; or Mr. JOHN DOUGLAS, NO. 12, Westgate Street, Newcastle upon Tyne.

7th August 1849 (London Gazette)

Derwent Mines' Office, 34, Dowgate-Hill.

NOTICE is hereby given, that the Directors of the Derwent Mines Company will be ready, on Thursday the 30th day of August instant, at twelve o'clock at noon precisely, to receive at this Office tenders for the 1830 undermentioned shares in the said Company, the call of 30s. per share on which, due on the 14th July 1849, has not been paid.
No tender can be received for less than the amount of the call so due. — Dated this 2nd August 1849.
No. 55 to No. 58, No. 243 to No. 248, No. 407 and No. 408, No. 605 to No. 616, No. 633 to No. 676, No. 849 to No. 858, No. 913 to No. 945, No. 950 to No. 988, No. 1001 and No. 1002, No. 1032 to No. 1200, No. 1346, No. 1358 to No, 1367, No. 1377 to No. 1379, No. 1400 to No. 1430.

B. O'Connor, Secretary.

1st September 1849 (Newcastle Journal)

Lead in the Northern Counties

The following is the return of the quantity of lead ore and lead produced in this part of the country during the year 1848, as published in the *Mining Journal*: —

Yorkshire	Ore Tons	Lead Tons
Swaledale and Arkendale	4053	3040
Cononly	699	437
Grassington including Garnbury & Coalgrove Beck	1159	707

Westmorland		
Dufton and Silverband	246	184
Hilton and Murton	273	388
	519	572

The total produced in the United Kingdom during the past year amounted to—

	LEAD ORE.	LEAD.
Tons	78,964	54,853

It will thus be seen that this and the neighbouring counties produce nearly one-half of the lead supplied by English mines. The following are the quantities of lead ore and lead imported and exported during 1848: —
IMPORTED—1298 tons of lead ore; pig and sheet lead, 3788 tons; retained for home consumption, 2157 tons.
EXPORTED—135 tons of lead ore; pig and rolled lead, 4977 tons; shot, 1151; litharge, red and white lead, 2292; foreign lead in sheet and pig, 3747 tons.
The Welsh sales include also the following lead ores: —
Australian, 69 tons; Belgian, 85 tons; German, 44; Portugal, 79;
Prussian, 112; and Sardinian, 112 tons.

9th November 1849 (Newcastle Courant)
Marriages
At Appleby, in St Michael's, on the 1st inst., Thomas, son of Jacob Wilson, Esq., of Alston House, Cumberland, to Margaret, youngest daughter of the late Joseph Bowstead, Esq., of Beck Bank, in the same county.

17th November 1849 (Carlisle Patriot)
Deaths
At Patterdale, on the 2nd inst., Mr Francis Shields, smelter, aged 40.

25th January 1850 (Carlisle Journal)
Marriages
At Nenthead, on the 24th inst., Mr James Robinson, to Mrs Margaret Thompson.
In 1851, at Pry House, Nenthead, James Robinson, lead miner, aged 29, his wife Margaret 25, daughter, Hannah 9 months.
See 18th July 1874, 26th February 1876, 23rd December 1876, 26th April 1879
Deaths
At Alston, on the 19th inst., Miss Ann Pattinson, draper, aged 63—much respected.
In 1841, at Market Place, Alston, Ann Pattinson, Milliner, aged 50, Mary Pattinson, Milliner, aged 40, Mary Welsh 13, Jane Welsh 35, Jane Summerset, servant, aged 24, and Elizabeth Summerset, servant, aged 25.
In 1851, at Front Street, Alston, Mary Pattinson, draper, woollen, aged 50, and niece, Mary Welsh, dress maker, aged 23.

26th January 1850 (Newcastle Journal)

RELIGIOUS AND CHARITY NOTICES

The Rev Blythe Hurst has been preferred by Wentworth Blackett Beaumont, Esq. of Bywell Hall from country the Curacy of Nenthead, to the Incumbency of Slaley, in this county.

1st February 1850 (Durham County Advertiser)

Deaths

At Stanhope, on the 17th ult., aged 51 John Hutchinson, Esq. He was agent for the London Lead Mining Company from the time he left school to his death, and besides his agency over the company's different works here, he was chief accountant and cashier at their various workings in Durham, Cumberland, Westmorland and Yorkshire.

In 1841, at Stanhope, John Hutchinson, mining agent aged 40, his wife Jane 35, children, John 15, Richard 14, William 12, James 10, George 8, Isabella 6, and Robert 2.

15th March 1850 (Durham Chronicle)

TO BE SOLD BY PRIVATE CONTRACT

AND IF NOT SOLD, THEN TO BE LET

With entry at May-day, 1850.

STANHOPE HOUSE, situate in the beautiful and healthy Vale of the Wear, with the Cottage, Stables, Coach-house, and Garden, and about Ten Acres of excellent Old Grass Land, all belonging to the Lead Company.

The Property s situate within two Miles of the Terminus of the Wear Valley Railway at Frosterley, immediately adjoining the Stanhope Rectory House and Grounds; commands a fine and open view of the surrounding Country, and is well adapted for the residence of a private Family.

MR PARMLEY, the Company's Agent at Stanhope, will shew the Premises; and for further particulars apply to Messrs BAINBRIDGE, Solicitors, Alston, by Penrith, who are authorised to treat for the Sale thereof.

29th March 1850 (Carlisle Journal)

Deaths

At Alston, on the 27th inst., Mr. John Litell, blacksmith, aged 78 years. The deceased was a man of great corporeal powers, having weighed at some periods of his life seventeen stones —and for upwards of forty consecutive years he weighed sixteen stones without variation, and without at the same time manifesting any appearance of inconvenient corpulency. Nor were these great physical powers bestowed on him in vain; for to great strength of body were united in him throughout his long life such fixed and regular habits of industry as are rarely exceeded. He died much respected by a large circle of acquaintances in his own neighbourhood, and was well known and highly esteemed by many of the Society of Friends living at a distance of which Society he has been for these last forty-eight years a zealous and consistent member.

In 1841, at Town Head, Alston, John Little, blacksmith, aged 65, and his wife Mary aged 65.

5th April 1850 (Carlisle Journal)
Deaths
At Garrigill, on the 1st inst., Mrs Isabella Coulthard, aged 80 years.

St John's Churchyard, Garrigill

Sacred
to the memory of
Thomas Coulthard
of Flatt who died 3rd April 1837
aged 74 years
Also of Isabella his wife
who died at Garrigill April
1st 1850 aged 80

Thomas Coulthard married Tamar Little 24th June 1887, at St John's, Garrigill.
1. John baptised 8th June 1788, son of Thomas Coulthard of Flatt.1788
2. Mally baptised 19th March 1790, daughter of Thomas Coulthard of Flatt
Tamar Coulthard was buried at Garrigill 9th January 1793

Thomas Coulthard, married Sarah Elliott 8th December 1793, at St Augustine's, Alston.
Children:
3. Tamar born 24th August 1794, baptised 1st January 1794, buried 14th November 1800, at St Augustine's, Alston, aged 6, of Hillhouse, daughter of Thomas Coulthard, Mason, widower.
4. Sarah baptised 16th July 1796, daughter of Thomas & Sarah Coulthard of Scalebank, Alston.
5. Thomas born 18th May 1798, 2nd son of Thomas Coulthard, Flatt, miner, by his wife Sarah daughter of John & Mary Elliott1798

Sarah Coulthard was buried 7th May 1800, aged 29, at St John's, Garrigill.

Thomas Coulthard married Isabella Watson, 20th March 1802, at St Augustine's, Alston.
Children:

6. Joseph born 6th September 1802, 3rd son of Thomas Coulthard, Garrigill, Mason, by his wife Isabella daughter of Joseph Watson of Garrigill.
7. Hannah born 18th June 1804 4th daughter of Thomas Coulthard, Cowgap, Mason, by his wife Isabella daughter of Joseph Watson.
8. Thamar born 12th December 1806, 5th daughter of Thomas Coulthard of Flatt, Mason, by his wife Isabella daughter of Joseph Watson
9. Isabella born 4th December 1808, daughter of Thomas & Isabella Coulthard of Flatt.
10. Thomas born 14th June 1812, 4th son of Thomas & Isabella Coulthard, mason, of Flatt.

Isabella Coulthard, of Garrigill Gate, buried 4th April 1850, aged 80, at St John's, Garrigill.

At Dufton, on the 31st ult., Elizabeth, infant daughter of John Fleming, miner; same place, on the 1st instant, Margaret Waller, aged 85 years; also, same place and day, George Nicholson, aged 76 years.

20th April 1850 (Newcastle Journal)

REJOICINGS IN HONOUR OF WENTWORTH BLACKETT BEAUMONT, ESQ.

The eldest son and heir of the late Thos. Wentworth Beaumont, Esq., who was for many years one of our representatives in parliament, Wentworth Blackett Beaumont, Esq., of Bywell Hall, in Northumberland, and Bretton Hall, in the County of York, attained his majority on Thursday week, as briefly stated in our last, when great rejoicings took place in the vast mining districts belonging to that gentleman in this and the adjacent County. The extent of country over which the several mines and works are situated, and the number of workmen and boys employed approaching nearly to three thousand, prevented any dinner or other festivities being limited to one place, and arrangements were, therefore, made by the chief mining agent, Thomas Sopwith, Esq., by which the celebration of the happy event was held in the three principal mining districts on three separate days, commencing in East Allendale, on Thursday week, and being continued in West Allendale and Weardale on the two following days. Excellent dinners were provided in such parts of the several dales, as best suited the convenience of the workmen residing in them, while tea and other refreshments were provided for the younger boys. In East Allendale, eight hundred and seventy miners and smelters dined; in West Allendale, five hundred and six; and in Weardale, twelve hundred and fifty-five; being in all two thousand six hundred and thirty one workmen who dined. The number of younger boys employed in the works, and of other young persons who were entertained, amounted to three hundred and three; making in the aggregate two thousand nine hundred and thirty-four persons who partook of Mr. Beaumont's hospitality on this occasion. In addition to substantial joints of meat, pies, and abundance of rich plum pudding, all which were served hot and in a manner reflecting the greatest credit on the several parties who prepared the dinners, each guest had an ample allowance of ale and hot punch, which afforded the means of hearty rejoicing, without trenching on the borders of that dissipation and excess which sometimes mar the pleasure of festivities on similar occasions. It is gratifying to state, that while this numerous body of workmen displayed the greatest enthusiasm, and entered most heartily into the various rejoicings, the

utmost order prevailed, and the whole of the festivities passed off in a manner, which afforded satisfaction to all. Each of these three districts possesses an excellent band of music, formed entirely of miners, and their able and willing services added much to the liveliness of the proceedings. In each dale, also, a battery of twenty-one guns sent forth repeated salutes; a great number of flags and other decorations also imparted gaiety to the scene, and the weather fortunately proved highly favourable during the three days on which the rejoicings took place.

EAST ALLENDALE. At sunrise on Thursday week, a royal salute was fired from the battery at Allenheads. The band having breakfasted at the residence of Mr. Sopwith, proceeded to the new school, founded by the late T. W. Beaumont, Esq. and maintained by his son the present lord of the manor, who has presented a field adjoining the school, as a play ground for the use of the children, to whom, after the usual morning prayers followed by the national anthem, formal possession of this generous gift was given, and the children made hill and dale resound with hearty cheers in honour of the liberal donor. The foundation of a new building intended to receive part of the hydraulic machinery, now in course of erection by Messrs. W. G. Armstrong and Co. of this town, was laid by Mrs. Sopwith, amidst a large concourse of miners and other spectators, the music and the firing of cannons during this and other proceedings of the day being accompanied by the most enthusiastic cheering. At each of the dinners, after a due observance of the accustomed loyal toasts, "Good health, long life, and happiness to Mr. Beaumont," was responded to with almost deafening cheers, as was also the health of Mrs. Beaumont and family, and J. G. Atkinson, Esq., Mr. Sopwith, and the local agents. At Allendale Town, the workmen employed in the smelt mills walked in procession, and partook of a hearty dinner. At night the whole town was brilliantly illuminated, the band paraded the streets, and bonfires blazed from the neighbouring hills. The new school at Allenheads was also illuminated, and dancing and other festivities were kept up to a late hour.

WEST ALLENDALE. In West Allendale on Friday morning, the local agents, with the resident clergymen and other friends, headed a procession of nearly six hundred persons, consisting of the entire body of workmen, who met Mr. Sopwith on the road from East Allendale, and accompanied him to the residence of Mr. Nevin. Where, having been drawn up in a body, Mr. Sopwith addressed them at considerable length, and thanked them for the respectable compliment they had paid to their employer, in the person of his representative. The orderly and respectable appearance of the workmen in this procession who walked three abreast, and stretched nearly a quarter of a mile in length, headed by a band of music and flags, &c., presented a scene of no ordinary interest, and will, doubtless, long be remembered with the other festivities of the occasion. Morning prayers at Carr Shield Chapel were attended by a large number of the miners, and the local choir, who possess great ability in chanting, sung the national anthem, "God save the Queen." Dinners were given at Carr Shield, Coalcleugh, and Ninebanks, and the utmost attachment and enthusiasm were evinced by all present. Dancing, bonfires, illuminations, and other rejoicings continued during the whole of the evening.

WEARDALE. Similar hospitalities and rejoicings were resumed in Weardale, on Saturday; dinners were given at Newhouse, Short Thorns, Cornhill, St.

John's Chapel, Westgate, and Rookhope; the firing; of cannons, music, and a procession of workmen, with various other manifestations of enthusiastic rejoicing afforded the numerous body of workmen employed by Mr. Beaumont, an opportunity of showing their attachment; and it is only just to say of the entire body of miners, throughout the whole of the proceeding, that they appreciated the high character and generous disposition of the excellent young gentleman, whose majority they were met to celebrate, and to whom no greater compliment could have been paid, than by the good order, respectable appearance, and highly creditable proceedings of this large number of workmen.
We understand that the celebration of Mr. Beaumont's majority by the tenantry of his large landed estates in Northumberland will take place on a future occasion, in the course of the summer, when it is expected he will himself be present. At present Mr. Beaumont is a Fellow Commoner of Trinity College, Cambridge, and by his conduct, disposition, and attainments, affords every promise of being at once an accomplished and useful country gentleman as well as a kind and considerate landlord.

3rd May 1850 (Carlisle Journal)
Deaths
At Patterdale, on the 24th inst., Joseph Banks, smelter, aged 34 years.

4th May 1850 (Newcastle Journal)
A subscription is now being made for making several improvements in the church at Nenthead. The appeal to the public both of Nenthead and Alston in furtherance of these objects has been handsomely responded to.

31st May 1850 (Carlisle Journal)
Marriages
At Alston Church, on the 23rd instant, Mr. Thomas Dowson, of West Allen, to Miss Mary Moffat of Low Sillyhall.
In 1851, at Whiteley Shield Green, West Allendale, Thomas Dawson, lead ore washer and farmer of 17 acres, aged 32, his wife Mary 23, and mother, Elizabeth Dawson, aged 73. THE ALLENDALE BAND. —The West Allendale Band were on Saturday last most generously entertained at a dinner given by Thos. Sopwith, Esq. chief mining agent to Wentworth Blackett Beaumont, Esq. in the new and spacious building erected at Carrshield for the convenience and accommodation of the miners. After the cloth had been drawn and grace said, the customary loyal toasts were drank to the Queen, the Royal Family, the Lord of the Manor, the Bishop and the Clergy, &c. which were responded to in the most enthusiastic manner. It was truly gratifying to see the cordial feeling, which prevailed betwixt the operatives and the agents. Mr. Sopwith addressed them in most appropriate terms on the relative duties and responsibilities that exist between master and workmen, and concluded by recommending to all engaged in these important works habits of industry and economy, which necessarily embraced their own interests as well as those of Mr. Beaumont. The address was well received. The band has existed only ten months, and the proficiency it has made in the science of music is truly surprising; it consists of eighteen members, who are a body of remarkably fine young men. Messrs. Thomas Heron Scurr, and Joseph Jaques were present from Newcastle.

19th July 1850 (Carlisle Journal)
Deaths
At Alston on the 16th, inst., Mr. Jacob Peart, Leadgate, miner, aged 57.
The inquest determined death was an accident caused by a fall from a cart.
In 1841, at Middle Craig, Jacob Peart, lead miner, aged 45, his wife Hannah (Bell, married 9th January 1823, at At Augustine's, Alston) aged 40, children John 15, Robert 12, Thomas 10, Hannah 8, George 6, Nancy 4, and William 4 months. In 1851, at Leadgate, Hannah Peart, widow, aged 50, children John, lead miner, aged 36, Robert, lead miner, aged 23, Thomas, lead miner, aged

20, Hannah 18, George, lead miner, aged 16, Nancy 14, James 12, William 10, and Joseph 4.
At Alston on the 16th, inst., Mr. Thomas Bell, clogger, aged 47.
At Alston on the 17th, inst., Esther, wife of Mr. John Little, agent at Coalcleugh, aged 27. *See 2nd December 1837*

FATAL ACCIDENT IN A LEAD MINE.
On Friday, the 12th inst., an inquest was held at the Black Bull Inn, St. John's Chapel, in Weardale, before Mr. Thornton, deputy coroner, on view of the body of Wm. Bee, aged 49. The deceased worked at the Elmford Lead Mine, and on the previous morning, he had gone to his work as usual. In the afternoon, the other men not having seen him come out began to have fears about him, and therefore set out in search of him to the place where he had been working. Not finding him there, they went down the waygate, where there was a wooden partition, and supposing he might have fallen down the other side, they knocked at the partition as they went, to see how far the metal reached. On getting to the top of it, they broke through the partition, and found the deceased lying on the metal rather sideways. He was alive but quite insensible. There was a large wound on the back part of his head, and other smaller ones on the right temple. He was immediately removed, but on getting to bank, he was found to be dead. He had been working alone with a javelin letting out the ore and metal, which would fall down a shaft, across which a plank was laid, and it is supposed he had slipped his hold and thus fallen down into it. No blame was imputed to any one connected with the mine. The deceased had frequently worked there before, as well as others. He was a very industrious and intelligent man, and highly respected. Verdict, —" Accidentally killed."
In 1841, at Lane Hill, St John's, William Bee, lead miner, aged 40, Jane Bee aged 30, Mary Bee aged 9, Hannah Bee 6, and William Bee 4 years.
In 1851, at Lane Hill, St John's, Jane Bee, widow, aged 41, children Mary 18, Hannah, dress maker, aged 15, William, lead ore miner, 13, and Joseph 5.

23rd August 1850 (Carlisle Journal)
Remarkable Shot. — On Wednesday last, Thomas Lee, of Nenthall, on Alston Moor, whilst shooting on Greengill Moss, rose a covey of fifteen grouse,

about thirty yards off; six fell to the first barrel and four to the second, seven of which were shot dead, and three lamed. The day before he shot twelve brace in succession, without even missing a barrel.

Deaths

At Garrigill, on the 15th instant, Mr. William Coates, aged 77 years.

At Bleagate, near Alston, on the 15th inst., Mr. John Smith aged 77 years.

In 1841, at Bleagate, John Smith, yeoman, aged 65, and Elizabeth Smith 65.

30th August 1850 (Carlisle Journal)

SHOCKING ACCIDENT AT CONISTON.

A fatal and most painful accident occurred on Wednesday morning week, to a much-respected old man, named Thomas Millican, about sixty years of age, while attendant upon the large water-wheel that serves to pump and draw the work from the deepest part of the Coniston copper mines. The unfortunate man met with his death by his falling into the wheel case, or rather into the inside of the wheel itself, during the time it was revolving at a most rapid rate, owing to which his body was literally torn to pieces by the arms of the wheel and the hundreds of screw-bolts that project some inches through the casing, like so many iron teeth, in the midst and upon which he was hurled for some time. The wheel is placed high upon the mountain side above the works, and was tended by the deceased alone; therefore it is not known how he got precipitated into the wheel. The deceased not attending to repeated signals from a person employed down the shaft, gave rise to a suspicion that something had befallen him, and on the party ascending, he was horror-struck at finding the mangled remains of the old man. —Preston Guardian.

31st August 1850 (Kendal Mercury)

Fatal Accident At The Conistone Mines.— An inquest was held at Coniston, by Wm. Blendall, Esq., on the 22nd, over Thomas Millican, aged 61. It appears he had charge of the water-wheel at the copper mines, and some of the men finding the signal for turning the water off the wheel not attended to, went to see the cause, when Millican was found inside the wheel, with his head severed from the body, besides other injuries. —Verdict, “accidental death.”

Thomas Millican married Mary Bradwell 11th November 1786, at St Augustine’s, Alston. Thomas Millican son of Thomas Millican of Gate and Mary Bradwell baptised at St John Garrigill 26th April 1789.

Mary Millican of Skydes, wife of Thomas was buried 30th September 1789, at St Augustine’s, Alston.

31st August 1850 (Newcastle Journal)
It is stated that William Bell Walton, a poor but respectable miner, living near Alston, has fallen heir to the estate of the late William Bell, Esq., of High Shields, near Hexham, estimated to be worth about £100,000. Mr. Walton has a large family, and has been for some years a consistent member of the Wesleyan Methodist Society in Nenthead.
See 25th April 1856.

7th September 1850 (Carlisle Journal)
FLORAL AND HORTICULTRAL SOCIETY of NENTHEAD AND GARRIGILL
The first exhibition of this society took place in the Lead Company's School Room, at Nenthead, on Friday, the 6th inst. Most of the flowers, fruits and vegetables exhibited were in a high state of cultivation, and would have been very creditable to localities much more favourably situated for their production. They formed a remarkable contrast with the surrounding heather-clad hills, and their exhibition was a triumph of horticultural skill over a climate very unfavourable to their growth. Prizes were awarded by the judges—Messrs. Brown and Gardener, of Teesdale—to the best specimens in each class. The day was fine and the attendance numerous, not less than eight hundred people were present, who were admitted into the room by tickets. The room was beautifully decorated with festoons, &c., of evergreens and flowers. The brass band belonging to the place was also in attendance, and enlivened the proceedings by the performance of a number of popular pieces. The whole passed off favourably and must give an increased impetus to horticultural pursuits, as a recreation favourable, not only to the morals but also to the health and longevity of the lead miners.

20th September 1850 (Newcastle Courant)
Deaths
At Para, *(State in Brazil, main City Belem)* on the 15th inst., of July, of Yellow fever, on his way from Pernambuco *(State in Brazil main city Recife)* to the United State, aged 19, Thomas second son of Hugh Lee Pattinson, Esq., of Scots House, near Gateshead.

21st September 1850 (Newcastle Journal)
ALSTON FLORAL AND HORTICULTURAL SOCIETY.
The annual exhibition of this society took place yesterday week. The show of fruits, flowers, and vegetables, was small but respectable in quality, and pleasing enough to those who are not fond of drawing odious comparisons. The vegetables, more especially, indicated no lack of horticultural skill in the Alston cottagers; and the tasteful decorations, together with the performances of a quartet, such as is not often found in a secluded district, contributed not a little towards making the exhibition a treat to the numerous visitors, and an encouragement to future exertions. A similar society has been formed by the two villages still further away up these remote dales, namely, Nenthead and Garrigill; and their first exhibition, of a most promising character, was held a fortnight ago, at Nenthead, a place where twenty years ago, an old inhabitant was of opinion that “ne tree u'd grew but a kest un." The friendly rivalry which has sprung up between this society and the one at Alston, bids fair to draw forth the utmost skill and exertion of the garden-loving folks of the district.

28th September 1850 (Carlisle Patriot)
TO BE LET, for the term of 15 years, from the 12th May 1851, all that Well Established and Commodious INN, with Stables, Coach House, and other conveniences, at LOW BYER, ALSTON, together with 41A. 3R. 33P. of excellent LAND. The Inn is situated in the immediate vicinity of the Terminus of the Alston Branch Railway, which will be shortly opened.
And also, the adjoining DWELLING HOUSE and GARDEN, now in the occupation of Mr STEPHENS, for which offers will be received together with the Inn, or separately.
Further particulars may be known on application to Mr. Paull, Low Byer, Alston, and offers in writing will be received by Mr Grey, at the Greenwich Hospital Office, Dilston, Newcastle-upon-Tyne, up to Monday the 4th day of November, 1850. Dilston, September 24th 1850

18th October 1850 (Carlisle Journal)
TO be SOLD, by AUCTION, the Freehold FARM, called the HOLE, containing 103 Acres or thereabouts of anciently enclosed Lands, and 222 Acres or thereabouts of more recently enclosed Pasture and an undivided moiety of an outer adjoining pasture containing 838 acres or thereabouts, situated in PRIORSDALE, in the Parish of Alston, in the County of Cumberland.

The Minerals under the anciently enclosed lands belong to the proprietor of the soil, and those under the two pastures belong to him jointly with the Commissioners of the Greenwich Hospital.
The Estate is intersected by numerous veins of Lead Ore mostly unexplored, but in strata favourable to the production of lead ores, being the same as in the adjoining manor of Alston Moor where extensive Lead Mines are worked.
The time and place of Sale will be announced in a future advertisement. Reference to Messrs. J. & R. GIBSON, Solicitors, Hexham, Northumberland.

1st November 1850 (Durham County Advertiser)
An inquest was holden at the Phoenix Inn, Stanhope on the 30th ult., before Mr Thornton, deputy coroner, on view of the body of George Bainbridge, aged 65. The deceased was a miner, and worked at Hollow Gill Lead Mine. On the 29th ult., he with his two nephews were sitting by the fireside in the shed connected with the mine, when his lips began to quiver and his colour change, and before the lapse of ten minutes he was a lifeless corpse. He had been suffering from dropsy for about a year, but had been somewhat better the last three months, and able to follow his employment. He had been a miner all his life, and also suffered from shortness of breath, incident to all who have followed that occupation. Verdict, “Died from natural causes.”
In 1841, at Stanhope, George Bainbridge, lead miner, aged 50, his wife Barbara age 45, Elizabeth 20, and Elizabeth 3 months.
In 1851, at Stanhope, Barbara Bainbridge, pauper, lead miners widow, aged 60, daughter Elizabeth, unmarried aged 33, grandchildren, Elizabeth 10, Barbara 6, and George 3.
In 1861 at Stanhope, Wilson Hoggarth, iron miner, aged 34, his wife Elizabeth 42, children Mary H 7, Sarah 5, Ann 2, Barbara under 1 month, step children Elizabeth Bainbridge 20, George Bainbridge, labourer, aged 13, and mother in law, Barbara Bainbridge, widow, aged 70.

15th November 1850 (Carlisle Journal)
INQUESTS BEFORE MR. Lee, DEPUTY CORONER—On the 11th instant, at Garrigill Gate, on view of the body of Whitfield Hodgson, shoemaker and clogger, aged 59. On the 9th instant deceased was at Alston hiring; on his return home he was accompanied by Jas. Hutchinson, who rode behind him, until within a short distance of home. They then dismounted, and drove the horse before them until they arrived at Hutchinson’s house, where they separated. This was about 8 o’clock at night. Deceased proceeded towards home.
The horse having arrived without him, his wife went out in search of him and on ascertaining the facts from Hutchinson she became alarmed, as the road from Hutchinson's house is extremely dangerous. The river Tyne runs at a considerable depth by the side of it for nearly two hundred yards; and bank is also very precipitous in several places without any protecting wall. On making search, deceased was found lying in the river quite dead. He was near the side, at a depth of about nine inches. He had a wound upon his left temple. This was about an hour after he parted from Hutchinson.

All the money he was expected to have was found in his pockets. Verdict—" Found dead." The Jury remarked strongly upon the impropriety of allowing the road to remain in its present state. The coroner made arrangements for communicating such opinion to the surveyors of the highways, and giving them notice that unless they took immediate steps to protect the road they would be held responsible for the consequence.

23rd November 1850 (Newcastle Journal)
Deaths
At Allenheads, on the 11th inst., aged 57, Mr John Dixon, much respected.

26th November 1850. (London Gazette)
NOTICE is hereby given, that the Partnership heretofore subsisting between us the undersigned, as Lead Miners, at Crossfell, near Alston, in the county of Cumberland, under the name or firm of the South and West Crossfell Lead Mines Company, was this day dissolved, so far as regards the undersigned, Alfred Hall. —As witness our hands this 30th day of September 1850.
Alfred Hall, James Morrison, Wm. Bell, Elizabeth Fenwick.

10th January 1851 (Carlisle Journal)

WANTED, a SCHOOL MISTRESS for the GARRIGILL GATE BRITISH and FOREIGN GIRLS' SCHOOL. For further Particulars apply to Mr. JOSEPH WALTON, Garrigill, Alston.
Testimonials to be forwarded on or before the 20th January, 1851.
Garrigill, 3rd Jan., 1851.

11th January 1851 (Westmorland Gazette)

THE LATE FLOOD.

The Greenside mines, in Patterdale, the effects of the storm and flood appear to have been more serious. In the course of Wednesday night the water,

which poured into a large reservoir connected with the mining operations at that place, was so immensely overpowering, that the embankment gave way, and damage to considerable amount was occasioned to the works by the water in its progress towards the lake. We have heard the injury variously estimated at from two or three thousand pounds, and that if the occurrence had taken place during the day-time, instead of at night, the probability is that several lives would have been sacrificed.

25th January 1851 (Newcastle Journal)
Marriages
At Alston, on the 16th inst., Mr. John Walton, town, to Frances, daughter of Mr. Jonathan Walton, Spencycroft, Alston.
In 1851, at Back Simpson street, Newcastle upon Tyne, John Walton, labourer at lead works, aged 32, and his wife Frances, aged 28.

8th February 1851 (Newcastle Journal)
Marriages
At Garrigill Gate on the 1st inst. by the Rev Mr Holmes of Nenthead, Matthew youngest son of Mr Matthew Watson of Ashgillside, mine agent, to Jane eldest daughter of Mr Thos. Bell, miner, Allenheads.

Margaret Pickering of High Nest, was buried at Garrigill, 4th February 1851, aged 76. See 31st October 1871

7th February 1851 (North & South Shields Gazette and Northumberland and Durham Advertiser)
A LETTER FROM CALIFORNIA SHELLBURG, Dec. I, 1850.
DEAR MOTHER, I write these few lines to you, hoping to find you and all my brothers and sisters well, as this leaves us at present. Myself and family are all

well. Since I wrote to you, I have travelled many thousands of miles. I left this country on the 5th of April, 1849, bound for California gold mines, a distance of 2500 miles by land, through an Indian country, with oxen and Waggons loaded with provisions; others with pack horses, and some on foot. Such a sight as my eyes never saw, and hope will never see again—there was nothing to see but the wild savage Indians, and the grizly bears, and thousands of buffalos, &c. Such scenes of privation and distress as you would scarce believe. The cholera was raging amongst the emigrants; hundreds died. There is a desert on the route to California from 25 miles to 70 miles, without any water except hot springs which no man can drink. I was once 20 hours without anything to drink. I was taken very sick with the bloody flux on the way, and after I got to the end of my journey, I, with **Jonathan Hoopes,** from **Nenthead**, **Thomas Swinbank**, from **Middleton**, and hundreds more, were taken with the black scurvy, and worst of all could get nothing to cure us till we got some potatoes for which had to pay 3 dollars per pound. You will think this a great price for potatoes, but we were glad get them any price; we could get nothing of provision kind under 1 dol. 50 cents, per lb., which is six shillings in English money. We arrived on the 27th of September; worked there four months, and then was taken sick again; the doctors thought I had best return to the States again, so I started with man belonging to Jarrow, named Robert Wear. We met with one man from Australia, who was transported from Jarrow; his name was John Steward, he told me he knew **John Eels** from **Nenthead**, but he is dead. We took ship at California for Panama, which was distance of 3500 miles, and then we crossed the Isthmus of Darien, from whence we shipped for Jamaica and thence to New York. When I was at New York I saw a man whose name was Thomas Hedley, from Newcastle; his father is a viewer at Callerton Colliery. If my brother Leonard could see him, would tell him about me. And then I returned home, where I landed on the 19th of July. I found my family all well. I was very sick at first, but now I have got well again. Mother, I am satisfied with travelling; California is not what it is reported to be, —yet thousands have made a small fortune, but tens of thousands have made nothing. But I have done well for the time that I was able to work, and intend you to have a little of it. If I do not come England soon, I will send you some money the first opportunity I have, which I consider no more than my duty, as your son. I have some property in this place that I must sell before I come home. Property is not worth so much now, as it was three years ago by fifty per cent, and times are very dull at present; and I think it will remain so as there are so many people here. Elizabeth, my wife, wrote to you last, but got no answer. Mother, have talked enough about this world of grief and sin; let us live to God, that we may be with him eternally shut in at last. He has promised to be a husband to the widow and a father to the fatherless if trust in him. God bless you, my dear mother.—Amen. My son Leonard wants say something to his grandmother, so I must quit.

My Dear Grandmother, —I would like to see you. If my father and mother should come to England, then I would see you. I have got my picture, with my father and mother; the first opportunity I will send it you. My father would advise all friends to stay at home. So no more at present from your grandson, LEONARD CURRY.

There is a piece of all our hair: the two red is Joseph's and mine, the light Leonard's, and the blue our little Elizabeth Jane's. You must write as soon as

you receive this. So no more at present, from your affectionate son and daughter, JOSEPH AND ELIZABETH CURRY.

8th February 1851 (Newcastle Guardian and Tyne Mercury)
Marriages
At Garrigill Gate, on the 1st inst., Matthew, youngest son of Mr Matthew Watson, Ashgildside, mine agent, to Jane, Eldest daughter of Mr Thomas Bell, Allenheads, miner.
In 1841, at Ashgillside, Matthew Watson, farmer, aged 50, his wife Isabella 55, children, joseph, labourer, aged 20, Jane 15, Matthew, shepherd, aged 13, and Frances 4.
In 1851, at Ashgillside, Matthew Walton, farming 639 acres, part of which is common land, aged 62, his wife Isabella 68, sons, Joseph, lead miner, aged 30, Matthew, lead miner, aged 23, sons wife Jane 26, grandson, Robert Watson 9, and Orphan, Mary Coats, aged 13.
Matthew Watson, of Ashgillside, was buried 5th June 1851, aged 61, at St John's, Garrigill.
In 1861, at Ashgillside, Matthew Watson, yeoman, aged 33, his wife Jane 36, children, Ellen 8, Isabella 8, Thomas 4, Jane 2, and mother, Isabella Watson, widow, annuitant, aged 75.
Isabella Watson was buried 3rd September 1867, at St John's, Garrigill.

15th February 1851 (Newcastle Guardian and Tyne Mercury)

At Alston, on the 28th ult., Mr John Walton of Nent Hall, mining agent, to Miss Emma Collins, of the Crown Inn, Alston.
In 1851, at the Crown Inn, Alston, Thomas Kirkley, innkeeper, aged 50, born Brompton, Yorkshire, his wife Ann aged 52, son Thomas aged 17, visitors John Walton, mining agent, aged 28, born Scotland, and his wife Emma Walton aged 24, born St Saviours, Surrey.

14th March 1851 (Carlisle Journal)

TO LEAD SMELTERS

WANTED, TWO good FURNACE MEN. — Apply at the Roughtengill Mine Smelt Works, near Caldbeck.

25th March 1851 (Cumberland Pacquet, and Ware's Whitehaven Advertiser)

On Wednesday last an elderly man, named Joseph Shaw, met with a horrible death at the Greenside Mines. It appears that the Smelting Mill had not been in use since Christmas at which period it sustained considerable damage by the heavy floods which then prevailed and the washing away of the reservoir, &c.; and it would seem that, on the day named, Shaw was engaged in putting the machinery forward again, but finding that it did not work properly, he commenced an examination intro the cause. While doing so he unfortunately approached too near the small wheels, and his clothes became entangled in them, he was drawn into the machinery, and literally torn to pieces in less than a minute. He has left a widow and seven children to lament his melancholy death, the latter, however, are mostly grown up, and consequently able to provide for themselves.

In 1841, at Glencoin, Hartsop, Glenriding, Patterdale, Joseph Shaw, lead miner, aged 40, his wife Mary (Dent, married 6th December 1824, at Shap) aged 35, children, George 15, Mary 12, John 9, Isabella 6, Agnes 3, and Joseph 6 months.

In 1851, at Hartsop, Patterdale, Mary Shaw, widow, aged 47, born Shap, Westmorland, children, George, lead ore miner, aged 28, John, lead ore miner, aged 9, Agnes 13, and Joseph 10.

Joseph Shaw buried at Patterdale, 22nd March 1851, aged about 50.

28th March 1851 (Carlisle Journal)

TO be SOLD, by AUCTION, at the house of Mr GEORGE DODD, *Ewe Lamb Inn*, ALSTON on Friday, the 11th of April, 1851, at Six o'clock in the Evening, (J. WOODMASS, Auctioneer), all that valuable Leasehold ESTATE, called FLATT, in the Parish of Alston, Cumberland, within Two Miles of Alston, and adjoining the Road leading to Garrigill Gate, consisting of Two Dwelling Houses, Barn, Byre, and other Out-offices, with 34a. 0r. 30p. of Meadow and Pasture Land.

There is an abundance of Coal and Lime in the immediate neighbourhood of the Estate The Tenant Mr. James Kearton, will show the Premises; and further particulars may be known on application to Messrs. JOHN and JOSEPH COULTHARD, or of the Auctioneer, Alston.

TO BE SOLD BY AUCTION, At the Queen's Head Inn, Newcastle-upon-Tyne, on Saturday the Twelfth day of April, 1851, at One o'clock in the Afternoon, (Mr. THOMAS BLANDFORD, Auctioneer) the Freehold and Tithe-free ESTATE of The HOLE, consisting of 103 Acres or thereabouts, of more recently Enclosed Lands, and 222 Acres or thereabouts, of more recently enclosed Pasture, and undivided Moiety of an adjoining Moor, containing 838 Acres or thereabouts, and an Undivided Fourth of a Parcel of Land, containing 23 Acres or thereabouts, and situated at PRIORSDALE, in the Parish of Alston, in the County of Cumberland, Six Miles distant from the Town of Alston, on the Line of Turnpike Road from Alston to Middleton,

which Road passes through the Heart of the Property, connecting it with the Branch Railway from Haltwhistle to Alston, which is expected to be completed in the course of 1851.

The Minerals under the anciently Enclosed Lands belong to the Proprietor of the Soil, and those under the above-mentioned Pasture and Moor, and also under adjoining Pasture, containing 204 Acres or thereabouts, (the Property of the Commissioners of Greenwich Hospital,) belong to him jointly with the Commissioners of Greenwich Hospital, and those under the Parcel of Land containing 23 Acres, belong to the Proprietors of the Soil.

The Estate abounds in Lead, Iron, Coal, Lime, &c. the Strata, and most of the Mineral Veins which intersect the Property, and are almost unexplored, being the same as those in which the Rich Mines of Alston Moor, Weardale, Teesdale, Allendale, Nenthead, &c. have been Worked with the greatest success in the immediate Neighbourhood. Formerly a large quantity of Lead was obtained on the Property and one Vein which has been, and still continues to be worked with considerable success, is standing whole for more than mile in length, and produces from 60 to 90 Ounces of Silver to the Fother of Lead, (21 cwt.).

The Property is well Fenced, and has an abundance of Water and Water-power, and is sheltered to the North by the Plantations of the London Company. The land has been extensively Drained, Limed, and Planted, but is still capable of great improvement, if those operations are continued, and this can be done at a very trifling expense, as the stones for draining, together with limestone and coal well adapted for burning it, and a Kiln for that Purpose, are all conveniently situated about the middle of the property.

Being surrounded by the extensive Preserves of the Duke Cleveland, and the London Company, the Estate abounds with Grouse and other Game, and from the nature of part of the ground, is peculiarly well adapted for Shooting in the latter part of the season, when the birds are wild, and unapproachable on open ground. The Tees, one of the finest Fishing Streams in the North of England, is within an hour's walk.

The House, which is well adapted for a Shooting Box, is pleasantly situated on the Banks of the South Tyne. and there are Cottages and other Outbuildings, affording all that is necessary for an extensive Grazing Farm.

JOHN FENWICK, the Shepherd, on the Premises will shew the property, and Plans and Conditions of Sale may be had at the *Blue Bell Inn*, Alston; the *Queen's Head Inn*, Newcastle-upon-Tyne; the Journal *Office* Carlisle; of Mr JAMES BURNETT Jun. Ovington near Gateshead. . Messrs. CHISHOLME and Co. Lincoln's Inn London; Messrs. J. and R. GIBSON, Solicitors,. Hexham; and Mr. THOMAS BLANDFORD, Corbridge, near Hexham.

SHOCKING ACCIDENT.

On Friday last, at Patterdale, an inquest was held on the body of Joseph Shaw, aged 50, who met with his death in the following dreadful manner: — Deceased was a "washer" at the Greenside Lead Mines, and on Wednesday afternoon, the water-wheel having got deranged, it was stopped for the purpose of being set right. Whilst this was being done portion of water was let on, and the deceased's coat-lap, who was watching the operation, was accidentally caught by the cogs of the wheel, and was drawn in underneath it and crushed to death. The water was immediately stopped, but the deceased,

when taken out, was quite dead. He had received a fatal injury on his left side, from which his bowels protruded in a shocking manner. No doubt whatever was entertained but that the death was purely accidental, and a verdict to that effect was returned.
Joseph Shaw married Mary Dent, 6th December 1824, at Shap, Westmorland.
In 1841, at Glencoin, Hartsop, Joseph Shaw, lead miner, aged 40, his wife Mary 35, children, George 15, Mary 12, John 9, Isabella 6, Agnes 3, and Joseph 6 months.
In 1851, at Hartsop, Mary Shaw, widow, aged 47, children, George, lead miner, aged 23, John, lead miner, aged 19, Agnes 13, and Joseph 10.
Mary Shaw died 2nd qtr., 1853, at Patterdale.

Deaths

At Alston, on the 21st inst., Dorothy, wife of Mr Joseph Atkinson, aged 28 years.
Joseph Atkinson married Dorothy Fawcett, 23rd December 1843, at Kirkland.
In 1851, at Town Head, Alston, Joseph Atkinson, widower, Ag. Labourer, aged 25, children, Mary 5, John 3, Margaret 2, Joseph 1 month, and mother in law, Mary Metcalf, married, aged 52.
Joseph Atkinson, married Hannah Hymers, 27th May 1854, at St John, Garrigill.
In 1861, at Jacksons Yard, Keswick, Joseph Atkinson, lead miner, aged 36, his wife Hannah, 44, children, James, lead miner, aged 17, Mary 15, John, lead miner, aged 13, and Thomas 4.
At Alston, on the 26th inst., Wm. Parker, aged 20.
At Alston Workhouse, on the 23rd inst., Mrs Elizabeth Teasdale, aged 58 years.

2nd May 1851 (Newcastle Courant)

Marriages

At Alston, on the 22nd ult.,, Mr Jonathan Holmes, of Tanfield, Durham, Teacher, to Miss Margaret Peart of Alston.
In 1841, at Grassfield, Alston, Thomas Holmes, lead miner, aged 35, his wife Jane (Walton, married 27th May 1826, at Alston) 35, children, Jonathan, carter labourer, aged 14, Elizabeth 12, Richard 10, Jane 7, Ann 5, and Walton 2.
Thomas Holmes, Yeoman, of Grassfield, Alston, died 15th June 1871.
Jane Holmes died 3rd qtr., 1874, aged 69, at Alston.
See 12th April 1861

In 1841, at Front Street, Alston, Cuthbert Peart, miller, aged 40, children, Ann 15, Margaret 14, George 10, and Thomas 3.
In 1851, at Hill House, Alston, Cuthbert Peart, widower, mine agent, aged 59, children, Ann, milliner, aged 26, Margaret, Bonnet maker, aged 24, George, pupil teacher 19, and T W 13.
See 6th January 1838
In 1851, at Tanfield, Durham, Jonathan Holmes, schoolmaster, aged 24, born Alston, and his sister Ann, schoolmistress, aged 14.
Jonathan and Margaret Holmes emigrated to Canada.

Jonathan Holmes died 12th May 1890, at Pickering, Durham, Ontario.
Margaret Holmes died 18th June 1913, at Pickering, Durham, Ontario.

ALSTON: LEADGATE. —The spacious and handsome school-buildings erected by the Rodderup Fell Mining Company, at Leadgate, in the parish of Alston, were opened on Thursday, the 1st instant, with great éclat. The children were assembled at half-past three o'clock in the afternoon, and

partook of a very substantial tea. At half-past six, the room was again well filled by a large number of the parents and others, when addresses were delivered by the Rev. J. Burton, curate of Alston; Jacob Wilson, Esq., of Alston House; and Mr. Silversides, the master. The school-buildings consist of a very commodious school-room, capable of accommodating from 100 to 120 children, and an exceedingly convenient house for the master—built at the sole cost of the Rodderup Fell Company.

10th May 1851 (Newcastle Journal)
A new infant school is to be erected at Alston, by the Rev. Hugh Salvin, who purposes making a present of it to the parish. The worthy incumbent has already built a national school, and a handsome church at Nenthead, principally at his own cost. It is his intention to convert the present infant school at Alston into a residence for the mistress.
Deaths
At Nenthead, near Alston, lately aged 74, John Millican Esq, for upwards of thirty years principle agent to the London Mining Co**.**
In 1841, at Low Hill Top, Nenthead, John Millican, lead mining agent, aged 60, son John Millican, lead smelting agent, aged 30, son John's wife Sarah Millican aged 30, and Mary Little, independent, aged 40.
In 1851, at West Nenthead, John Millican, widow, retired mining agent, aged 74, born Alston, and grandson, John T. Little, landowner & mortgagee, aged 22, born Stanhope.
See 2nd September 1876, 24th August 1878 and 5th April 1879.

16th May 1851 (Carlisle Journal)
Keswick Pencil Works.—Messrs. Foster and Son, black lead pencil manufacturers, Keswick having just completed fitting their mill with entire new machinery of the most approved principle, introducing several improvements hitherto unattained, invited their numerous workmen to a supper, at the Kings, Head Inn, in commemoration of the occasion The supper was served up in Mrs. Younghusbund's best style and we need not say that ample justice was done to the good things set before them.
Lead Mines. —The lead mine of Hewthwait, Newlands, which has for some time been unpropitious, is now, we are glad to state, in a very prosperous condition. An extensive vein of excellent ore has recently been discovered, and additional workmen have been engaged during the past week.

17th May 1851 (Newcastle Journal)
ALSTON INFANT SCHOOL.—A mistake having occurred in some of the particulars coincident on the mention made last week on the intended erection by the vicar of a new Infant School at Alston, he is anxious to rectify it. It is correct that he purposes to build the one in question at his own expense, but it was stated in addition, (no doubt by a well-intentioned correspondent) that a national school and church at Nenthead had lately been erected almost entirely at his own expense. On the contrary, they were built by public subscription, and it is gratifying to have the opportunity of bearing testimony to the readiness and hearty goodwill with which his parishioners co-operate with their vicar and contribute their share in these public improvements. Within the

last few years the following buildings have been erected in the parish of Alston by public subscription, aided by grants from different societies.
A national school, to accommodate 100 children; an infant school, now too small, with three comfortable rooms above for one of the teachers, A church at Nenthead; and a parsonage-house is now in course of erection

23rd May 1851 (London Gazette)

Derwent Mines Company.

NOTICE is hereby given, that the Annual General Meeting of the Proprietors of the Derwent Mines Company will be holden at their Offices, No. 6, Queen-street-place, Upper Thames- street, on Thursday the 5th day of June now next ensuing, at one o'clock in the afternoon precisely; and notice is hereby also given, that immediately after such General Meeting an Extraordinary Meeting of the said Proprietors will be held at the said Offices to consider the expediency of raising additional capital for the purposes of the said Company, and with that view to authorize the Directors to create and issue further shares, such shares to be offered in the first instance to the present Shareholders of the said Company, in proportion to their respective shares, and to give all the necessary powers to the said Directors for carrying out the said measure; also to consider the propriety of consolidating the shares in the said Company, as well those now existing as the shares proposed to be created, and to give all necessary authority to the Directors in that behalf; also to consider the propriety of altering the scale of voting and qualification of Directors; and upon other special business.—Dated this 22nd day of May 1851.

B. O'Connor, Secretary.

24th May 1851 (Newcastle Guardian and Tyne Mercury)

FATAL ACCIDENT IN WEARDALE.

An inquest was held at St. John's Chapel, in Weardale, on the 19th inst., before Mr Thornton, deputy coroner, on view of the body of Henry Richardson. On the 8th inst., the deceased was loading a cart with ironstone at the Rowntree Syke quarry. While bearing a piece of stone to the cart, a mass of stone of about a ton weight fell from the facing. A man who was near, shouted to him to get out of the way, and he went close to the cart, when the metal rolled against him, and crushed him in the abdomen against the cart.
He was immediately removed to his lodgings, and Mr Bateman, surgeon, attended him until his death, which happened on the 16th inst. It appeared that mortification of the lungs had ensued, which ultimately caused his death. —Verdict accordingly.

24th May 1851 (Carlisle Patriot)

ALSTON.—Within the last few years the following buildings have been erected in the parish of Alston by public subscriptions, aided by grants from different societies: —A national school, to accommodate 100 children; an infant school, now too small, with three comfortable rooms above for one of the teachers; a church at Nenthead; and a parsonage-house is now in coarse of erection at Garrigill. It is also pleasing to state that the above-mentioned schools are liberally supported by the parishioners; the annual subscriptions, Independent of the children's pence, amounting to about £50; thus, enabling

the managers to secure the services of the most efficient teachers. The vicar of Alston is about to erect another building, an infant school, at his own expense.

8th July 1851 (Cumberland Pacquet, and Ware's Whitehaven Advertiser)
Last week there were some celebrations in connection with the Keswick mines, which are worthy of record. The festivities took place in commemoration of the putting in motion of a new steam-engine, which has been erected at the Brandley mine, (at the head Derwentwater lake) one of the mines now worked by the Keswick Mining Company. The auspicious occasion was celebrated at the mine by a luncheon given by the manager to a party of gentry, and afterwards by a dinner given to the miners and other workmen employed on the premises, to the number of about fifty. These mines are now being worked by a London company who have expended a large sum of money in the adventure. The returns as yet have not been sufficient to pay the costs, but the prospects, we rejoice to find, are such as to warrant the erection of the steam-engine in question. This mine has unfortunately been closed for nearly twenty years in consequence of want of water power to drain it, and to crush and dress the ore. The engine is horizontal and condensing one, on the Cornish principle, and built by Messrs Nichols and Williams, of Tavistock, Devon. It is calculated to lift 50,000,000 lbs. one foot high the consumption of one cwt. Of coal. After an excellent dinner a sum of money was raised and wrestled for by the men and boys. The wrestling was excellent, and the principal prize carried off by Mr. William Parkin, of Thornthwaite. The amusements were brought to a close by the company cordially wishing success and prosperity to the undertaking on account of which they had met.

19th July 1851 (Newcastle Guardian and Tyne Mercury)
Marriages
At Allendale, St Peter's, on the 17th inst., Mr George Percival, tea dealer, Allenheads, to Mary, eldest daughter of the late Mr Joseph Graham, Huntland, Allendale.

8th August 1851 (Carlisle Journal)
Deaths
At Garrigill, on the 3rd inst., Mr William Watson, aged 36 years.
William Watson, married Elizabeth Wallace, 22nd February 1844, at St John, Garrigill.
Elizabeth (Betty) Watson was buried 9th June 1847, aged 33, at St John, Garrigill.
In 1851, at Lane Head, Garrigill, Sarah Vipond, widow, farmer, aged 45, lodger, William Watson, widower, lead miner, aged 35, born, Weardale and daughter, Elizabeth Watson aged 3, born Alston.
In 1861, at High Windy Hall, Garrigill, Thomas Archer, lead miner, aged 35, his wife Isabella 30, children, John 12, Thomas 8, Mary 3, William 2 months, and visitor Elizabeth Watson, aged 13.
In 1871, at Loaning Head, Garrigill, Sarah Vipond, lead miners widow, aged 64, and Boarder, Elizabeth Watson, _____ and washerwoman, aged 23.

9th August 1851 (Kendal Mercury)

KESWICK, &c.

Brandley Lead Mine.—This mine, at which recently noticed the erection of new steam engine, is at present offering the most promising prospects of remuneration the enterprising company by which it is now conducted, two large veins of ore of the finest quality having been cut into during the past week.

16th August 1851 (Kendal Mercury)

KESWICK, &c.

Brandley Lead Mine.—Accident.—On Friday, the 8th instant, as two of the workmen at the above mine had ascended the shaft, loaded with some tools, for repair, one of them lost his footing and fell down the shaft about twenty feet, fortunately stopping at one of the landings of the ladder. We are happy to state that he did not receive any injury beyond being stunned by the fall.

24th October 1851 (Newcastle Courant)

TO BE SOLD BY PUBLIC AUCTION,
At the House of Mr Kirkley, Crown Inn, Alston, on
Monday the 17th November, at 12 o'clock,

ALL that valuable LEASEHOLD ESTATE, called BALES, within One Mile of Alston, adjoining: the High Road to Penrith, and now in the Occupation of Mr William Dowson and John Woodmas, containing 112A. 0R. 12P. of enclosed Ground, of which 31A. 3R, 4P. are Meadow Lands, together with Two Allotments of 80A. 1R. 8P. with unlimited Right on Grildergill Moor.

The House and Outbuildings have been rebuilt within the last few Years, and are in excellent Repair; and owing to its Contiguity to the Market Town of Alston, and the Branch Line of Railway, makes it a most desirable investment.

Further Particulars may be known on Application to Mr Tinniswood Millican, of Nenthead; Mr Frederick Fenwick, of Stanhope; and Mr Joseph Little, Middleton. Mr William Dowson, the Tenant, will show the Premises.

31st October 1851 (Carlisle Journal)

Deaths

At Alston, on the 23rd inst., Ann Coulson, aged 66 years.

In 1841, at Middle Skelgill, Alston, Thomas Coulson, lead miner, aged 50, his wife Ann 50, and daughter, Mary 15.

Thomas Coulson died 10th March 1860, aged 71.

See 16th March 1860.

At Alston, on the 24th inst., Ann Kearton, aged 51 years.

Joseph Kirton, married Ann Nattrass 24th January 1824, at St Augustine's, Alston.

In 1841, at Jolly Beard House, Alston, Emanuel Nattrass, lead miner, aged 40, Joseph Kirton, lead miner aged 35, Emanuel Kirton 10, Jane Kirton 7, and William Todd, lead miner, aged 20.

In 1851, at Front Street, Alston, Joseph Kerton, lead miner, aged 57, his wife Ann 50, children, Emanuel, shoe maker, aged 20, and Jane, aged 17.

Emanuel Kirton emigrated to Australia about 1854.

Possible death of Joseph Kirton/Kearton, 2nd qtr 1851, registered at Alston.

31st October 1851 (Durham Chronicle)

STOCKTON

Prize Medal—Lead ORE, &c. —The contributions to the Exhibition of Works of Industry, for which a prize medal was awarded to Mr Joshua Byers, of Stockton, as producer end manufacturer, were the following: —1. Lead ore from Grasshill mine, Teesdale. —2. Pig of refined lead. —Pig of common lead. —4. Pig of slag lead. —5. Silver extracted from the lead. —6. Litharge made from the lead. —7. 1st November 1851 (Newcastle Journal)

An Inquest was held at Allenheads, on Saturday last, before Mr Reed Coroner, on the body of John Philipson, who was killed at Allenheads Mine by falling down the shaft. It is supposed that he had been seized with vertigo or giddiness, to which he was subject. The inquest was adjourned to the 17th November.

In 1851, at White Hill, Allendale High Forest, John Philipson, lead miner, aged 57, born Allendale, his wife Mary Ann 25, born Stanhope, children, Ester 6, John 4, Henry 2, William 4 months and daughter Jane aged 16.
In 1861, at Ireshopeburn, Stanhope, Mary Ann Phillipson, widow, aged 37, children, John 14, Henry 12, William 10, Joseph 2, and niece, Ann Peart 3.

15th November 1851 (Newcastle Guardian and Tyne Mercury)

Marriages

At Allendale Town, on the 10th inst., Mr John Fairless, engineer, to Margaret, second daughter of the late Thomas Dawson, Esq., both of Allenheads.
See 2nd December 1850

21st November 1851 (Carlisle Journal)

INQUEST

On the 17th instant, at Nenthead, on view the body of Isaac Robson, aged 10 years, son of Emma Robson, widow. On the preceding Thursday, deceased left home to go to school, but instead he and other boys followed a wedding party to the King's Head public house, and there twice attempted to get up stairs to them, but were prevented by the landlady. Deceased and Woodmas Thompson, aged 13, then entered the house by a back window, and went into the room. Immediately on entering, Thompson seized a glass of rum punch, and drank it. Some of the party then gave Thompson and deceased some more punch and raw rum, and turned them out of the room. Shortly afterwards they returned, and had some punch and rum, and were again turned out. They then went down stairs, had some ale, and immediately afterwards fell asleep. They were taken home in that state. Thompson rallied in the course of the night, but deceased laid in a state of stupor until he died the following afternoon. Medical aid was called after the lapse of twelve hours, but without effect. Verdict, "That deceased died from taking an excessive quantity of rum, administered to, and voluntarily swallowed by him, he and the parties administering it being ignorant of the effects which were likely to be thereby produced." —The Coroner hoped the case would operate as a caution to the parties, and deter them and others from giving spirits to children so young.

William Robson married Emma Hornsby, 28th January 1830 (Williams death is recorded as 4th quarter of 1841).
Other children found, Margaret, born 7th July 1833, buried at Alston, 18th December 1837, aged 4 years, and Ridley, born 7th December 1835, buried 19th December 17837, aged 2 years.
In 1841, at West Nenthead, William Robson, lead miner, aged 35, Emma Robson, aged 32, and Mary Robson, aged 10 (born 11th November 1830).
In 1851, at Overwater, Emma Robson, widow, aged 42, sons, Isaac Robson 9, and William aged 6 years.
In 1861, at Overwater, Emma Robson, lead ore miners widow, aged 54, and son William, lead miner aged 15. Emma's death is recorded as the 1st quarter of 1866, and I believe William died 3rd quarter of 1865?

Deaths

At Brownside, near Alston, on the 14th inst., Miss Mary Lee, aged 73.

25th November 1851 (Cumberland Pacquet and Ware's Whitehaven Advertiser)

On Friday last, a serious accident occurred at Greenside mines, near Keswick. Whilst two of the men, Thos. Williams, a Cornish-man, and Thomas Hilton, from Caldbeck, were in the act of boring out a hole they had made ready for a blast, and thinking the powder had got wet, they were in the act of taking it out again, when the blast took place by which Williams has lost one of his eyes, and at present is nearly blind of the other, and also very much cut and bruised in both hands, arms, and other parts of his body. Hilton fortunately was not so much injured as his companion, who is a married man with a wife and family, and has been for some time resident at Great Braithwaite, near Keswick.

James Hilton married Elizabeth Armstrong, 24th March 1816, at St Augustine's, Alston.
In 1841, at Newlands, parish of Sebergham, James Hilton, lead miner, aged 50, his wife Elizabeth, aged 40, children, Thomas, 20, John15, Robert15, Hannah 13, and James 7.
In 1851, at Hatcliff, Caldbeck, James Hilton, lead miner, aged 65, born, Alston, his wife Elizabeth, aged 55, sons, Thomas, lead miner, aged 32, John, lead miner, aged 20, Robert, lead miner, aged 27 all born Alston.
In 1851, James Hilton, aged 17, was an apprentice grocer, to Thomas Wilson, grocer, Low Caldbeck.
James Hilton senior, died 2nd quarter 1861, registered at Wigton.
In 1861, at Heskett New Market, Joseph Scott, lead miner, aged 32, his wife Hannah aged 34, born, Alston, children, Jane 8, born, Caldbeck, Hannah 6 born, Caldbeck, Elizabeth 4, born, Alston, Mary A 1, born, Caldbeck, Elizabeth Hilton, widow, confectioner, aged 64, born Alston, and brother in law, Thomas Hilton, lead miner, aged 40, born, Alston.
In 1871, at Fellside, Caldbeck High, Hannah Scott, miners wife, aged 42, children, Elizabeth 14, Esther 9, James 7, and George 4. In 1871, Joseph Scott, iron miner, aged 42, was a boarder at Kelton and Lamplugh, Whitehaven.
In 1871, at Fellside, Caldbeck High, Elizabeth Hilton, widow, aged 76, sons, Thomas, lead miner, aged 50, John, lead miner, aged 48, Robert, lead miner, aged 46, granddaughters, Jane Scott 18, and Mary Anne Scott 11.
Hannah Scott died 4th quarter 1880, aged 55, registered at Whitehaven.

Elizabeth Hilton, died 2nd quarter 1876, aged 79, registered at Whitehaven.
In 1881, at Arlecdon, Cumberland, Joseph Scott, widower, iron miner, aged 54, children, Mary Ann, dressmaker, aged 22, Esther, 19, George 14, granddaughter Annie Hutchings 6, and boarder Ruth Scott, dressmaker, aged 16.
In 1891, at Arlecdon, Cumberland, Joseph Scott, iron ore miner, aged 62, his wife Mary 47, grandson, Joseph M Watson, 8, brother Robert Mossop, quarryman, 38,and nephew, James Mossop 11.

25th November 1851 (London Daily News)
At the Keswick mines a fine vein of ore has been cut in the bottom level at Brandley. The 20-fathom, north at this mine is worth 25 cwt., Kelley's rise, 20 cwt., and Hewetson's stope 30 cwt. of lead ore per fathom. The Salt Sump stope is yielding 30 cwt., and the Salt level rise 8 cwt., and the Salt level stope 10 cwt. of ore per fathom.

3rd December 1851. (London Gazette)
NOTICE is hereby given, that the Partnership heretofore subsisting between us the undersigned, as Lead Miners, at Crossfell, near Alston, in the county of Cumberland, under the name or firm of the South and West Crossfell Lead Mines Company, was this day dissolved, so far as regards the undersigned, Alfred Hall. —As witness our hands this 30th day of September 1850.
Alfred Hall, Henry Jefferson, Wm, Bell, Anne Fenwick, James Morrison, Elizabeth Fenwick.

12th December 1851 (Carlisle Journal)
Deaths
At Nenthead, on the 3rd instant, Ann, wife of Mr Thomas Moffatt, aged 40.
See 5th January 1878
At Alston, on the 4th inst., Ann Fairweather, aged 17 years.
In 1851, at Butts, Alston, Ann Bell, widow, pauper, aged 78, and granddaughter, Nancy Fairweather, garden lab, aged 18.
At Alston on the 7th inst, Frances, widow of the late Mr. Isaac Richardson, joiner, aged 59.
In 1841, at Edmunds Lane, Alston, Isaac Richardson, joiner, aged 45, his wife Fanny aged 45, children Thomas, joiner, aged 20, Hugh, lead miner, aged 20, Mary 15, Elizabeth 15, Charlotte 14, Ruth 12, Walton 9, and William 5.
Isaac Richardson died 2nd quarter 1847.
In 1851, at Bulman's Lane, Alston, Frances Richardson, widow, aged 57, sons Walton, joiner, aged 19, William, blacksmiths apprentice, aged 17, and grandson John Richardson 6.
See 19th June 1869.

2nd January 1852 (Carlisle Journal)
Deaths
Alston, on the 31st ult., Mr. William Little, aged 55 years.
See 2nd December 1837.

9th January 1852 (Carlisle Journal)

OPENING OF THE BRANCH RAILWAY TO ALSTON

It having been made known that the partial opening of this line would take place on Monday, Jan. 5th, the great bulk of the inhabitants of Alston Moor, and many from the adjoining mining vales, as well as great numbers from Knaresdale, &c., met together at the Alston station, on that morning, for the purpose or giving a hearty reception to the first locomotive ever seen in thisis neighbourhood, and to participate in the rejoicings of the day. The Alston band left Alston at 7 in the morning, and proceeded to about 3 miles below Alston where an engine was awaiting their coming, and took them down to Lambley, ten miles from Alston. The engine, which was splendidly decorated, and to which were attached three carriages, occupied by gentlemen connected with the railway, and others, and a number or coal waggons, then returned and proceeded on her way to the Alston station, where she arrived about half-past ten in the forenoon, amidst the deafening cheers of me crowd, the ringing of bells, and the roar of cannon. Every available place on either side of the line near the station from which a view could be obtained, was clad with wonder-gazing spectators— hundreds of whom never before beheld a locomotive "fire horse," or heard its shrill whistle. The stupendous limestone rock or scar, near the terminus at Alston which stands at a great height above the rail way, which runs along its base was literally crammed with spectators. This beautiful rock, which was cut, as with a chisel, and at great expence, will ever be an object of curiosity to the passenger. On the arrival at the station the coals were disloaded and then reloaded into a number of carts, which were drawn into the town of Alston by horses with bridles hung with rosettes and ribbons, and preceded by a band of music. These coals, consisting of about 70 Cartloads, were purchased from the proceeds of the church collections, and from other sources, and were distributed to the poor. As a matter of coarse, there was not wanting on this occasion a plentiful supply of “barley bree," several half barrels of which were given to the navvies and natives at the expense of the railway authorities, and of gentlemen belonging to the town; nor did the effects of this beverage fail to operate on its recipients, for the day's proceedings were wound up by half a dozen friendly pugilistic encounters, which were, however, not attended with any damage to person or property, for there were broken in the several combats neither chairs nor tables, pots nor glasses—the combatants having for their floor the sods and hard stones, and for their roof the canopy of heaven. Notwithstanding these fights, the common results of intoxication, it is but justice to the navvies to say that, during their residence at Alston and its vicinity, they have, with few exceptions conducted themselves in a peaceable, orderly, and becoming manner.

It is much to be regretted, however, that the proceedings of the day were greatly marred by a lamentable casualty, which happened to a boy of the name of Teasdale, belonging to Slaggyford, who fell from a waggon, the wheels of which literally cut off both his legs, and caused his death the following morning.

FATAL ACCIDENT AT THE OPENING OF THE ALSTON BRANCH RAILWAY.

A certain portion of the line of railway between Haltwhistle and Alston was opened for goods traffic on Monday last. The length is about nine miles, and extends between Lambley and Alston, opening a communication with the

collieries of Lord Carlisle. The first train proceeded from Lambley in the morning, and landed its cargo safely at the terminus at Low Byer. The engine was then taken back to Lambley to receive a fresh supply of water. On its return some coal waggons and trucks, without sides, were attached; two of these trucks were loaded with goods, one of them with slates, and the other with a puncheon of rum. This train stopped at Slaggyford Station, and the crowd were allowed indiscriminately to mount the trucks and other carriages. Amongst others, four boys—one of them named Joseph Teasdale, aged 15 years, living with his mother and step-father in Slaggyford —seated themselves at the hind end of the last truck but one of the train. When the train came within a few hundred yards of the station, the engine-man found it necessary to bring it to a standstill to avoid the immense crowd. The engine, on being put in motion again, gave the carriages a sudden jerk. The boy Teasdale was at this moment standing up; he was thrown back, and fell in between the two trucks. In the fall he caught hold of his companions, and was carrying him down when another boy saved him by catching hold of his legs. The fourth boy also fell to the ground. The wheels of the first truck were found to have passed over both the legs of Teasdale, and nearly separated them from the body.

He was removed to Mr Cranston's inn, it Low Byer, and immediately attended by the medical man of the town. He lingered till one o'clock next morning, when he died. The other boy, named Smith, had a narrow escape from death the wheel passed along his arm separating the skin and flesh from the bone. He is under the charge of Mr Thomas Bell, bonesetter, and is going on favourably. An inquest on the body of Teasdale was held before Mr Carrick on Tuesday, when a verdict of “Accidental Death" was returned, after some discussion on the want of proper care and precision on the part of the officials of the railway, in having no persons in charge of the train, and not preventing the crowd from sitting upon the carriages.

Deaths

At Low Farnberry, near Alston, on the 2nd instant, the wife of Jonathan Harrison, aged 34. *See 27th November 1841*

At Alston, on the 3rd inst., Mary, wife of Thomas Dryden, aged 39 years.

In 1851, at Thirlwalls Lane, Alston, Thomas Dryden, joiner & cabinet maker, aged 40, his wife Mary (Forster, married 3rd quarter 1838, registered at Penrith) aged 38, born Penrith, children, Elizabeth 9, Jane 7, Harriett 5, and Mary 3. Thomas Dryden died 1st quarter 1860, registered, at Penrith.

At Aimshaugh, near Alston, on the 5th inst. Miss *(Sarah)* Hymers, aged 21 years. *See 28th January 1848*

13th February 1852 (Carlisle Journal)

The Alston Moor Mining Company.— This company held a public meeting on the night of the last of January, in the large Assembly Room, Crown Inn, Alston for the purpose of allotting shares, reading over the rules, and explaining the system (cost book system) by which the company is to be governed. Mr. Richardson, the secretary, read and explained the rules, and convinced the half-frightened portion of the assembly that it was not a “joint stock company," but a company where every individual was individually responsible. At the close of this very interesting meeting, the crowd followed the secretary into an adjoining room where shares to a very large amount

were taken. We understand that Mr. Isaac Walton, of Brownside, near Alston and Mr. Richardson were the means of establishing this company; and we wish them every success. Alston has now a railroad, extensive tileries, splendid buildings, and its enterprising inhabitants seem to be making a great effort for improvement.

Deaths

At Alston, on the 3rd inst, Anthony Foster, aged 51 years.

In 1841, at Town Head, Alston, Hannah Foster, aged 25, sons Jacob 11 and William 1. Hannah died 4th quarter 1843.

In 1851, at Town Head, Alston, Anthony Foster, widow, lead miner, aged 50, sons Jacob 21, William 11, and domestic servant Margaret Clemitson 48.

See 11th February 1853

6th March 1852 (Newcastle Guardian and Tyne Mercury)

At Alston, on the 4th inst., John, youngest son of the late Joseph Dickinson, Esq., of Lovelady Shield, to Miss Hannah, daughter of John Cowper Esq., of Raise House, Alston.

In 1861, at Raise, Alston, John Cowper, retired draper, aged 68.

John Dickinson, draper, aged 41, his wife Hannah 41, children Mary 7, Sarah E 6, Frances H 4, visitor Phillis Errington, widow, annuitant, aged 38, and house servants, Hannah Greenwell 19, and Margaret Herdman 17.

See 29th August 1846, and 19th June 1869.

12th March 1852 (Newcastle Courant)

ALSTON TURNPIKE ROADS.

NOTICE is hereby given, that the TOLLS arising at the several Toll Gates, erected upon that Part of the Alston Turnpike Roads leading from Hexham to Alston, and called or known by the Names of SUMMERRODS, NUBBOCK. WHITFIELD, CLARGILL, NEWSHIELD BANK, and LANGLEY CASTLE TOLL GATES, and the PONTAGE or TOLL arising at the WEST BOAT BRIDGE, will be

LET BY AUCTION,

To the best Bidders, at the New Court House, in Hexham, on Tuesday, the 20th Day of April next, at twelve o'clock at Noon, in the Manner directed by an Act passed in the third Year of the Reign of his late Majesty King George the Fourth, "For regulating Turnpike Roads," which Tolls produced the last Year the Sums following, namely, the Tolls the Sum of £900, and the Pontage the Sum of £205, above the Expenses of collecting them, and will severally be put up at these Sums, or such other Sum or Sums as the Trustees may think fit.

Whoever happens to be the best Bidder must, at the same Time, pay one Month, in advance (if required) of the Rent at which such Tolls and Pontage may be respectively let, and give Security, with sufficient Sureties, to the Satisfaction of the Trustees of the said Turnpike Roads, for Payment of the rest of the Money Monthly; and such Sureties are expected to be present to sign the Securities.

J. RUDDOCK, ROBT. BAINBRIDGE Clerks to the Trustees of the said Turnpike Roads. Hexham, 9th March, 1852.

2nd April 1852 (Newcastle Courant)
Deaths
At Toronto, Canada, on the 29th of February last, aged 49, much respected, Mr Thomas Walton, formerly of Alston Moor, Cumberland.

9th April 1852 (Carlisle Journal)
Deaths
At Alston, on the 5th instant, Thomas Scaif, aged 81 years—a remarkable instance of longevity in a lead miner, a class of men whose lives are of proverbially short duration. Deceased worked seventy years in and at lead mines at Coalcleugh, in West Allendale, the property of W. B. Beaumont, Esq., who granted him a pension, which however, he was only privileged to enjoy during the last months of his life. He continued to work in a "partnership" till within two years of his death; and was more-over, for upwards of fifty years the occupant of the same house in which he drew his last breath.
Thomas Scaife married Elizabeth Williamson, at Alston, 5th October 1797.
Children: —
Ann born, 2nd November 1797,
Isaac born, 9th November 1799,
Thomas born 2nd April 1802,
John born 14th January 1804,
Thomas born 2nd June 1807,
James born 5th October 1809.
Elizabeth Scaif was buried 28th March 1826, aged 62.
In 1841, at Town Head, Thomas Scaif, lead miner, aged 65, Ann Scaife 40, and Thomas Scaife lead miner, aged 30.
In 1851, at Front Street, Thomas Scaife, widow, lead miner, aged 80, born Allendale, and his daughter Ann, aged 53, born Alston.
In 1851, at Bruntley Syke, Thomas Scafe,, lead miner aged 44, his wife Ann aged 33, and daughters, Elizabeth 8, Mary 5, and Sarah 1 year.

9th April 1852 (Durham County Advertiser)
An inquest was held on Tuesday last, at the High Force Inn, in the parish of Middleton in Teesdale, before Wm. Trotter, Esq., on view of the body of John Allinson, a miner at the Ashgill Head Lead Mine. On the previous Thursday the deceased was riding up the level in the mine on a wagon laden with stones. The level was about 6 feet in height and 3 ½ wide. Henry Walton, another miner was lying on the same waggon, when the deceased fell backwards over upon him shouting "oh dear." The horse was immediately stopped, and he was at once removed to the mining shop and medical attendance procured. There were no wounds about him but he had lost the use of his limbs, and was quite prostrate. He died on the following day. The deceased was a tall man, and it appeared that he had been caught on his jacket by something from the roof and knocked over, thus getting a twist in the neck which injured the spine. There was a written order at the mine forbidding the men from riding on laden waggons. Verdict, "Accidently killed."
John Allinson, aged 32, was buried at St Mary the Virgin, Middleton in Teesdale, 6th April 1852

23rd April 1852 (Carlisle Journal)

CAUTION!!!

TO MINE AGENTS AND OTHERS.

THE following Men have been DISCHARGED from the KESWICK MINES, for wilfully breaking one of the Rules, and for combining together to resist the enforcement of the Penalty: —

Thomas Jones	Thos. Martin
John Lancaster	William Barnes
J. Davidson	James Barnes
Jos. Robinson	Thomas Coulson

(Signed) RD. BRIGHAM SHEPHERD.
Portinscale, April 15th, 1852

23rd April 1852 (Newcastle Courant)

Upwards of 250 men, women and children left Penrith, last week, for Liverpool. The men who are mostly natives of Alston and its neighbourhood are engaged by Mr Thompson of Hexham, formerly mine agent at Greenside, as workmen in the Government goldmines of Bathurst, Australia. Married men have the voyage expenses defrayed for themselves, their wives and two children each. When landed the men will receive a monthly wage of six pounds. The Alston band accompanied the emigrants from Alston to Penrith.

14th May 1852 (Carlisle Journal)

Inquests before MR. LEE, Deputy CORONER. —On the 7th inst., on view of the body of William Craig, miner, aged 20. On the 5th instant, deceased was working in the Rodderup Fell Mine, and whilst preparing to remove from the side of the low level a large stone, weighing about two cwt., it suddenly fell upon the back of his neck and forced the front of his neck upon apiece of timber which he was in the act of lifting, whereby he received several severe injuries from which he died in the course of the following day. Verdict—" Accidental death."

William Craig, baptised 15th August 1822, at St John's, Garrigill, son of William and Thamer Craig.

In 1841, at Middle Craig, Garrigill, Tamar Craig, widow, aged 45, children, William, lead miner, aged 15, Isaac, lead miner, aged 15, Jane 13, and Elizabeth 7.

In 1851, at Red Brow, Garrigill, Tamar Craig, widow, aged 56, born, Garrigill, children, Isaac lead miner, aged 26, and Jane 23.

Tamar Craig, was buried at Garrigill, 17th March 1861.

William Craig married Mary Holmes, 2nd quarter 1849, at Alston.

In 1851, at Ewe Hill, Alston, William Craig, lead miner aged 28, his wife Mary 26, and children Hannah 3, and William 1.

*In 1861, at Dodberry, Garrigill, Alston, Elizabeth Holmes, farmer of 28 Acres, aged 62, sons, Isaac, lead miner, aged 29, George, lead miner, aged 26, William, lead miner, aged 22, daughter Mary Craig, domestic servant, aged 36, grandchildren, Hannah 14, and William 11.**
Miss Mary Craig married John Morrow, at Alston Church on the 26th August 1861, both of Garrigill. See 30th August 1861

In 1841, at Snappergill, Garrigill, Jane Parmley, farmer aged 60, John Morrah, lead miner, aged 30, Nancy Morrah aged 20, and Jane Parmely 1.
In 1851, at Beldy, Garrigill, John Morrow, lead miner, aged 40, his wife Nancy (married 3rd quarter 1840) aged 31, children, Jane 11, William 5 months, and mother in law Jane Parmley, widow, aged 74. Jane Parmely was buried 17th January 1853, aged 76.

William Morrow, of Beldy, aged 9 months, was buried 26th June 1851, Nancy Morrow of Beldy, was buried 9th August 1852 both at St John's, Garrigill.

In 1861, at Beldy, John Morrow, widower, lead miner, aged 51.
In 1871, at Beldy, Garrigill, John Morrow, lead miner, aged 60, his wife Mary aged 46, children, John 9, and George 5.
John Morrow, aged 66, was buried 30th May 1877, at St John's, Garrigill.
In 1881, at High Beldy, Mary Morrow, widow, grocer, aged 56, sons, John, lead miner, aged 19, George, lead miner, aged 15, and boarder, Robert Morrow, lead miner, aged 67.
**William Craig married Tamar Holmes, 4th quarter 1870, registered at Alston.*
In 1871, at Snappersgill, Garrigill, Daniel Holmes, lead miner, aged 41, his wife Mary 38, son William 12, Boarders, William Craig, lead miner, aged 21, and his wife Tamar aged 18.
In 1891, at School St, Gateshead, William Craig, fitter, aged 41, his wife Tamar, aged 38, children, Elsie 16, born Benwell, and Thomas 6, born, Garrigill. In 1901, at Holly Terrace, Gateshead, William Craig, Machine Minder "Iron", aged 51, his wife Tamar 48, and son Thomas W, drapers assistant, aged 16. In 1911, at 229 St Cuthbert's Road, Gateshead, William Craig, dairyman, aged 61, his wife Tamar 58, and son Thomas, Hosier assistant, aged 26.
Probate
Tamar Craig, wife of William Craig, died 7th August 1919, at 229 St Cuthbert's Road, Gateshead, administration to William Craig, dairyman, effects £233 17s 7d.
William Craig, died 12th December 1919, at 229 St Cuthbert's Road, Gateshead, administration to Thomas William Craig, draper, effects £262 1s 7d.

21st May 1852 (Carlisle Journal)
Deaths
At Alston, on the 16th inst., Thomas Brown aged 60.
In 1841, at Potato Market, Thomas Brown, lead miner, aged 45, and Mary Brown aged 50. In 1851, at Front Street, Alston, Thomas Brown,widower, lead miner, aged 58, and his sister Mary Brown, aged 55.
At Alston, on the 17th inst., Joseph Parker, aged 39.
In 1841, at Skelgill Rigg, Joseph Parker, lead miner, aged 25, his wife Elizabeth aged 25, children Mary 2, and John 1.

In 1851, at Bank Foot, Alston, Joseph Parker, lead miner, aged 39, his wife Elizabeth (Parker, married 10th June 1837, Alston) aged 35, children Mary 12, John 11, Joseph 8, Elizth 6, Jane 2, and nurse child William Dalton 1.
In 1861, at Physic Hall, Bank Foot, Elizabeth Parker, widow, dealer in confectionary, aged 45, children Joseph, lead miner, aged 18, Elizabeth, spinner at woollen mill, aged 15, Jane, spinner at woollen mill, aged 12, Robert 9, and James 2.

4th June 1852 (Carlisle Journal)
Deaths
At Alston, on the 30th ult. suddenly, Mr. J. Thompson Low, aged 45 years.
John Thompson Low, married Hannah Clint, 26th January 1837, at Alston.
Hannah Low was buried at Alston, 18th November 1837, aged 31.
In 1851, at Butts, Alston, Ann Robson, widow, aged 62, son William, road labourer, aged 19, lodger Thompson Low, widow, lead miner, aged 43, and lodgers son Thomas 13 (baptised 10th September 1837).
See 21st August 1841, 28th June 1873, 25th March 1876, 27th May 1882, 20th June 1885, 4th April 1891, 3rd February 1894 and 29th August 1896.

12th June 1852 (Newcastle Guardian and Tyne Mercury)
CORONERS' INQUESTS. —On the 4th instant, S. Reed, Esq., held an inquest at Coldcleugh, Allenheads, on T. Hutchinson, aged 11, who was drawn in amongst the wheels of a crushing mill, and received such injuries as to cause his death in a short time. Verdict "Accidental death."
In 1851, at Coalcleugh, John Hutchinson, Lead ore washer, aged 40, his wife Elizabeth 41, children, Jane 12, Thomas 10, Margaret 8, William 6, John Liddle 5, and mother Elizabeth Hutchinson, lead smelters widow, aged 74 (buried at Carrshield 20th April 1853, aged 76).

Added by:Lost Ancestors

Jane Hutchinson of Coalcleugh was buried at Carshield 3rd May 1859, aged 20.
In 1861, at Coalcleugh, John Hutchinson, Lead ore washer, aged 50, his wife Elizabeth 51, children, Margaret 18, William, lead ore dresser, aged 16, John L., lead ore dresser, aged 15, and Henry J 9.
In 1871, at Holling Close, Allendale, John Hutchinson, widower, farmer of 75 acres, aged 60, children, Margaret 28, John L, Ag. labourer, aged 23, Henry J, farmers son, aged 19.
Probate 8th January 1874
The Will of John Hutchinson late of Hollin Close, in the parish of Allendale in the county of Northumberland, yeoman, who died 25th March 1873 at Hollin Close was proved at Newcastle upon Tyne by John Liddle Hutchinson of Hollin Close, lead ore miner, and Henry James Hutchinson of Hollin Close, farmer the sons and Margaret Forster (Wife of John Forster, Farmer) of Nine Dargue, Allendale the daughter the executors. Effects under £200.

25th June 1852 (Newcastle Courant)
Marriages
At the Independent Chapel, Clayton Street West, on the 17th inst., Mr Matthew Batey, engineer, son of the late Mr Batey of Alston, to Sarah, eldest daughter of Mr Jonathan Walton, of this town, formerly of Alston.
In 1861, at William Street, Westgate, Newcastle, Matthew Batey, engine fitter, aged 33, born Alston, his wife Sarah, aged 30, born Alston, children, John W 6, Marg A 4, Thomas H 2, and Jacob 1 month.

10th July 1852 (Newcastle Guardian and Tyne Mercury)
Deaths
At Weardale, at White House, on the 6th inst., at an advanced age, George Crawhall, Esq.

16th July 1852 (Newcastle Courant)
During the great storm on Monday the 15th inst., a boy, 11 years of age, named Thomas Redshaw, son of Mr Whitfield Redshaw, of High House, Weardale; was returning home about two o'clock, when he was struck by the electric fluid and killed on the spot. His skin was much scorched, his trousers were torn down and one of his boots had the same appearance as if it had been fired at with a gun loaded with small shot. An inquest was held the following day, and a verdict according to the above circumstances returned.
In 1841, at High Houses, William Redshaw, lead miner aged 45, William aged 12, Jane 8, Whitfield, lead miner, aged 20, and Sarah 20.
In 1851, at West Highhouse, William Redshaw, widow, farmer of 22 acres, aged 58, daughter Jane aged 17, son Whitfield, lead miner, aged 35, daughter in law Sarah, aged 27, grandsons, Thomas 10, and Paul 7.
In 1861, at High Houses, William Readshaw, widow, formerly lead miner, aged 68, son Whitfield, lead miner, aged 41, daughter in law, Sarah 38, grand children Paul, iron miner, aged 17, Thomas W 4, Elizabeth 1, and house servant, Sarah A Low 21.

23rd July 1852 (Carlisle Journal)

VALUABLE LEAD MINES TO BE SOLD,

On Tuesday, July 27.

To be SOLD, by PUBLIC AUCTION, by order of the Executors of the late Isabella Penman, at Mrs. Errington's, Blue Bell Inn, ALSTON, on Tuesday, July 27th, 1852, at Six o'clock in the Evening, all those well-known LEAD MINES, called the "GALLIGILL SYKE and BENTS," situated about Three Miles East of Alston, Cumberland, held by square grant under Greenwich Hospital. They have, of late years, although only partially opened out, been very productive, having raised, in some single years, upwards of 300 Tons of Ore.

The Lead is of the very best quality, and yields upwards of 20 Ounces of Silver in the Ton.

Mr. JOSEPH CAIN, who lives upon the Premises, will show the Mines; and further Particulars may be had by applying to Mr. JOHN MIDDLETON, Brough, Westmoreland, or Mr. THOMAS PENMAN, Bridge Street, Newcastle.

6th August 1852 (Newcastle Courant)

Deaths

At Alston, on the 28th ult., aged 44, Tamar, youngest daughter of the late Mr William Walton, formerly of Raise, near that place.

In 1841, at Market Place, Alston, Tamar Walton, independent, aged 68, Ann Walton, straw bonnet maker, aged 35, and Tamar Walton, straw bonnet maker, aged 30.

In 1851, at Front Street, Alston, Ann Walton, straw bonnet maker, aged 48, and her sister Tamar, straw bonnet maker, aged 42.

3rd September 1852 (Newcastle Courant)

Marriages

At Stanhope, on the 28th ult., Mr Cowper Cain, draper, St John's Chapel, Weardale, to Miss Isabella Currah, Shittlehope Burn, near Stanhope.

Isabella died 4th quarter of 1854, at Weardale.

See 4th April 1856, and 7th September 1895.

3rd September 1852 (Carlisle Journal)

NENTHEAD AND GARRIGILL FLORAL AND HORTICULTURAL SOCIETY.—The third exhibition of this society was held in the Lead Company's Schoolroom, at Nenthead, on Friday last. The room was beautifully decorated with festoons of evergreens and flowers. The judges (Messrs. Tindale, Mason, and Pinkney) were met by the brass band belonging to the place, and received a hearty cheer as they passed the show-room. At half-past ten o'clock the judges entered the show-room, and proceeded to award the prizes. On the conclusion of their labours great satisfaction was expressed at the manner in which their duties had been discharged. The day was fine, and the attendance numerous, not less than seven hundred persons being present. Refreshment was provided by the society at cheap rate. The show of fruits and vegetables did great credit to the cottagers. The flowers exhibited were in a high state of cultivation, particularly the fuchsias, which would have done credit to any grower. The best light specimen shown was a fine large graceful plant

of Delicata, covered with large clusters of beautiful blossoms, and which gained a high eulogium from the judges. Myles' Purity stood a good second. The best dark variety was large and well-grown plant of Exoniensus, the second best was a splendid plant of Dr. Smith. Four beautiful Lilium Lancifoliums were exhibited by the cottagers. In connection with the flowers, &c. four beautiful cases of minerals were exhibited. One of the cases, which was got up Mr. Isaac Robinson, was valued at thirty guineas. Mr. Robinson was an exhibitor at the great Industrial Exhibition of 1851. The excellent performance of the band which was in attendance during the day contributed much to the gratification of the numerous visitors to the exhibition. The show altogether was decidedly the best ever held at Nenthead. The whole proceedings passed off favourably, and much credit is due to all parties concerned.

Marriages

At Alston, on the 2nd inst., Mr William Green, joiner, to Miss Margaret Armstrong, of the Dunn Cow Inn, Alston.

Deaths

At Alston, on the 29th ult., John, son of Mr John Vevers, aged 13 years.

At Wanwood Hill, near Alston, on the 30th ult., Henry, son of Mrs Rain, widow, aged 20 years.

See 9th December 1843

1st October 1852 (Newcastle Courant)

Deaths

At Alston vicarage, on the 28th ult., aged 80, the Rev Hugh Salvin, vicar of Alston.

2nd October 1852 (Newcastle Journal)

THE LATE VICAR OF ALSTON.

The Rev. Hugh Salvin, Vicar of Alston was the youngest child of his parents, Anthony Salvin, Esq. of Sunderland Bridge, and Anne his wife, daughter of George Smith, Esq. of Burn Hall. The Salvins of Sunderland Bridge were descended from a younger son of the House of Croxdale, one of the most ancient families in the County of Durham.

Jeffrey and Hugh Salvin, twin brothers, were baptised at Croxdale June 6, 1773. Hugh (with whom we are at present concerned) became a member of St. John's College, Cambridge; and, being intended for the medical profession, took the degree of M.B. in the year 1795. Owing, however, to an extreme sensitiveness, which he felt would prove an effectual hindrance to the proper discharge of his professional duties, he abandoned medicine, and, turning his mind to Divinity, subsequently entered into Holy Orders.

About the year 1808 he succeeded the Rev. John Hodgson (the late lamented Historian of Northumberland) in the Curacy of Gateshead, and continued to act in that capacity under the Rev. Dr. Phillpotts, now Bishop of Exeter, and the Rev. John Collinson, now Rector of Boldon, for many years making himself generally acceptable to the parishioners by the amiability of his disposition and the agreeableness of his manners. In 1814, he preached at St. Mary's, Gateshead, a thanksgiving sermon on the overthrow of Napoleon Bonaparte, which was afterwards printed. In 1824, he was appointed chaplain to H.M.S. Cambridge (Captain Maling), in which vessel sailed as one of the

midshipmen the son of his Rector, Capt. Rich. Collinson, C.B. who has since so honourably distinguished himself, and is now engaged in the Arctic Seas in, the chivalrous search for Sir John Franklin and his brave companions. The Cambridge was stationed off the coasts of Peru and Chili during the eventful period of the struggle between Spain and her Colonies in South America. After his return to England, Mr. Salvin printed at Newcastle in 1829 his very intelligent and interesting Journal written on board H.M.S. Cambridge from Jan. 1824 to May 1827. Appended to this was an Epistle to Prospero (or under the title Bolivar), translated into blank verse from the original Spanish of Jose Maria de Paudo.

On a subsequent voyage in H.M.S. Iris, Mr. Salvin also kept a journal (not, however, printed), which, describing as it did what came within his observation in coasting along the classic shores of Italy and Greece, could not fail to possess much interest. In1841, Mr. Salvin was presented by the Governors of Greenwich Hospital to the Vicarage of Alston, in the County of Cumberland, though in the Diocese of Durham. Here in this remote and. until lately, almost inaccessible locality, he has endeared himself to the inhabitants by the constant attention he has paid to their best interests, and the uniform zeal which he has displayed in the promotion good works and useful undertakings.

During his Incumbency, through his exertions and by his munificent aid, National and Infant Schools, together with accommodation for a mistress, have been erected. An additional Church has also been built at Nenthead, the first minister of which was the Rev. Blythe Hurst, the self-taught blacksmith of Winlaton, who, upon his ordination by the Bishop of Durham in 1842 commenced his clerical duties under Mr. Salvin's auspices as Curate of Garrigill, in the parish of Alston. Mr. Salvia died on the 28th of Sept. 1852. being in his eightieth year. He had been married at St. Mary's Church, Gateshead, in 1841 to Julia Alice, eldest surviving daughter of the late Anthony Surtees, Esq. of Hamsterly Hall, in whom he found a lady who has zealously co-operated with him in all his labours of love. During the earlier part of his life, Mr. Salvin was engaged in tuition and surely, no one could have been more happily fitted for such a task. He was not only a ripe scholar and good classic, but a keen and intelligent observer of all that was passing in the world. He had an insatiable thirst for knowledge and Information on every subject, and possessed the rare faculty of being able to communicate to others, and to the young especially in the most lucid and agreeable manner, the treasures of a well-stored mind. He was also an Oriental Scholar, conversant with Hebrew and Arabic, whilst with most of the modern languages of Europe he was quite familiar, and ready at all times to turn his talents as a linguist to good account, and make himself useful where-ever he had an opportunity. Thus, we find him employed on several occasions as interpreter between the officers of the Cambridge and the Spanish authorities. Then we find him in 1839 most humanely volunteering to attend Ehlert, a Prussian Convict in Durham Gaul, condemned to death for the murder of his captain in Sunderland Harbour.

2 October 1852 (Newcastle Guardian and Tyne Mercury)

ZINC PAINT.

THE VIEILLE MONTAGNE ZINC MINING COMPANY beg to inform Manufacturers and Dealers in Paints generally, that they have established

a Branch Depot at Newcastle-on-Tyne, for supplying the North of England with their WHITE OXIDE OF ZINC and ZINC PAINT, in a pure state, and of a quality which can only be manufactured with the Zinc from their Mines in Belgium.

The PATENT WHITE ZINC PAINT is superior in every respect to White Lead Paint, less expensive, free from all poisonous influence, and is unaffected by Sea Water, Sulphurated Hydrogen, or any Gases, as well as preserving its original Colour.

WHITE ZINC PAINT causes none of those ravages invariably engendered by White Lead upon the human frame, when used in a pure state. If adulterated, it becomes a very inferior Paint instead of a first-rate one.

Also, a very cheap and superior GREY PAINT, suitable for Ships and all other common outside work, &c. Sold Wholesale and Retail.

For particulars, &c., apply to

MR BENJAMIN PLUMMER,

Agent for the North of England; or Mr K. DETCHON,

4, Walker Place, North Shields.

Offices, No. 7, Quayside, Newcastle-on-Tyne.

8th Oct 1852 (Carlisle Journal)

ALSTON ROYALTIES

MINING IN THE NORTH OF ENGLAND.—

For some time past there has existed a desire among a number of parties in this neighbourhood to open out fresh mines on Alston Moor. The high royalties, or dues however, still demanded by the trustees of Greenwich Hospital have offered an almost insuperable harrier to such an undertaking. The following letter addressed to the Mining Journal, and bearing on the question is deserving of attention: —

Mining in The North of England. —High Dues “Sir, — I have recently had occasion to visit some of the most extensive mineral districts in the north of England and in Scotland, including a portion of the coal formation, &c, in the neighbourhood of Newcastle-on-Tyne, and was also solicited to inspect the district of Alston Moor, in Northumberland, so renowned in former days for its great production of lead ore; but in latter years the hand of industry may be said to be paralyzed, which, from the information afforded me, is attributable to the high terms demanded by the trustees of the Greenwich Hospital estates for leasing their mines.

High royalties or dues might have done very well a couple of centuries ago, when large quantities of minerals, particularly lead ore, were found near the surface, in the shape of floors or channels of ground; but as these great deposits appear to be exhausted, and capital combined with mining skill is required to discover and develop the mineral resources of this district, I see very little prospect of any good being done in the shape of promoting the prosperity and general welfare of the same, unless the royalty is considerably reduced —and as great bodies are said to move slowly, much valuable time, no doubt, must be sacrificed ere they see their error. I also found that the Duke of Cleveland was equally high in letting his mineral estates, although thousands of acres of land lay almost, if not entirely, useless, for want of cultivation and inhabitants.

“The mountain range of limestone traversing a great portion of Northumberland and Cumberland doubtless contains vast deposits of mineral, particularly that of lead ores, and it appears to me to be of the same character of limestone (carboniferous) as the productive mineral district of North Wales. I have no doubt that the manor of Knaresdale, which comprises some 10,000 or 12,000 acres of land adjoining the Alston Moor estates, contain immense quantities of coal and lead ores, and if leased on liberal terms would, in a few years, yield large and profitable returns. The geological features of this property, so far as I was able to judge from my inspection, led me to the conclusion that mineral existed there in large quantities, and that proper management, combined with capital, would open out the district, and cause the traffic of this barren portion of the north of England to become of great importance, and increase the value of property very considerably, particularly as there is now a branch of the Newcastle and Carlisle Railway recently made through this district to Alston. The prosperity of Cornwall depending almost entirely upon the success of its mines, the advantage arising from liberal dues may be considered of equal importance in this country as in Northumberland and Cumberland. In California and Australia mineral is found on the surface, and in great quantities, a few feet below the surface, imbedded in the alluvial soil resting on the fast or solid strata; so it was in Cornwall in the days of the Phoenicians, and to a certain extent exists at the present period; but as time passed on other deposits were d covered in veins, or lodes, requiring skill and science to develop them; hence the landed proprietors have found out, by degrees, that they must put their shoulders to the wheel, and reduce the dues—the result of which is that Cornwall may be considered to stand pre-eminent as a mining county; and the great prosperity at the present time may be shown by the fact, that a single acre of land in many districts is returning to the owner of the estate several hundreds a year, in dues or royalty, which, under a less liberal system, would not pay 10s. an acre annually. The dues or royalty in Cornwall now vary from 1-8th to 1-24th of its produce.

“ABSALOM BENNETT.

“Moorgate-street, London, Sept. 28.

12th November 1852 (Carlisle Journal)

NOTICE is hereby given, that a separate Building named **REDWING MEETING-HOUSE**, situated at REDWING, in the Parish of Alston, in the County of Cumberland, the District of Alston and Garrigill, being a Building certified according to law as a Place of Religious Worship, was on the Eighth day of NOVEMBER, One Thousand Eight Hundred and Fifty-Two, duly REGISTERED for SOLEMNIZING MARRIAGES therein, pursuant to the Act 6th and 7th Wm. IV., c. 85. Witness my hand this 10th day of November, One Thousand Eight Hundred and Fifty Two. WILLIAM GUY, Superintendent Registrar.

who died May 30th 1900 aged 85 years

19th November 1852 (Carlisle Journal)
Lead Mine, Newlands.—The recently discovered lead mine at Goldscope continues very auspicious. An additional number of workmen have been engaged during the past week, and it is confidently expected that a further supply will be added in the course of a week or two.

3rd December 1852 (Newcastle Courant)
The Tees Side mining company, have recently cut a rich vein of lead ore, in the extensive mining grant held by them at Tyne Head, near Alston. It is stated that the vein is about 9 feet wide."

19th December 1852 (Reynold's Weekly Newspaper)

LIFE IN AUSTRALIA.

We have been favoured by the following letter from the brother of a young man named Hudspeth, who emigrated to Australia from Carshield, West Allendale, Northumberland, last May, with a party of seven other young men:

"Melbourne, Australia, August 29th, 1852.

"My dear Brothers and Sisters, —I take the opportunity of sending you these few lines to let you know of my safe arrival at this place on the 28th, after a splendid passage of eighty-three days; we crossed the line on the 4th of July, and passed the Cape of Good Hope on the 27th, and cast anchor in the Bay of Port Philip the 25th instant. We never saw land after leaving the coast of Ireland until the morning of the above date; we had no deaths on board, or very little sickness, and one birth. I cannot describe to you every particular on our passage at present, time not permitting; all is anxiety and bustle in this place at present; there has been two months of very rainy weather in Australia, consequently there has not been much doing at some of the diggings. The town is quite full of people; lodgings can scarcely be had for either love or money, the roads to the diggings being nearly impassable for any sort of conveyance or travelling on foot. Many persons have been drowned, the bridges been swept away, and rivers overflooded; also great holes with bullock drays sticking fast, and having them to dig out, the holes filling up with water. Some drays have now been ten weeks on the road, about one hundred miles, and not arrived there yet. You have no idea of Melbourne at present—you cannot know the rich from the poor. I think there cannot be any of the latter, if they only have health. If there are two persons walking in Melbourne, the one finely dressed, the other in fustian clothes and blue shirt or blouse, if either is attacked by robbers it will be the latter, as they will suspect him to be a digger, therefore he will have plenty of gold or cash about him; there are robberies of this sort happening frequently when the party is only one or two; or if people get drunk in Melbourne, they will be watched and eased of their cash. Hence the necessity of always carrying a loaded pistol or two with you, which I assure you are exorbitant prices, Colt's revolvers as much as 30l. each, common single barrelled pistols, 4l. each; guns not being in such great demand as the former, being so much heavier for taking up to the diggings. The best plan I believe, at present, is to have as little luggage as possible with you, as there are places where people are up to their middle in mud and water, and sometimes, to pull out, stuck quite fast. We have engaged the time we stay in Melbourne to pay 1s. 6d. a meal for our victuals and to find our own beds and bedding, and a place to lay them free of charge, and we think ourselves fortunate in finding such a place. We have mutton or beef to every meal, which is very plentiful here, I assure you.

"I have not had much time to look around it yet. Wages of all kinds are extremely high at present. Joiners and stonemasons, mostly wanted, can get very near as much as they have a mind to ask, owing to so many getting rich at the diggings and buying ground in the town and building houses and shops. Any person that can work may earn four times the wages he can have in England. Should any of my friends or acquaintances think of coming out this next year, I should recommend them to start about the same time we started from England; but before ever they think of coming out here they most make up their minds to undergo privations and hardships, the same as I expected

and have found. But there are hundreds braving it and making their fortunes who never wrought a day's work in their life—the diggings being quite as good now as ever they have been, is the report at this place. Very near every shop in Melbourne has a notice up that they buy gold and give the best price for it; the value here is about 3l. 4s. per ounce, and a man that hires to dig has an ounce of gold per day; but very few, I believe, will hire, nearly all preferring to pay the license, which is 80s. per mouth still, and there is a talk of intending to raise the license to 3l. a month.
"At present, our party all enjoy good health, and in good spirits; none of us have rued the day we left England, but quite the contrary, and we are all anxiety to be at the diggings and commence operations as soon as possible. I very near forgot to notice what a good trade begging is in Melbourne; there is a blind man making as far as 5l. per week, I hear. I have not seen copper used here for change the blind man I saw myself was receiving his alms in sixpenny and shilling pieces of silver, but he is the only one I have met here yet. The Allendale people would be quite astonished if any of them were here only one day."

24th December 1852 (Newcastle Courant)
Marriages
At Gateshead, on the 14th inst., Mr William Sparke, surveyor, of Sparty Lee, eldest son of the late Mr James Sparke, of Lillswood, to Miss Dawson, of Allenheads.

7th January 1853 (Carlisle Journal)
Marriages
At Alston Church, on the 30th ult., by the Rev. Daniel Ace, Mr Thomas Snowden, stone mason, to Miss Sarah Johnson, of the Turks Head Inn.
Deaths
At Dryburn, near Alston, on the 30th ult., Mr Francis Whitfield, aged 84.
In 1841, at Far Dryburn, Francis Whitfield, independent, aged 70, and Thomas Whitfield, independent, aged 60.
In 1851, at Dryburn, Garrigill, Elizabeth Watson, widow, farmer, aged 45, children, Thomas, lead miner, aged 25, John, lead miner, aged 22, Joseph, lead miner, aged 20, Mary 16, Jane 7, mother in law, Elizabeth Watson, widow, annuitant, aged 87, and Brother in law, Francis Whitfield, widower, annuitant, aged 84.
See 20th December 1845
At Whigglety, near Alston, on the 3rd inst., Elizabeth, widow, of Joseph Hall, aged 41.
Joseph Hall married Elizabeth Hymers 9th October 1834, at St Augustine's, Alston. In 1841, at Foreshield, Alston, Elizabeth Hall, farmer, aged 25, children, John 6, and Ann 5 months.
In 1851, at Hudgill, Elizabeth Hall, lead miners widow, aged 40, children, John, lead miner, aged 16, Ann 10, Eliza 7, and Hannah 2.

21st January 1853 (Carlisle Journal)
WANTED an unmarried FRENCH TEACHER, for the GARRIGILL GATE GIRLS SCHOOL. The Committee guarantee a Salary of not less than £30 a

year.—Further particulars may be known by application to Mr. THOMAS DOBSON, of Garrigill Gate, near Alston, until the 21st Feb., 1853.

29th January 1853 (Kendal Mercury)

KESWICK, &c.

Accident.—At about two o'clock Wednesday morning last, a shocking accident befel Mr James Kelly, who, in company with some other workmen, was engaged in sinking a new shaft at the Brandley lead mine, near Keswick. A barrel, which is used for the purpose of drawing the superfluous water, by some unaccountable means became detached from the rope which it was suspended, and was precipitated down the shaft, distance of 9 fathoms, and falling against the head of Mr K., bruised it in a shocking manner. He remains quite insensible, and has not spoken to any one since; indeed, very little hopes are entertained of his recovery.

4th February 1853 (Carlisle Journal)

Deaths

At Low Bailes, near Alston, on the 29th ult., Mr. John Woodmass, aged 55 years

In 1841, at Bales, John Woodmass, innkeeper, aged 40, his wife Ann (Clementson, married, 18th October 1827, at Alston) aged 40, children Margaret 13, Sarah 12, John 10, Ann 8, Jonathan 6, Mary 5, and Jane 1.
In 1851, at Low Bayles, John Woodmess, lead miner, aged 53, his wife Ann 54, children John, lead miner, aged 20,Ann, domestic duties, aged 18, Jonathan, lead miner, aged 17, John 10, Elizabeth 6, and Margaret , dressmaker, aged 23.
In 1861, at Low Bailes, Ann Woodmass, widow, innkeeper, aged 65, Mary, dressmaker, aged 24, Elizabeth, innkeepers daughter, aged 17, and grandson, John Hodgson, aged 6.
Ann Woodmass died 2nd quarter 1870, aged 73. See 16th February 1866

4th February 1853 (Newcastle Courant)

Marriages

At Newcastle, at St Andrew's Church, on the 26th ult., Mr Alexander Walton, blacksmith, Allenheads, Allendale, to Miss Rebecca Wabbs, of this town.

11th February 1853 (Carlisle Journal)

Deaths

Alston, on the 5th inst., Jacob, son of the late Anthony Forster aged 22.
See 13th February 1852

11th March 1853 (Newcastle Courant)

TO PARISH CLERKS AND OTHERS.—WANTED, the BAPTISMAL REGISTER or REGISTER of BIRTH of ISAAC CRAWHALL, who was born at Whittlee Shield in West Allen, Northumberland, on or about the 19th April 1795. A reward of Five Shillings will be paid on a correct certified copy of the same being forwarded to Joseph Crawhall, Jun., St. Ann's Ropery Office, Newcastle upon Tyne, March 10th, 1853.

2nd April 1853 (Carlisle Patriot)

LEAD MINING IN THE KESWICK DISTRICT, CUMBERLAND.

(From the Mining Journal, March 26)

Sir You remarks in the Journal of 12th having drawn great attention to the Keswick mines, I think it may not be uninteresting to the mining world if I give a slight sketch of the present state and prospects of these and other mines now working the immediate neighbourhood of Keswick. In the Keswick Mining Company's sett, Brandley, there is a new shaft being sunk to cut the vein at depth of 50 fms. from surface and is now down 20 fms.; this will open out 30 fms. of whole ground directly under a run of orey ground, from which run of ore alone nearly 300 tons of ore have been taken since August, 1851. It is contemplated cross-cutting at 30 fms., where large returns of ore can be made at once. In the old engine-shaft there are two pitches now working, which are nearly paying the whole expenses of the mine. A 30 fm. level is being driven north on the vein to communicate with the one that will be driven south from the cross-cut in the 30 at the new shaft; this will open out nearly 800 fms. of whole ground. The 20 fm. north is being driven to out some pipes of ore to the north of the new engine-shaft. For some time the lode has been poor in this end; but it is now much improved, and will yield present about 6 or 7 cwts. to the fathom. This level will open about 17 fms. of backs below the adit, and beyond this adit level a very great quantity of virgin ground, it is being driven obliquely into a high mountain on the same lode as Old Brandley, from which large quantities of ore have been taken by the ancients. The engine and washing machinery will be removed to the new shaft, where it is down 30 fms.

BARROW MINE. —There are six men working tribute here, and are making a profit of about £20 per month. More active operations are now contemplated, no work having been done below the adit for want of power. Very large quantities of ore have been raised from this mine, but latterly it has principally been worked on tribute, that the mine has been left in a very impoverished state.

THORNTHWAITE MINE. —The 37 fm. level is nearly driven home to the run of ore passed over in the 27 fm. level, and from which very good ore was raised in places, worth 2 tons to the fathom, and also to prove the rich gossan so highly extolled by all those who have inspected this mine. The level is being driven by the side of the vein for ease, and small string of ore running into the vein, worth about 2 to 4 cwts. per fathom, has just been cut. It is contemplated cutting into the vein about 2 or 3 fms., when ore will again be raised.

GOLDSCOPE MINE, in the adjoining sett, is still yielding a large quantity of ore—one end being now worth fully 5 tons per fm. There is now lying at surface about 100 tons of ore, which has been principally taken from the level alone—the work of four men: 20 tons of solid ore have been taken to pile from the grate, and only about a fourth part of the work gone through. This is the most splendid discovery that has been made in this district, and is likely to reward richly the spirited proprietors, as there are 60 fms. of backs above the adit; and about more may obtained by driving up level about 70 fms. from the Old Copper Mine shaft.

YEWTHWAITE MINE is still paying good profit, and there is now a large quantity of ore on the mine dressed and undressed.

SKIDDAW AND BLENCATHERA MINES. —These mines, which are being worked by a local company, and are in a very promising state. The stopes in

the Blencathera vein are yielding upwards of a ton of ore per fm. in very easy ground. The lode is large, and is one of the richest mineralised veins in the district. The lode in the north drift has been cross-cut upwards of 9 feet; and the footwall has not yet been reached. It is composed of a beautiful gossan, quartz, galena, carbonate of lead, phosphate of lead, sulphate of barytes, sulpheret of iron (iron pyrites), and carbonate and sulphur of copper. There is a cross-cut being driven from the shaft to the Skiddaw lode, and is within few fathoms being accomplished. A rich string of ore has just been cut, which has very much elated the shareholders. About £800 has been spent on these mines, principally machinery and in sinking the shaft and cross-cutting; 4 tons of ore have been sold, obtained from the lead; and about 10 tons more is in the course of dressing. The shares, which were originally 75, have been subdivided into 1500, and 10s. per share have been paid upon the 1500; and they have lately sold the rate of £2 per share. These mines are situated in the basin between Skiddaw and Saddleback on the junction of the granite and killas, or clay-slate. Two fine copper veins run through this sett, but have not been worked upon. One is about 15 ft. wide, composed of gossan, and carbonate and sulphuret copper; the other is the same nature, but smaller, both are considered to be fine trials.

WOOD END MINE is yielding sufficient ore to pay its way.

FORCE CRAGG MINE. —A low adit being driven to cut a pipe of ore, which yielded considerable quantity of ore in the level about. The ore is the richest in district, and will average about 49 ozs. to the ton for silver.

A company has been formed to work the GREAT SADDLEBACK MINE: but nothing of consequence has yet been done. There are other mines springing up in the neighbourhood; and I trust ere long we shall see this one of the best districts in the kingdom. All we want is capital and energy; for, wherever it has been applied, it has led to successful results—the Keswick Company's and the Goldscope setts alone being capable of being, divided into fifty setts, and would have; been so if in Cornwall or Devon.

RICHARD B. SHEPHERD. Portinscale, March 22.

[We are informed by Mr. Shepherd that, subsequently to the date of his letter, a rich- run of ore has been discovered in the Brandley mine].

8th April 1853 (Newcastle Courant)

Marriages

At Nenthead, on the 6th inst., Mr John Walton, of Brother Lee, Weardale, to Miss Elizabeth Cain, of Galligill, near Alston.

In 1851, at Brother Lee, Alice Walton, widow, aged 60, sons, John, lead miner, aged 34, Joseph, Iron stone miner, aged 33, Thomas, Iron stone miner, aged 22, and William, day labourer, aged 20.

In 1841, at Market Place, Alston, Elizabeth Cowper, 75, Tamer Cowper, Silk mercer, aged 45, and Elizabeth Cain, servant, aged 30.

In 1851, at St John's Chapel, Cowper Cain, draper and grocer, aged 25, and his sister Elizabeth Cain, assistant, aged 39, both unmarried.

In 1861, at Ropehaugh, Allendale, John Walton, born Weardale, provisions dealer, aged 46, his wife Elizabeth 50, and mother Alice Walton, farmers widow aged 70.

In 1871, at Ropehaugh cottages, Allendale, John Walton, retired provisions dealer, aged 54 and his wife Elizabeth 60.

Deaths
At White Heaps, near Blanchland, on the 24th ult., aged 47, Mr Thomas Farbridge.
See 21st March 1845, 4th July 1846, 4th April 1856, 7th March 1868, 13th July 1872, 23rd January 1875, 28th August 1875, 7th September 1895, and 6th April 1901.

FOR PRIVATE SALE
TWO SHARES in CASHWELL LEAD MINE,

New engines have been recently erected in this mine, with every prospect of it being highly productive and lucrative.
For further particulars apply to Mr James Pentland, auctioneer, St John's Lane, Newcastle.

16th April 1853 (Carlisle Journal)
Deaths
At Mark Close, near Alston, on the 11th inst., suddenly, Elizabeth, wife of Mr Lancelot Hall, aged 43.
Lancelot Hall married Elizabeth Armstrong, 27th January 1831, at Alston.
In 1851, at Skelgill High, Alston, Lancelot Hall, farmer, aged 40, his wife Elizabeth, grocer, aged 40, children, William, lead miner, aged 19, Diana, 15, Ann 14, Lancelot 11, John 8, Isa 5, Mary 3, and Thomas 1.
In 1861, at Hill House, William Hall, farmer & grocer, aged 30, sister, Anne, house keeper, aged 23, brother, John, blacksmith apprentice, aged 18, Eliza, house maid, 16, brother Thomas 10, visitor, Dorothy Armstrong, house servant, aged 16.

Probate for Lancelot Hall 1873
26 April. Administration of the effects of Lancelot Hall late of Marks Close, in the parish of Alston in the county of Cumberland, Yeoman a widower who died 18th November 1854 at Mark Close was granted at Carlisle to William Hall of Alston, Groceer the son and one of the next of kin. Effects under £450.

22nd April 1853 (Carlisle Journal)
Deaths
At Nenthead, on the 18th inst., Mrs Margaret Cousin, aged 80 years.
In 1851, at Wellgill, Nenthead, Caleb Cousin, lead miner, aged 41, his wife Mary 39, mother, Peggy Cousin, widow, annuitant, aged 79, son in law, Joseph Wales, lead ore washer, aged 12, and son in law, Thomas Wales 9.
See 14th January 1843 1st June 1866, 14th October 1871, and 21st August 1897

22nd April 1853 (Newcastle Courant)

A funny story, but one very true,
Read this story, and you'll not rue.

IT gives me great pleasure that I am, by the blessing of God, enabled to let my many kind friends know that I have succeeded in getting the £150 Debt off the Wesleyan Chapel, in Allendale Town, since March the 18th, 1848. There has been given: —

1546 Donations	£81	14	7½
Weekly subscriptions, anniversaries, &c.	68	5	4½
Total	£150	0	0

I have begg'd in the East, I have begg'd in the West,
I begg'd in the places where I thought would be best;
I begg'd in the North, I have begg'd in the South,
I begg'd all the country nearly all round about.
I begg'd a penny, and several times more;
I begg'd a shilling near the sea-shore,
I begg'd of the poor, I begg'd of the rich;
I begg'd that the Trustees would not be kept in the twitch.
Some said I was funny, others said I was strange,
To come to their country a begging to range,
I found that the people were loving and kind,
The Lord made their hearts to giving inclined.
I begg'd in the wind, I begg'd in the wet,
I begg'd till I got one hundred and fifty pounds of the debt,
It has sometimes been wet, but oftentimes fair,
It may be as well if Isaac will say na mair.
In a short time, I intend publishing my begging speech and this little poem, and giving the profits to some good cause. If any is wishful to have a copy, at twopence each, I shall feel happy to supply them.

ISAAC HOLDEN.
Allendale Town, April 19th, 1853.

See 23rd November 1855, & 24th August 1872.

Marriages

At Stanhope, lately, Mr William Longmire, only son of John Parmley Esq., of Stanhope House, to Jane, eldest daughter of Mr George Thompson, builder, of the same place.

John Parmley son of Joseph and Lydia (Redfearn, married 18th April 1789, at St Mary the Virgin, Middleton) Parmley, 1795, at Middleton in Teesdale.
Children of Joseph and Lydia Parmley:
1. Joseph baptised 20th February 1791, buried 20th August 1837, aged 46. See the Will of Joseph Parmley, probate dated 1845.
2. Samuel baptised 3rd February 1793,
3. John born 1795
4. Henry baptised 22nd April 1797, emigrated to the USA
5. Thomas baptised 28th February 1799, buried 2nd July 1809, aged 10, at Middleton.
6. Sarah baptised 21st March 1803, married John Robinson 9th May 1822 at Middleton
7. Maria baptised 1st January 1804, married John Warwick 27th December 1836, at Middleton, John and Maria Warwick with their daughters, Ann 2, & Lydia 9 months, emigrated to New York on the Splendid, arriving 16th July 1841. In 1860, Lidy Warwick, aged 22, was a servant at Schuylkill, Pennsylvania.
8. George baptised 30th December 1804,
9. Dorothy baptised 18th January 1807, buried at Stanhope, 2nd August 1892, aged 85.
10. James baptised 19th March 1809

11. Thomas baptised 21st April 1811
12. William baptised 22nd Aug 1813, emigrated to the USA

Joseph Parmley of Hood, was buried, 25th March 1816, aged 51, at St Mary the Virgin, Middleton.
Lydia Parmley was buried 12th October 1831, aged 62, at St Mary the Virgin, Middleton.

2. Samuel Parmley married Elizabeth Allason (daughter of Thomas and Jane Allson) 14th March 1819, at St Mary the Virgin, Middleton, witnesses, John Parmley and Jonathan Horn
Children of Samuel and Elizabeth Parmley:
2a. Joseph baptised 26th November 1820, St Mary the Virgin, Middleton, son of Samuel Parmley a Miner.
2b. Thomas born 21st February 1823, baptised 6th April 1823, Wesleyan, at his parents house.
2c. Samuel baptised 14th August 1824, St Mary the Virgin, Middleton, son of Samuel Parmley a grocer, emigrated to Pennsylvania.

Elizabeth Parmley was buried 16th August 1824, aged 38, at St Mary the Virgin, Middleton.

In 1841, at Market Place, Middleton, Samuel Parmley, lead miner, aged 45, children, Joseph 20, Thomas 15, Samuel 15, and servant Mary Bainbridge aged 25.

2. Samuel Parmley senior, emigrated, the 1850 census of the USA gives, at Tamaqua, South Ward, Schuylkill, Pennsylvania, Samuel Parmley, shopkeeper, aged 58. Samuel Parmley, confectioner, born Durham England, died 16th December 1852, at Tamaqua, Schuylkill, Pennsylvania.

George Pinkney married Phebe Thompson, 6th November 1813, at St Mary the Virgin, Middleton.
George Pinkney of New Town, miner, aged 47, was buried 8th March 1837, at St Mary's, Middleton.
In 1841, at New Town, Middleton, Phoebe Pinkney, aged 40, children, Mary 20, Ann 15, George, Miner, aged 15, John, Miner, aged 15, William 8, and Phebe 3.

2a. Joseph Parmley married Ann Pinkney (daughter of George) 16th March 1843, at St Mary the Virgin, Middleton.
In 1851, at Masterman Place, New Town, Middleton, John Pinkney, lead miner, aged 25, brother William, lead ore washer, aged 17, sister Pheby 13, lodgers, Joseph Parmley, blacksmiths labourer, aged 30, his wife Ann, straw bonnet maker, aged 30, children, Elizabeth P 6, Dorothy Ann 4, and George P aged 2.
In 1861, at Masterman Place, Middleton, Joseph Parmley, infirm, formerly miner, aged 40, his wife Ann aged 41, children, Dorothy 14, George Pinkney 12, Mary Redfearn 9, Samuel Joseph 3, and Boarder William Pinkney aged 27. In 1871, at High Dyke, Middleton, Ann Parmley, widow, formerly straw bonnet maker, aged 51, children, George, lead miner, aged 22, Mary 19, and Joseph 13.

In 1881, at East Butterknowle, Evenwood, Bishop Auckland, Ann Parmley, widow, formerly straw bonnet maker, aged 62, daughter Mary aged 29, and son Joseph, coal miner, aged 23.

Ann Parmley died 4th quarter 1889, aged 70, registered at Auckland, Durham.

2b. In 1851, at Middlerton, Thomas Parmley, shoe maker, aged 28.
Thomas Parmley married Mary Ann Dunn, 2nd quarter 1851, registered at Richmond.
In 1861, at Frenchgate, Richmond, Yorkshire, Thomas Parmley, shoemaker, aged 38, his wife Mary, aged 29, children, Jan, 8, Randolph 6, George 3, and Elizabeth 8 months.

Schuylkill County, ss:

I, HENRY H. SELTZER, REGISTER for the PROBATE OF WILLS and granting LETTERS OF ADMINISTRATION, in and for the County of Schuylkill,
To Thomas J Parmley Administrator of the estate of J. Matilda Parmley late of the Borough Mahanoy City deceased. GREETING.

WHEREAS, the said J. Matilda Parmley lately died intestate (as is affirmed,) whilst she lived, and at the time of her death, divers goods, chattels, rights and credits within the said county, by means whereof the full disposition and power granting the administration of all and singular the goods, chattels, rights, and credits which were of the said deceased, within the said county, and also the auditing the accounts, calculations and reckonings of the said administration and final dismission from the same, to me is manifestly known to belong. I desiring that the goods and chattels, rights and credits of the said deceased may be well and truly administered, do hereby grant unto you, the said Thomas J Parmley in whose fidelity in this behalf I very much confide, full power by the tenor of these presents, to administer goods, chattels, rights and credits, which were of the said deceased, within the said county, and also to ask, collect, levy, recover and receive the credits whatsoever of the said deceased, which at the time of her death were owing to or to her did anyways belong, and pay the debts in which the said deceased stood obliged, so far forth as the goods, chattels, rights and credits will extend according to their rate and order of law, especially well and truly administering the goods, rights and credits of the said deceased, and make a true and perfect inventory thereof, and exhibiting the same in the Register's Office, in the County of Schuylkill, within thirty days from the date hereof; and further do make or cause to be made a just and true account of your administration, within one year from the date hereof, or when, thereunto legally required, and that you will well and truly comply with the laws of this Commonwealth, relating to Collateral Inheritances; and if it shall hereafter appear that any last Will and Testament was made by the said deceased, and the same shall be proved according to law, if you being thereunto required do surrender the said Letters of Administration into the Register's Office aforesaid. And I do by these presents ordain, constitute and appoint you, the said Thomas J Parmley Administrator, of all and singular the goods, chattels, rights and credits, which were of said deceased within the limits aforesaid, saving harmless and forever indemnifying me and all other officers against all persons whatsoever, by reason of your administration aforesaid, and saving to all other their rights.

IN TESTIMONY WHEREOF, I have hereunto set my Hand and Seal of Office, at Pottsville, the 18th day of June in the year of our Lord one thousand nine hundred and six (1906)

Parmley lately died intestate (as is affirmed), whilst he lived, and at the time of his death, divers goods, chattels, rights and credits within the said county, by means whereof the full disposition and power granting the administration of all and singular the goods, chattels, rights and credits, which were of the said deceased, within the said county, and also the auditing the accounts, calculations and reckonings of the said administration and final dismission from the same, to me is manifestly known to belong. I desiring that the goods and chattels, rights and credits of the said deceased may be well and truly administered, do hereby grant unto you, the said Chas. S. Parmley in whose fidelity in this behalf I very much confide, full power by the tenor of these presents, to administer goods, chattels, rights and credits, which were of the said deceased, within the said county; and also to ask, collect, levy, recover and receive the credits whatsoever of the said deceased, which at the time of his death were owing to or to him did anyways belong, and pay the debts in which the said deceased stood obliged, so far forth as the goods, chattels, rights and credits will extend according to their rate and order of law, especially well and truly administering the goods, rights and credits of the said deceased, and make a true and perfect inventory thereof, and exhibiting the same in the Register's Office, in the County of Schuylkill, within thirty days from the date hereof; and further do make or cause to be made, a just and true account of your administration, within one year from the date hereof, or when, thereunto legally required, and that you will well and truly comply with the laws of this Commonwealth, relating to Collateral Inheritances; and if it shall hereafter appear that any last Will and Testament was made by the said deceased, and the same shall be proved according to law, if you being thereunto required, do surrender the said Letters of Administration into the Register's Office aforesaid. And I do by these presents ordain, constitute and appoint you, the said Chas. S. Parmley Administrator, of all and singular the goods, chattels, rights and credits, which were of said deceased within the limits aforesaid, saving harmless and forever indemnifying me and all other officers against all persons whatsoever, by reason of your administration aforesaid, and saving to all other their rights.

Renunciation of Widow filed.

In Testimony Whereof, I have hereunto set my Hand and Seal of Office, at Pottsville, the 24th day of May in the year of our Lord one thousand eight hundred and ninety-four.

Chas. C. Matten REGISTER.

3. John Parmley married Mary Longmire, at Middleton in Teasdale, 22nd June 1823. Mary Parmley was buried at Middleton, 19th May 1826, aged 25 years. In1841, at Stanhope, John Parmley, Mining Agent, aged 45, his sister Dorothy aged 30, and son William aged 15. In 1851, at Stanhope, John Parmley, widow, lead mine agent, aged 56, born Middleton, his son William L., draper & grocers assistant, aged 25, sister Dorothy, single, housekeeper, aged 44, visiting brother James, married, farmer and grocer, aged 42, and house servant Barbara Prest aged 19.
John Parmley married Ann Waggot, 13th July 1854, at Stanhope.
John died 28th January 1860, aged 65, and Ann died 17th July 1875, aged 63.

In 1861, at Stanhope, George Thompson, widow, mason, aged 57, son in law, William L. Parmley, grocer & draper, aged 35, daughter Jane, wife of William, aged 32, grandsons, John 5, and George 3 (buried at Stanhope 30th June 1862, aged 4).
In 1871, at Leadgate, Allendale William L. Parmley, married, draper & grocers assistant, was boarding with Robert Fairlamb & family.
In 1871, at Stanhope, Jane Parmley, married, milliner, aged 43, sons, John, pupil teacher, aged 15, and James 9.

Probate 18th March 1861. *The will with a codicil of John Parmley, late of Butts House in the Parish of Stanhope in the county of Durham, Mining Agent deceased, who died 28th January 1860, at Butts House, aforesaid was proved at Durham by the oaths of John Walton of Stanhope House in the said Parish Mining Agent, Thomas Dobson Bolton of Stanhope aforesaid Agent, and Ann Parmley of Butts House aforesaid widow the relict the executors. Effects under £600.*

In 1861, at Stanhope, George Thompson, widow, mason, aged 57, son in law, William L. Parmley, grocer & draper, aged 35, daughter Jane, wife of william, aged 32, grandsons, John 5, and George 3 (buried at Stanhope 30th June 1862, aged 4).
In 1871, at Leadgate, Allendale William L. Parmley, married, draper & grocers assistant, was boarding with Robert Fairlamb & family.
In 1871, at Stanhope, Jane Parmley, married, milliner, aged 43, son John, pupil teacher, aged 15 (buried 24th November 1872, aged 16 at Stanhope), and son James aged 9 years.
Jane Parmley was buried at Stanhope 29th June 1879, aged 50.
In 1881, at Paragon Street, Stanhope, James Parmley, clerk, aged 19 is boarding with Mary Raine and family.
James Parmley married Jane Phoebe Earl, 14th November 1889, at Stanhope.
Jane Phoebe Parmley was buried 7th November 1890, aged 29.
In 1891, at High Street, Stanhope, James Parmley, widow, quarry clerk, aged 29, his daughter Grace E., 6 months, and servant Annie Golightly, housekeeper aged 28.

James Parmley, widower, married Jane Bellerby, 29th April 1896, at West Rainton.

In 1901, at High Street, Stanhope, James Parmley, limestone quarry inspector, aged 39, his wife Jane aged 39, children Grace Earl 10, Jennie 4, and Frederick William 1.

In 1911, at High Street, Stanhope, James, quarry manager (Limestone) aged 49, his wife Jane 48, children Grace Earl 20, Jennie 14, and Frederick William 11.

IN MEMORY OF
THE LATE
JOHN PARMLEY,
OF STANHOPE HOUSE,
WHO FOR UPWARDS OF FORTY ONE YEARS WAS
AGENT FOR THE LONDON LEAD COMPANY
AND UPWARDS OF FIFTY ONE YEARS
A FOLLOWER OF CHRIST.
HE DEPARTED THIS LIFE JAN 28TH 1860
AGED 65 YEARS.
His end was peace.
THIS LANGUISHING HEART AT REST
ITS THINKING AND ACHING ARE O'ER
THIS QUIET IMMOVEABLE BREAST
IS HEAVED BY AFFLICTION NO MORE
ALSO OF ANN RELICT OF THE ABOVE
JOHN PARMLEY WHO DIED
JULY 17TH 1875 AGED 63 YEARS.
ALSO JAMES PARMLEY,
GRAND-SON OF THE ABOVE
DIED JUNE 23RD 1929 AGED 67 YEARS.
AND JANE HIS BELOVED WIFE,
DIED OCT 29TH 1952 AGED 90 YEARS.
(on reverse)
ALSO OF GRACE DAUGHTER OF
JAMES PARMLEY
DIED 18TH DEC 1970
AGED 80 YEARS

4. Henry Parmley married Mary Watson 15th March 1827, at Middleton.
In 1841, at Middleton, Henry Parmley, lead miner, aged 40, his wife Mary 45, and daughter Dorothy 14.
USA Naturalisation of Henry Parmley 16th April 1855, at Lafayette, Wisconsin.
In 1860, at New Diggings, Lafayette, Wisconsin, Henry Parmley, Miner, aged 62, and his wife Mary aged 64.

8. George Parmley married Ann Watson 19th November 1827, at Middleton; emigrated to USA 6/7/1830, arrival, at Philadelphia, accompanied by his wife Ann, on the ship John Wells.

Arrival Card for Ann Parmley

10. James Parmley married Mary Hardy, 24th November 1840, at Middleton.
In 1841, at Middleton, James Parmley, lead miner, aged 30, his wife Mary 20, and Joseph 15.
In 1851, at Middleton, James Parmley, grocer, aged 42, and his wife Mary 35.
In 1861, at Market Place, Middleton, James Parmley, grocer, aged 52, his wife Mary 44, and boarder Mary J Burdon, aged 6, born Newcastle.
In 1871, at Market Place, Middleton, James Parmley, grocer, aged 62, his wife Mary 54, niece, Mary J Burdon, 16, nephew Nicholas Burdon 12, niece, Sarah Weatherel 10, and nephew, Thomas Weatherel 8.

St Mary the Virgin Churchyard.
In affectionate memory of James Parmley of Middleton who died January 29th 1880 aged 70 years. Also of Mary wife of the above who died January 31st 1893 aged 76 years. Also of Nicholas Burdon who died March 29 1875, aged 17 years. Also Sarah Weatherel who died June 12 1878 aged 17 years. Also of Thomas Harry Weatherel born March 19 1863, died December 29th 1888.

11. Thomas Parmley married Mary Race 6th March 1834 at Middleton.
In 1851, at Thatch Lee, Middleton, Thomas Parmley, lead miner, aged 40, his wife Mary 38, and son George, labourer, aged 16.
In 1861, at Spring Hill, Middleton, Thomas Parmley, lead miner & farmer, aged 50, his wife Mary 48, son George, lead ore smelter, aged 26, and sister Dorothy Parmley, retired housekeeper, aged 54.

In 1871, at Thatch Lee, Middleton, Thomas Parmley, lead miner, aged 60, his wife Mary 58, son George , smelter of lead ore, aged 34, his wife Mary 34, grandchildren, Dinah 11, Maria 9, Ann 6, and Thomas 2.

Thomas Parmley was buried 18th April 1877, aged 66, at St Mary the Virgin, Middleton.

12. The United States Census of 1850, at Schuylkill, Pennsylvania, William Parmley, miner, aged 35, his wife Jane 22, and daughter Lydia aged 1.
In 1860, at Henrico, Virginia, William Parmley, coal mine manager, aged 46, his wife Jane 33, children, Lydia 11, William 8,and Martha 4.
In 1870, at Schuylkill, Pennsylvania, Jane Parmley, aged 41, children William W, clerk in store, aged 18, Martha B 14, Grace 10, and John 7.
In 1880, at Schuylkill, Pennsylvania, Jane Parmley, makes boxes for squibs, aged 50, daughter Grace R, assists her mother, aged 18.

WANTED immediately, a steady, active, young MAN, as ASSISTANT to the DRAPERY and GROCERY BUSINESS. None need apply but those that can give a satisfactory Reference.—Apply to DICKINSON and ERRINGTON, Alston

See 19th November 1852

4th June 1853 (Newcastle Guardian and Tyne Mercury)
Deaths
At Allenheads, on the 27th ult., aged 32, Elizabeth, wife of Mr Albany Charlton.

2nd July 1853 (Kendal Mercury)

KESWICK &c.

THE KESWICK MINES.—Little has of late been done in some of the above mines, owing to the extreme drought. At Thornthwaite and Stonycroft, the workings are nearly full of water, as a sufficient amount of water-power cannot be collected to work the pumps; and at Brandley enough of water cannot be obtained from all the adjacent land to supply the steam engine. The workings in this mine are the most extensive in the neighbourhood of Keswick, and belong to the Keswick Mining Company. The quantity of ore obtained here is moderate, but a larger return is in prospect. A new engine-shaft has for some time been in progress, and has attained the depth of 29 fathoms; it is intended to continue it to the depth of 50 fathoms, but a cross-cut will be made at 30 fathoms to the vein, which is some six or eight fathoms distant, and known to contain a pipe or rick ore in this place, as has been proved by some higher levels. The ceremony of laying the foundation of new engine house took place on the 23rd ult. When it is completed, the engine (a 20-inch horizontal one, erected two years ago,) with all her attachments will be removed to it, when the ore can be raised to a much greater advantage. —The Barrow mine is making a fair return, though very few men are at present employed. —Stony Croft has but recently been opened, but the prospects are most encouraging, the ore containing more silver than any in the neighbourhood. —Hewthwaite and Goldscope are both in a profitable position.—The Skiddaw and Blencathra

mines are being worked to considerable advantage, though a large extent of "dead" ground has had to be cut through. A vein containing black lead has recently been discovered near Keswick by some mining gentlemen, who have secured the sett and intend commencing immediately. We have seen some samples, which, when purified, we not doubt will make excellent "composition." Some which we saw tested leave a brilliant polish on iron.

Deaths

At Penrith, on the 25th inst., very suddenly, aged 55 Mr James Thompson, managing director of Mr Marshall's Greenside Lead Mines, in Patterdale, and formerly gunsmith, Penrith.

19th August 1853 (Newcastle Courant)

TO BE SOLD BY PRIVATE CONTRACT,
On Saturday, the 27th instant, at Water House Inn,
two miles west of Haydon Bridge,

SIX THIRTY-SECOND SHARES of WHINETLEY LEAD MINE, held under lease of the Greenwich Hospital, situated two miles North West of Haydon Bridge, and the Second Lease Length from SALTLING- STONE LEAD MINE, which is one of the most productive Mines of Lead Ore at present in the North of England. Whinetley Mine was commenced in the year 1846 by a number of practical miners under the employment of the late W. B. Beaumont, Esq., at Barney Craig, in West Allendale, in connection with Jacob Walton, Esq., Green Ends, and has been persevered with in the most practicable and economical manner. They have driven nearly 300 fathoms of level, and expect to be now within 30 fathoms of one of Settlingstones veins. The reason why the above Shares are to be sold, is on account of the decease of Shareholders and others not being able to carry them on. Whinetley Mine is considered by most practical miners to be one of the best trials in the mining districts, in either Northumberland, Cumberland, or Durham.

Offers will be received and information given, on application to Thomas Martin, Agent, Church Lands, Allendale; or to Jacob Walton, Esq., Green Ends, Alston, Cumberland.

THOMAS MARTIN, AGENT, Church Lands. August 9, 1853.

20th August 1853 (Newcastle Journal)

LEAD MINES OF NORTHUMBERLAND AND DURHAM.

“The principal portion of the mining districts in this part of the kingdom (says Mr. Sopwith), may be considered as extending about twenty miles from north to south, and the same distance from east to west. The square of 400 miles thus formed, and lying equally about the junction of the counties of Northumberland, Cumberland, Westmorland, Durham, and Yorkshire, comprises the manor of Alston Moor, the mountain ridge of Crossfell, and the dales of the Tees, Wear, East and West Allen, and the Derwent.” Situated on the sides of the "Pennine Chain," or "backbone of England” and at a great elevation, —adds Fordyce, in his able work, "The History of Durham,"—the alternations of temperature are considerable, and the features of the country are of a decidedly moorland character. In the numerous valleys, which occur amongst the lofty elevations of these “English Apennines," the cropping or

basset of the strata is very obvious, and affords peculiar facilities for geological research. The mines in Weardale have been extensively worked for a very long period by the ancestors of W. B. Beaumont, Esq., M.P.; and those in Teesdale are chiefly occupied, under the Duke of Cleveland, M. Hutchinson, Esq. and others, by the London Lead Company, which was chartered by Queen Elizabeth “for smelting down lead with pit coal and sea coal.” "As there is no regular publication of the lead sales (says Mr. Hunt, Keeper of Mining Records, London), and as the ores are sold in large and small parcels, sometimes publicly, but often by private contract, there has been much difficulty in obtaining accurate information of the entire produce of the United Kingdom.” Mr. Tremenheere says that Mr. Beaumont's Mines in East Allendale, West Allendale, and Weardale, in the counties of Durham and Northumberland, give employment to upwards of 2000 men and boys, who are said to raise about one-fourth of the quantity raised in England, one-sixth of the produce of Great Britain, and one-tenth of the total quantity of lead produced in Europe, including the British Isles. The following quantities, in tons, were produced in the specified years: —

	In 1845.	**In 1846.**
Mr. Beaumont's Mines.	12,200 ore 8,180 lead	12,000 ore 8,100 lead.
Teesdale Mines	2,572 “ 1,688 “	2,850 “ 1,870 “
Weardale	560 “ 372 “	560 “ 372 “
Sharnberry	88 “ 58 “	64 “ 42 “
Derwent Mines	1,916 “ 988 “	1,470 “ 997 “

In 1847, the returns were: —

East and West Allendale and Weardale —	13,600 ore	9,300 lead.
Teesdale Mines	8,850 “	2,588 “
Sharnberry	64 “	42 “
Derwent Mines	1,674 “	1,033 “

Out of 93,046¾ tons of lead ore raised and sold in Great Britain during 1850, 21,010 tons were raised in the counties of Durham and Northumberland. Most of the ores of lead contain a small proportion of silver, which may be obtained by cupellation; but the cost of fuel, labour, and loss of lead by this method was so great, that it could only be applied economically when the lead contained at least 20 ozs. of silver to the ton. By a process invented by Mr. H. L. Pattinson, of Scots House, however, lead containing only 3 ozs. of silver to the ton may be cupelled with profit; and it appears that from 7 to 8 ozs. of silver is the average quantity at present obtained from a ton.

10th September 1853 (Newcastle Guardian and Tyne Mercury)
Marriages
At Alston, on the 1st inst., by the Rev. Mr Harper, Independent minister, Mr Geo. Bell to Miss Elizabeth Wallace, both of Nenthead.
In 1851, at Hillersdon Terrace, Nenthead, William Wallace, lead mining agent, aged 34, sister Elizabeth 32, and brother Thomas, lead miner, aged 20.
In 1861, at New Town, Middleton in Teesdale, George Bell, foreman at lead mine works, aged 30, born Middleton, his wife Elizabeth aged 42, born

Garrigill, children, Mary Phillis 6, Elizabeth Letitia 4, and Ann Louisa 11 months.
In 1871, at Town End, Middleton in Teesdale, George Bell, foreman lead mine ore washers, aged 40, his wife Elizabeth 52, children, Mary Phillis 16, Elizabeth Leatitia 14, and Annie Louisa 10.
Possible death of Elizabeth Bell, 4th quarter 1875, at Darlington, aged 55.
In 1881,at North Road, Cockerton, Darlington, George Bell, widower, Railway engine drilling machinist, aged 50, and daughter, Anne Louisa 20.

23rd September 1853 (Carlisle Journal)
Marriages
At Alston Church, on the 24th inst., By the Rev. W. N. Snowe, vicar, Mr Adam Walton, late of Nenthead, to Lydia, eldest daughter of Mr James Stephens, of Lowbyer. *See 19th March 1887*
At Alston Church, on the 26th inst., By the Rev. W. N. Snowe, vicar, Mr William Wilson, miller, to Miss Elizabeth Stewart.
Deaths
At Cowgap, near Alston, on the 14th inst., Mr John Smith, aged 46 years.
John Smith married Tamar Shield (born 11th March 1818, daughter of Robert and Nancy Shield)17th June 1843 at Alston.
In 1851, at Cow Gap, Garrigill, John Smith, miner and farmer, aged 45, his wife Tamar 43, children, Martha 14, Sarah 7, Ann 5, Ester 3, and Elizabeth 1.
Possible burial of John Smith 19th July 1859, at St John, Garrigill.
In 1861, at High Nest, Garrigill, Tamar Smith, miners widow, aged 44, children, Elizabeth 11, and Anna 8
In 1871, at Bruntley Syke, Alston, Tamar Smith, widow, laundress, aged 54, and daughter Anna, dressmaker aged 18.
In 1881, at Bruntley Syke, Alston, Tamar Smith, widow, assisting her daughter with dressmaking, aged 62, and daughter Anna, dressmaker aged 27.
Tamar Smith died 4th qtr., 1890, aged 72, registered at Alston.
At Alston, on the 16th inst., Mr Joseph Dickinson, land surveyor, aged 58 years.
See 2nd August 1831

11th November 1853 (Carlisle Journal)
Marriages
At Alston Church, on the 10th inst., Mr William Lee, of How Hill, to Miss Elizabeth Simpson, of the Hermitage.
In 1861, at Howe Hill, Garrigill, Ann Lee, widow, farmer of 36 acres, aged 79, son, William, lead miner, aged 45, daughter in law Elizabeth aged 37, grand children, John 6, Mary A. 4, Margaret 3, William 1, and domestic servant, Elizabeth Simpson 17, and lodger William Blades, coal miner, aged 66.

Ann Lee died 5th April 1864, aged 82, at Garrigill.

In 1871, at Howe Hill, Garrigill, William Lee, lead miner & farmer of 36 acres, aged 55, his wife Elizabeth, 47, children, John, lead miner, aged 16, Margaret 13, William 11, Isabella 9, and Nancy 5.

William Lee was buried 26th May 1880, aged 64, at Garrigill.

In 1881, at How Hill, Garrigill, Elizabeth Lee, widow, farmer of 30 acres, aged 57, son John, labourer at Colliery, aged 26, daughter Nancy 15, and visitor Nancy Little, game keepers daughter, aged 18.
In 1891, at Byers Green, Bishop Auckland, Joseph Percival, labourer at Colliery, aged 27, born Nenthead, his wife Nancy 25, children, Frances E. 4, Isabella 3, John W. 1, and Mother in law, Elizabeth Lee, widow, aged 67.
Possible burial of Elizabeth Lee 2nd qtr., 1896, aged 73, registered at Houghton le Spring, Durham.
See 7th April 1864.

Deaths

At Physic Hall, near Alston, on the 6th inst., Ruth, daughter of the late Mr George Spotswood, aged 16. *Burial records give the age as 14 years.*
In 1841, at Middle Skelgill, Alston, George Spotswood, lead miner, aged 45, his wife Jane (Pearson, married 30th June 1822, at St Augustine's, Alston) aged 35, Children, Mary 15, Hugh, lead miner, aged 13, George, lead miner, aged 11, Elizabeth 8, Thomas 5, and Ruth 2.

George Spottiswood, died 10th July, 1846, at Alston.
Jane Spottiswood died 25th September 1846, aged 46, at Alston.

In 1851, at Annatwalls, Alston, Mary Spottiswood, house keeper, aged 25, brothers, George, lead miner, aged 21, Thomas, lead miner, aged 15, sisters, Ruth 12, and Catherine, 9.
At Alston, on the 9th inst., Mary, widow of Mr James White, aged 71.
See 28th August 1875
At Garrigill, Alston Moor, on the 30th ult., Jos. Hart, eldest son of the late Mr J. H. Pridham, inland revenue officer, Carlisle.
Joseph Hart Pridham, of Garrigill Gate, aged 18 years, was buried at Garrigill 3rd November 1853.

12th November 1853 (Carlisle Patriot)

A WOMAN ACCIDENTALLY SHOT BY HER HUSBAND. — An inquest was held before Mr. Carrick, coroner, on the 7th instant, at Nenthead in the parish of Alston, on view of the body of Hannah Jackson, wife of William Jackson, shoemaker, aged 38 From the statement of her husband, it appeared that early on Friday morning, the 4th instant, he took down his gun and loaded it near the bed-side, and put a cap on. Deceased was lying in bed, with her back to him. He then proceeded to take the barrel from the stock, and was in the act of shaking it to get the barrel out of the stock, when the hammer fell on the cap without his touching the trigger, the muzzle at the moment being pointed towards the bed, the gun went off, and deceased sprang up and cried out "Oh William you have shot me!" He ran out immediately for Dr. Carson, who on arriving and examining deceased, found a gun-shot wound about two inches from the back bone, on the right side, about an inch from the haunch bone; it went downwards and forwards, about an inch, over the haunch bone,

and into the abdomen. The medical gentleman attended her till she died, at ten o'clock on Saturday night last, of inflammation of the bowels. She suffered great pain from the time of the lamentable occurrence up to her death. The deceased and her husband lived together on most affectionate terms. She stated in the presence of the medical gentleman and several of her neighbours, that it was pure accident, and that her Willie had always been good and kind to her. Jackson was much distressed while giving his evidence. He was preparing to go to the adjoining moors to shoot grouse.

25th November 1853 (Carlisle Journal)

DUFTON WATER WORKS.

TO THE EDITOR OF THE CARLISLE JOURNAL.

Sir,—The age in which we live is one of great improvement great enterprise, and great discovery. In every part of our country, genius, wealth, talent, and benevolence are brought to bear on the melioration and advancement of the people in knowledge, skill in their several departments of labour, and in all the social comforts of human life. Mighty geniuses have arisen over the last half century, and have put forth their powers of intellect and rich resources of mind if not to plan and rear their Memphises, Ninevehs, Palmyras, Persepolises, and Elephantes, at least they have done enough to call forth the wonder of the learned, benefit incalculably the commerce of the world, promote the intercourse of nations, and erect monuments which shall stand in the pathway of time, as magnificent memorials of the worth, enterprise, benevolence, and mechanical skill of the designers.

Mechanics' Institutes have been built and fitted up with libraries, for the diffusion of knowledge, varied apparatus for experiments, and eloquent lectures on the whole circle of science; Schools have been erected and provided with funds for the education of the labouring classes; Hospitals for the support of the poor, and Dispensaries for the reception and relief of the sick have been established, and adequate provision made for the admission of the unfortunate, and the application of all that human skill can accomplish for the recovery of the diseases to which our race is subject; and Churches have been dedicated by man, and consecrated by the Divine Present, for the recovery of cases which no human nor medical skill is found profound enough to reach.

In your excellent paper, a week or two ago, you gave a magnificent account of the repairs of our Parish Church, the names of parties employed in those repairs, together with the names of a few of the liberal contributors of the funds so benevolently furnished for carrying into effect the necessary improvements.

A full list of contributors, both major and minor, has been published, and the creditor side of the account, which is looked for, will doubtless follow with all convenient haste, so soon as the auditor shall have examined the bills and discharged all outstanding claims upon the repairs.

The church was Opened last Sabbath by the Rev. Dr. Jackson, Chancellor of the diocese of Carlisle, and the venerable rector of the parish. The congregations were respectable.

Notwithstanding the meritorious amount of embellishment and painstaking bestowed upon the edifice, the old Lady, it must be confessed, is still considerably wrinkled, and shows unmistakeable symptoms of age and

infirmity outside, but the visitor must pass within, where, contrary to the established order of things, he will find her dressed in her “beautiful garments,” fair and stately to look upon, waiting for the bridegroom, and doing the *amende honorable* for her dilapidated state of former years.

Simultaneously with the opening of one fountain for the supply of living waters, there were opened four fountains in the village for the supply of that compound of hydrogen and oxygen so essential to animal life, and in a state of greater salubrity and freedom from injurious ingredients than had been supplied previously for domestic use.

Dufton is a small but picturesque village situate at the base of the pike of that name, and immediately in front of the rough, yet bold, romantic, and deeply interesting escarpment of limestone rock, ever and anon inviting the attention of the geologist, and where mineral veins traverse it, found productive of lead ore in former years to some amount, and doubtless worked from the time the Romans were masters of this part of the county.

The village had long been badly supplied with pure good water for domestic purposes. The “syke” which runs through the village supplied that essential article to cattle, pigs, poultry, and the inhabitants in common. All had access to it, all had common right and privilege thereto, and were supplied from the one source; hence the insalubrity of the water and its unfitness for human use.

The people resolved to repair the evil and error of former years. A meeting of the ratepayers of the village was legally and duly convened. The object for which the meeting was called was laid before it, and the project was duly sanctioned and unanimously agreed to. The proprietors of the land in the line of water course were waited upon for their leave and sanction, which was generously, kindly, and freely given. The people, with a zeal, energy, and perseverance worthy so commendable and meritorious a project, set to work with spirit—but one feeling animating the whole.

The London Lead Company, with their usual liberality, contributed handsomely to the undertaking; Captain Eliott, of Appleby Castle, generously supplied the tiles free of charge at the tile works; and the inhabitants taxed themselves, by agreeing to levy a rate on all tenements in the village, taking the fixed rateable value of each tenement as the basis of the assessment.

Some slight opposition appeared to disturb the harmony and good feeling which prevailed, but the work has been accomplished, the four fountains were opened with a good supply of the best and purest water on Saturday, the 12th inst., and ‘tis now hoped that good neighbourly feeling will again prevail, and the past opposition be “writ in water.”

Where all parties have done so handsomely, and shewn so much zeal and heartiness in carrying out the undertaking to a happy and successful termination, it may appear almost invidious to name any one in particular, but justice demands that honourable mention should be made of the gentlemanly bearing, generous support afforded, and countenance and assistance benevolently bestowed by Captain Eliott, of the Castle, without whose aid and concurrence the salutary and beneficial improvement could not manifestly have been carried into execution.

X.Y.Z.

TO be SOLD, by AUCTION, at the house of Mrs Dodd, *Golden Lion Inn*, ALSTON, on Friday December 9th, 1853, at Six o'clock in the Evening, all that valuable LEAD ORE MINE, known by the name of CALVERT, situate in

TYNE HEAD, and held under Lease of S. R. FYDELL, Esq., with all Ore, Mineral, and Material thereunto belonging. Mr. John Wilkinson, of Shield Hill, Garrigill, will shew the Mine, and further particulars may be known on application to Mr. John Woodmass, Auctioneer.

THE CLEVELAND ESTATES—TESTIMONIAL TO T. F. SCARTH, ESQ.

A public dinner was given a few days ago to this much respected gentleman by the Durham Tenantry of His Grace the Duke of Cleveland (this being the fiftieth year of Mr. Scarth's connection with the noble duke's estates), at which a splendid assortment of plate, value £230, was presented to him, bearing the following inscription :—"This salver was presented, together with a soup-tureen, two cover-dishes, and a kettle and stand, to Thomas Freshfield Scarth, Esq. of Keverston, head-agent and auditor of the estates of his Grace the Duke of Cleveland, by the tenantry in the county of Durham, as a testimony of their high esteem for his character in the impartial discharge of his several duties—1854." About eighty of the principal tenantry of the Duke of Cleveland assembled on the occasion, at the Queen's Head Inn, Staindrop, Mr. Wm. Hawdon, of Wackerfield, in the chair—Mr. Robt. Graham, of Burton House, in the vice-chair. After the usual loyal toasts had been given from the chair, and the Duke of Cleveland's health duly honoured, The Chairman, in presenting the testimonial, addressed Mr. Scarth as follows :—

I hare the honour to be chosen by the tenantry on the Raby Estate to present you with this plate, as a testimony of the high esteem they entertain for you, as agent to his Grace tho Duke of Cleveland—for the courtesy and prompt attention with which you at at all times meet any business application they may have to bring before you— and, as far as is compatible with his Grace's interests, in assisting and advising any improvements that time and circumstances may require. Though this testimonial has been confined to the tenantry alone, we may feel highly gratified in haring a gentleman connected with us who, we feel assured, possesses the goodwill of the whole neighbourhood by the universal desire evinced to be allowed to join in this tribute of respect. I do not wish to eulogize, but this I may say— never was a call more heartily responded to than the suggestion of making known the high regard we entertain towards you. On behalf of the tenantry, I beg your acceptance of this plate. Long. Sir, may you be spared to meet us and enjoy the society of your family and friends. Mr. Hawdon concluded by proposing Mr. Scarth's health, which was most enthusiastically received.

After the long-continued applause had subsided, Mr. Scarth rose, and with much emotion responded as follows:— I rise under feelings of no ordinary difficulty to return you my thanks for the testimonial presented to me by the tenantry and lessees of mines on the Duke of Cleveland's Durham Estate, whose good opinion, good wishes, and kind feelings, towards myself, combined with the confidence reposed in me, have been so feelingly expressed by the gentleman you have selected to convey them. Gentlemen, splendid as is this testimonial, its real and intrinsic value to my feelings is the testimony it conveys of the friendship, esteem, and confidence, you repose in me, and that they are the remits of our close and intimate acquaintance for a long series of years. It has ever been my wish and endeavour through life, so to blend the interest of landlord and tenant, that in promoting the one I was at the same time advancing the other, to effect that object, I have had the good fortune to enjoy facilities that do not fall to the lot of all agents, having acted for, and possessing the confidence of, two noblemen who were ever ready to sanction and promote measures of real utility to their tenantry —who in times of difficulty were prompt to afford relief where relief was necessary, or to aid

the endeavours of those tenants whose means enabled them to contend with their difficulties and counteract them by the improved cultivation of their farms. Such was the late Duke of Cleveland, and such Is the present, and I shall ever feel that my lot has been fortunately cast in having had to act for two such noblemen, in having enjoyed their confidence, and held in trust that delicate but most important relation which exists between landlord and tenant. Gentlemen, I have touched upon the difficulties farmers have had to contend with, difficulties now past, and I hope never to return—but strange as it may appear to you, these times of difficulty have been to me a source of proud satisfaction. Yes, I repeat it. if proud satisfaction. During those times, not a tenant on the Duke of Cleveland's Estate in this county of Durham, and I may add in Shropshire, Staffordshire, or Northamptonshire, ever appeared in arrears on his Grace's rent-roll. Whatever were your difficulties, you fulfilled your obligations to your landlord, and I further say, with increased satisfaction, that at this time there is not an arrear in this county, or those I have named, in the Duke of Cleveland's Estates. That, gentlemen, is what an agent has just right to be proud of in the tenantry over whom he presides. My acquaintance with the mining interest of Teesdale is of more recent date; but it has been a great satisfaction to me that since that acquaintance commenced, though the scale of duty paid to the lessor has been reduced, the returns from the mines have been increased and are likely to further improve, to the mutual advantage of lessor and lessee. In conclusion, gentlemen, I again thank you for this handsome testimonial of your friendship and confidence—infinitely to me more valuable from that feeling, than its value in money, whatever may be its amount—a testimonial I will hand down as an heir-loom to my family and a memorial to my children, of that good feeling that existed between their father and the tenantry and lessees of mines on the Duke of Cleveland's Estates. Before I sit down, I beg to drink in a bumper the health's of the donors of this splendid testimonial—"The tenantry and lessees of mines on the Duke of Cleveland's Estates," accompanied with my warmest thanks.

Mr. Heslop briefly responded.

Mr. Graham, from the vice-chair, in proposing the health of Wm. T. Scarth, Esq. said :—

It is with very great pleasure I rise to propose the next toast it is one that ere this has fallen to my lot, and every time I do it with greater zest, it being tho health of a gentleman whom, the more he is known the higher he is appreciated. In talking about the present testimonial (in my official capacity) many of the tenants in the west country, over whom Mr. W. T. Scarth is agent, said they thought he also should have a testimonial. I told them I would be very glad to assist them, and give them my mite, but I thought we must wait a little, though I trust it will not be so long deferred as the present tribute of respect (Mr. Scarth having been fifty years connected with the Raby Estates.) In the course of time, very probably, Mr. Wm. Scarth will take a higher position than he now holds; and when he does, I hope, nay I am sure, he will not forget the good adage of "Live and let live." I have now, therefore, gentlemen, to ask you to drink, with bumpers, the health of Mr. W. T. Scarth.

Wm. T. Scarth, Esq. acknowledged the toast in the following terms.—

Mr. Chairman, Mr. Vice-chairman, and Gentlemen.— I have to thank you many times for the kind manner in which you responded to the last toast. I feel great difficulty in finding words sufficient to express myself, as much more

than I deserve has been said by my friend the vice chairman. It is a source of great happiness to me to think, in carrying out the arrangements of my father for the management or the estates, I have succeeded in establishing so good a feeling between myself and the tenantry.
When I began some thirteen years ago to take an active part with my father, more particularly in the inspection of the estates, I took for my guide the motto—"What was conducive to the tenant's interest was also for the landlord's." In following which I have imitated the excellent example of him who this day receiving such a token of the regard and esteem of, I will unhesitatingly say, 'One of the most respectable bodies of tenantry in England.' When you are connected with such a body of men, the task is easy and the pleasure great. I can only say, gentlemen. I hope the same good feeling and confidence may always exist between us. There is not one in whom, as well as in his family, I do not feel the deepest interest. I take it as the greatest compliment possible to have had my health proposed in such a manner, and drank with such good feeling. Before sitting down, gentlemen, I have a most pleasing duty to perform—one which I assure you gives me infinite pleasure; that is. proposing the health of our worthy chairman, Mr. Hawdon, whom I have known for many years, and there is no man for whom I entertain a higher and better opinion. What a satisfaction, then, it must be to me to see him the chairman on the present occasion. I wish, gentlemen, the toast of our chairman had devolved on one more able, though there is none who could speak with greater sincerity, knowing, as I do, the sterling worth of my friend. I propose, therefore, gentlemen, the health of our chairman, Mr. Hawdon.
Mr. Hawdon responded in suitable terms.
Edward Scarth, Esq. then rose and said :—
I have very great pleasure in proposing the next toast, which is the health of our esteemed and worthy Vice-Chairman and Secretary. To me it is a great gratification doing so, as I am certain all those who know him must appreciate his good qualities. I am proud to say I have for many years enjoyed his friendship, having both been at the same school and now occupying adjoining farms, and I feel most happy in being a neighbour and friend of Mr. Graham's, as a more honourable and upright man there does not exist; therefore, gentlemen, I hope you will join with me in drinking a bumper to the health of our Vice-Chairman and Secretary.
Mr. Graham briefly acknowledged the compliment.
Mr. Brown proposed the health of Mr. Barnes, highly eulogizing his services as Treasurer to the fund, to which Mr. Barnes made a suitable reply.
The Rev. J. E. Jones proposed the Committee and Collectors, which was replied to by Mr. Geo. Raw.
Henry Lipscomb, Esq. proposed success to the Lead Mining Companies of Teesdale, in connection with Wm. T. Scarth, Esq. as agent.
Wm. T. Scarth. Esq. replied as follows:—
My name having been coupled with the last toast, "the Mining Interests of Teesdale," I return you my thanks, regretting much the absence of Mr. Bainbridge, the Lead Company's head agent and superintendent, (on account of the snow,) whose intention it was to have been here this day. The London Lead Company is the principal one in the Teesdale district, and was established years ago by benevolent persons (of the Society of Friends, I

believe) for the employment of the residents in the dales of the Tees and Alston Moor. This great company has long been prominent for the good it has done. I should decidedly say there is no company in England can surpass its management, doing everything for the benefit of those who are dependent upon it. There are other companies in Teesdale, but of more recent date, whom I feel great pleasure in alluding to, whose object is the comfort of their operatives both under and above ground, as well as the development of the mineral wealth. With Teesdale I am well acquainted, that estate being particularly under my management, and it affords me much pleasure in speaking of those for whom I entertain so good an opinion. It is true we have little tiffs, I dare say, but that over, and we are better friends than ever, as I have made it my rule to show favour or affection to none particularly, all being the same to me, and my only object is to do what is right between man and man. We know where there is a large population and small holdings party jealousies occasionally creep in, particularly amongst relations; however, we get on comfortably together, and I feel happy in returning thanks for those in whom I have much interest and regard. The climate of Teesdale is far different from this part of the country, and the holdings generally so small that you might suppose agricultural progress would stand still, but I have great satisfaction in saying I have marked with pleasure the improvement that has taken place, and the general wish to follow any good example.
Mr. Nelson, after alluding to the great pleasure the proceedings of the day had afforded him, gave the healths of Mrs. Scarth and the ladies, and observed if to visit the poor and needy and to attend to the wants of the afflicted meet with our approbation, then indeed did the members of the Keverstone family deserve the highest regard, and well would it be if all other ladies and gentlemen followed their example, for there was nothing adds so much to the lustre of female character as that best and choicest of gifts, charity.
Mr. Scarth responded in suitable terms.
The dinner was served by Mrs. Nichols, of the Queen's Head, Staindrop, in her usual good style, and the room was most taste fully decorated.

27th January 1854 (Carlisle Journal)
A MAN FOUND DEAD.—An inquest was held before Mr Carrick, coroner, on the 19th instant, on view of the body of a man whose name was unknown, who was found dead on the day previous, on the road leading from Nenthead into the county of Durham, about three-quarters of a mile from Nenthead. Deceased had been in a public house at Coalcleugh on the Tuesday evening previous, vending tracts. He was known in the neighbourhood of Alston, was a very infirm man, and walked upon crutches, having lost the use of one of his legs. The road upon which deceased was found is a very exposed one, leading over the Fells, and he had no doubt sunk from exhaustion and fatigue, and died—Verdict “found dead."

11th February 1854 (Westmorland Gazette)

DEATH FROM INCLEMENCY OF THE WEATHER. — On Tuesday, the 30th ult., Mr. Carrick, coroner, held an inquest at Nenthead, Alston, on the body of Christopher Oliver, stonemason, aged eighteen years. The deceased was a native of Bewcastle, but for some time past resided at Westgate, in the county of Durham. In the beginning of last month he had been on a visit to his sister, who lives at Coathill, and on the 9th ult., he left to return home. He proceeded by the evening train to Alston, and then continued his journey on foot. He fell in with three young men, who accompanied him to the village of Nenthead. He told them that he intended to cross the fells that night. They strongly urged him to abandon the attempt, and stay with them all night. He, however, persisted, and proceeded on his way, having a riding pad over his shoulders and stirrup leathers knotted about his neck. His non-arrival caused his brother, who also lived at Westgate, to write to their sister. Her answer at once raised his fears; and, after making fruitless inquiries west of Alston, he employed Teasdale, the Alston police officer, who obtained information of his having taken the road over Killhope. A large number of men were raised on Monday, who shortly found his lifeless corpse lying in the snow, about a quarter of a mile from the turnpike and a mile and a quarter from Nenthead. The storm was very severe on the night in question — there being a heavy fall of snow, accompanied by a piercing east wind, and the roads being previously impassable for carts. It was remarked by the jury that that the road was at all times dangerous for travellers after dark. There being no fences by the sides, nor a guide post to mark the road in the darkness or the storm, the jury considered the road trustees and their surveyor blameable in not having provided these protections, and expressed a hope that no time would be lost in attending to the matter. Verdict—"Death from the inclemency of the weather."

6th March 1854 (Public Ledger and Daily Advertiser)

At the Tees Side Mining Company monthly meeting the accounts showed balance against the mine £30 9d.

10th March 1854 (Carlisle Journal)

THE "TURBULENT DISTRICT" OF ALSTON.

TO THE EDITOR OF THE CARLISLE JOURNAL

Sir, —Having just seen the second report of the Select Committee on Police, I have read with some surprise the examination of John Fawcett, Esq., on the 16th June 1853, wherein he states as follows: —"I am not at all acquainted with the lead mining districts of Cumberland but the coal mini9ng district I am acquainted with, though not very extensively. *I never was at Alston*. We have found it rather a *turbulent district.* We have occasionally had to *send troops to quell disturbances* there, but this is some years ago. The occupation of that part of the district by the rural police would enter into my view. I do not anticipate any impediment to the authority of the police from the nature of the occupation of the people.. I do not see that there would be any more difficulty

in controlling them than in controlling coal miners, or weavers, or iron workers, or any other persons. They have only the advantage of being able to run to earth quicker than others."

As Mr Fawcett admits he was never at Alston, and knows nothing about the "turbulent district," I may be excused for enlightening him on the subject by the following statement of facts: —

The population of the parish consists mostly of "turbulent" miners, and numbers little short of 7,000 inhabitants. The magistrates hold a petty session at Alston once a month, and it appears that during the last eight years the average number of informations (exclusive of bastardy informations and matters connected with the parish) amounts to the large number of *thirteen each year* (being just one in a month) as the following table will show.

Statement of informations, convictions, and committals for trial by the Justices at Alston from January 1846 *to January* 1854, viz. —

	Informations	Convictions	Committals
Housebreaking	2		2
Petty thefts	14	3	4
Assaults	44	23	
Trespasses in pursuit of game	20	14	
Malicious injuries and trespasses	16	11	
Drunkenness &c.	26	20	
Vagrants	21	16	
Total	143	87	6

I may further add that 37 of the above informations were against wandering vagrants and strangers to the place.

Mr Fawcett says "we have occasionally had to send troops to quell disturbances there, but this is some time ago." Now. The only occasion on which troops were ever sent to quell disturbances was in or about 1818, when about twenty country lads took it into their heads to *disturb* a few *grouse* which the officials of Greenwich Hospital, the Lords of the Manor, had just then determined upon possessing for their own special amusement. The keepers being unable to take those "Garrigill Lads," a troop of soldiers was thought necessary to be sent upon the Tom-fool errand, and I believe that, at the time parties who most outrageously sent them upon such a shooting excursion got a deserved rap over the knuckles from head-quarters. *See 23rd January 1819*

I beg to tell Mr Fawcett that the paid constable of the parish can now accomplish more than the troop of soldiers were able to do 36 years ago, and can at the same time afford protection against tramps and vagabonds who are daily living upon the charity of the slandered inhabitants.

I would invite Mr Fawcett to visit Alston before he again volunteers his evidence against the inhabitants, and I am much mistaken if he does not find that the "turbulent" miners of Alston Moor require less controlling, are more free from rioting and turbulence, more peaceably disposed, more kind hearted and better educated, both morally and religiously, than any other like class of men in the kingdom.

I am Sir, your obedient servant,

Alston, March 1, 1853. D

Death From Burning

An inquest was held at Middleton in Teesdale, on the 24th inst., before Mr Thornton, deputy coroner, on the body of Ann Todd, aged 2 years, daughter of Thomas Todd, lead miner. The mother of the child was employed every morning in cleaning the Lead Mining Company's offices, and on the previous morning she had gone out as usual, leaving the children in bed. During her absence they had got up, and by some means the poor child had got its clothes set on fire, and was severely burnt, and died in consequence about three hours afterwards. Verdict — "Accidentally burnt."

7th April 1854 (Carlisle Journal)

Nenthead.—The London Lead Mining Company have, with their usual liberality, very kindly given a donation of six shillings per month to all their workmen, and three shillings per month to all their working boys, during the present high prices of their necessaries of life. As on former instances of their wonted liberality, it has been productive of the best feelings and wishes of the company's numerous body of workmen towards their employers.

15th April 1854 (Newcastle Guardian and Tyne Mercury)

Deaths

At North Terrace, on the 14th inst., aged 29, deservedly respected, Mr William Crawhall, son of the late John Crawhall, Esq., of Allenheads.

21st April 1854 (Carlisle Journal)

> **TO LEAD MINE AGENTS.** WANTED, at STONECROFT LEAD MINE, near Hexham, a PERSON capable of Letting, Superintending, and Measuring Work; also, of Surveying and Keeping up Mining Plans and Accounts. Application to be made to Mr. Wm. Benson, Fourstones.

2nd June 1854 (Newcastle Courant)

On Wednesday, an inquest was held at Rope Burn, near Blanchland, before Mr Favell, coroner, on the body of John Atkinson Beck, aged 17. He was employed at the Derwent Mines, Washing, and, on the Tuesday preceding, he was greasing the machinery of the grinding-wheel, when he was caught (apparently by his waistcoat, which was loose) and drawn in by the shafts of the rollers, which were whirling round with great rapidity. He was immediately extricated, but was quite dead.

In 1851, at Shotley High Quarter, John Atkinson Beck, labourer, aged 47, born Blanchland, his wife Elizabeth, aged 40, born Bywell, children John, washer of lead ore, aged 16, Ann 11, and Hannah 8.

In 1861, at Blanchland, John Atkinson Beck, road labourer, aged 57, his wife Elizabeth aged 53, daughter Ann Scott, married, aged 21, and son in law James Scott, farm servant, aged 29, born Sebergham, Cumberland.
Father John A Beck, died 8th March 1863, aged 59, mother Elizabeth died 7th March 1890, aged 83, buried at St Mary, Blanchland

7th July 1854 (Carlisle Journal)
Bursting of a Reservoir at Garrigill
Friday last a reservoir belonging to the Bentyfield Lead Mining Company burst, in consequence of the recent heavy rains, and the water rushing out washed down the machinery in a building where the ore is dressed, and destroyed a large quantity of ore.

7th July 1854 (Newcastle Courant)
Deaths
At Jeffries Rake, near Blanchland, on the 29th ult., aged 57, Mr Richard Eddy, washer agent to the Derwent Mining Company.
Richard Eddy baptised 3rd April 1796, Father Thomas Mitchel, mother Susannah Eddy.
Richard Eddy married Jane Forster, 28th May 1820, at Blanchland.

In 1841, at Jeffry's Rake, Hunstanworth, Weardale, Richard Eddy, lead ore washer, aged 45, his wife Jane aged 35, children, Joseph 15, Jonathan 13, William 10, Mary 8, Jane 5, Ann 5, and John 3.
In 1851, at Jeffray's Rake, Hunstanworth, Weardale, Richard Eddy, lead ore dresser, aged 54, born Blanchland, his wife Jane aged 51, born Middleton, children, Joseph, lead ore dresser, aged 28, Jonathan, lead ore dresser, aged 22, William, agricultural servant, aged 19, Mary 17, Jane 14, Ann 14, and John 12. Jane Eddy aged 59, died at Jeffrey's Rake 31st December 1859.

5th August 1854 (Newcastle Guardian and Tyne Mercury)
An inquest was held at Boltsburn, in Weardale, on the 31st ult., before Mr Thornton, deputy coroner, on the body of Smith Clemenson *(Clemitson)*, aged 42 years. The deceased lived at Allendale Town, but worked as a labourer in Rookhope. On Monday, the 24th of July, after being away two or three days, he returned to Rookhope, having apparently been drinking to excess, to which he was unhappily addicted. He complained of a pain in his chest, to which he was subject, and was unable to go to work. He continued all the week very poorly, and laid in bed much, but would not have a doctor. On the Saturday morning he became worse, and Mr Arnison, of Stanhope, was sent for, but he died before his arrival. Verdict, "Died from natural causes." The deceased was a noted violin player, and frequenting public-houses got into dissipated habits. He was cousin to John Lough, the famed sculptor.
Smith Clemitson, married Mary Longstaff, at Allendale, 21st September 1835.
In 1841, at Allendale Town, Smith Clemetson, lead ore washer, aged 25, Mary Clemetson aged 30, Robert Clemetson 5, Hannah Clemetson 3, and Robecca Clemetson 1. Mary his wife died 2nd quarter of 1847.
In 1851, at Allendale Town, Smith Clemitson, widow, profession of music, aged 38, children Robert, lead ore washer, aged 15, Hannah 13, Rebecca 11, William 9, and Mary Jane 6.

2nd September 1854 (Newcastle Guardian and Tyne Mercury)
RAILWAY EXCURSION.—On Saturday last, by the liberality of the Newcastle and Carlisle Railway Company, between and persons arrived in this town, from the west country. The train, which consisted of about fifteen carriages, brought visitors from Alston, Nenthead, Allendale Town, and Haydon Bridge, many of whom experienced for the first time in their lives the enjoyment of ride upon the rail. The excursionists were accompanied by an excellent band of music from Alston Moor, and the superior manner in which they performed several pieces of music, tended very much to enhance the pleasure of the whole company. The sea-side being invariably the principal attraction for country people, Tynemouth was, of course, the chief place of resort, where they enjoyed for the short time they had to stay, the full benefit of the invigorating sea breeze, and on Monday afternoon returned home by the half-past four o'clock train from the Central Station, in this town, highly delighted with their excursion

6th October 1854 (Carlisle Journal)
Accidental Death
An inquest was held before Mr Lee, deputy coroner, on the 3rd instant, at Nenthead, on view of the body of Ridley Havelock son of William Havelock, miner, aged 3 years, who was found up to his shoulders between the wheels

of a crushing mill, belonging to the Dowgang Mining Company. Deceased was seen upon the gangway leading to the mill, an alarm was immediately given, but before any party could reach him he had fallen into the hopper. The jury returned a verdict of "Accidental death," and accompanied their verdict by a recommendation to the company to erect a protection around the mill to prevent similar accidents.

Ridley Havelock, son of William and Anna Havelock, baptised 1st December 1851, at Nenthead.

In 1851, at Overwater, Nenthead, William Havelock, lead miner, aged 38, his wife Anna (Trathan, married 25th June 1836) 34, children Nicholas, lead ore washer, aged 14, Martha 11, Isabella 10, William 7, Richard 5, and John 3.

In 1861, at Overwater, William Havelock, lead miner, aged 50, his wife Anna 44, children Nicholas, lead miner, aged 24, Isabella 20, William, lead ore washer, aged 17, Richard, lead ore washer, 15, John 13, Susannah 4, and grandson, Thomas Havelock 5 months.

In 1871, at Overwater, William Havelock, widow, lead miner, aged 58, children Isabella, house keeper, aged 29, John, lead miner, aged 23, Susannah 14, and Mary Ann 9.

See 3rd December 1870, 3rd August 1872, 22nd April 1882, and 8th December 1894

20th October 1854 (Newcastle Courant)

Durham Michaelmas Sessions

Robert Whitfield, labourer was charged with stealing, on the 26th September, at Middleton in Teesdale, seven rugs and other articles the property of the Governor and Company for Smelting down lead, in Middleton in Teesdale. Mr Davidson stated the case. The prisoner was in the service of the Company, who allowed their workmen the use of three rugs each for bedding while they remain on the premises. The stock was found to be deficient, search was made, and seven of them were found in the prisoners possession, at his own house. Guilty. Two months imprisonment.

20th October 1854 (Durham County Advertiser)

FATAL ACCIDENT. —An inquest was held on the same day, at Low Houses, near Newbiggin, in the parish of Middleton in Teesdale, before Mr. Thornton, on the body of Thomas Beadle. The deceased was employed at the Eggleshope Lead Mine, to shovel out the work from the grinder. On the 11th inst., a laden waggon was coming down the railway to the stopper at a sharp rate, and knocking off the timber which was fixed to stop it, fell below and hit the deceased on the head while he was jumping out of the way. The waggon was in charge of another boy, who had left hold of it for a minute, and the rails being very wet with the rain, and slippery, it had gone beyond its usual speed, and he could not overtake it again. Deceased was removed home, and a surgeon obtained, when he was found to be suffering from concussion of the brain, and died the following morning.

Verdict —Accidentally killed by a blow on the head, producing concussion of the brain. *Widower Mason aged 63*

Locke, Blackett, and Co. (purchasers)	£13 5s 0d.
W. J. Cookson and Co.	£13 5s 0d

1st December 1854 (Newcastle Courant)

Presentation on Monday last.

A very handsome gold chain, seal and key were presented to Parkin Lee, Esq., who is about to leave Ninebanks for Australia.

In 1841 Parkin Lee aged 14, was at school in Newcastle, Percy Street, in 1851, he is living at Ninebanks and is listed as a landed proprietor, aged 24, born North Allendale.

Parkin was the son of William and Phillis (Hodgson, married at Kirkhaugh 2nd June 1825) Lee of Ninebanks.

A memorial, at Ninebanks, records: —

To the memory of William Lee, who died at Ninebanks
on the 29th day of January 1844 aged 62 years.
Also of Phillis Lee his wife only daughter of John and Jane Parkin
of Appleby, of Westmorland, who died at Ninebanks 22nd October
1827, aged 42 years.
William Lee their son died 23rd June 1826 aged 16 weeks, and buried at Alston.
This tablet is placed to the memory of his affectionate parents
by their only son Parkin Lee A.D. 1854.

29th June 1863, The Star Ballarat

The Mechanics Institute

The secretary reported having received ten guineas from Mr Parkin Lee. It was resolved, "That Mr Lee's name be added to the list of life members, and that he be informed of the same with the best thanks of the committee.

Parkin Lee invested in the Gold mines and is listed as a shareholder of the EUREKA PROSPECTING, AMALGAMATED GOLD-MINING COMPANY, holding 50 shares. (Gippsland Saturday 8 February 1868)

The Argus(Melbourne) 6th July 1869, lists him as a director of the Clunes and Blackwood Quartz-mining Company.

8th December 1854 (Newcastle Courant)

Deaths

At Alston, on the 28th ult., Esther, wife of Mr Thomas Bell, miner.

In 1851, at Butts, Alston, Thomas Bell, lead miner, aged 31, his wife Esther (Lightbourn, married 25th December 1845, at Alston) aged 24, and son Thomas 2 years. See 12th July 1884.

6th January 1855 (Westmorland Gazette)
Marriage
At St. Lawrence Church, Appleby, on the 30th ult., Mr John Hutchinson, mine agent, Alston, to Miss Ann Fearson, of Appleby. *(Ann Salkeld Teason (or Fearon) Atkinson). In 1861, at Chapel Row, Appleby, Ann Hutchinson, widow, aged 32, dressmaker, and daughter Anne, aged 5. See 19th December 1856*

12th January 1855 (Newcastle Chronicle)
THE NORTHERN LEAD MINES *(From the Mining Journal)*
… CUMBERLAND. In Cumberland there are many rich and profitable mines yielding large returns, but mostly in private hands. Of these, the Goldscope and Greensides are doing well and the latter has paid something enormous. The Keswick Mining Company are not yet working to profit, but have better prospects before them. The operations of the company would appear to have been too extended for limited capital, and, by bringing them into a smaller compass, better results may be obtained. At Brandley one of the mines belonging to the company, a very valuable discovery has lately been made. In 1853, the Cumberland returns of lead ore yielded 5,619 tons of lead, and 50,000 ounces of silver. …

12th January 1855 (Durham Chronicle)
THE LEAD MINES IN 1854. — Durham, Northumberland, and Westmoreland, (Says Mr J. Y. Watson, in his mining report of 1854, published in the Mining Journal), yielded ores which produced 15,434 tons of lead and 140.000 ounces of silver: —the largest mines, the East and West Allendale, and Weardale, yielding 11,916 tons of ores or 9,904 tons of lead, and 50,700 ounces of silver— the Derwent mines, 1,330 tons of ore, 1,000 tons of lead, and 16,000 ounces of silver. In Cumberland there are many rich and profitable mines, yielding large returns, mostly in private hands. Of these, Goldscope and Greenside are doing well, and the latter has paid something enormous. The Keswick Mining Company are not yet working to a profit, but have better prospects before them. The operations of the company appear to have been too extended for a limited capital, and, by bringing them into smaller compass, better results may be obtained. At Brandley, one of the mines belonging to the company, a very valuable discovery has lately been made. In 1853, the Cumberland returns of lead ore yielded 5,619 tons of lead and 50,000 ounces of silver.

20th January 1855 (Westmorland Gazette)
AWFULLY SUDDEN DEATH.—An inquest was held at Alston on Wednesday evening last, before Mr. Carrick, county coroner, on the body of Mr. Philip Aydon, aged 29 years. The deceased was a traveller for the firm of Sidney and Rae, wholesale tea dealers, in Newcastle. He left Newcastle on Wednesday morning, by the first train on his Alston journey, and arrived at that town at ten o'clock. He proceeded to Mrs. Errington's, the Blue Bell Inn, where he took a seat in the commercial room. He called Miss Errington and inquired if he could have a gig to Nenthead. He had scarcely uttered the words when Miss Errington observed him to change colour. She asked him if he felt ill, to which he made no reply. She immediately ran into the kitchen and called her mother and a commercial gentleman, who happened to be

present. On entering the room, they found him in a dying state, and he expired in a minute or so. It appeared from the evidence of his brother-in-law, that he had extensive heart disease, an attack of which had nearly proved fatal last summer. He was a young man of a most excellent character. The jury, composed of the principal tradesmen of the town, found a verdict of natural death. The corpse was removed the following morning to Newcastle. —*Carlisle Patriot*

9th February 1855 (Carlisle Journal)
Deaths
At Garrigill, on the 4th ult., Mr Joseph Varty, innkeeper, aged 46 years.
See 20th September 1834, & 25th January 1856

2nd March 1855 (Carlisle Journal)
Alston.—A company under the title of the Tynehead Mining Company, with 6,400 shares has just been established at Alston, with the view of extending the operations in the mine, with a spirit commensurate with its anticipated worth. The mine is situate on the north-east slope of Tynehead Fell, in the centre of the richest producing district in England, and the grant extends over 21 years, at dues of one seventh of the ore, including rental. The parish of Alston, in 1850 produced 17,775 bings of ore, and the average yield of the mines for the last one hundred years is rather over than under that quantity.

9th March 1855 (Carlisle Journal)
Deaths
At Alston, on the 5th inst., Mr. Wilson Dickinson, aged 43 miner.
In 1841, at Town Foot, Alston, Wilson Dickinson, lead miner, aged 30.
In 1851, at Middle Gate, Penrith, Wilson Dickinson, lead miner, aged 39, his wife Jane aged 31, children Tom 4, John 2, and William 3 months. All children born at Penrith.
In 1861, at Butts, Alston, Jane Dickinson, widow, dressmaker, aged 41, sons Tom, lead miner, aged 14, John, tailor, aged 12, and William 10.

16th March 1855 (Carlisle Journal)
Deaths
At Foreshield, on the 8th instant, Mrs Sarah Bell, aged 75 years.
See 12th March 1842
At Lowbyer near Alston, on the 14th inst., Mr William Paull agent to the Commissioners of Greenwich Hospital, aged 58 years.
William Paul married Ann Michell, 26th July 1823, at Gwennap, Cornwall.
Children of William and Ann Paull:
Maria Ann Michell, baptised 18th July 1824, at Gwennap
Joseph Mitchell Paull baptised 1st July 1827, at St. Mewan
Emily Michell baptised 11th December 1828, at St. Mewan
John Henry baptised 3rd April 1830, at St. Mewan
William Davey baptised 3rd April 1830, at St. Mewan
Ann Paull was buried at St Austell, 20th June 1836.
In 1841, at St Austell, Cornwall, William Paull, mine agent, aged 45, Children, Maria 17, Joseph 14, Emily 13, William 11, and John 11.
In 1851, at Lowbyer, Alston, William Paull, widower, Moor Master, aged 55,

born Gwennap, Cornwall, his daughters, Maria Ann, aged 26, born St Austell, and Emily aged 22, born St Austell.

20th April 1855 (Newcastle Courant)

Marriages

At St John's Church, Oxford Square, on the 18th inst., Thomas Wilson Crawhall Esq., of the Raise, Alston, Cumberland, eldest son of Isaac Crawhall Esq., of Bradley Hall, in this town to Fanny Portmore, youngest daughter of Francis F Fothergill, Esq., of Cambridge Street, Hyde Park.

20th April 1855 (Carlisle Journal)

ALSTON.—About two hundred of the workmen of the Rodderup Fell Mining Company were plentifully regaled by Thos. W. Crawhall, Esq., the respected manager of the company's works, on the occasion of his marriage, on Wednesday, the 18th inst. After the health of 'the newly-married pair had been proposed by the resident agent and heartily responded to by the workmen, followed by cheers that made the village ring, the men and boys proceeded to spend the afternoon in those amusements for which Cumberland is noted, such as wrestling, a running leap over hurdles, and foot-racing, all of which were contested in a manner that would have done credit to the prize-ring. The sports being ended, the remainder of the evening was spent with appropriate toasts and song. Everything passed off with the greatest harmony, and all returned home highly delighted with the enjoyments of the day.

APPLEBY—COMMITTALS for TRIAL.— At the Magistrates' Office, Appleby, on Tuesday, George Hindmoor, a labouring man, was charged before Robt. Addison, Esq., with stealing a pair of boots, belonging to Richard Hetherington, Garrigill, miner, from a groove shop, at Hardshins Mine, where they were left by Hetherington on his entering the mine on the morning of the 11th instant. In the afternoon they were missing, and another pair of old ones left in their stead. There was snow on the ground at the time, and by the aid of the footprints and enquiries the prisoner was traced to Harewood, and thence to Shield Row, near Gateshead, where he was apprehended wearing the stolen boots. Committed for trial to the Appleby Midsummer Sessions.

Marriages
At Alston, on the 17th inst., Mr John Watson, of Garrigill, to Miss Hannah Watson, daughter of the late Emerson Watson, of Hudgill.
In 1861, at Aimshaugh, Alston, John Watson, farmer of 70 acres, his wife Hannah aged 36, sons, Joseph 5, and Thomas 2.

27th April 1855 (Carlisle Journal)
Married
At Alston Church, on 25th inst, Mr William Thomason of Garrigill to Miss Frances Elliot of Alston.
In 1841, at Cropgill, Garrigill William Thomason, lead miner aged 26, and his wife Elizabeth aged 22.
In 1851, at Bridge End, Garrigill, William Thomason, lead miner, aged 35, his wife Elizabeth (Slack married 31st January 1839; Elizabeth died 16th August 1852, aged 35) aged 32, and daughter Mary 9 months.
In 1861, at Bridge End, Garrigill, William Thomason, lead miner, and Methodist lay preacher, aged 46, his wife Frances 40 (daughter of Joseph and Mary Elliot, of Ashgill), and daughter Mary 10. In 1871, at Bridge End, William Thomason, grocer, aged 56, and wife Frances aged 49. Also at Bridge End, Mark Slack, widow, annuitant, aged 91, and servant, Mary Thomason, aged 20. William died 12th July 1879. Mary Thomason married Joseph Currah, 26th April 1877, at St John, Garrigill. Mary died 4th quarter of 1880.
In 1881, at Garrigill, Frances Thomason, widow, grocer, aged 59.
In 1881, at Garrigill Gate, Joseph Currah, widow, lead miner, aged 28, and general servant, Margaret Robinson, widow, aged 55. Joseph Currah married Mary Raisbeck August 1883. In 1891, at Stone Cottages, Nenthead, George Raisbeck, unmarried, retired lead miner, aged 65, brother Robert Raisbeck, unmarried, lead miner, aged 46, visitors Joseph Currah, foreman lead ore washer, aged 38, and his wife Mary Currah 50.
In 1891, at Bridge End, Frances Thomason, widow, grocer, aged 69, and general servant, Mary Mitchell, aged 17. Frances died 24th January 1893, aged 72.

"NORTHERN PRIMITIVE METHODISM" by W.M. PATTERSON,
E. Dalton, London, 1909 - p171-183
The membership of the circuit is about 270. How many valuable members and officials have gone from it from time to time to more promising fields of labour at home or across the seas it would be impossible to tell. Like John Shipley, who was converted under Jane Ansdale in 1823, and who went to the Isle of Man in 1831, and rose to eminence in the island, many of the highland sons became a social and spiritual power in the localities in which they settled. Of those who remained at home, tributes to their strength of personality, depth of conviction, tenacity of purpose, warmth of devotion, and generosity and hospitality, are beyond count. The Latimers, the Harrisons, the Pearsons, the Waltons, the Hills, the Thompsons, the Doyles, the Shields, and the Hendersons; W. Thomason, of Garrigill; John Hall, John Holmes, John Davidson, John Wilkinson, Thomas Moffatt, Edward Greenwell, Isaac Watson, and multitudes more among the living and the dead have surrounded Alston, Nenthead, Nentshury, Lilaygill, Garrigill, and the country round with traditions (and nourished them), the recital of which can never cease to inspire generations to come. Nenthead

gave Robert Hind to the ministry. In his recent lamented death a prince has fallen in our Israel. In addition, there have gone into the itinerancy from the circuit G. T. Lovatt, Isaac Cousin, and W. Robson. M. H. Barron, who died at Fernando Po, was born at Wellgill, Nenthead, though his parents afterwards went to reside at Durham. See 5th May 1877, 2nd August 1879, 11th August 1883, 26th September 1891, and 18th April 1914.

Deaths

At Alston, John Readshaw, aged 47 years.

In 1841, at Water Greens, John Readshaw, lead miner, aged 30, his wife Isabella (Pearson, married 5th February 1831, Alston) aged 30, children Jane 9, Mary 4, and Joseph 2. In 1851, at Water Greens, John Readshaw, widow, lead miner, aged 44, children Mary 14, Joseph 12, and Isabella 8. In 1861, at Water Greens, Jane Pearson, widow, farmer of 30 acres, aged 70, grandchildren Joseph Readshaw, miner & farmer, aged 22, and Isabella Readshaw, dairymaid, aged 18.

28th April 1855 (Carlisle Patriot)

Deaths

At the Workhouse, Alston, on the 22nd inst., Margaret Furnace, aged 66.

Margaret Furnace, baptised 27th December 1788, daughter of Benjamin Furnace of Croft.

In 1841, at Kelloe, Durham, Ann Peart, widow aged 60, and Margaret Furnace, aged 50.

In 1851, at the Workhouse, Alston, Margaret Furnace, aged 62.

26th May 1855 (Newcastle Guardian and Tyne Mercury)

COUNTY OF DURHAM INQUESTS.

An inquest was held at Westgate, in Weardale, on the 18th inst., before Mr Thornton, deputy coroner, on the body of Wm. Armstrong, aged 20. The deceased was employed at the Height Ironstone Mine. On the 4th inst., he was boring holes for blasting stone. In trying a hole with a "dresser" to see if it was even, he found a "slough hole" which he intended to fill up with powder, and while drawing it out the powder exploded, and he was thrown four yards off and severely burnt. He died on the 17th. Verdict, "Accidentally killed."

15th June 1855 (Durham County Advertiser)

Death By A Blow. —An inquest was held at Westgate in Weardale, on the 8th inst., on the body of Featherstone Kidd, aged 10 years. The deceased worked with his father at Slit Lead Mine, near Westgate. On the 4th inst., he had been standing near the Whimsey at the mouth of the mine, when the rope got entangled by some means, and a piece of timber flew off and hit the poor boy on the forehead, causing a very deep wound. He was carried home and medical attendance obtained. He died on the morning of the 8th inst.

Verdict —Accidental death.

In 1851, at Kitty Cragg, Stanhope, Joseph Kidd, lead miner, aged 43, his wife Hannah (Featherston, married at St John's Chapel, 12th February 1831) aged 42, children Jane 15, Elizabeth 12, Featherston 6, and Mary Hannah 4.

In 1861, at Kitty Cragg, Joseph Kidd, lead ore washer, aged 53, his wife Hannah 52, daughters Elizabeth 22, Mary H 14, and granddaughter Sarah Kidd 2.

22nd June 1855 (Carlisle Journal)

Also 7 Sixty-fourth Parts or Shares in FAR TYNE GREEN Lead Ore Mine, with a like Share of all Ores, Minerals, and Materials belonging the same. The above Mines are situate in the Manor of TYNEHEAD, in the parish of Alston, and are at present producing large quantities of Lead Ore.

Mr. JOSEPH HETHERINGTON, of Garrigill (the Agent), will, on application, show the Mines, and give all further information.

JOHN WOODMASS, Auctioneer.

23rd June 1855 (Carlisle Patriot)

Deaths

At Alston on the 16th inst., Ann daughter of Francis Philipson aged 37.

In 1841, at Hermitage, Garrigill, Francis Philipson, lead miner, aged 60, his daughter Ann 20, and granddaughter, Elizabeth 4 months.

In 1851, at Garrigill, Francis Philipson, widower, lead miner, aged 70, born Northumberland, his daughter Ann 33, born Northumberland, and granddaughter Elizabeth aged 10, born Garrigill.

At Beldy, near Garrigill, on the 19th inst., Hannah daughter of the late Whitfield Dawson, clogger, Alston aged 27.

14th July 1855 (Carlisle Patriot)

Capt. William Jeffrey, of the Driggith Mines, Cumberland, is appointed superintendent of the Tees Side Mines, and commenced his duties a week ago. The long and varied experience of this gentleman in mining, and the erection and working of pumping machinery, is a guarantee that the machinery at these mines will speedily put in order. —*Mining Journal.*

The unfortunate Goldscope Mine (Cumberland), which for the last four months has been under the management and. receivership of Mr. John Taylor, jun., of Queen- street, has, we regret to find, fallen in to a serious extent during the absence of that gentleman in Spain. This catastrophe, added to the fact that the mine is in Chancery, has, at least for the present, destroyed those hopes of its prosperity which were once entertained. This event falls particularly hard upon A. R. Clarke, Esq., the proprietor of 7-9ths of the mine, inasmuch as during his management it was worked successfully. —*Mining Journal.*

18th July 1855 (Teesdale Mercury)

Alderson and others v. Leggett. —This case excited some interest. The plaintiffs are employed at a lead mine, at Spanham, near Bowes, and had contracted with the defendant to drive a "horse-drift," at £2 15s. per fathom. The amount of work to be done was 14½ fathoms. The defendant stated that the work had not been satisfactorily executed. On the pay-day he had retained in his hand a balance of £10, which he contended he had disbursed in making good the unsafe work of the plaintiffs. This balance the plaintiffs sought to

recover. After hearing the evidence. His Honour adjudged the plaintiffs £6. Mr. Coulthard for the plaintiffs, Mr. Barnes for the defendant.

21st July 1855 (Carlisle Journal)
Deaths
At Nenthead, on the 17th inst., aged 26, Elizabeth, wife of Mr Thomas Watson.
Thomas Watson married Elizabeth Tinniswood, 18th December 1850, at Nenthead.
In 1841, at Nenthead Low Hill Top, Elizabeth Tinniswood aged 15, and her sister Ann 10, were working as servants too John Millican, lead mine agent.
In 1851, at Hillersdon Terrace, Nenthead, Thomas Watson, lead mining overman, aged 29, born Middleton, and his wife Elizabeth, aged 21, born Burtreeford.
In 1861, at Hillersdon Terrace, Thomas Watson, widower, lead mine agent, and local Methodist preacher, aged 40, children, Tinniswood 9, Margaret 7, and his unmarried sister, Hannah Watson, house keeper, aged 32.

In 1851, at Ashgillside, Joseph Renwick, retired lead miner, aged 61, his wife Nanney 59, sons David, labourer, aged 32, Joseph, lead miner, aged 24, and Thomas, lead miner, aged 22.
See 3rd December 1853

7th September 1855 (Carlisle Journal)

TESTIMONIAL OF REGARD. —On Wednesday, the 29th ult., a number of lessees of lead mines, and other friends of Mr. James Stephens, of Lowbyer, Alston, dined together at the Golden Lion Inn, on occasion of presenting him with a silver tea service and a gold watch and chain, as a testimonial of esteem for him during the thirty years he has held the office of Clerk of Ore Deliveries in Alston Moor. Jacob Wilson, Esq., presided, supported by Charles Arnison, Esq., as vice-chairman. After the removal of the cloth, the health of her Most Gracious Majesty the Queen Prince Albert, and the rest of the Royal family, Emperor and Empress of the French, and other appropriate toasts were drunk, when the president (Mr. Wilson), the oldest lessee of lead mines in the Manor of Alston, presented the testimonial to Mr. Stephens in a very feeling and affectionate manner, giving his testimony to the assiduity and faithfulness with which Mr. Stephens had discharged his onerous duties. The teapot bears the following inscription: —

Presented, together with a sugar basin, cream ewer, gold watch, and appendages, to Mr James Stephens, by the lessees of lead mines on Alston Moor, and other friends to record the esteem and respect entertained for him during the thirty years, he has discharged the duties of Clerk of Ore Deliveries in the Manor of Alston, 1855." Mr. Stephens acknowledged the valuable present in a very appropriate and interesting speech, expressive of his deep sense of the kindness shown him. The value of the testimonial is about £60— of the manufacture of Messrs. Reid and Son, Newcastle-upon-Tyne, and it was accompanied with a guinea of the date of 1591, a significant expression of hearty good wishes for the health and prosperity of Mr Stephens and that of his family. The affability and kindness of the venerable chairman, now in his 85th year, the good feeling elicited, and the very agreeable and friendly manner, in which the whole was conducted, rendered the occasion highly pleasing and long to be remembered.

In 1841, at Lowbyer, Alston, James Stephens, clerk of deliveries, aged 40, his wife Lydia (Davis) aged 45, children all born Alston, Lydia 14, William 13, Mary 10, John 7, and Elizabeth 4. In 1851, at Lowbyer, James Stephens, clerk of deliveries, aged 52, born Wendron, Cornwall, Lydia 58, born Sithney, Cornwall, daughters Mary Ann 20, and Elizabeth 14.

In 1861, at Lowbyer, James Stephens, Greenwich Hospital pensioner, aged 62, born and his wife Lydia, aged 69. Lydia died at Alston, 1st quarter of 1863.

In 1861, at 5 George St., East, St Andrews, Newcastle, William Davis Stephens, ship owner, aged 33, and his wife Hannah 32, born Haltwhistle. In 1861, John Stephens, shipping agent, aged 27, was lodging at Westgate, Newcastle.

In 1871, he was lodging at 6 Picton Place, St Andrews, Newcastle, shipbroker, aged 37.

11th September 1855 (Cumberland and Westmorland Advertiser, and Penrith Literary Chronicle)

Marriages

At Nenthead, on the 4th inst., Mr Henry James Dalton, of London, to Sarah, youngest daughter of T. Millican, Esq., of Nenthead House.

Marriages
At St Peter's Church, Newcastle upon Tyne, on the 19th inst., Mr Wm. Hewitson, of Allenheads, Northumberland, surgeon, to Martha Anne, second surviving daughter of Mr Robert Dees, of Newcastle.

6th October 1855 (Gateshead Observer)
Marriages
At Garrigill, near Alston, on Saturday, by the Rev. J. Harper, Mr Thomas Shield to Eleanor, daughter of Mr T. Millican of Eshgillside. This being the first marriage solemnised at Redwing Meeting House, the newly married couple were presented with a handsome family Bible.
In 1861, at Ashgill, Thomas Shield, lead miner, aged 30, Ellen his wife 31, and daughter Ann E. 7 months.

17th October 1855 (London Daily News)
From Tees Side Mine. "The water is out a little below the 20 fathom level; the appearance of the mine is good, and will work at a profit. The branch of ore in the bottom of the 20 is worth about 1½ ton per fathom. The stopes over the 20 will turn out half a ton per fathom; the ground will stope for £3 per fathom. It will take a little time in clearing the cistern, &c.; when we get the pumps down the water will be cleared In 24 hours. As far as the water is concerned, we can keep that with the greatest ease."

20th October 1855 (Newcastle Journal)
Deaths
At Loaning House, near Alston, on the 12th inst., aged 76 years, Robert Bainbridge, Esq. solicitor, universally respected lamented.
Robert Bainbridge married Elizabeth Walton, 17th June 1804, at Alston. Children, Robert Walton, baptised 14th May 1805, Elizabeth, born 19th January 1807, George born 27th January 1809, Hannah baptised 28th December 1813, and Utrick baptised 13th August 1818.

In 1841, at Loaning House, Robert Bainbridge, solicitor, aged 60, and daughter Hannah Bainbridge aged 25.
See 10th September 1836, 8th July 1837, 5th April 1861, 4th January 1873, 8th February 1873, 7th September 1878, 2nd January 1892.

DECIDED BARGAIN, OWING TO THE SCARCITY OF LEAD.

To be SOLD, one 32nd PART or SHARE in that swift yielding LEAD MINE called WEST GREEN HURTH, in the Manor of Teesdale. —Apply to JOHN SALKELD, Junior., General Accountant and Commission Agent, Brunswick House, Penrith.

ALSTON PETTY SESSIONS.— Friday Nov 2.

(Before the Rev. Octavius James and the Rev. R. W. Friend)

Poachers. — John Nicholson, of Willey Hill, near Renwick, was charged with poaching on an allotment near Gilder Forest. This being the first offence, and the defendant having previously borne a good character, he was fined in the penalty of 13s., costs included. — George Walker, of White Wall, was charged with a similar offence on an allotment in the occupation of Mr Teasdale, of Nenthead, and was fined £2, costs included. — Geo. Lee and Cooper Barnes, miners, both of Clog Hall, were charged with the same offence on lands in the occupation of Mr Madgin. Fined 13s 6d. each, costs included.

Assaulting a Policeman Thomas Carr, of Nenthead, was charged with assaulting police constable Iredale, while in the discharge of his duty, at Alston. Fined 10s. – Hugh Yeates, of Dryburn, was charged with being drunk and disorderly in the streets of Aston on the night of the 2nd inst., and with having then and there assaulted and obstructed the police. Fined 6s.

Deaths

At Allenheads, on the 1st inst., Jane wife of Thomas Sopwith, Esq., aged 48 years, deeply lamented.

At Rice, near Alston, on the 3rd inst., Mr Joseph Craig, aged 28 years.

14 November 1855 (Teesdale Mercury)

Fatal Accident near Middleton-in-Teesdale. —On Tuesday, the 6th inst., a young man, named Robinson, employed at Colebury Lead Mine, met with his death under the following melancholy circumstances. It appears that he was engaged near some machinery used in bruising the lead ore, and his clothing becoming entangled, he was drawn in, and before he could be extricated, was so shockingly crushed that his death must have been almost instantaneous.

Henry Robinson, aged 19 was buried at St Mary the Virgin, Middleton in Teesdale 9th November 1855
George Robinson married Margaret Bainbridge 15th May 1833, at Middleton in Teesdale.
In 1841, at Forest of Frith, Middleton, George Robinson, lead miner, aged 45, his wife Margaret 36, children James 7, Henry 4, David 1, and Ann Bainbridge, servant, aged 18.
In 1851, at Bell House, Newbiggin, Teesdale, George Robinson, lead miner, aged 58, his wife Margaret 45, children James lead miner, aged 16, Henry lead miner, aged 14, and David 12
In 1861, at Bell House, Newbiggin, Teesdale, George Robinson, lead miner & farmer, aged 68, his wife Margaret 55, son, David, lead miner, aged 21,

Hannah Bell, house servant aged 17, son, James lead miner, aged 26, daughter in law Mary aged 24, grandson, Henry aged 2, and visitor Elizabeth Parkin, carters daughter, aged 18.
George Robinson died 2nd quarter 1867, aged 74.

In 1871 at Townend, Middleton, Ann Watson, miners widow, aged 40, children, George, lead miner, aged 19, Hanah 17, James, lead ore worker, aged 15, Mary 11, Henry 9, David 7, Margret Ann 5, and mother, Margaret Robinson, miners widow, aged 66.
Margaret Robinson died 1st quarter 1873, aged 67.

19th November 1855 (Public Ledger and Daily Advertiser)
At Tees Side Mining Company meeting the accounts showed a balance against mine, £435 3s. 6d; a call of 1s. 6d. per share was made. *Mining Journal*

23rd November 1855 (Newcastle Courant)
SINGULAR NOTION OF CHARITY.—It will no doubt be within the recollection of many of our readers that, some time ago, a person, calling himself Isaac Holden, of Allendale Town, visited most of the towns and villages in Northumberland and the adjoining counties, selling an engraved portrait of himself, which, he stated, was for a charitable purpose; he has now completed his object, and, on Tuesday last, the day appointed for making his intention known, handed the following resolution to the proper authorities, at Allendale Town, accompanied with some lines of poetry, which are not suitable for a newspaper; —"It is with feelings of gratitude I am enabled, by the blessing of God, to let my kind friends know that I have sold 658 portraits, with the profits of which I intend buying a hearse for the church at Ninebanks, West Allen, Northumberland. As there has never been one at that place before, and many of the dead are a good distance from the "house appointed for ail living," I have no doubt it will be a great benefit to that part of the country. —ISAAC HOLDEN, Allendale Town, November 20,1855
Isaac sold a Daguerreotype photograph of himself to raise the funds mentioned above.
In 1841, at Allendale Town, Isaac Holden, grocer, aged 30, his wife Ann (Teailford, married 13th December 1834) aged 25, children Maria 4, and Mary 2 years, Mary died 1st December 1846, aged 7 years.
In 1851, at Allendale Town, Isaac Holden, grocer and tea dealer, aged 47, his wife Ann aged 40, and daughter Maria aged 14, born Allendale.
In 1861, at Allendale Town, Ann Holden, widow of grocer, aged 48, and daughter Maria aged 24.
In 1871, at Allendale Town Ann Holden, widow, aged 60. In both 1861 and 1871 census Ann's place of birth is listed as Stanhope, Durham.
Ann Holden died 19th August 1872
Maria Holden, married John Forster, 3rd quarter of 1864; in 1871 at Allendale Town, John Forster, aged 32, bookseller, stationer and grocer, his wife Maria aged 34, and son Joseph J. aged 2 years. The epitaphs for Allendale, state that John and Maria had two sons who died in infancy, both named Isaac Holden Forster, the deaths are given as 26th December 1865, aged 9 months, and 23rd December 1866 aged 3 months. Maria died 21st November 1871, aged 55.

Isaac Holden www.bbc.co.uk/ahistoryoftheworld

Isaac grew up at Mohope in the West Allen he worked on the washing floor of the lead mine and at about 13 years of age, as a lead miner at the Hartleycleugh lead mine.
At St Cuthbert's Church, Allendale there is a memorial to Isaac (Obelisk) on which is said: —"In memory of Isaac Holden, a native of this parish who died November 12 1857 aged 51 years. He gained the esteem and respect of the public by his untiring diligence in originating works of charity and public usefulness. Upwards of 600 persons subscribed to erect this monument".
See 22nd April 1853, & 24th August 1872.

24th November 1855 (Carlisle Patriot)
THE LEAD MINES.—The following is the agent's report of the Keswick mines, dated the 10th inst.:—"At the Brandley Mine, the 48 fm. level south, I am happy to say, has improved during the week, and we have now a beautiful lode worth 15 cwts. of ore per fothom. In the 40 north there is but little change. Lode small, and worth 6 cwts. of ore per fathom. In the rise in the back of this level there is good lode, which will produce 20 cwts. of ore per fathom. In the 30 fathom level north we have intersected a string which has thrown the lode out of its course. The lode is worth from 5 to 6 cwts. per fathom, but the ground is hard and wet. The salt sump stopes south will yield from 12 to 15 cwt. per fathom, the north stopes 5 cwts. per fathom. In the 30 fathom south, No. 1 stope is worth from 6 to 8 cwts., and No, 12 stope, 2 cwts. of ore per fathom. In Lancaster rise we have a very strong lode, worth 8 cwts. per fathom. At Thornthwaite mine the lode in the drift is poorer, worth about 8 cwts. of ore per fathom."

7th December 1855 (Newcastle Courant)
Marriages
At Ballarat, Australia, on the 16th July Mr David Reilly of West Auckland Durham, to Hannah 2nd daughter of Mr John Pattinson agent for the Weardale Iron Company, Stanhope Burn Ironworks, Stanhope.

14th December 1855 (Carlisle Journal)

Marriages

At Alston, on the 9th inst., Mr John Davidson to Mrs Elizabeth Gibson, both of Alston.

In 1861, at Main Street, Alston, John Gibson, innkeeper, aged 32, born Kirbythore, his wife Elizabeth 39, born Kirkoswald, niece, Sarah Westmorland 7, and servant, Elizabeth Varty 14.

At Alston, on the 12th inst., Mr Jonathan Parmely, of Slaggyburn, to Miss Hannah Bell, of Alston.

Deaths

At Fourdargue near Alston, on the 12th inst., Ann wife of Joseph Kindred, aged 28 years. *See 8th February 1870*

15th December 1855 (Westmorland Gazette)

ALSTON PETTY SESSIONS, DECEMBER 7TH

(Before H. W. Friend, Esq., and the Rev. Octavius James)

John Kersopp, of Park, near Alston, miner, charged by John Spark, game watcher, with poaching on Gilerdale Forest, on the 5th of November last. Fined £2. including costs.

John Walton, also of Park, charged by Walter Spark, game keeper, with poaching ou Gilerdale Forest, on the 10th of November last.

Fined £2. including costs.

Elizabeth Thompson of Alston, alleged that Wm. Craig, of Alston was the father of her illegitimate child. This case had been adjourned from the previous petty Sessions in consequcnee of the very conflicting evidence given on that occasion for the defence. Craig alleged the probability of Thomas Lee, of Alston, draper, being the father of this child, and called a number of witnesses to prove that they had seen Mr. Lee in company with Elizabeth Thompson at late hours of the night, on several occasions. The evidence for the defence did not materially shake thei evidence of Miss Thompson, and her statement being sufficiently corroborated, the Magistrates made an order, upon Craig for 1s. 6d. per week and costs.

28th December 1855 (Durham County Advertiser)

Mining in the Alston Moor District.—In compliance with the wishes of many of the shareholders, the committee of management of the Nether Hearth Lead Mire have prepared an elaborate prospectus, Containing much interesting information on the history of that mine and district. The mines in Alston Moor, held under the Commissioners of Greenwich Hospital, have been extremely productive; the Moor Master's book showing that, for the three triennial periods, ending 1768, 1827, and 1850, the produce was respectively, 24,732 tons, 30,973 tons, and 20,274 tons. In Forster's Strat, published in 1821, it is stated that the district does not possess that sublimity of soil which characterises many portions of the globe, but is rich in valuable deposits of lead, ore, and invariably astonishes mineralogists who have visited the rich mines of more celebrated countries; it has, however, been strangely neglected by scientific men. The Nether Hearth Mine is situate ten miles from Alston, Cumberland; is bounded on the north by the River Tees, at the point where the counties of Durham, Cumberland and Westmoreland, join and is near the mines, of Mr W. B. Beaumont and the Loudon Lead Company. The grant is

held for 21 years, from 1855 at 1-7th dues for the Tynebottom limestone, and 1-10 for the remainder, payable in ore at the mine, and no other rent; with abundance of water power, &c., free of charge. It has been worked for lead from time immemorial, and the surface at the western part of the sett has the appearance of an immense rabbit warren, caused by the heaps thrown up in the search for ore, large quantities of which have been raised by surface workings. The company who held the sett previous to the present one, were principally working men, and during the twenty years they worked it they obtained 1014 tons 15 cwt. of ore. The average number of pickmen employed was five; the ore was principally got at a depth of 6 or 7 fms, and nowhere deeper than 13 fms. The average price obtained for the ore was £9. 7s. 6d per ton; and the last ore sold by the present company realised £16 10s. per ton. The mine has been inspected and reported on by Messrs. John Hitchins, Capt. W. Jeffrey, and John Calvert, whose reports agree as to the value and durability of the mine, But 2s per share (£640) has been paid up; while one-half has always been returned in dividends, and another just approaching.

4th January 1856 (Durham County Advertiser)
MINING IN NORTHUMBERLAND AND DURHAM.—The *Mining Journal* in a review of mining in Northumberland and Durham in 1855 has the following: The mines here are chiefly private property: and among them East and West Allendale and Weardale sold lead ores in 1844 to the extent of 12,220 tons, yielding 9200 tons of lead and 49,000 oz. of silver, against 11,916 tons of ore, 9904 tone of lead, and 40,700 ozs. of silver in the previous year, from which it would appear the ores of 1853 were much the richest for lead as well as silver. Little Egglescope, 2861 tons of ore, and 2117 of lead; Wiregill, 2207 tons of ore, and 895 tons of, lead; the Derwent Mines, 1000 tons of ore, 800 of lead and 15,000 ozs. of silver. These mines show a falling off as compared with the previous return of 330 tons of ore, 200 tons of lead, and 1600 ozs. of silver. Total return of these counties, 22,329 tons of ore, 16,669 tons of lead, and 78,577 ozs. of silver.

18th January 1856 (Carlisle Journal)
Deaths
At Alston, on the 16th inst., Mr John Woodmass, auctioneer and mining agent, aged 44.
See 20th June 1868
At Alston, on the 13th inst., Mrs Elizabeth Emerson, aged 103.
In 1851, at the Butts, Alston, Elizabeth Emerson, widow, pauper, aged 97, born, Williamswick, Northumberland, daughter, Sarah Brown, widow, pauper, aged 74, born Kirkhaugh, and lodger, William Lattimer, cartman, aged 45.
At Fourdargue, near Alston, on the 15th inst., Joseph, son of Mr Joseph Walton, relieving officer, aged 23.
See 25th February 1860, 4th November 1871, & 2nd September 1876.

25th January 1856 (Carlisle Journal)
GARRIGILL
The Independent Brass Band belonging to Garrigill, held their annual festival at the house of Mrs Varty, innkeeper, Dragon Inn, on Friday evening, the 18th inst., when a supper was provided for the occasion. At 6 o'clock the band

accompanied by the Nenthead band, paraded the village. The night was calm and serene, and the music performed comprised some of the most beautiful pieces of the day. At 7 o'clock the cloth was spread for supper, when upwards of eighty sat down, and did ample justice to the delicacies provided by the worthy hostess.

Deaths

At Alston, on the 20th inst., Mr Wm. Brown, aged 75 years.

In 1851, at Front Street, Alston, William Brown, pauper, retired mason, aged 70, and Ann Parker, housekeeper, aged 54.

2nd February 1856 (Newcastle Guardian and Tyne Mercury)

Deaths

In Hindhaugh Street, on the 30th ult., aged 44, Mr John Liddle, lead miner.

6th February 1856 (Teesdale Mercury)

MIDDLETON.—On Monday, the 21st inst., a beautiful Time-piece and Gold Pencil-case (purchased of Messrs. Reid & Son, Newcastle upon Tyne) were presented to Mr John Hyslop, Master of the Lead Company's School, Middleton in Teesdale, by a few of his former pupils, as a testimonial of their esteem for the diligent discharge of his duties as a teacher, when under his tuition. *See the Probate of John Hyslop dated 1885*

8th February 1856 (Newcastle Courant)

Marriages

At Corn Mill, on the 2nd inst., Mr John Keenlyside, carrier, of Buckshot, near Blanchland, to Ruth, youngest daughter of Mr John Liddle, washing master, Byrup, near Allenheads.

23rd February 1856 (Newcastle Journal)

Deaths

At Arkendale, near Reeth. On the 16th inst. very suddenly, aged 34, Mr Robert Barningham, lead miner.

James Barningham (son of John, baptised 16th January 1779) married Margaret Marr at Arkengarthdale, 15th December 1805.
Children of James and Margaret Barningham:
John baptised 30th November 1806
Hannah baptised 21st May 1809
James baptised 30th December 1810, buried 3rd July 1817
Thomas baptised 28th February 1813
George baptised 29th October 1815
James baptised 9th August 1818
Christopher baptised 15th April 1821
Robert baptised 4th April 1824
Anne baptised 4th November 1827
All at Akengarthdale.

Margaret Barningham wife of James was buried 5th September 1839, James was buried 28th September 1847, both at Arkengarthdale.
In 1841, at Old Yard, Arkengarthdale, James Barningham 61, Hannah 30, Christopher 20, Robert 16, Ann 14, and John 10 (son of Hannah

Barningham?). In 1851 at Arkengarthdale, Yorkshire, Robert Barningham, unmarried, lead miner, aged 26, and Ann Barningham, servant, aged 23.

23rd February 1856 (Newcastle Guardian and Tyne Mercury)
Deaths
At Allendale, in Wentworth Place, on the 16th inst. aged 71, much and deservedly respected, Margaret, widow of the late Mr William Johnson, many years agent at the Nenthead Smelting Works, Cumberland.
William Johnson married Margaret Lee, 12th October 1811, at Allendale.
In 1841, at Nenthead Market Place, William Johnson, smelting agent, aged 57, and his wife Margaret aged 57.
William Johnson died 16th June 1845, at Nenthead.
In 1851, at Wentworth Place, Allendale, Margaret Johnson, widow, annuitant, aged 66, born Allendale. See 21st June 1845.

29th February 1856 (Newcastle Courant)
Deaths
At Daddry Shield, Weardale, on the 26th inst., aged 46, much respected, Mr Joseph Featherston Martindale, provision dealer.

8th March 1856 (Newcastle Journal)
MARRIAGE OF W. B. BEAUMONT, ESQ. M.P
The marriage of Wentworth Blackett Beaumont, Esq., M.P. for the Southern Division of the county of Northumberland, with the Lady Margaret-Anne De Burgh, fourth daughter of the Marques of Clanricarde, which took place in London, was celebrated over the vast estates of the hon. gentleman in Northumberland, and more especially in the towns and villages connected with them, with great rejoicing and unbounded joy on Thursday last. By daybreak, several guns at Hexham, Bywell, Allendale, and other places in the county, ushered in the festivities of the day, and these were followed by the display of banners, the ringing of bells, and the parading of bands playing festive music. At Newcastle-upon-Tyne also, as at other places in the Southern Division, the day was appropriately celebrated, and at intervals throughout the day, the ringers clammed the bells together in imitation of a *feu de joie*. The system of “firing" the bells is quite a novelty in this town, and created no little attention on account of the peculiar and joyous effect it produced.
CELEBRATION IN THE MINING DISTRICTS. In the several mining and smelting establishments in Allendale and Weardale, extensive arrangements were made for various festivities. At Allenheads, flags were hoisted at sunrise; one of them, of large dimensions, waving proudly on the summit of Kilhope, at the elevation of 2200 feet above the level of the sea. Gratuities to the amount of £200 were distributed amongst the necessitous and deserving poor in East and West Weardale, and at Newhouse, The children in the principal schools, supported by Mr. Beaumont, had breakfast, and in the evening the miners, smelters, and their families were invited to a dance and other entertainments, in which they heartily participated. In the library at Allenheads, a large number of poor persons were supplied with refreshments, as were also the school children; but a dinner and ball were deferred, in consequence of an accident, which rendered any extensive festivity incompatible with the public feeling in this particular district.

11th March 1856 (Cumberland and Westmorland Advertiser and Penrith Literary Chronicle)

ALSTON PETTY SESSIONS.

Before Thomas Wilson, Esq., H. W. Friend, Esq.,
and the Rev. Octavius James, March 8th

William Atkinson, of Lowbyer, coal agent, was summoned by Phoebe Davidson, as putative father of her child. Mr. Cant, of Penrith, appeared for complainant, and Mr. Beudle Moor for defendant. Case dismissed.

Joseph Lancaster, of Garrigill, miner, was summoned by Hannah Coulthard, as putative father of her child. Mr. Cant appeared for defendant. Case dismissed.

Isaac Todd, of Annewell, miner, was summoned br Elizabeth Bramwell, as putative father of her child. Mr. B. Moor for complainant, and Mr. Cant for defendant. Ordered to pay 1s 6d per week and costs.

Thomas Dickinson, of Alston, miner, a great, sturdy looking fellow, was summoned for assaulting John Stout, of Garrigill, innkeeper, on the 22nd of December last. It appeared that Stout and Dickinson met in the Royal Oak, Alston. Dickinson owed Stout some money for drink, and it being more than Dickinson thought, he struck Stout on the face. John Thompson, Alston, corroborated Stout's statement. Fined 20s and 13s 6d costs. In default committed two months.

Dickinson was also charged with having assaulted Matthew Harrison, of Alston, innkeeper, on the 22nd of December last. About ten o'clock at night, Dickinson went into Harrison's public house and committed an assault upon a man named Bramwell. Harrison and his wife, thinking that Dickinson was going to kill the man, took hold of him in order to make him desist, when he committed an onslaught upon all that came in his way. The landlord got two black eyes and a bloody nose; a man called White a black eye; Bramwell a black eye; and Harrison's wife had her breasts discoloured by blows from Dickinson. Also a Sergeant of the 63rd regiment of foot, billeted in the house, was violently assaulted. P.C. Teasdale was called in, when he found Dickinson with his clothes off, and kicking a man lying on the floor. He took hold of him in order to rescue the man, when he immediately seized him by the throat, and nearly strangled him. Mr. Cant appeared for Mr.Harrison. Fined £2, &. 19s 6d costs, or two months for the assault. Fined £5, and 10s 6d costs, for the assault on the police, or two months.

Joseph Todd, of Alston, miner, charged with rescuing Dickinson from the custody of the P.C. Teasdale, when bringing him out of Harrison's. Fined 20s. including costs.

12 March 1856 (Teesdale Mercury)

FIRE AT ALLENHEADS MINES.

On Monday evening, the 3rd inst., the timber in one of the underground shafts of Allenhead lead mines was discovered to be on fire, and the shaft together with the adjacent workings and galleries of the mine became filled with dense smoke, from the effects of which, two boys, aged about 17, unfortunately perished. This part; of the mine continued, during the whole of Tuesday, to be unapproachable, and it was not until Wednesday morning that the bodies were found. The names of the sufferers were John Sanderson and Isaac Short; and

the melancholy event has caused much gloom amongst the inhabitants, accidents in the mine being of so rare occurrence that nothing of a serious character has occurred during the last five years.

14th March 1856 (Carlisle Journal)

ALSTON PETTY SESSIONS. March 8.

(Before Thomas Wilson and H. W. Friend, Esqs. and Rev. O. James)

Thomas Dickinson, miner was convicted of committing an assault upon John Garrigill, innkeeper, and was fined 20s and 13s 6d costs, or, in default two months imprisonment. He was also convicted of assaulting Matthew Harrison, innkeeper, and fined £2, and 17s 6d costs. For assaulting a policeman he was fined £5, and 10s costs, or in default, two months imprisonment. Total for the three assaults, £10 3s 6d, or in default, six months imprisonment. Joseph Todd, miner, was fined 20s, costs included, for attempting to rescue Dickinson from the custody of the police.

21st March 1856 (Newcastle Courant)

Deaths

At Red Hill, Surrey, on the 9th inst., aged 67, Thomas son of the late Mr Thomas Dodd, of Nenthead, Cumberland, many years mining agent to the London Lead Company.

Thomas married Nancy Teasdale on 10 October 1807, they had two children Simon and William both baptised on 10 June 1816.

In 1851, at Slaithwaite, Almondbury, Yorkshire, Thomas Dodd, married, aged 62, surveyor and Civil Engineer was lodging with John Briscoe and his family, John Briscoe born Cheshire, aged 36 is listed as a time keeper, his wife Mary Briscoe, born Alston, Cumberland, aged 33, children, Elizabeth Whitfield, born Alston, aged 7, Ann Briscoe, born Marsden, Yorkshire, aged 4, William Briscoe, born Marsden, Yorkshire, aged 3, Mary Briscoe, born Marsden, Yorkshire, aged 2, and Margaret Briscoe, born Marsden, Yorkshire, aged 1. See3rd December 1859, 14th October 1871, 4th May 1872, 15th February 1873, 30th June 1877, 1st April 1882, 21st July 1888.

4th April 1856 (Carlisle Journal)

SUDDEN DEATH.—An inquest was held before Mr. Lee, deputy coroner, on the 29th ult., at Nenthead, on view of the body of Mary Wilkinson, wife of Matthew Wilkinson, smelter. On the morning of the preceding day, about one o'clock, deceased was found dead lying upon the floor close to her bed; her night clothes nearly burnt off. A box of lucifer matches were found lying upon the floor, and the remains of two matches which had been ignited lying close beside her. It is supposed that she had risen from bed, as she usually did, to ascertain the time for awakening her husband to go to his work, and had suddenly died from the effects of chronic heart disease, fallen upon the floor, and the fire had communicated itself to the bedclothes. Her husband was awoke from the suffocating effects of the smoke and found deceased as above stated. A grandchild slept with them, and lodgers were sleeping in the adjoining apartment. They heard no noise until the husband called to them for assistance. Deceased had a mark upon her forehead, apparently caused by a fall upon the floor. Neither the mark nor the burns upon the body were of that

serious character as to lead the jury to the conclusion that death was caused either by violence or from fire. Verdict, “natural death.”

4th April 1856 (Newcastle Courant)
Marriages
At St. John’s, on the 3rd inst., Mr Cowper Cain, of Chapel, Weardale, to Miss Elizabeth Bottomley, of this town.
In 1861, at St. John’s, Stanhope, at Manchester House, Cowper Cain, Draper, aged 34, his wife Elizabeth 34, daughter Elizabeth 2, and Lydia Teasdale, servant, aged 24.
In 1871, at Darlington, Northgate, Cowper Cain, draper, aged 44, his wife Elizabeth aged 45, daughters Elizabeth Ann 12, Mary Cowper 7, and Charlotte Watson, general servant, aged 18.
In 1881, at Darlington, 87 Northgate, Cowper Cain, Draper etc. Employing 2 Milliners & 2 Assistants, aged 54, his wife Elizabeth Renwich, aged 55, daughter, Mary Cowper 17, and Jane Ann Shaw, general servant, aged 20.
See 3rd September 1852, and 7th September 1895.
For family connections (Cain) see 21st March 1845, 4th July 1846, 8th April 1853, 7th March 1868, 13th July 1872, 23rd January 1875, 28th August 1875, 7th September 1895, and 6th April 1901.

23rd April 1856 (Teesdale Mercury)
LEAD MINING IN TEESDALE.
The early history of Load Mining in Teesdale it wrapt in so much obscurity that our conclusions must, to a great extent, be drawn from conjecture. It has been surmised that the Romans wrought lead mines, and also procured iron in the district: whether this was actually the case or not, is more than we would venture to assert, but, at the same time, there are facts which conspire to give plausibility to the conjecture.
That the Romans procured lead ore and smelted it in Britain is fully established, for in the British Museum, two-piece of lead are preserved, bearing the Roman stamp. Derbyshire and Cornwall are pointed out as the localities from whence the Romans drew their supply of lead, but it does not follow that these were the only ones. Teesdale, and the adjacent dales, have proved the most productive fields of any in the kingdom, and we may conclude that a clever, energetic, and adventurous people like the Romans, would not be slow to avail them selves of the mineral wealth of this region. This surmise is strengthened from the fact that “Bale Hills,” composed of slags and other debris, the residue of smelting operations, are numerous in the district. Now, the identity of the form of smelting, evidenced by these slags, and other remains which are acknowledged to be Roman in their origin, urge, us to the conclusion that lead mining, and the smelting of lead ore in Teesdale, are as ancient in their date as in other parts of the kingdom. Wood was uniformly used for smelting, either in its native state, or in the form of charcoal and the abundant forests then existing in Teesdale, would form a powerful inducement to mining speculation.
About ten years ago, a successful effort to obtain lead from one of these bale hills, took place at the Gaunless Smelt Mill. Some workmen in the employ of Mr. Mark Sherlock had observed a large accumulation of ancient slags at

Penny-hill plantation, about a mile from the lead mill. They were at first uncertain as to whether the slags were the remains of lead or iron ore, but after assaying a portion, the fact that the slags were of lead was satisfactorily proved. The adventurers having made all necessary arrangements with the proper authorities set energetically to work. The whole of the slags were carted to the lead mill, and after undergoing the usual series of operations, produced upwards of 296 cwt. of lead.

Whilst these slags were being removed, unmistakable tokens were found that not only had lead ore been smelted on the spot, but also sheet lead manufactured. Numerous scraps of sheet lead were discovered, together with a considerable quantity of fine loamy sand, unlike any other in this locality, and probably brought from a distance. By means of this sand a small pit had been formed, into which the lead ore had been run, and at the bottom of this pit was found a piece of lead three or four stones in weight. Even if the process of smelting had not been here conducted by the Romans, we may hazard the conjecture that these primitive works date back to a period antecedent to the Norman conquest; and it is not unlikely that the sheet lead manufactured on this desolate height was used for covering the roofs of some of the earlier churches erected in Teesdale.

We may suppose that mining speculations would be but little followed in England, for a long period after the Conquest. The barons were warlike in their propensities, and, as they were of the dominant race, the pursuits of peaceful industry would meet with no encouragement. Even after the Normans and Saxons had begun to amalgamate, the wasting foreign wars in which the English monarchs were perpetually engaged, would have the effect of denuding the country both of its population and its treasure. The destructive and fearful contest, which, in the 15th century, raged between the rival houses of York and Lancaster, also contributed to prolong the era of ignorance and crime not unaptly known as the “dark ages." These and similar causes would prevent the commercial resources of the country from being developed, and it is likely that mining operations, if conducted at all, would be carried on to a very limited extent.

Mining would probably be resumed in Teesdale after the Tudor dynasty got firmly seated on the throne; and, if any records previously existed they have been irretrievably lost. It is authentically stated that, in the reign of Edward the Sixth, lead mines were worked in the parish of Eggleston. Tools and implements have, however, at various times been discovered, which bear the impress of a much earlier date. (To be continued)

25th April 1856 (Carlisle Journal)

A FORTUNATE MINER.— Died, at High Shields, near Hexham, on the 21st inst., Mr. Robert Walton Bell. Mr. Bell, who in 1850 was suddenly called from an obscure station in life, to succeed his relative at High Shield, and to inherit the wealth of the well known "Michael Bell, of Hexham,"—seemed to bear the sudden transition with a meek and quiet spirit. He had been a working miner at Nenthead, and came very unexpectedly to inherit the broad acres High Shield, and the pleasant fields on the southern margin of Hexham. He was speedily elected a guardian of the poor, and was a member of the board of health from its formation, which office he filled with satisfaction to the public. Mr Bell had

early been connected with the Wesleyan Methodists, and adhered to that body, by whom and by many others he was highly esteemed.

Robert Walton, born 6th February 1800, illegitimate child of Elizabeth Walton, of Nenthead.

In 1841, at Donk Hall, Nenthead, Robert Walton (Bell), lead miner, aged 41, his wife Elizabeth aged 42, born Alston, children, Joseph, lead miner, aged 18, Robert, shepherd, aged 16, Elizabeth 13, Jonathan, lead miner, aged 11, Mary 9, Jacob 5, and William 4.

In 1851, at High Shield, Hexham, Robert Bell, landed proprietor, aged 51, born Hexham, his wife Elizabeth, 52, children, Robert 26, Elizabeth 23, Jonathan 21, Jacob 16, house servants, Barbara Walker 25, and Margaret Storey 20.

30th April 1856 (Teesdale Mercury)

HISTORY OF LEAD MINING TEESDALE.

Continued from our last.

Having glanced at the ancient history of Mining in Teesdale, we now come to an era in which the mists that have enshrouded our past history clear away, and a new epoch dawns upon us, in which mining speculations hare been carried on with the spirit and enterprise which have raised Teesdale to its present eminence as a mining field, and bestowed upon the population those substantial blessings which render their lot an enviable one compared with that which their fathers experienced.

As we hare no records to shew that mining speculations, previous to this period, were conducted on scientific principles, and as it is essentially necessary for the uninitiated (if they would form-an idea how mining operations are conducted) to have an outline of the characteristics of our mineral veins, perhaps a slight digression on that head mat not be out of place.

Lead veins are divided by Mr. W. Foster, in his “Sections of the Strata," into various kinds. Those, which are productive, run nearly east and west, and are called rake veins. Some of these are called gash veins, from being widest at the top, and gradually contracting until they terminate in the lower sills. Others, which he denominates slip veins, shew more diversity in their form, and have the appearance of a number of irregular steps, from the sloping of the strata in different places. Pipe veins, again, are more circular in their form, and lie at every variety of inclination from the perpendicular; but they seldom if ever assume a horizontal direction. Then there is the flat or dilated vein, which opens out horizontally, not unfrequently to a considerable width. In addition to these varieties of veins, there are frequently lodes forming junctions with them, like branches of trees, leaving the main vein in every direction; and transverse or cross veins, which are never, so far as we know, productive—not only so, but they in general destroy the productiveness of the vein they intersect. These veins often make a great disruption in the strata through which they pass; a very remarkable instance of which was discovered a few years ago at Close House Mine, where some workmen employed by the Lead Company, in driving a level, came to a cross vein, and after getting through it, found that the strata on the opposite side was thrown up 90 fathoms.

The sides of a vein are called its cheeks, and, in Teesdale, the veins have an inclination, or, as miners call it, a hade, towards the north; and the strata, unless interrupted by the crossing of a vein, or some other cause, rises

towards the west. The interior of the vein presents a great diversity of forms. Sometimes the rock throughout is sparingly mixed or impregnated with ore; at other times there are ribs of pure galena, at certain distances from each other, varying in thickness; and at other times a single rib in the vein is 2 or 3 feet thick. Occasionally the veins open into irregular chasms, containing water, and mingled with the water are gravel, clay, detached fragments of rock, and pieces of galena in nearly a pure state. As a rule, wet veins are more productive than dry ones, and this goes to support the theory that they are formed through mineral springs. Another fact which strengthens this conclusion is that the ore procured nearest the surface runs more easily in smelting; and if that which is worse to work be exposed to the atmosphere, its porosity is increased, and it is more easily acted upon. From this we would infer that the ore at the bottom of the rein is first deposited, and the deposit is continued through an indefinite period, until the fissures are filled up.

According to recent experiments, it is highly probable that the wonderful agency of Electricity has been manifested in the beautiful processes carried on in Nature's subterranean laboratory. This is the more apparent from the fact that the cheeks of veins frequently bear evidence of having been subjected to the action of very powerful heat, such as electricity is calculated to produce, and the ores procured from these reins are generally blue or sulphate of lead, and white or carbonate of lead, which latter is produced in much smaller quantities than the former. On the top of the vein in what the miners call a rider, which sometimes runs out to the surface, and consists generally of different kinds of spar, impregnated with ore, and in some cases mixed with the ores of iron, copper, zinc, and other metals. This rider often bears down a considerable depth into the centre of the vein, and in other cases there is a post 2 or 3 feet thick on each side. The width of the veins in Teesdale varies from 2 or 3 feet to 30 feet and upwards. The best ores are those, of course, which contain the greatest percentage of lead, and are most free from an admixture with other metals. The best ores seldom contain less than 15 or 20 per cent of sulphur; but, while the inferior ores contain a less percentage of lead, they also contain a much larger amount of silver. This is accounted for on the ground that the other metals which are found in combination with the lead, while in the form of ore, cannot be separated, on account of their weight, in the process of washing; but, when the smelting takes place, the silver is released from its combination with the other metals, and having a strong affinity for lead, amalgamates with it The average amount of silver contained in the Teesdale ores is 10 oz. per fother of 21 cwt.; so that, if a mine will yield lead of a good quality, with this amount of silver, it is more profitable than if the percentage of silver was rather greater, and the lead of an inferior quality.

Having given this short outline of the character of our mineral veins and their productions, we resume the thread of our history. The London Lead Mining Company commenced their works in Teesdale more than 150 years ago, and the principal motive, which influenced them, was one of a philanthropic character. Several gentlemen belonging the society of Friends, travelling in Teesdale, had their attention arrested, and their sympathies aroused, by the signs of poverty and destitution which they beheld and, with the characteristic benevolence of the religious denomination they belonged, began to think of the best means of ameliorating the condition of the working people. The

conclusion they came to was, that the readiest method would be to try to develop the resources of the dale in a more efficient style than had hitherto been practised, by carrying on mining and smelting in an energetic manner. This, they contemplated, might be effected by the substitution of coal for wood in smelting. Whether coal had been in use previously in any part of England for smelting purposes, or to them belonged the discovery of its adaptation, we are not in a position to ascertain but certain it is, if it had not been discovered, mining speculations would long ago have been nearly if not completely suspended, and die principal part of the population of the upper district of Teesdale would have had to look elsewhere for the means of obtaining a livelihood. However, to the Lead Company belongs the honour of being the first incorporated association for Lead mining and smelting down lead ores with pit-coal and sea-coal—and though the Founders of that Company have long rested with their fathers, and their names are buried in the oblivion of the past, the work they commenced still lives, and to them the inhabitants of Teesdale owe a debt of lasting gratitude. The enterprise with which mining operations are still carried on by the Company, and the desire they manifest to preserve the health and lives, and to elevate the moral and social condition of their workmen, exhibit the same sagacity and benevolence which led their predecessors to open out the mines of Teesdale.

3rd May 1856 (Carlisle Patriot)

Accident at Greenside Lead Mines. —An accident (a thing of rare occurrence) happened in the above mines on Friday last. It appears that large slab, forming part the roof of the mine, gave way, and in its descent alighted upon one of the workmen named Hindmoor. The unhappy sufferer escaped with broken thigh, but, like the Dutchman of old, thanked Providence that was not his head. The directors of the mines did all in their power to alleviate his sufferings, and in the evening the same day was quietly conveyed in an easy carriage to his residence at Keswick.

14th May 1856 (Teesdale Mercury)

HISTORY OF LEAD MINING IN TEESDALE

Continued from No. 44.

Soon after the London Lead Mining Company commenced operations in Teesdale, they had difficulties of a formidable nature to contend with. The jealousy of local speculators, incompetent and self-seeking agents and the prejudices of an ignorant and semi-barbarous population, would conspire to discourage them in the course of their enterprise. The directors also, not being stationed in the district, and having to trust to local representatives could not so well cope with the difficulties of their position. One great drawback was the imperfect method of washing their ores, the whole being accomplished by hand-labour, till long after the establishment of the company. Another disadvantage was the obtaining competent workmen for the smelting department, and the distance the ores had to be conveyed to the smelters. The Teesdale ores procured by the company during the earlier stages of their history were carried to the Whitfield and Acton Smelt Mills, in Northumberland a distance of 20 or 30 miles, for the most part over bleak and pathless moors.

Whether what is called the “Scotch Hearth" was used for smelting operations, prior to the reign of William and Mary, is not distinctly known, but it is certain that the Governor and Company were the first to introduce the reverberating or smelting furnaces into their works at Whitfield.

About 80 yean ago, Henry second Earl of Darlington, with the vigour of intellect which distinguishes his race, foreseeing the benefits that would accrue to the population from a better development of the mineral wealth of the district, erected the first smelting furnaces in Teesdale, at Langdon Beck, about 8 miles west of Middleton. This establishment, which comprehended all that was then known of the art of smelting, was the precursor of those complete and well-organised smelt mills which have since arisen in the Dale, whore every resource of modem science has been brought into requisition, not only to free the lead from the impurities it naturally contains, but also to extract that more valuable product—silver—with which the metallic veins of this region are impregnated.

The beautiful process of refining, which had long been known in France, was brought into England at the close of the 17th century—not unlikely by some of those unfortunate refugees who were driven from their native land by the Revocation of the Edict of Nantes. Thus, while Spitalfields and Coventry trace from this date the rise of their silk manufactures, which enabled than to compete with the looms of Italy and France; so the northern part of our Island has gained advantages of as substantial a character, in the introduction of the process of refining, which, while it improved the quality of the lead, made the emoluments arising from it considerably greater.

It is probable that refining was first practised in the north at Whitfield Mill, which was generally afterwards termed cupola mill; and some of the earliest workmen were natives of France.

The first Agent employed by the Lead Company, of whom we have any account, was a Mr. Wm. Ainsley. Of his fitness for the office we are not able to speak, nor yet of several of his successors; but it is beyond doubt that the affairs of the Company were never superintended in that business-like manner calculated to ensure success, until the first Mr. Stagg was entrusted with the management of the Company’s works in Teesdale and the adjacent districts. From this period—upwards of 60 years ago—dates all the greatest improvements, which have taken, place in the various departments of the Governor and Company’s works. Mr. Robert Stagg, sen., and Mr. Joshua Stagg, sen., both held important offices under the Company, in Teesdale and at Alston Moor. The mines at Flake Bridge, Racket Gill, Parkin Groove, and Wire Gill, may be enumerated among timer earlier efforts, and although none of these were so productive as some of their later discoveries have subsequently proved, yet they were sufficiently so to make a small return for the capital expended, and to excite hopes of further success.

About this time, stamping and crashing machines were introduced. Previous to the invention of these powerful auxiliaries, the whole labour of washing the ore, and separating it from the refuse with which it is encumbered, was performed by hand; and whilst the men were engaged toiling in the bowels of the earth, in the most painful postures, with an insufficient supply of light and air, and their lives constantly jeopardized, —boys of tender age, and even women, were laboriously employed, with heavy iron implements, in pounding the rock containing ore, before it could be submitted to the manipulation of the

washers. Even the lever or brake sieve is comparatively but a modern invention, and superseded the hand sieve previously in use.
As many of our readers, doubtless, are unacquainted with the processes of dressing and washing the produce or the mines, we purpose here giving a brief account of the manner in which these operations are conducted—leaving a description of the more modem inventions to a future stage of our history.
The place where washing is carried on is generally selected from its proximity to the level month or opening of the mine, and if it be at a lower range it is better, at the water which flows freely out of the mine is then made available. The rock, &c., which is brought out of the workings first deposited in teams; here a grate is placed, through which a stream of water washes the clay and smaller particles, a boy being employed to place the work on the grate, and another to assist the operation of the water. Those pieces of the work which shew no indications of ore, are thrown aside as useless, and are called deads; and those, which are pure ore, are likewise laid aside to be conveyed to the smelt mill. The clayey or slimy particles are collected in pits or reservoirs, to be afterwards submitted to a different treatment, and the principal part of the work, as it is picked or separated, is taken to the crashing mill and there emptied into a large hopper. In some small mills there is a contrivance for supplying the mill with work, as it is wanted; generally, however, this forms employment for a boy.
The mill consists, first, of a large waterwheel, from 24 ft. to 32 ft. in diameter, impelled by a stream at or near the top. The supply of water for efficiently working a 24 ft. wheel should not fall far short of 200 cubic feet per minute. 22 cubic feet per minute, at the ordinary velocity of the stream, are considered equal to one-horse power, and the water-wheel of a crashing mill should not be less than eight or ten horse power. To both sides of the wheel machinery is attached; comprehending, on the principal (or rough) side, one pair of rough and two pairs of smooth rollers. The rough rollers are those, which first receive the work, and the teeth of these rollers, acting together, drew the work in as it is hauled on to them. The work then passes down troughs, placed at a proper inclination, between the smooth rollers, and thence into a box called the rough box. A stream of water is constantly flowing along with the work, and a boy is continually throwing the crushed matter out, while the slimy particles pass away with the water, and are deposited in pits, which furnish employment for the slime washer. An arrangement, very useful in preventing breaks, consists of two of the brasses belonging each pair of rollers being made to slide in a metal frame. A strong lever is attached to each, with a heavy weight at the end, and if any substance too hard to be crashed gets betwixt the rollers, the lever lifts, and suffers the roller to press backward, and thus relieve itself of the obstruction. (To be continued)

23rd May 1856 (Carlisle Journal)
Marriages
At Alston Church, on the 22nd inst., by the Rev. Jas. Bowstead, curate, Mr Thomas Teasdale, of Garrigill, to Miss Martha Smith, of Nest; and on the same day, Mr John Johnson of Garrigill, to Miss Esther Smith, of Nest.
In 1861, at Loaning Head, Garrigill, Thomas Teasdale, carter, aged 28, his wife Martha 24, children, Phebe 4, William 3, and Ann 1.

In 1861, at Physic Hall bank foot, Alston, John Johnson, stone mason, aged 31, his wife Esther, 25, children, Mary J. 4, and Thomas 2.

Deaths

At Alston, on the 17th inst., Mr Samuel White, aged 49 years.

In 1851, at Town Head, Alston, Mary White, widow, domestic, aged 68, children, Samuel, lead miner, aged 43, James, railway labourer, aged 34, Isaac, railway labourer, aged 25, Pattinson, lead miner, and butcher, and Jane, domestic duties, aged 23. See 11th November 1853, 28th August 1875

At Alston, on the 18th, Mrs Margaret Hetherington, aged 83 years.

Joseph Hetherington married Peggy Richardson 17th November 1791, at St Augustine's, Alston.

In 1841, at Front Street, Alston, Margaret Hetherington, grocer, aged 68, and Margaret Hetherington, bonnet maker, aged 35 (born 2nd June 1805, 4th daughter of Joseph Hetherington, Alston, by his wife Margaret, daughter of Thomas Richardson)

In 1851, Margaret Hetherington, widow, grocer, aged 78, daughter, Margaret Hetherington, grocer, aged 44, grandson, Joseph Hetherington, lead miner, aged 18, and granddaughter, Ann Hetherington, 11.

At Alston, on the 20th, Mrs Elizabeth Wilson, aged 55 years.

In 1851, at Ramsay Buildings, Alston, Elizabeth Wilson, widow, washer woman, parish relief, aged 49, born Kirkhaugh, daughters, Eleanor, woollen spinner, aged 14, Betsy, 6, lodgers, Thomas Turner, railway labourer, aged 20, and James Lankey, Rail labourer, aged 40.

At Alston, Turk's Head Inn, on the 21st inst., Mrs Lawson, aged 76 years.

In 1851, at Front Street, Alston, Joseph Johnson, innkeeper, aged 58, born Castle Carrock, his wife Elizabeth, 54, born Castle Carrock, daughter Sarah 23, born Alston, sister in law, Mary Lawson, widow, annuitant, aged 71, and nephew Isaac Walton, carpenters apprentice, aged 17, born Farlam.

31st May 1856 (Newcastle Journal)

VALE OF WEST ALLEN, NORTHUMBERLAND.

TO BE PEREMPTORILY SOLD BY AUCTION, in the latter Part of the Month of July next.

By Mr. THOMAS BLANDFORD, Auctioneer,

THE ESTATE and entire VILLAGE of NINEBANKS, delightfully situated in the Vale of WEST ALLEN, in the County of Northumberland, with MANSION HOUSE, WALLED GARDEN and SHRUBBERIES, and suitable Stabling and Out-Offices attached; Farm House and Offices; Antique Tower; Temperance Hotel (late an Inn); Cottages; Joiners' and Blacksmiths' Shops; with Water Corn Mill, and improved Machinery, the Whole in complete Repair; with 380 ACRES, or thereabouts, of Arable TURNIP and BARLEY SOILS, Meadow and Hill Pasture Land, and ornamented and sheltered by young thriving Plantations, and full-grown Timber, fenced with Stone Walls and Thorn Hedges,, and bordering for a considerable Distance upon the River Allen, so rich in picturesque Scenery,— and in close proximity to the extensive Game Preserves and beautiful Seat of the Reverend John Blackett Ord, Whitfield Hall, and near to the famed Grouse preserves of W. B. Beaumont, Esq. M.P.; together with 69 STINTS, and THREE-FIFTHS of a STINT, in and upon Allendale Stinted Pasture.

Further Particulars, and Day and Place of sale, will be duly announced in a future Advertisement, meanwhile Particulars may be had of Mr. BLANDFORD, Corbridge; and of Mr. JOHN STOKOE, Solicitor, Hexham.
Hexham, 20th May, 1856.

11th June 1856 (Teesdale Mercury)

HISTORY OF LEAD MINING IN TEESDALE

No. IV.

One of the great secrets of success in the mining speculations of the Lead Company has been their perseverance, and by this they have not unfrequently succeeded where others have failed. In some well-authenticated cases, local parties who occupied the ground before them, and gave up in despair, were within a few steps of acquiring a handsome fortune.

A case of this nature occurred at the Manorgill Mire, which had been commenced by a family named Walton. After trying for a considerable time, with only a limited amount of success, they resigned their right to the Company, preferring regular employment and a fixed salary to the uncertainty of speculating on their own account. A few days after they had concluded terms with the Company, they cut a rein of great value, which, if it had been their fortune to alight upon it when working for themselves, would have amply repaid them for their labours, and raised them to a state of comparative comfort and affluence. This happened upwards of 60 years ago. Some years later, mining speculations were decidedly on the ebb in Teesdale, and, with the exception of the Cross Fell Mining Company, the value of the metal produced was inadequate to the working expenses. The local adventurers were dispirited, and their exertions crippled by the want of capital when the Lead Company, at this time, obtained the lease of a tract of ground in which the Lodgesyke Mine was subsequently opened.
This ground had been held by four gentlemen resident in this neighbourhood of whom one was, the late Mr Collinson, of Woodside. After repeated trials they had abandoned their enterprise. The Company's agent Mr Joshua Stagg, Sen., after obtaining possession commenced immediate operations. Four men were employed, whose efforts for a while, were as unsuccessful as those of their predecessors; and Mr Stagg at length become so fully convinced of the futility of further proceedings, that he ordered the men to desist on the same day, Mr Collinson (the gentleman above alluded to) visited the place, and seeing the men depressed by the unwelcome order they had received, endeavoured to cheer them; and told them that, although they had hitherto been equally unsuccessful with his colleagues and himself, yet it was his belief the ground would eventually be found productive, and he then recommended them to make an attempt a short distance from where the previous works had been commenced. Thanking him for his disinterested advice, which they agreed to adopt, two of them waited upon Mr Stagg, and begged his permission to try for a few weeks longer. Mr Stagg answered that, as a faithful servant of the Company, he should not be justified in expending the funds entrusted to him, without reasonable hope of remuneration, and he therefore refused to comply with their request. He added that they were at liberty to prosecute their search, but it must be at their own expense; and he concluded by expressing an opinion that the prosperity of Teesdale, as a mining district, was approaching to a close.

The men returned to their companions in a desponding mood, and, finding Mr Collinson still there, asked how he would proceed under similar circumstances? He urged them to continue, and in the end they consented. By his suggestion, they prepared a small dam, and brought a “squirt hush" in a direction he pointed out. This was a work of some days, and on its completion they eagerly awaited the result. Fortune favoured them, and, after a few hushes, the “rider” or top of a vein was struck. We much question whether the discoverers of the golden treasures of Australia or California felt a greater thrill of pleasure than these men did, when they found their toil rewarded Their hopes had been derided, and they well knew that, upon their success depended whether they should be able to earn a livelihood in the locality of their birth, or be compelled to wander forth among strangers, in search of that employment which was most congenial to their tastes and early training.

They ceased operations till Mr Stagg should again visit them; and resolving to give him an agreeable surprise, they concealed the evidences of their discovery. On his arrival they shewed their preparations, and pleaded for his support; but he told them he had determined not to expend a penny more without the certainty of a return, and he thought that they, as working men, with their labour only to depend upon were blameable in prosecuting their unprofitable task. After listening to his remarks, they said they would prove that their labours had not been so utterly profitless as he imagined, —and they then exhibited the vein. As he gazed upon this palpable evidence of their success, a smile lit up his countenance. The important bearing of the present discovery on the future mining speculation of Teesdale, were fully apparent to him; and in joyous tones he congratulated them on their good fortune.

After the lapse of more than half a century this mine still furnishes employment to a number of workmen, who generally find their efforts well remunerated. It is said that from this mine, in one single year, 16,000 bings of ore were sent to the smelt-mill; and there is no doubt that the opening of Lodgesyke mine was an important event in the history of Lead Mining in Teesdale, and gave a powerful impetus to subsequent adventure. It is averred that the Company, after receiving a fair amount of interest for their outlay, invested the surplus as a provision for contingencies; and it is probable that this gave a degree of stability to their transactions, which enabled them to surmount many future difficulties.

These men who, by their energy and perseverance, in the midst of discouragement, made the trial which turned out so eminently successful, deserve to be held in grateful remembrance, and we gladly record the names we have heard, viz: — Messrs Richard and George Lee, Mr Isaac Raine, and Mr Mark Armstrong. The latter gentleman still survives, and has been long employed as an agent by the Governor and Company.

(To be Continued),

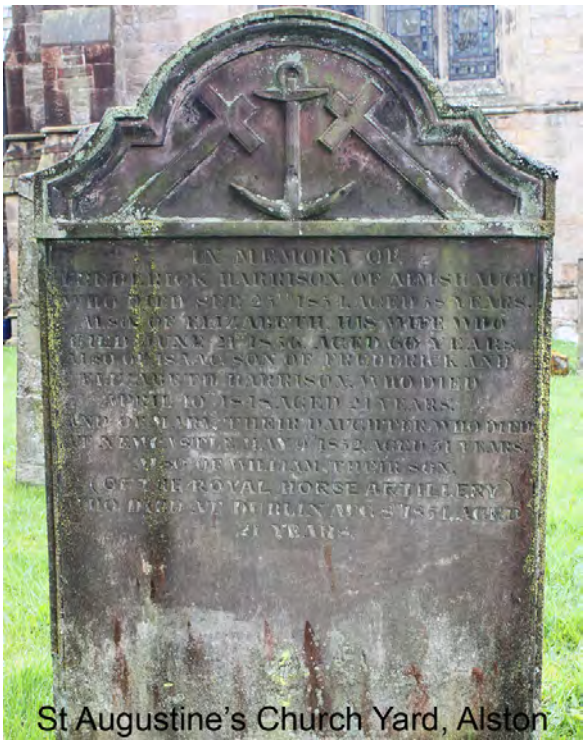
21st June 1856 (Carlisle Journal)

Deaths

At Nenthead, on Sunday, the 15th inst., Miss Hannah Baty, fifth daughter of the late David Baty, of Nunclose, aged 33.

Hannah Baty, baptised 12th November 1822, daughter of David & Hannah Baty, at Hesket in the Forest, Cumberland.

In 1841, at Nunclose, Hesket in the Forest, Kirkoswald, Ann Baty, dressmaker, aged 30, and Hannah Baty 15.
In 1851, at Overwater, Nenthead, Mary Harrison, widow, retired grocer, aged 69, born Alston, nephew, Harrison Lonsdale 11, born, Whitehaven, niece, Hannah Baty 25, born Hesket, and house servant, Nancy Cain, 23.
At Hill House, Alston, on the 21st inst., Mary Ann, eldest daughter of Mr Joseph Walton, butcher, aged 17 years.
Joseph Walton married Barbara English, 7th November 1841, at Alston.
In 1851, at Hill House, Alston, Joseph Walton, butcher, aged 45, his wife Barbara 32, children, Mary Ann 12, Mabel 10, Elizabeth 8, Sarah 5, Margaret 1, and house servant, Elizabeth Walton 22.
Barbara Walton died 4th qtr 1856, registered at Alston.
In 1861, at Church Cross Terrace, Alston, Joseph Walton, widower, butcher, aged 50, children, Elizabeth 19, Margaret 12,Isabella 5, aand John 9.
See 13th November 1841,
At Alston, on the 22nd inst., Mrs Elizabeth Harrison, widow of Frederick Harrison, of Aimshaugh, aged 60 years.
In 1851, at Castle Nook, Kirkhaugh, Frederick Harrison, farmer of 50 acres, aged 55, his wife Elizabeth 55, son Frederick 16, and daughter, Bessy 14.



St Augustine's Church Yard, Alston

25th June 1856 (Teesdale Mercury)

HISTORY OF LEAD MINING IN TEESDALE

Egleshope Banks, June 20, 1866.
Sir,—I beg leave to state, that the account given in the "History of Lead Mining in Teesdale," published in the Teesdale Mercury, respecting the conduct of my late grand-uncle, Mr Joshua Stagg, of Eggleston, is just the reverse of the truth, according to the accounts I repeatedly heard from Richard Lee and George Walton, two of the discoverers of Lodge-syke Mine.
The state of the case, as I learned it from them, was to the following effect.

Thomas Dodd, Esq., of Nenthead, then principal mining agent (superintendent, as we say now), without whose sanction no bargain of any kind could be let in the Governor and Company's concern, let a bargain for the discovery of the Lodge-syke vein to Richard Lee, George Watson, Isaac Raine, and I forget the name of the fourth man, on the condition that they were to receive £8 per fother for all the lead to be made from ore raised in the Lodge-syke Mine during the period of two years, dating from the time of setting the bargain, and in the meantime to have 30s per month advanced on account, to enable them to live.

Having wrought one year unsuccessfully, Mr Dodd (not Mr Slagg, who was only subordinate agent, and could not do so) endeavoured to stop the trial, on the pretence that be saw no probability of success, and therefore did not consider him- self justified in risking the Company's money over it.

This was a blank to the poor men and Mr Stagg, who were all sanguine of success, and who having found out so many places where the vein was not, considered they were so much nearer finding out where it was, but Mr Dodd obstinately persevered in refusing the "lent money," without which no belly timber could be obtained, and bellies, like mines, require propping inside, or they soon collapse, or in mining phraseology, the sides "run together." The upshot of the matter was, that Mr Dodd would not risk any more money, but at Mr Stagg's earnest request, graciously permitted him, at his own a risk, to furnish the men with provisions, as nearly all agents at the time were shopkeepers and provision-dealers; of which latter class Mr Slagg was one. The mine was won about half-a-year later, leaving the men only half- a-year to clear all off, but such was the excellence of the mine, they told me, after clearing themselves of all debts, they had £70 each left, for which they said they were "thankful to God and Mr Stagg, but not to Mr Dodd." You will observe that the names of the workmen are erroneously given in your account, but this might easily happen after a lapse of 60 or 60 years. I am only anxious to clear the name of my friend.

There is another error I will point out. In a former paper you say, the Devonshire furnace was first introduced in the north of England at Whitfield Mill. In this you are misinformed; it was first introduced at Eggleston Mill, and then at Whitfield Mill; in both cases by my grandfather, the late Robert Stagg, Esq., of Alston.

Your correspondent informs me he was led into the error by the misapplication of the term "learn."

In this dale the inhabitants, in speaking, often put the effect for the cause, and also speak elliptically, thus, if they were speaking of a person teaching another, they would say "He is learning him," and if a mistress were frying eggs, they would say "She is frying herself*

Now the fact was, that men were sent from Eggleston Mill to teach the Whitfield men furnace smelting, but your correspondent's informant told him they went to learn furnace smelting, meaning they went to teach them (the Whitfield smelters) the art of furnace smelting, but your correspondent being a vary grammatical sort of man, gave the dictionary construction of the terms instead of the provincial one, which is the more remarkable as he is a native of the dale.

I am. Sir, yours obedtly,

ROBT. RICHARDSON.

MR. EDITOR, —Since writing my last communication on the “History of Lead Mining,” I have become aware that, principally through defective information, I was led into errors, which have caused strictures on the subject, and, in addition to what other correspondents may communicate, I feel myself bound to give publicity to some further information I have received on the subject of the opening of Lodge-syke Mine, a which places the character of the late Mr Joshua String, sen before us in the most favourable light. It is but due to his memory, and an act of justice to surviving friends, to say that his conduct in reality was such as to render him worthy of the esteem of the present generation. It appears that he did not hold the responsible situation, which I at first supposed, but was merely a subordinate under Mr Thomas Dodd, sen., of Nenthead, who had the general superintendence of the whole of the Company’s mining operations in the Teesdale district, as well as at Alston Moor and the localities in the north.

Mr Dodd being of opinion that Teesdale was a worthless mining field, was opposed to expending money which he thought would never bring a return, but he consented to expend a certain sum, and if when that was exhausted nothing was discovered, to give it up as a hopeless case. Time wore on, and the prospect grew more gloomy instead of brighter. The last farthing was disbursed, and still they were the subjects of the “hope which long deferred makes the heart sick.” In the meantime, Mr Stagg, feeling a special local interest, and deeply sympathising with the men took upon himself the risk (on finding Mr Dodd inexorable) of advancing money on his own account, or, what was equivalent, provisions. In addition to the encouragement given by Mr Collinson to persevere, Mr John Richardson, sen, who was frequently engaged in the neighbourhood, told them he had sometime before discovered rider impregnated with ore in crossing a sheep track, but could not point out the exact locality. In reference to the statement made in my last communication, concerning the men ultimately making the trial on their own account, which resulted in the discovery, I have only the authority of my informant, whom I considered perfectly trustworthy.

In the interim, another local speculator was watching with eager expectation the result of the trials, and as the Company were so unsuccessful, for a while he indulged in sanguine hopes that they would abandon it as a profitless enterprise, as their predecessors had done. Upon their relinquishing the ground, he was prepared to commence upon it, as he had discovered unmistakable evidences of the treasures, which were concealed beneath the surface. In a future paper I shall give some particulars of the subsequent fortunate career of this gentleman as a mining speculator.

I hare also ascertained that the original partnership consisted of six instead of four partners. The names of the whole I am also enabled to state, on the authority of Mr Armstrong. They were Messrs Richard Lee, George Watson, John Bussey, Isaac Raine, Richard Raine, and John Raine.

Although it will be seen that Mr Armstrong was not one of the original partners, yet he formed one of the second partnership, who were more successful, I may perhaps say with safety, than any partnership ever formed in the district They commenced operations immediately after the others had discovered the vein, and being fully convinced from the hade or inclination of the vein northward, at the top, that the first set of men were too far south, they sunk a shaft more to the north. The result shewed the correctness of their

conclusions, for in six weeks they procured the astonishing quantity of 1212 bings of ore, and there is little doubt that the hade of the vein was what had led to so many failures. It could be traced some miles to the eastward and westward of where they were engaged, but having an inclination of 1 in 2 in the elevated ground where the mine was opened, the leaning northward was greater than had been anticipated.

In reference to the earlier communication about smelting operations, your readers will perhaps learn from another correspondent that Eggleston, not Whitfield, was the locality where the Derbyshire smelling furnace was first tried. The origin of the mistake will also be shewn. But I hare heard nothing to the contrary that, at Whitfield, both hearth smelting and refining were carried on at an early date. Prior to the erection of what is commonly called the Low Mill at Eggleston, the Company had the Stob-green Mill, situated in the same locality, but it was at the Low Mill that the Derbyshire furnace was first introduced by Mr B. Stagg, sen. The only question is whether the Company or the Earl of Darlington were the first to introduce this improvement in smelting operations, as, under that enterprising nobleman, it was introduced at Langdon before Gaunless Mill was commenced. Nevertheless, a workman who was engaged under the Earl of Darlington, but who is now in the employ of the Lead Company, and can recollect events, which transpired upwards of 60 years ago, is inclined to give priority of introduction to the Company.

I wish to act on the principle of giving honor to whom honor is due, and if I fail, it will not be intentionally. If any other correspondent with more time—better means of information—and more attractive style of communication, will continue the subject, I will gladly take my leave of the public; but until some other more competent writer will occupy my place, I feed it a duty I owe to the editor of the Teesdale Mercury, and the public generally, to communicate all the information I can on these matters of local interest.

I am. Sir, Yours, &c.,

In alluding to our correspondent's concluding paragraph, we beg him to feel assured that we are most grateful for the pains he has taken to enrich our columns with the fruits of his talents and research. We have the more pleasure in making this statement, as the “History of lead Mining in Teesdale," to which he has been the chief contributor, has met with the warm approbation of our readers, and has been commended by personages whose claims to literary excellence are allowed by the country at large. —ED. T. M.

27th June 1856 (Newcastle Courant)

Births

At Launceston, Tasmania, on the 12th March, the wife of J L Miller Esq., Surgeon Superintendent of the Hospital & Infirmary, formerly of Allendale town, of a son.

27th June 1856 (Carlisle Journal)

ALSTON WRESTLING AND NORTHERN GAMES.

The first annual competition for the prizes given by the Wrestling Society of Alston took place on Thursday and Friday last, when the sum of £32 was given to contend for. The wrestling throughout was of a first-class character; and the decisions of the umpires and referee (Messrs. T. Wearmouth, J. Robley, and G. Robson,) gave universal satisfaction .

THURSDAY.

For the prize of £10, given to be contended for by 10½ stone men, there were 64 entries.

Second Round

Stood	Fell
Jonathan Emerson, Weardale	Joshua Peart, Weardale
Edward White, Alston	George Humble, Weardale
Joseph Nattrass, Weardale	William Varty, Garrigill
Joseph Gelding, Middleton	John Faulder, Low Hesket
Thomas Lonsdale, Weardale	John Elliott, Haltwhistle
Isaac Walton, Weardale	Thomas Sparks, Alston
James Scott, Carlisle	Thomas Phillips, Stapleton
Leonard Thompson, Nenthead	Joseph Graham, Nenthall
Joseph Peart, Weardale	Thomas Snowden, Keliah
Edward Hobson, Midgeholme	Joseph Spottiswood, Alston
Edward Waugh, Old Gate	Arthur Coddlegrass, Alston
Wm. Pattinson, Low Rigg	Jonathan Humble, Weardale
George Little, Green head	Thomas Richardson, Alston
James Pattinson. Weardale	L. Wearmouth, Weardale
Thomas Pearson, Weardale	M. Dickinson, Alston
William Black, Tarn House	John Hetherington, Weardale

Third Round

E. Waugh	J. Emerson
T. Lonsdale	W. Black
I. Walton	L. Thompson
J. Scott	W. Pattinson
J. Nattrass	G. Little
T. Pearson	E. White
J. Peart	J. Gelding
J. Pattinson	E. Robson

Fourth round.

J. Scott	T. Pearson
T. Lonsdale	E. Waugh
J. Nattrass	J. Peart
J, Pattinson	I. Walton

Fifth Round

J. Scott	T. Lonsdale
J. Pattinson	J. Nattrass

Final Falls

J. Scott	J. Pattinson
J. Pattinson	J. Scott
J. Scott	J. Pattinson

The winner received £5; second, £2; and third and fourth, 10s. each. Those who fell in the fourth round received 5s. each ; and in the third, 2s. 6d each. The sum of £1. 10s., given to contend for by the sixteen last standers, was won by James Pattinson, of Weardale, Isaac Walton, of Weardale, being second. The winner received 15s., and the second man 10s. Jonathan Emerson and Joseph Nattrass, both of Weardale, were third and fourth, and received 2s. 6d. each.

FRIDAY.

There were 69 entries for the £11 prize, for men not exceeding 16 stones. Subjoined is a return from the

Third Round

Stood.	Fell.
William Wood, Carlisle	Thomas Ridley, Dryburn
Thomas Hobson, Weardale	John Hetherington
Wm. Hobson, Midgeholme	Robert Doyle, Nenthead
James Scott, Carlisle	John Nattrass, Weardale
Richard Wright, Longtown	Hugh Elliott, Haltwhistle
Jonathan Emerson, Weardale	Edward Waugh, Midgeholme
James Pattinson, Weardale	L. Wearmouth, Weardale
Jon. Whitehead, Workington	George Smith, West Allendale
Joseph Peart, Weardale	Ben Cooper, Carlisle

Fourth Round

R. Wright	J. Scott
Whitehead	
T. Robson	J. Emerson
W Wood	J. Pattinson
w! Robson	J. Peart
J. Whitehead, odd-man	

Fifth Round

R. Wright	J.
T. Robson	W. Robson

Sixth Round

W. Wood	T. Robson
R. Wright odd-man	

Final Falls

W. Wood threw R. Wright twice

The winner received £5; second, £2; third, £1; fourth and fifth, 10s. each; those who fell in the fourth round, 5s. each; and those who fell in the third round, 2s. 6d. each.
The prize for boys 6 ½ stones and under was won by Joseph Allison, of Weardale, John Story, of Harper Town, being second.

The prize of £1 10s for the 16 last heavy-weight standers was won by Richard Wright, who threw Thomas Robson twice in succession.

WHO DEPARTED THIS LIFE
FEBRUARY 1ST 1864
AGED 54 YEARS
ALSO OF ANN WALTON HIS WIFE
WHO DEPARTED THIS LIFE
FEBRUARY 19TH 1861
AGED 48 YEARS

In 1871, at Clargill, Joseph Walton, lead miner, and farmer aged 37, his wife Ann 33, children William E 13, Margaret A 11, Elizabeth 9, Mary Jane 7, Joseph 5, and John 1. In 1881, at White House, Joseph Walton, farmer of 43 acres, aged 47, his wife Ann 43, children William E., labourer in lime works, aged 23, Margaret A. 21, Mary Jane 17, Joseph, labourer in lime works, aged 15, John 11, Rebecca 9, Thomas 5, Albert 3, and Herbert F. 1. In 1891, at White House, Joseph Walton, farmer, aged 57, his wife Ann aged 53, children William E., general labourer, Joseph, general labourer, aged 25, Rebecca, domestic servant, aged 19, Albert 13, and Herbert F. aged 11. In 1901, at Elswick, Newcastle, Ann Walton, widow, aged 63, sons William E., paviours cartman, aged 43, Thomas, grocers cartman, aged 25, Albert, electrical engineers clerk, aged 23, and Herbert F., confectioners clerk, aged 21.

Deaths

At Allenheads, on the 12th ult., aged 48, much lamented, Elizabeth, wife of Mr Christopher Rodham, miner.

In 1851, at Low Pry Christopher Rodham, lead ore miner, aged 38, and his wife Elizabeth (Lee, married 2nd quarter 1844) aged 36.

9th July 1856 (Bury and Norwich Post)

Lowestoft

On Tuesday, the Diving cutters, Ranger and Ann, of Whitstable, arrived at this port, the masters of which report having salved from the wreck of the schooner Darlington, sunk on the Newcombe sand, 59 pigs of lead belonging to the London Lead Company; also three tons of pig iron, salved from the Falconer schooner, sunk off Hasborough.

21st July 1856 (Public Ledger and Daily Advertiser)
At the Tees Side Mining Company meeting the accounts showed a balance against adventurers of £154 1s. 7d; a call of 1s. per share was made. *Mining Journal*

25th July 1856 (Carlisle Journal)
SCHOOL TREAT—On Thursday, the 17th instant, the Rodderup Fell Lead Mining Company, according to their annual custom and usual liberality, provided tea and cakes in profusion for the scholars of Leadgate School, Alston. There were 93 children present —a greater number than ever mustered on any previous occasion. This is a gratifying proof of the increasing popularity of the school, which has been more than doubled since the present master took charge of it. The clean, neat, and respectable appearance, together with the orderly behaviour of the children elicited the praise and admiration of the ladies and gentlemen who witnessed the proceedings. The company are very solicitous for the efficiency of the school, and spare neither labour nor expense to render it so. After the scholars had concluded, the; wives of the tenants belonging to the company sat down to tea, as usual, in the schoolroom.

26th July 1856 (Newcastle Guardian and Tyne Mercury)
BAZAAR AND TEA AT NINEBANKS.
NEW SCHOOLS OF WEST ALLENDALE.
These schools in their newly finished state, standing on an abrupt and picturesque elevation of the river Allen, are a practical illustration of the great and lasting advantages that may result from a cordial union of feelings, sentiments, and exertions among the affluent and labouring population of any district. The necessity for a school or schools had been felt and acknowledged by all parties who had given the subject any degree of consideration, and the miners in the employ of W. B. Beaumont, Esq, M.P., in the lower part of the village were desirous of enjoying a like privilege with their friends at Carrshield where that gentleman had built and endowed a school, some time since. The matter was from less to more matured into a resolution to build the schools on their present sites, the ground being kindly given by Mr Jos, Lee, of Dilston. Mr Beaumont, with his usual munificence, kindly consented to subscribe £100 to the building funds, and endow the schools in part, each scholar having to pay three-half-pence per week. This offer was very thankfully received, but there was still a large sum of money to raise, considering the size of the village, and the want of really wealthy persons in it. But the want of superfluous riches was amply compensated for by the willingness with which every one contributed, and those of the working class who could not give money gave a number of days' work.
The mutual good feeling thus subsisting among all ranks and parties, together with a most active and intelligent committee of management, soon brought the matter to a successful and happy issue, —the foundation stone of the first school being only laid on the beginning of April and both completed by the middle of July. Without, in any manner, derogating from the usefulness of the other members of the committee, Mr Nevin, Mr Beaumont's agent in West Allendale, merits especial thanks for his exertions not only in this, but in every thing of a public nature, connected with the locality.

The bazaar which had been got up by Mrs Nevin, Mrs Scurr, Mrs Reed, Mrs M. Lee, Mrs Jos. Lee, Mrs H. Wilson, the two Miss Taylors, and a few others, and presided over by Mrs Nevin, reflected the greatest credit on these ladies, both as to their benevolent intentions and artistic skill. Articles of the most recherché and unique description, fit for a lady's boudoir or drawing-room might be seen, and by their sides things of a less showy but more substantial nature suited to the circumstances and habits of the rustic and mining population of Allendale. At the principal entrance to the schools, in which the Fancy Fair was held, there were erected four high poles, covered with evergreens, from the tops of which floated a number of beautiful and suitably inscribed banners or flags. The morning of the 18th inst. was extremely dull, with a continuous fall of drizzling rain till near noon, when the clouds broke away and gave us a good share of sunshine, and a fair breeze for our banners, all the afternoon. The opening of the bazaar was on the afternoon of this day, when the whole of our village aristocracy, with a great number of their gentlemen with Mr Sopwith, Mr Beaumont's chief agent in these districts, and his family at the head, were very cheerful and frequent purchasers. In the midst of the bustle of sight seeing and buying, who should arrive but our eccentric and kind friend, Mr Isaac Holdon, tea dealer, &c, of Allendale Town. His was a rather curious visit, and formed a very strange episode in the proceedings of the day. Above two years since this public spirited and singular person had a likeness of himself taken at Hexham and sent to London, from which a steel engraving was taken, and 1000 impressions or copies of his portrait were sent down. These he got framed and has since been selling at two shillings each, making it a profound secret how he intended to appropriate the money. This he divulged some time since, and getting all ready, he determined to come over on this public occasion to make us a present, yes, a present with the profit he had derived from his pictures of a very singular and sombre looking article, its black plumes nodding at every breeze. The present (gentle, but mortal reader) was a hearse. "Little Isaac" as he calls himself stood up on its boards and gave us one of his simple and homely speeches, telling the company that the schools they were met about that day were the beginning of making a man, while his gift was a help to the last scene. Mr Sopwith, on behalf of the inhabitants, made a suitable reply, thanking Mr Holdon for the present, and alluding to several other action* in Mr Holdon's laborious and useful life. The vehicle was removed, and the thoughts suggested by its appearance, were as soon removed from the minds and faces of all present. After tea there was an open air meeting presided over by the Rev. Mr Scurr, who gave an elaborate address on the subject of education, dwelling particularly on the religious element that ought to enter into all systems of education, and the great importance of good training at home. The schoolmaster, he observed, could rarely make anything beyond an automaton, but the life, the essence, the soul could be always communicated at home. Mr Sopwith followed, with one of his pithy and practical speeches, showing the advantages of an early training, in the more practical and social virtues, —all of which were expatiated on in an easy and affable manner peculiar to that gentleman. The second day came, and with it came the labouring population *en masse*, rushing in to see the bazaar and bargain for their two shilling's, three shilling's, and five shilling's, worth of goods, all of which our most beautiful and obliging ladies assured them was very good and

cheap, and our young men could not for their lives of them deny the assertion, seeing with what grace their purchases were folded up and handed over the tables, and the many kind and smiling thanks they got in at the bargain. The stalls were nearly all emptied by seven o'clock of the second day, but to have a little fun and competition, our respected auctioneer, Mr Forster, was called in, and kindly offered his services gratis, for a short time to sell the remaining goods. These were soon disposed of, and thus ended in a most successful and triumphant manner, this, our first bazaar, which some rather doubting and dull persons predicted would be a failure. A large tent was fitted up in a field belonging to Mr Taylor, with tables, &c, for the accommodation of those visitors who wished to have tea, and nearly one thousand persons partook of this “cup which cheers but not inebriates." Another spacious tent was erected at the sooth end of the schools, for the sale of lemonade and British wines, and had its scores of visitors each day. A very neat little elevated tent, decorated with evergreens, was erected for the West Allendale Band, who discoursed the sweetest of music in it at short intervals throughout both days, enlivening and cheering the gay throng. Thus we have had two days of mutual rejoicing; and now that they are over we have two very neat, healthy, and substantial schools, which being patronised and endowed by such a gentleman as W. B. Beaumont, Esq., MP, will no doubt prove a real blessing to our dale for many years to come.

1st August 1856 (Newcastle Courant)

SINGULAR ACCIDENT. —On Saturday afternoon, a fatal accident occurred at Blanchland, to a man named John Beck, of Shildon, under the following circumstances: — Deceased was mowing for his father, Mr G. Beck, of Blanchland, in a field, situated at that place, and was in the act of whetting his scythe above him, when, most unfortunately, he was observed to fall in a fainting fit and the scythe fell between his neck and left shoulder, which caused a mortal wound. His brother and another person were present, and other assistance was speedily procured, but, from the great extent of the wound, it was of no avail, as he died almost instantly. The body was afterwards removed to its home, where an inquest was held on Monday, before Mr Reed, coroner, and a verdict of accidental death was returned. Deceased was forty-two years of age, 6 feet 3 inches in height, and for many years a valuable and much esteemed workman to the Derwent Mining Company. He was a quiet and industrious man, was greatly respected, and his melancholy end is deeply regretted. He has left a widow and three helpless children to deplore his loss.

9th August 1856 (Kendal Mercury)

PETTY SESSIONS.

Alston, August 1.

(Before T. Wilson and H. Friend, Esqrs., and the Rev. Octavius James.)

ASSAULT.—Jas. Kearton, Garrigill Gate, was charged with assaulting Henry Wilkinson, of the same place, on the 17th ult. Complainant said that Kearton had frequently threatened to take his life by striking his head off. He threatened to do so when the assault was committed; and if he had lost his head, could not have come there to have got law on him, was determined to come while he

had his "heawd" on. Kearton admitted the assault, and was fined 28s., costs included.
NUISANCE.—The Clerk of the Alston Board of Guardians complained of a nuisance on Rodrop Fell, arising from 9 or 10 dead cattle, which were all lying near together, and were the property of Mr John Young. Mr Cant appeared for the defendant. Young was not aware that the cattle were unburied. His hind had sole charge of the farm. Had the circumstance been made known to Mr Young, he would have given orders for the immediate interment of the cattle. Dismissed.

9th August 1856 (Newcastle Journal)
The beautiful estate at Ninebanks, together with the village, mansion house, and farm buildings, in the Vale of West Allen, in this county, was purchased last week, by the Rev. John Blackett Ord, of Whitfield Hall, at the price, it is understood, of about £12,000.

5th September 1856 (Newcastle Courant)
Deaths
In Elswick Terrace, Newcastle, on the 29th ult., aged 72, deeply regretted, Mr Thomas Carr; deceased was for nearly 30 years teacher of the London Lead Company's School, at Nenthead, Cumberland.

17th September 1856 (Teesdale Mercury)
HISTORY OF LEAD MINING IN TEESDALE
No. VIII
About the year 1830, the Company extended their efforts to benefit the moral and social condition of their workpeople. Mr Stagg was deeply impressed with the importance of doing something in the way of educating the rising generation, as he recognised the fact which is acknowledged to be a statistical one, that "Ignorance is the mother of vice," and that unless the working classes were better educated, the most stringent rules would not be sufficient at all times to curb the turbulent passions of an ignorant population. His first request was for a school, and this led to the erection of the present spacious school room, where the children of the workmen obtain a very fair education, in the most useful branches of learning; and especially since they secured the services of the present efficient master, has the progress of the children been of the most Satisfactory character.
In the rear 1821, the Skears mine was commenced, which from its easy distance from Middleton (only about a mile), makes it very convenient for the workmen residing there. This mine, although not so productive as Lodgesyke and some of a more modern date, has yielded a large amount of ore, which has amply repaid the capital expended. The same year, the company engaged an experienced medical practitioner to attend upon the workmen and their families, thus relieving them from the burden inseparable from personal or domestic affliction, where there are bills of medical attendants to pay. About the same time, the Company commenced erecting those cottages for their workmen, commonly known as New Town, or, more properly, Masterman Place, so called as a mark of respect to the then governor of the Company; and these cottages each have a garden attached, which, while laid out in a very tasteful manner, and abounding in every variety of floral beauty, the more

substantial requisites are not forgotten; for their vegetable produce shows a care and skill in the management, highly creditable to the workmen. These beneficial alterations had not been many years in operation when a period of unprecedented depression ensued, which nearly terminated mining operations in Teesdale for a season. At all events it was fortunate that the members of the company were extensive capitalists, and had an active, energetic, and economical local superintendent, who, while faithful to his employers, deeply sympathised with the workmen. There area a combination of causes to produce this depression. Lead was selling at its minimum price, bring at from £11 to £13 per ton. The Lodgesyke mine was denuded of the richest portion of its mineral treasures, and no other at all approximated to it in richness; and the work procured from the mines entailed a proportionate increase in the expenditure in washing operations, as the yield became less; but, at this juncture, an event took place which relieved the Teesdale district from the pressure of its redundant population. The event we refer to was what is commonly called the first pitmen's strike, which took place about the year 1830, in connection with the moat important collieries of the North. Very opportunely for the coal owners, lead mining was in the depressed state mentioned above, and through that circumstance they ware able to secure a good supply of tolerably efficient workmen. Parties who had scarcely before ever left their native dale, migrated to a fresh sphere of labour, where, although strong pecuniary temptations were held out, they knew they would be regarded with feelings of bitter hostility by those workmen whore places they were intended to fill. The writer well remembers being the witness of affecting scenes, when manly bosoms heaved with emotion, and eyes glistened with tears as they looked on those scenes which were alike hallowed by the recollections of childhood and the pleasing reminiscences and tender associations of more mature years; and even after they had got fairly located in their fresh places of abode, the old homesteads were still dear to their hearts; and when the speculations of the Company were again crowned with so success, the majority of them gladly responded to the call to return, and cheerfully resumed those labours which were more congenial to their tastes and early habits.

26th September 1856 (Newcastle Courant)
Deaths
At Ireshopeburn, Weardale, on the 22nd inst., aged 53, much respected, Mr Ralph Watson. *Shoemaker*

29th September 1856 (Morning Chronicle)
THE DERWENT MINING COMPANY have declared their thirteenth dividend, of £2 per share.

10th October 1856 (Carlisle Journal)
Prince de Joinville. —We understand that this distinguished visitor and suite are at present Mr. E. Poole's family boarding house, Portinscale, near Keswick. On Monday the Prince and Princess, with their son and daughter, their chaplain and some members of their suite, arrived in Cockermouth, and drove up to the Globe Hotel, after which they attended morning service at the Roman Catholic Chapel, into the poor-box of which they dropped a five-pound note. After taking refreshments at the Globe, the noble guests returned to

Portinscale. On Monday, among other objects of interest, the Prince and Princess de Joinville and family paid a visit to the Greta Pencil Works, belonging to Messrs. Banks, Son, and Co., of Keswick. They have also repeatedly visited the shop of Mr. John Cowper, and purchased a collection of minerals, found in the North of England.

13th October 1856 (London Daily News)
A Special general meeting of the **Derwent Mines Company** is called for the 23rd inst., to decide whether the company shall be registered with limited or unlimited liability under the Act of last occasion, and to consider the propriety of "further consolidating the shares."

17th October 1856 (Carlisle Journal)
Deaths
At Lee House, Garrigill, on the 11th inst., Mr Thomas Pearson, aged 97 years.
Thomas Pearson married Nancy Shield, 3rd May 1783, at St Augustine's, Alston.
In 1841, at Low Lee Houses, Thomas Pearson, independent, aged 81, Nancy Pearson 75, and Nancy Kidd 20.
Nancy Pearson was buried 27th June 1847, aged 82, at St John, Garrigill.
In 1851, at Low Lee Houses, Thomas Pearson, widower, landed proprietor, aged 91, daughter, Mary Watson, widow, aged 60, and grand daughter, Martha Watson 25.

WATER WHEELS
FOR SALE
BY PRIVATE TREATY

THREE Spare WATER WHEELS, belonging to the Keswick Mining Company, of the following dimensions, viz. —

One 40 Feet	diameter	3½ Feet	breast
One 21	"	3	"
One 20	"	2	"

Also, TWO HORSE WHIMS, a STAMP AXLE and FRAME.

Apply to Mr R. B. SHEPHERD, Portinscale, Keswick
Portinscale, 15th October 1856

29th October 1856 (The Cornish Telegraph)
At the Tees Side Mining Company general meeting, the accounts showed a balance of £126 2s. 3d. against the adventurers.

5 November 1856 (Teesdale Mercury)
MIDDLETON. —On Friday afternoon, as a boy named Watson was working in a sump at Mr Allison's Skeers Lead Mine, some of the props slightly gave way, when the hole closed upon the boy's legs, and fastened him in. As there was very little air, fears were entertained that he would die before he could be released; but, though imprisoned till 3 o'clock next day—a period of 24 hours—when taken out he was found to be no worse.

1st November 1856 (Carlisle Patriot)
Deaths
At Nenthead, Frances, daughter of Mr Joseph Hudspeth, aged 4 years.
See 1st March 1879
At Wigglety, near Alston, on the 27th inst., of consumption, Mr John Hall, aged 21.
Joseph Hall married Elizabeth Hymers 9th October 1834, at St Augustine's, Alston.
John Hall born January 8th 1835, baptised at Redwing Chapel, 13th January 1835, son of Joseph Hall, lead ore miner, and Elizabeth his wife, of Foreshield, Alston.
Joseph Hall of Foreshield, was buried 26th November 1836, aged 35, at Alston.
In 1851, at Hudgill, Elizabeth Hall, lead miners widow, aged 40, children, John 16, Ann 10, Eliza 7, and Hannah 2.
Elizabeth Hall died 1st qtr 1853, registered at Alston.

15th November 1856 (Carlisle Patriot)
Marriages
At Alston Church, on the 13th inst., Mr Isaac Hornsby, of Nenthead, to Mrs Ann Glendinning, of Alston. *See 1st May 1869*
At Allenheads, Saturday the 8th inst., Mr Emerson Pears, of Greenends, Nenthead, to Mrs Percival, of Allenheads.
In 1841, at Allendale, High Forest, Emerson Pears, lead ore miner, aged 35, children, Jane 15, Isabella 14, Hillary 11, and George Green 15.
In 1851, at Greenends, Nenthead, Emerson Pears, widower, lead miner, aged 44, born Allendale, daughter, Mary, aged 26, born Allendale, and visitor, John Pears, retired lead miner, aged 55, born Allendale.
In 1861, at Greenends, Nenthead, Emerson Pears, lead miner, aged 55, his wife Hannah 45, step daughter, Ann Percival, aged 26, and son, John Curry Pears, aged 1 year.
In 1871 at Dirt Pot Shield, Allendale, Emerson Pears, retired lead ore miner, aged aged 70, his wife Hannah 55, and son John C. aged 11.

Emerson Pears died 4th qtr 1871, aged 71, registered at Hexham.
In 1881, at 31 Victoria St. Elswick, Hannah Pears, widow, aged 65, son John C., Insurance clerk, aged 21, and granddaughter, Frances H. Teasdale, general domestic servant, aged 19, born Alston.
Hannah Pears died 3rd qtr., 1891, aged 76, registered at Newcastle upon Tyne

5th December 1856 (Newcastle Courant)

Wolsingham Petty Sessions

Before W. L. Darnell Clerk, and G. P. Wilkinson, Esq., George Emmerson, of Westgate, Weardale, miner, was charged with cruelly beating and bruising his own child, It appeared from the evidence of seven respectable witnesses that since the death of Emmerson's wife he has been in the habit of beating the child, and bruising it in a frightful manner. Emmerson's neighbours being afraid that he might kill the child in his passion, they found it their duty to bring the case before the magistrates. The case being proved the bench committed Emmerson to the house of correction for three calendar months.

12th December 1856 (Carlisle Journal)

NENTHEAD.—The members and friends of the Nenthead Amateur Band, to the number of 150, celebrated their third anniversary, at the house of Mr. Joseph Blacklock, Miners Arms Inn, West. Nenthead, on Friday last. Ample justice was done to the plentiful repast which was provided by the worthy landlord and the spirits of the company were greatly enlivened by the band performing under the able leadership of Mr. Cousin, a selection of the most popular music of the day in a style and manner which reflected the greatest credit upon all engaged.

Marriages

At Alston Church, on the 11th inst., by the Rev. W. N. Snowe, vicar, John son of Mr James Dixon, tailor and draper, Alston, to Miss Bessy Harrison, of Alston, daughter of the late Mr Frederick Harrison, of Aimshaugh. *See 21st June 1856*

12th December 1856 (Newcastle Courant)

BLANCHLAND.—On Tuesday, the 2nd inst., a fatal accident occurred at Derwent Mines. A young man named Joseph Eddy, of Shildon, about 20 years of age, had that day made his first commencement of working in the mines; and was at the time "putting" the waggon, when he most unfortunately left his hold, and fell down a hopper to the depth of about 16 fathoms. He was immediately taken up and conveyed to his home, where medical attendance was procured; but having received a most serious fracture of the head, it was of no avail. He lingered until Thursday morning, when death put an end to his suffering.

In 1841, at Shotley, John Eddy aged 40, his wife Jane aged 40, children, Thomas 20, Jane 14, Edward 11, John 10, William 7, Joseph 4, and Richardson 2.
In 1851, at Blanchland, John Eddy, lead ore miner, aged 54, born Hunstanworth, his wife Jane aged 51, born Stanhope, children, Jane 23, born Stanhope, Edward, lead ore miner, aged 21, born Stanhope, John, lead ore miner, aged 19, born Stanhope, William, lead ore washer, aged 16, born Blanchland, Joseph, lead ore washer, aged 14, born Blanchland, Richardson,

lead ore washer, aged 11, born Blanchland, Sarah 9, born Blanchland, Catherine 6, born Blanchland, and grand daughter Jane 5, born Hunstanworth.
In 1861, at Blanchland, John Eddy, lead ore miner, aged 64, his wife Jane 61, son Richardson, lead ore miner, aged 21, daughter Catherine 16, born Acomb, and granddaughter Jane aged 15.

19th December 1856 (Carlisle Journal)
Deaths
At Appleby, on the 13th, of pulmonary consumption, Mr John Hutchinson, late clerk to the lead mining company of Alston Moor, aged 31 years.
See 6th January 1855

20th December 1856 (Carlisle Patriot)
HAYDON BRIDGE.—SALE OF LEAD ORE.—Dec. 10th: From Nenthead receiving house, Messrs. Shield and Dinning, 150 bings at £5 4s. 6d.; Messrs. Cookson and Co., 100 bings at £5 5s., 110 bings at £5 8s.; From Lowbyer receiving house, Messrs. Shield and Dinning, 150 bings at £5 0s. 6d.; Messrs. Cookson and Co., 120 bings at £5.

ALSTON COUNTY COURT, Dec. 13
(Before T. H. Ingham, Esq.)
Lee v. Armstrong.—Armstrong had gone to Lee's to purchase cheese, and had taken half-a-sovereign instead of sixpence in change. Defendant not appearing, judgement was given against him.
Davidson and Others v. Craig.—Craig, a partner in Galligill Bents Mine, was summoned for non-payment of wages. Mr Paget, for defendant, pleaded that his client had not employed the plaintiffs. Craig, however, being proved to be a partner, consented to pay on the production of the mine accounts by the other partner, Mr T. Penman.
Marriages
At the Wesleyan Chapel, Alston, on Thursday the 11th inst., Mr Joseph Lancaster, to Miss Jane Walton.
In 1861, at Dodberry, Garrigill, Jane Lancaster, married, aged 25, children, Elizabeth 3, and Joseph 1.
In 1871, at Loaning Head, Garrigill, Joseph Lancaster, stone mason, aged 42, his wife Jane 35, children, Elizabeth 13, and Joseph 11.
Jane Lancaster was buried 2nd June 1878, aged 42, at Garrigill.
In 1881, at High Beldy, Garrigill, Joseph Lancaster, widower, stone mason in lead mine, aged 53, children, Elizabeth 23, Joseph, horse driver in lead mine, aged 21, Mary Ann 9, and Emily 6.
Joseph Lancaster, stone mason, of High Beldy died 7th September 1904.
Deaths
At Nenthead, on Monday the 15th inst., after a lingering illness, Mr John Wallace, aged 22.
John Wallace of Nenthead, was buried 17th December 1856, aged 23, at St John, Garrigill.
On Monday the 15th inst., Mr Joseph Pearson, of Skelgill, Alston, aged 74.
In 1841, at Water Greens, Alston, Joseph Pearson, lead miner, aged 55, and his wife Jane 50.

In 1851, at Water Greens, Alston, Joseph Pearson. lead ore washer, aged 66, and his wife Jane 63.
In 1861, at Water Greens, Alston, Jane Pearson, widow, farmer of 30 acres, aged 70, grandson, Joseph Readshaw, miner & farmer, aged 22, and grand daughter Isabella Readshaw, dairy maid, aged 18.
Jane Pearson died 4th qtr., 1869 aged 83.
At Appleby, on Saturday last, Mr John Hutchinson (late mining agent, Nenthead), of a lingering illness, aged 30.
In 1851, at Fair Hill Top, Nenthead, John Hutchinson, clerk to the lead company, aged 25, born Penrith, brother George Hutchinson aged 10, born Stanhope, and House servant, Mary Bright 22.
John Hutchinson, married Mary Bright, 23rd November 1851, at Nenthead.
Mary Hutchinson, married John Glendinning 7th May 1870, at Nenthead.
In 1871, at Nenthead, John Glendinning, lead miner, aged 36, his wife Mary 38, step children, Elizabeth Hutchinson 15, William Hutchinson, lead ore dresser, aged 12, John Hutchinson, 9, and daughter, Hannah Glendinning 8 months.

20th December 1856 (Newcastle Guardian and Tyne Mercury)

CORRESPONDENCE

COUNTY CORONERS AND THEIR DUTIES

To the Editor of the Newcastle Guardian.

GENTLEMEN, —Are Coroners of any use, or are they not? If they are of no use why burden the county with their payments—but if they are of use, is it not expected they will do their duty? Their duty, I apprehend, is to inquire into the cause of the death of persons who are killed or otherwise meet their death in an accidental or suspicious manner. Questions have recently arisen as to the expenses attendant upon inquests, and some coroners have grumbled that inquests having to be held at great distances from their residences have not paid them. Is this question of expense an excuse for not holding an inquest upon a person killed? 1 should say not.

These remarks have been caused in consequence of the following case: —In the early part of last week a young man named J Eddy, who had been employed to work as a miner in the Derwent Company's Lead Mines, near Blanchland, went into the mines for the first time, and on going along a level he had, it appears, to cross the top of a shaft upon which was simply two or three loose planks for a footway. The shaft top either not having been sufficiently protected, or J Eddy not knowing of such a place, or from some other cause, he fell down the shaft to the bottom, a considerable distance (some people say 20 fathoms), and was severely injured. He was taken out and removed to his house at Blanchland, where he lingered until Thursday morning (the 4th inst.,) when he died. During the time the poor follow was suffering no medical assistance was called to his aid, (although a duly qualified medical practitioner lives in the village), with the exception of a gentleman who professes medicine and surgery, though not duly qualified. On the death of the young man, I understand the constable of the district was required to notify to the coroner the necessity of holding an inquest—that functionary objected, on the ground of expense, personally to go to the coroner, (whoso residence is at Newcastle), but wrote to him the particulars of the case. The letter, I believe, was posted in sufficient time on Thursday to

reach Newcastle the same evening, but no inquest has yet been held to ascertain the cause of the death of the young man, and the body was committed to the grave on Sunday. Now, whether the blame of no inquest being held rests with that high official, the constable, or that higher one, the coroner, remains to be settled, or whether, after all, it is not a question of expense—the coroner having on a previous occasion of holding an inquest at the same place grumbled respecting the distance, and the amount of mileage allowed him.
At present the public do not know whether the young man intentionally precipitated himself down the shaft—which is very unlikely—or whether the Derwent Mines Company have not been grossly culpable in allowing the shaft to be unprotected, and thus causing his death. Great numbers of men are employed in these mines, and would it not, therefore, be a satisfaction to them that accidents of this kind—for I take it to be an accident— should be inquired into, and if blame should attach to any one lot them be censured.
This is a case in which the coroner is bound to hold an Inquest, and I shall be glad to find that it is not the expense that has deterred him from doing so.
I am, gentlemen, your obedient servant, JEFFRIES RAKE.
Blanchland, Dec 10th, 1856.

10th January 1857 (Carlisle Patriot)

ALSTON PETTY SESSIONS.

(Before Rev. O. James and H. W. Friend, Esq.)

John Clark summoned for arrears of payment for illegitimate children. Ordered to pay, but costs remitted.
John Teasdale summoned for payment to illegitimate child. Payment and costs ordered. Defendant expressed his determination to die in prison.

16th January 1857 (Carlisle Journal)

Marriages

At Alston Church, on the 11th inst., by the Rev. Joseph Bowstead, curate, Mr Wm. Lee, to Miss Elizabeth Armstrong, both of Randalholm Hall.
In 1861, at Randalholme, Alston, William Lee, farmer of 200 acres, employing 3 labourers, aged 32, born Kirkhaugh, his Wife Elizabeth aged 30, born Kirkhaugh, children, Ann 3, Thomas 7 months, step son, Elliott Armstrong 10, John Lee, Husbandman, aged 24, and house servants, Jane Davidson 20 and Mary Scafe 15.

Deaths

At Tindal Fell near Brampton, on the 2nd inst., Ralph, son of Mr John Farrow, spelter works, aged 8 years.
At Nenthead on the 14th inst., Mr George Irwin, smelter, aged 63 years.
In 1841, Smelt Mill, Nenthead, George Irwin, lead miner, aged 45, his wife Isabella (Hewatson) aged 45, children John, lead miner, aged 25, Catherine 15, George, lead miner, aged 15, Joseph, lead miner, aged 10, Isabella 10, Anthony 8, Rachel 5, Betty 3, and Hannah 3 months.
In 1851, at Burn Bottom, Nenthead, George Erwine, lead ore smelter, aged 58, his wife Isabella 53, children George, lead ore smelter, aged 26, Joseph, lead ore smelter, aged 24, Anthony, lead miner, aged 18, Rachel 15, Betsy 13, and Hannah 10.
At Garrigill, on the 10th inst., Mr John Watson, aged 73.

In 1851, at Snappersgill, Garrigill, John Watson, retired lead miner, aged 67, his wife Jane 60, sons, John, lead miner, aged 27, Isaac, lead miner, aged 20, Christopher, lead miner, aged 17, servant Esther Armstrong, house servant, aged 17, and nephew, John Slack 7. See 2nd February 1866 & 4th Nov 1871
At Garrigill, on the 12th inst., Mrs Hannah Armstrong, widow of Mr John Armstrong, of Nenthall, aged 72.
See 13th May 1843

24th January 1857 (Carlisle Patriot)
NENTHEAD.—The lead-miners' annual pays were held on Wednesday the 14th inst., when several thousands of pounds were paid over to the men in different sums, from one pound to fifty, as balances of their earnings for the twelve preceding months. The mode of paying the miners in this district is somewhat singular. In the course of a year, the men take three separate bargains, of the average length of four months each, during which they agree to cut through so much solid rock or earth at a given price; and they are paid a certain sum per month to enable them to meet to current expenses of their families; at present this sum is 44s. and is called "a month's pay," or "subsist money." At the end of the year a balance is struck between the total earnings and the monthly payments, and the difference is handed over to the men at these annual pays as they are called. During this season all mining operations are suspended, and the large number of visitors from the surrounding district, the tradesmen who seek their debtors, and the numerous hawkers, give to the village the appearance of a fair. The inhabitants on these occasions generally conduct themselves with great propriety. On Wednesday the only breach of law that came under the notice of the police was a robbery by a donkey. The owner of the animal had placed in the stable with him a bag containing half-a-crown 's worth of oranges, and it appears that Neddy had bitten his halter in two, opened the bag, sucked every orange, and then, having the fear of punishment before his eyes, he had chewed his master's whip thong in pieces, *Not such an ass after all!* Although the miner's life is generally short, and attended with much toil and danger, habit, and an ardent attachment to his native place, reconcile him to it, and a more industrious and kind-hearted man can seldom be found than the Nenthead miner.
Deaths
At Alston, on the 18th inst., Isabella, wife Mr Joseph Jackson, clogger, aged 60.
At New Shield Toll Bar, near Alston, on the 20th inst., Mr Anthony Martindale, aged 50. *See 13th December 1884*

30th January 1857 (Royal Cornwall Gazette)
At the Tees Side Mining Company general meeting, held at Newcastle-on-Tyne, on Tuesday, the accounts showed a balance against the mine of £247 5s. 9d. A call of 1s. 6d. per share was made.

31st January 1857 (Carlisle Patriot)
Deaths
At Dufton, on the 18th inst., of diabetes, Thomas Hogg, son of Mr Thompson, lead mine agent, aged 11 years.
Thomas Hogg Thompson, baptised 25th January 1846, at Middleton in Teesdale, parents John and Anne Thompson.

3rd February 1857 (Cumberland Pacquet, and Ware's Whitehaven Advertiser)

A new Primitive Methodist Chapel was opened at Garrigill, in this county, on Friday week. The cost of the building was about £280, and at the time of opening, the subscriptions were announced as amounting to £140. The London Lead Company have contributed £50, and the Commissioners of Greenwich Hospital £15.

21st February 1857 (Carlisle Patriot)

Marriages

At Alston Church, on the 18th inst., Mr Joseph Smith, of Bleagate, to Miss Hannah Hill, of High Craig.

In 1861 at Bleagate, Garrigill, Joseph Smith, lead miner, aged 30, his wife Hannah 29, children, John 4, and Margaret 2.

In 1871 at Bleagate, Garrigill, Joseph Smith, farmer of 48 acres, aged 40, his wife Hannah 39, children, John 14, Margaret 11, Jacob 6, and Matthew 4.

In 1881, at 141 Gloucester Road, Elswick, Joseph Clerk, retired farmer, aged 50, his wife Hannah 48, children, Johnny, labourer, aged 24, Margaret, domestic servant aged 22, Jacob, draper aged 17, and Matthew, post messenger, aged 14.

Deaths

At Garrigill, on the 10th inst., Rachel, wife of Mr Joseph Pickering, butcher, aged 58.

In 1851, at Gate, Garrigill, Joseph Pickering, grocer & butcher, aged 49, his wife Rachel aged 53 (Walton, married 25th November 1824, at St Augustine's, Alston), children, Thomas, lead miner, aged 25, Adam, lead miner, aged 23, Ann 21, George 19, Rachel 13, Mary 12, and house servant, Eliz Hutchinson aged 20

At Nenthead, on the 11th inst., Mrs Jane Liverick, aged 46.

See 19th July 1861

At Crosslands, Alston, on the 12th inst., Mrs Ann Milburn, aged 74.

In 1841, at Leadgate, Ann Milburn aged 55, and Edward, lead minert, aged 15.

In 1851, at Crosslands, Alston, Ann Milburn, domestic duties, aged 68, born Wolsingham, and son Edward, lead miner, aged 27, born Wolsingham.

28th February 1857 (Carlisle Patriot)

On Tuesday, the 24th inst., a miner, named George Whitfield was crushed beneath a fall of earth, in a mine, at Nenthead. When extracted he was found to be seriously injured in the back, and one of his legs was broken; he has since been progressing favourably.

27th March 1857 (Carlisle Journal)

EXODUS OF LEAD MINERS FROM ALSTON.—The chief characteristic of the mining part of the population of Alston Moor at the present day appears to be their great inclination for emigration. Since the first discovery of gold in Australia, perhaps few countries, according to its small population, have sent out more adventurers to this flourishing colony than Alston Moor. Inured to pursue their somewhat dangerous and unhealthy occupation amid difficulties and always with the greatest uncertainty as to the finding the metal, the lead

miners of this and other countries are peculiarly adapted for the gold fields in Australia, the working of which require all the perseverance, patience, and skill which are necessary in the working of lead ore mines. In reference to the lead miners who have already emigrated from this locality, some of them have been unsuccessful, while very many of them have sent considerable remittances to their families at home, and have, after a few years of toil, returned to their native place with pockets pretty well lined; but very few if any, have realised fortunes.

On the10th instant ten of these miners left Alston for Liverpool, where they would embark for Australia they were all quite young men, and were from East Allendale, which is a neighbouring mining district to

Alston Moor: and on the morning of the16th instant a more than ordinary bustling and animating scene presented itself at the Alston Station, occasioned by the departure for the same destination of another company of miners. This company, together with those who left about the same time by a different route, were about twenty four in number, and are all young men belonging to the parish of Alston. It may here be observed as a fact, that, be their fortune what it may at the antipodes, the major part of these youthful adventurers have left good and comfortable homes. God speed them all well in the far famed land of El Dorado!

22nd April 1857 (Teesdale Mercury)

HISTORY OF LEAD MINING IN TEESDALE.

After a period of very severe depression, which caused many to seek in the coal fields employment that was more remunerative, the prospect, in connection with mining speculations, began to brighten, and especially after the Thornberry mine had turned out so prosperous, many of those involuntary exiles who, from stern necessity had left their native dale, gladly availed themselves of the opportunity now offered of returning to the sphere of labour that was more congenial to their tastes.

The Thornberry mine is situated in the manor of Eggleston, and was wrought with some degree of success many years before it again became productive in the year 1832; and it furnishes a very striking instance of the precarious character of mining speculations. The writer has heard it said, that for nearly 40 years, no amount of any moment of ore had been procured. Sometimes an old working would be discovered, which excited hopes in the expectant workmen that the “old man,” as they called the *genius loci*, would have left behind him some gleanings of mineral treasure; but it must have been very tantalising to find their hopes were something like the delusive mirage of the desert, which leads the thirsty traveller to imagine that the cooling waters of the transparent lake are before him, but the pleasing thought of speedy relief gives place to deep despondency, as the optical delusion is superseded by the painful reality that he is probably still far distant from the grateful element.

With something like the feelings of the disappointed traveller, would we suppose that the miner, when hopes of success had for a moment dawned upon him, only to end in mockery, again resumed his labour at the stubborn rock; but, at last, however, the unexpectedly, the mineral treasure which they had so long sought was laid open to their astonished gaze, and, with grateful hearts, a deputation carried a specimen of the ore sought to Mr Stagg, who shared in their joy on beholding this first fruit of the rich harvest which this

mine in a short time yielded, comparatively to the large amount expended in the research,—for no less a sum than £30,000 had been disbursed ere this first pledge of future success had been obtained.
Shortly after, a discovery made by Mr H. L. Pattison, in connection with smelting operations, conferred a great benefit on those engaged in the manufacture of lead. This process, known as the separating or crystallizing process, while it increased the number of operatives employed, effected a considerable saving to the employed, as the silver could be separated from the principal portion of the lead at such a low temperature that little waste took place. The lead which is now refined contains about 200 ounces of silver per fother, against 10 ounces as formerly.
But, while we are indebted to Mr Pattinson for this discovery, yet local parties have carried it out to a high state of perfection. For these improvements, in Teesdale, we are indebted to the late Mr. J. D. Stagg and his colleague, Mr. R. Richardson, (the present indefatigable agent of the lead Company at Eggleston), who, with untiring energy, seconded by the workmen under their orders, were not satisfied until they obtained the consummation of their wishes.

1st May 1857 (Coroners Inquest, Carlisle Archives TCR 2)
John Wilkinson, of Nenthead, accidentally killed by the falling in of part of the roof of a mine.
In 1851, at Overwater, Nenthead, Betty Fawcett, widow, aged 49, sons, John Wilkinson, lead miner, aged 25, William Wilkinson, lead ore washer, aged 15, and Thomas Fawcett aged 4. See 30th November 1864.

8th May 1857 (Carlisle Journal)
Marriages

STEERAGE, £14. CHIEF CABIN, £31 10s.
"MERSEY" LINE OF AUSTRALIAN PACKETS.
Sailing from Liverpool Melbourne on the 25th of every month, forwarding Passengers by Steamers at through rates to all parts of Australia.

Ship	Captain	Reg.	Bur.	To Sail
JOHN LYNN	Crowell	1474	3000	June 25
SOUTH CAROLINA	Shapcott	1515	3200	July 25
NEW SHIP	——	1700	13500	Aug. 25

The clippers of this line are all new, and are selected from the fastest clippers of the day. They sail punctually at noon their advertised dates. The John Linn is a remarkably fast ship, having only made three voyages, and has frequently maintained a speed of 15 knots per hour for a considerable period. Her 'tween decks are unusually lofty and well ventilated, and the second cabins, which are in the poop and deck house, are remarkably airy, fitted up with every possible convenience. The chief cabin is elegantly furnished, and the state rooms very large.

Passengers must embark on the 23rd June. Now loading; east side Prince's Dock—For freight or passage apply to

EDMUND THOMPSON, 20, Water-street, Liverpool. JAMES DOWKER, KENDAL; or to JOHN MILLICAN, jun., GARRIGILL, ALSTON.

27th June 1857 (Carlisle Patriot)
Deaths

On Monday, the 22nd inst., Mr Robert Hymers of High Galligill, aged 53.
See 27th June 1857, and 3rd January 1880

1857, AGED 80.

5th September 1857 (Carlisle Patriot)
CRICKET MATCH AT ALSTON.—The first ever played in this neighbourhood came off at Nenthead, on Saturday last between the newly-formed clubs of Alston and Nenthead. The playing was not first-rate on either side. Nenthead, however, scored 64, beating their opponents by 11. The chairing of the highest scorer, and a supper, ended the enjoyments of the day. It is hoped that this match will be followed by many others, as this noble game is a desirable one for the miners who have considerable: leisure time on their hands.

11th September 1857 (Carlisle Journal)
Extraordinary Accident to Professor Day. —Dr. Day, Professor of Medicine at St. Andrews, ascended Helvellyn from Patterdale yesterday week, and was descending in the direction of the Greenside lead mines, when the earth gave way under his feet, and he fell into the tunnel made to carry off the sulphurous gases from the smelting works. Fortunately he was just able to regain the opening, and to keep his head in the fresh air above it, hanging by one arm, the other being broken and powerless. this distressing position he remained till nightfall, when his cries for help attracted three gentlemen to the spot, who relieved him. He was removed to Patterdale, and next day to Carlisle, for surgical assistance.

25th September 1857 (Carlisle Journal)
CRICKET—ALSTON v. NENTHEAD.—The return match between these two clubs was played on the 18th instant, on the ground of the former. After a well contested game, Alston came off victorious. The fielding of the Nenthead club was much improved, and the bowling the Alston club was everything that could be desired. In the Nenthead's 2nd innings six men were bowled out with a score of only three. The day was most propitious, and this being the first cricket match played at Alston a large concourse of people assembled to witness the proceedings, and were all highly satisfied.
Deaths
At High Plains, near Alston, on the 14th inst., Elizabeth, widow of John Smith, of Bleagate, aged 82. *See 23rd August 1850*
At the Workhouse, Alston, on the 16th inst., Ann Stephenson, widow, aged 75.

3rd October 1857 (Westmorland Gazette)
WYTHBURN. —Helvellyn lead mine is now working with every prospect of remunerating the enterprise of its shareholders. Fine specimens of ore and its *adjuncts* are daily produced, and of finest quality. It is well worth the notice and enquiry of capitalists, and promises before long to become a *second Goldscope*, not to the lawyers but its shareholders.

9th October 1857 (Carlisle Journal)
Deaths
At Low Park, near Alston, on the 4th inst., Mr Nixon Walton, aged 60 years.
In 1851, at Low Park, Alston, Nixon Walton, lead miner & farmer, aged 54, brother John, mason, aged 60, sister Mary 56, and Nephew, Thomas Walton, cartman aged 19.

10th October 1857 (Carlisle Patriot)

PETTY SESSIONS

ALSTON. October 3

(Before the Rev. Octavius James and H. W. Friend, Esq.)

NEIGHBOURS' QUARRELS at NENTHEAD.— Anthony Brown, summoned for assault on Mary Hill. Complainant stated that on the Saturday previous, on hearing her boy shrieking, she went out and found that Brown's daughter had felled him with a shovel, and that on remonstrating with Brown about it, he "took up his neif, and catched her in't sma' ot back and then clicked up a chair and threatened murder." Defendant, on the other hand, stated that he was called down stairs by his wife to see the quarrels of the children, and that when Hill's boy called him a liar, he struck him in his passion, whereupon Mrs. Hill fired a stick at him and hit him on the nose, followed him to his door, and "dared" him with a volley of abuse; and as she still pursued him he turned round and gave her a kick. Witnesses who were called did not reconcile the contradictory statements of the parties, and the Magistrates had some difficulty in keeping them quiet in the court, —Fined 1s. and costs.

PUBLIC HOUSE ROWS AT NENTHEAD.—William Foster, Thos. Renwick, Thos. Fairless. William Shield, and Joshua Liddell, summoned by P.C. Teasdale, Foster for assault, and the others for aiding and abetting and obstructing him in the execution of his duty. Teasdale stated that on Friday September 28th, the day of the Flower Show, he was called to the Miners' Arms, and in endeavouring to quell the disturbance there, he was repeatedly struck by Foster and shoved. about by the rest for nearly an hour. Joseph Renwick a witness, gave evidence as to the general row, but did not see Foster strike, and could not identify any of the defendants on oath. Joseph Moffitt, Landlord of the Inn, corroborated the policeman's statement in every respect, but could not swear to Shield.—Fined 40s., including costs.—Shield acquitted.

John Stout, Innkeeper, at Garrigill, was summoned by P.C. Teasdale for having his house open and selling drink during prohibited hours on Sunday the 20th. Defendant at once admitted the sale of two pints of ale. In consideration of evidence given by the policeman as to bis good character and the orderly management of the house, he was fined in a mitigated penalty of 20s., including costs.

The business of the Court was concluded by the hearing of sundry nuisance cases.

16th October 1857 (Carlisle Journal)

Marriages

At Alston Church, on the 15th inst., Mr Christopher Richardson, joiner, to Mary, daughter of the late Mr John Pattinson, all of Alston.

Deaths

At the Workhouse, Alston, on the 13th inst., Miss Hannah Armstrong, aged 78.

24th October 1857 (Carlisle Patriot)
Deaths
At Alston, on the 18th inst., Mrs Hannah Bell, aged 37.

4th November 1857 (Teesdale Mercury)
Eggleston.—On Friday week, through the courtesy of gentlemen connected with the works, we had the gratification of inspecting the hydraulic machine forming the motive power of the newly erected saw mills, at the Eggleston Smelting Establishment. This machine, technically called a turbine, is extraordinary from its simplicity, and, being the first erected in this neighbourhood, a brief description of it may not be unacceptable to our readers. The water is brought from the adjacent hills by means of an open cut to the vicinity of the works, when it empties itself into a reservoir, where it undergoes filtration, previous to being introduced to its important office of propelling the machine. The turbine, which is of iron, stands in a small chamber by itself, 18 or 20 feet below the mill floor, and in shape and size is not dissimilar to a common beehive, with three rows of small holes, made in a curved form, round its lower extremity. Through an opening at the top, passes an iron axle, which is firmly keyed, and rests in a brass footstep, formed on the cover of the interior part of the turbine. This portion of the machine, to use an ordinary comparison, is nearly the shape of a man's hat, with the flange or brim firmly secured by bolts to the turbine box, to which the supply pipes for water are attached. Round the circumference are a number of holes, corresponding with those in the exterior or moving portion of the machine, with this difference; that the curve of the holes is in the opposite direction. Inside

this is a valve, which admits the requisite quantity of water, or, when desirable, shuts it off altogether. At the top of the upright axle, is a mitre wheel, which moves another, attached to a horizontal shaft, on which are fixed the sheaves, whence belts pass to drive the saws. When we first saw the turbine, it was at rest, and we could scarcely comprehend that an apparatus, so apparently insignificant, could possibly exert an effective force equivalent to the power of 16 horses! But our doubts were speedily set at rest, for the valve was suddenly opened by the workmen above in the mill, and the turbine immediately gave us a specimen of its capabilities, by whirling at the rate of 400 or 500 revolutions per minute, and expelling the water from the orifices in its sides, with a vehemence sufficient to keep at a respectful distance the most devoted adherent of hydropathy. We now ascended to the upper floor, where the saws were at work, and here our admiration suffered no diminution. The benches are fitted on the most approved principles, and perform their work with extreme precision: not only did these benches bear the wood up to the revolving saws, but, after it was cut, returned, and repeated the process with the greatest regularity. The speed with which the timber was sawn, demonstrated, even to our non-professional ideas, the wonderful superiority of this system. The turbine is from the establishment of Messrs Macadam Brothers, Belfast, and is adapted to work with a supply of 60 to 220 cubic feet of water per minute; the saw benches were constructed by Mr Anderson, of Galashiels. The whole of the machinery has given the utmost satisfaction to the agents of the Lead Company, and has been highly commended by everyone conversant with mechanics. In the course of the day, we also had the opportunity of seeing a large and valuable plate of silver, extracted from the lead at the smelting works, and of hearing a lucid explanation of the process of refining; for all which our grateful acknowledgments are due.

20th November 1857 (Carlisle Journal)
Marriages
At the Wesleyan Chapel, Garrigill, on the 19th instant, by the Rev. Wm. Maltby, Mr Thomas Dobson of Garrigill Gate, draper, to Mrs Phoebe Maxwell, of Crossgill.
At Alston Church, on the 14th instant, Mr John Craig, of Coatly Hill, to Miss Elizabeth Bell, of Dunston.
At Alston Church, on the 19th, Mr Thomas Monks, stonemason, to Mrs Dorothy Walton, Alston.
Deaths
At Alston, on the 12th inst., Mr Joseph Lee, aged 55.
In 1851, at Clog Hall, Nenthead, Joseph Lee, lead miner, aged 49, his wife Frances aged 47, children Jane I., 23, George, lead miner, aged 19, Frances 13, Joseph, lead miner, aged 12, Isabella 9, Anna 6, and Elizabeth 5. In 1861, Anne Lee aged 17, was working as a domestic servant at Bleagate for John Watson and family. See 25th July 1874, 12th May 1877

1st January 1858 (Newcastle Courant)
Deaths
At Alston House on the 25th ult., in her 82nd year, Elizabeth, wife of Jacob Wilson, Esq.

John Wilson of Carrshield, married Mary Walton of Smallburns Farm (Carrshield) 23rd January 1785 at Alston.
Children of John Wilson and Sarah Walton: —
John born 1st October 1761, Jacob, born 10th July 1770, Henry, born 1768?, Joseph, Mary, & Elizabeth.
John and Jacob are noted for their success in working Rotherhope Fell, and Hudgill Burn, lead mines, from which they made their fortunes.
John Wilson married Mary Bownas, (born 13th March 1759) daughter of John and Mary Bownas of Allendale, on 28th October 1790. John died at Shotley Hall on 12th August 1838. Mary died at Cullercoats, 27th September 1842, both she and John were buried at Carrshield.
Children of John Wilson and Mary Bownas: —
John born 10th August 1791, baptised 13th January 1792, died 18th January 1792.
John Bownas, born 27th October 1792, died 19th October 1823.
Maria born 11th October 1794, married Thomas Walton, 9th July 1821. Her eldest son John Wilson Walton, assumed the additional name and arms of Wilson on succeeding to Shotley Hall, following the death of his Uncle Thomas Wilson, this being a requirement of Thomas Wilson's will.
Ann born 23rd November 1796, baptised 8th February 1797, married Isaac Crawhall, of Allenheads, 15th October 1823.
Joseph born 24th January 1799, died 11th February 1799.
Thomas born 16th February 1800, married Elizabeth Cunard, at Nun Monkton, 30th April 1868, daughter of Sir Samuel Cunard. Thomas died 22nd April 1880, and Elizabeth died 4th March 1889, at Shotley Hall. Buried at St John's Church, Snods Edge, Shotley.
Henry born 14th February 1802, died 8th April 1803.
George born 14th February 1802, married Grace Bowstead, Grace died at Penrith 13th June 1859. George remarried, Emily Michell Paull, daughter of William Paull, on 14th April 1864, at Alston. See 16th March 1855.
William born 9th August 1804, died 28th August 1841, buried at Carrshield, family crypt.
Jacob Wilson married Elizabeth (Betty) Vipond, the daughter of Thomas and Frances Vipond, of Grassfield, Alston, 17th July 1800.
Children of Jacob and Elizabeth: —
Joseph born 6th June 1801, married Ann daughter of Joseph Bowstead, 27th June 1832, at Great Salkeld, Joseph died at Woodhorn, 29th May 1876, Ann died at Woodhorn 1st July 1873.
Hannah born 25th June 1803, died 23rd May 1822, art Clarghyll.
Elizabeth born 27th August 1805, married Thomas Fair, of Frenchfield, Penrith, on 19th October 17831, at Alston; Thomas died 18th December 1848, aged 53, Elizabeth died 11th March 1883, aged 77, and John Henry their youngest son died 6th November 1854, aged 8 years.
John born 18th July 1807, died 21st November 1842, at Newcastle.
Frances born 5th August 1809, died 6th November 1810, at Alston.
Sarah born 21st July 1811, died 29th February 1896, at Riding Mill.
Thomas born 4th December 1813, married Margaret, daughter of Joseph Bowstead, on 1st November 1849, at Appleby, Thomas died 16th August 1899, at Riding Mill, Margaret died 14th April 1897.

Henry Vipond, born 23rd October 1817, died at Newcastle 21st December 1891.
In 1841, at Alston, Jacob Wilson, independent, aged 70, his wife Elizabeth 65, Sarah Wilson 25, domestic servant Mary Grey 35, servant William Mawson aged 15, grandson Jacob Wilson 4, and grand daughter Elizabeth Fair.
In 1851, at Town Foot, Alston, Jacob Wilson, landed proprietor and mines, aged 80, born Allendale, his wife Elizabeth aged 75, and domestic servants, Mary Grey 51, and Bessy Teasdale 21.

Alston Cemetery inscription: —

JACOB WILSON OF ALSTON HOUSE

NOTICE is Hereby Given that RALPH SANDERSON, of Nenthead, near Alston, in the County of Cumberland, Grocer and Miner, has, by an Indenture, bearing date the 29th day of December instant, ASSIGNED all his ESTATE and EFFECTS to THOMAS BLACKLOCK of the City of Carlisle, in the said County, Grocer, upon Trust for the equal benefit of himself and such of the other Creditors of the said RALPH SANDERSON as shall execute the same Indenture, or assent thereto in writing, within three Calendar Months from the date thereof, and the said Indenture was on the day of the date thereof, executed by the said RALPH SANDERSON and the said THOMAS BLACKLOCK, in the presence of, and attested by JOHN REED DONALD, of No, 52, Castle street, Carlisle aforesaid. Solicitor. And NOTICE is hereby further given, that the said Indenture now lies at the Office of the said JOHN REED DONALD, in Carlisle, aforesaid, for execution by the Creditors of the said RALPH SANDERSON.
Dated the 30th day of December 1857.
J. R. DONALD, Solicitor to the Assignee.

8th January 1858 (Carlisle Journal)

NENTHEAD MINERS INSTITUTE. —A public tea party in connection with the above institute was held in the Lead Company's Schoolroom, Nenthead on New Years Day, when upwards of 350 partook of the repast, principally parties from a distance.

A public meeting was held in the evening. Mr Hyslop fulfilled the duties of chairman in a most praiseworthy manner. Appropriate addresses were delivered to a crowded audience by the Rev. Thomas Holme and other gentlemen belonging to the institute.

Great praise is also due to the Nenthead Amateur Band, which was in attendance and enlivened the proceedings by playing at intervals a selection of popular airs, waltzes, polkas, &c., in an admirable and scientific style. The whole of the proceedings terminated in a most agreeable manner, and afforded great pleasure and satisfaction to those connected with it. The Nenthead Miners' Institute has existed for somewhere about eighteen years, and his never been known to be more abundantly furnished with newspapers, periodicals, and other Standard works, nor in a more prosperous state than at the present time, it being supported by 90 members, and the number

gradually increasing. In connection with the above is an excellent library, composed of 1,000 volumes or upwards, treating upon all the popular subjects of the age, and which is accessible to the public on the first Friday of every calendar month. —Cor.

Marriages

At Alston Church, on the 7th inst., Mr Thomas Stuart, draper, Liverpool, to Miss Christian Sarah Cranston, of the Lowbyer Inn.

Deaths

At Browngill, near Alston, on the 31st ult, Jane wife of Mr Joseph Roddam aged 40 years.

Joseph Roddam, married Jane Slack, 3rd quarter 1840, at Alston.
In 1841, at Grassfield, Alston, Joseph Roddam, lead miner, aged 24, and his wife Jane 25.
In 1851, at Brown Gill, Joseph Roddam, lead mine agent, and farming 9 acres, aged 34, his wife Jane aged 35, and son Joseph 5.
In 1861, at Brown Gill, Joseph Roddam, lead mine agent, aged 44, son Joseph 15, and general servant, Sarah Woodmass 31.
Joseph Roddam, Mining Agent, died 3rd July 1870, aged 54.
See 4th February 1848, 9th July 1870, & 25th November 1882.

At Nenthead, on the 1st inst., Elizabeth, wife of Mr Jonathan Thompson, miner, aged 20 years.

In 1851, at Fiddler Street, Nenthead, Jonathan Thompson, lead miner, aged 46, Ann (Vickers, married at Alston, 22nd September 1827) aged 46, children William, lead miner, aged 26, Jonathan, lead miner, aged 23, Thomas, lead miner, aged 31, John, lead miner, aged 19, Mary 17, Jane 15, Ann 14, Joseph, lead miner, aged 13, Elizabeth 10, Daniel 8, James 7, and Vickers 2.*

Jonathan Thompson married Elizabeth Teasdale, 22nd January 1857, at Nenthead, Jonathan aged 28, Elizabeth aged 19.*

Jonathan Thompson snr., miner, died 1st November 1856 aged 51, at Nenthead.
See 8th November 1856

In 1861, at Foulard, Nenthead, Ann Thompson, lead miners widow, aged 56, children, John, lead miner, aged 29, Elizabeth 20, Dan, lead miner, aged 18, and Vickers 12. See 14th May 1869
In 1871, at Holmesfoot, Nenthead, Ann Thompson, widow, game keeper, aged 66, and son Vickers, lead miner aged 22.
Ann Thompson of Holmefoots, was buried at Nenthead, 24th April 1881, aged 77.
Jonathan Thompson jnr., married Hannah Irwin, aged 22, at Nenthead, 7th June 1860. In 1861, at Nenthead, Jonathan Thompson, lead miner, aged 33, and his wife Hannah, aged 22.
In 1871, at Overwater, Jonathan Thompson, lead miner, aged 42, children Hannah 31, John 9, Ruth A 7, Jonathan 4, and Tom 2.
In 1881, at Hillersdon Terrace, Jonathan Thompson, lead miner, aged 53, his wife Hannah 41, children John, lead miner, aged 19, Ruth A., domestic servant, aged 17, Jonathan, lead ore washer, aged 14, Tom 12, Erwine 9, lodgers Margaret Purdon, assistant mistress of undenomination school, aged 21, born Alva, Scotland, and Elsie Knight, assistant mistress of undenomination school, aged 21, born Kent.

Jonathan Thompson of Hillersdon Terrace, was buried 6th June 1888, aged 60, at Nenthead.

In 1891, at Hillersdon Terrace, Hannah Thompson, widow, aged 48, children Ruth Ann, dress maker, aged 26, Jonathan, lead miner, aged 24, Tom, lead miner, aged 22, Erwin, out of employment, aged 19, and grand daughter, Sarah Ann Thompson 3 years.

22nd January 1858 (Carlisle Journal)
Deaths
At Nenthead, near Alston, on the 19th instant, Mrs Elizabeth Bright, aged 72 years.
In 1841, at Market Place, Nenthead, Elizabeth Bright, school mistress, aged 55. In 1851, at Nenthead, Elizabeth Bright, lead miners widow, aged 65.

29th January 1858 (Carlisle Journal)
Deaths
At Hudgill, near Alston, on the 27th inst., Mrs Ann Walton.

2nd February 1858. (London Gazette)
NOTICE is hereby given, that the Partnership heretofore subsisting between the undersigned, Edward Holt and William Craig, as Proprietors of the Gallygill Syke Lead Mine, at Alston, in the county of Cumberland, has been determined by mutual consent, from the 31st day of December last; and that the said Edward Holt, as purchaser of the share of the said William Craig in the said mine, will receive and pay all outstanding accounts; and that the works of the said mine are now carried on by the said Edward Holt alone. —Dated this 25th day of January 1858. Edward Holt, William Craig.

23rd February 1858 (Cumberland and Westmorland Advertiser, and Penrith Literary Chronicle)
MARRIAGE FESTIVITIES AT ALSTON.—On the occasion of the marriage of the Rev. Joseph Bowstead to Miss Friend, third daughter of Hugh W. Friend, Esq., J.P., of Harbut Lodge, on Wednesday the 10th inst., the inmates of the Workhouse were treated by Mr. Friend to a plentiful repast of roast beef, plum-padding and ale. The dining room was tastefully decorated with evergreens the for the occasion, and the poor people heartily enjoyed the charitable and considerate treat.
GARRIGILL.—On Saturday, the 13th inst., the Nenthead Band gave an entertainment of an interesting character, gratuitous at the residence of Mr Thos. Cain, agent, and Mr Joseph Lancaster, Garrigill. The Performers were Professor Raisbeck and Mr James Atkinson, violin; Mr James D. Armstrong, violincello; Mr James Falters, cornet; and Mr G. Falters, saxhorn. The music consisted of Quadrilles, Polkas, Waltzes, and Airs, including Handel's Hallelujah Chorus, &c., which were performed in a very masterly manner, and gave the greatest satisfaction to all present. This is not the first entertainment that this excellent band has favoured us with in Garrigill, and we hope it will not be the last.

12th March 1858 (Carlisle Journal)

NEWCASTLE COURT OF BANKRUPTCY.

Friday, March 5.

(Before Mr. Commissioner Ellison.)

RE. U. VIPOND, OF ALSTON, MILLER.

This was a sitting on last examination.—Mr. Watson appealed for the assignees.—The bankrupt surrendered. He had not filed his accounts, and on being asked the reason, said there had not been time to do so.

Mr. WATSON said there was a large number of debts of small amount, and he had no doubt the bankrupt had given all his attention to the preparation of his accounts.

The COURT —If further time is necessary the only question is, to what extent. What is the amount of debt ?

Mr. WATSON said the amount of debts proveable was £8,000.

His HONOUR inquired if those creditors holding securities were able to realize them, so as to come in and prove for the difference.

Mr. WATSON said Messrs. Head, of Carlisle, who held many shares, had agreed with the assignees to have one sale for the shares held by them, and for those held by the assignees, and the sale would take place in three weeks' time.

His HONOUR said he would fix a dividend and take an adjournment afterwards if necessary.

The BANKRUPT applied for an allowance of £3 per week.

Mr. WATSON said the sum appeared large, but when the distance was taken into account, perhaps it was not larger than it ought to be.

The COURT would not fix the amount at present.

The bankrupt was then examined by the Court relative to certain of the proofs which had been tendered. One was a promissory note for £250 held by Mr. Edward Emmerson, and which was signed by 16 persons, of whom bankrupt was one. Bankrupt said it was debt owing to Emmerson for money to carry on a mine, of which he (bankrupt) with the other 15 were owners.

The COURT —Were you all equally liable?

The BANKRUPT—Not equally; my share was about a fifth of the whole.

The COURT—Have any of these paid any part of the sum?

BANKRUPT—Not yet.

The COURT —He laid out this money for the benefit of you all?

BANKRUPT—Yes, he did.

The COURT —Then he can prove for the whole amount upon your estate.

The sitting was adjourned to the 13th of April.

19th March 1858 (Durham County Advertiser)

Death From Being Crushed

An inquest was held at St John's Chapel, in Weardale, on the 11th inst., before Mr Thornton, deputy coroner, on the body of George Gardiner. Deceased was a lead miner at Ireshope Burn Mine. On the previous day he was at work sitting on a barrow, when a large quantity of stone fell in from the side and roof of the mine upon his body. On being taken out he was found to be quite dead. The stone was of the kind called "Plate," of a softish substance. The place had been examined the day before by a fellow workman, and was considered safe. The miners generally look after the

safety of the places where they work, and have plenty of props for use when required. Verdict, “Accidentally killed.” Deceased was about 21 years of age and was a remarkably fine stout healthy young man and much respected in the locality.

2nd April 1858 (Carlisle Journal)
ACCIDENTAL DEATH.—On the 24th March, a labouring man named Robert Chapman, was crushed by a mining waggon outside the mines at Patterdale, where he was found by a fellow labourer.
GARRIGILL EASTER SUNDAY.—At this village, near Alston, Palm Sunday is called Garrigill Easter Sunday, which name it has acquired, in times gone by, from the Vicars of Alston, when they had no curates, administering sacrament there every Palm Sunday. The custom of crowding the church is still kept up, but last Sunday the attendance was more than usually large; some 400 people got crammed into the little edifice, and numbers stood at the doors, unable to gain admission, long while before the service commenced. As in many country churches, psalmody has for many years been anything but congregational, the worthy clerk having hitherto had to sustain this part of the service solus. However, on Sunday last, an excellent harmonium, purchased through the exertions of the Rev. G. Monkhouse, curate of Garrigill, was first heard. The instrument was presided over by Mr. Wm. Howson, and the choir of the Alston Church attended, and went through the responses, chants, and psalms in a manner that reflected much credit upon themselves.

14th April 1858 (Teesdale Mercury)
Middleton-in-Teesdale.—The sale of Newspapers and Periodicals for the ensuing quarter, belonging to the Lead Company’s Workmen’s Reading Room, was held on Saturday night last, when the following prices were obtained, viz.;— The Times, 5s.; Leeds Mercury, 4s.; Durham Chronicle, 2s. 1d.; Illustrated London News, 2s 6d; Weekly Dispatch, 2s. 6d.; Chambers’ Journal, 9d; Leisure Hour, 9d.; National Magazine, 1s. 3d.; Sunday at Home, 1s.; British Controversialist, 6d.; British Messenger, 6d.

16th April 1858 (Carlisle Journal)
Deaths
At Glenridding, Patterdale, Mr John Bell, aged 62 years, late underground steward the Greenside Mining Company.

7th May 1858 (Carlisle Journal)
NENTHEAD.—On Friday, the 23rd ult., the Rev Young, of Newcastle, ex-president the Wesleyan Conference, pleached two sermons upon the re-opening of the Wesleyan Chapel, Nenthead. After the sermons, tea was served in the Lead Company's school-room, upwards of 500 being present.—On the Sunday following, the Rev. W. F. Slater, of Allendale Town, preached to a numerous congregation, when the sum of £26 10s. was collected.—On Monday, the 26th, the Rev. W. F. Slater delivered a lecture on "History and its Teachings" to a gratified audience in the schoolroom.

21st May 1858 (Carlisle Journal)

NEWCASTLE COURT OF BANKRUPTCY.

Tuesday, May 18. (Before Mr. Commissioner Ellison.)

RE. U. VIPOND, OF ALSTON, MILLER. &c.

This was a certificate meeting. Mr. WATSON appeared for the assignees. The bankrupt surrendered. No solicitor appeared for him.

Mr. WATSON said bankrupt's balance sheet extended over a period year and five months. commenced on the 9th September, 1856, with a surplus of £1,499. 16s. 6d. His profits amounted to £1,103, and his trade expenses to £2,679. That seemed large sum for expenses, amounting to 16 percent, on the amount of sales. The bankrupt's explanation was that in Alston they had to pay heavy expense, in carriage— £480 being the item on that head. Alston, as the Court was aware, was the centre a lead district; and a few years ago, large fortunes were made in mining speculations there. The result was that great many people indulged mining adventures, and the bankrupt became a mining agent for several parties. In 1856, at the commencement of his balance sheet, he held shares to the amount of £962. 10s., and since had purchased others amounting to £358. 5s., and he had also paid in calls £430. In consequence of his being engaged in these operations, the bankrupt became connected with Mr. J. H. Robinson, another mining agent, which had resulted in bill transactions between them to the extent of £3,600, so that a debt had become proveable on the bankrupt's estate, which ought not to have been proveable. This was a heavy amount of debt which was not legitimate; otherwise, so far as regard the bankrupt's conduct as a bankrupt, too much could not be said in his favour. He had always been ready to give the assignees every assistance in his power; and they left the case in his Honour's hands to deal with it as he thought right.

His HONOUR remarked that no case could more clearly illustrate the mischievous effects accommodation transactions and he should require some explanation of the accounts from the bankrupt before granting a certificate. The bankrupt endeavoured to explain that the bills passing between himself and Robinson were not strictly accommodation bills, but bills which ought to have been paid by their respective customers. He (the bankrupt) was trusting Robinson's customers to the amount of the bills he drew; and as a director of the lead mines, he thought it was his duty to assist Robinson getting the money to pay the mines. Robinson ought to have received money from the owners of mines sufficient to have paid these bills, but he could not get his calls regularly from them. The bankrupt added that he saw plainly he had acted inconsiderately and foolishly. He was sorry for it, and in future he would take care to avoid anything of the kind.

The COMMISSIONER drew the bankrupt's attention to the official assignees' report, which stated that the losses by mining speculations at Alston amounted, according to bankrupt's account, to £1374; though in his (Mr. Baker's) opinion these losses were understated. £2879 was taken credit for, represented by debts alleged to be due from several hundred miners. Of that sum only £540 had as yet been received, and any further dividend was likely to be very small. Then, with respect to the liabilities, irrespective of bona fide debts amounting to £7595, the bankrupt was liable on bills of exchange, many of which were accommodation bills, to the extent, of £7255, making a total

liability £14,850. The court required an explanation of these transactions from the bankrupt in writing.
The bankrupt prayed his Honour to grant an immediate certificate. would be great convenience to the district Alston to enable him to commence business immediately, as at present there was not a mill going in that district, he would be able to give the required explanation in a fortnight.
The court would give him protection for a mouth, and he might send his explanation to Mr. Baker, together with the letter which had been forwarded to Mr. Gibson.
The letter in question was signed by the bankrupt's principal creditors to the extent of about £4000, praying an immediate certificate on his behalf, on the ground bankrupt had himself stated.

28th May 1858 (Carlisle Journal)
Deaths
At Garrigill, on the 15th inst., Isabella, wife of Mr James Hutchinson, aged 76 years.
In 1851, at Beldy Mill, Garrigill, James Hutchinson, miller, aged 61, his wife Isabella (Coats, married 28th November 1811, at Allendale) aged 68, wifes sister Elizabeth Coats, annuitant, aged 75, and grand daughter, Mary Keenleyside 11.

28th May 1858 (Durham County Advertiser)
Deaths
At Newbiggin, on the 11th inst., aged 51, Mr W. Bell, Lead Company's Agent.
In 1851, at Foreshield, Nenthead, William Bell, lead miner, aged 44, his wife Jane 44, children, Mary 18, John, lead miner, aged 16, William, lead miner aged 11, Jane 9, Hannah 7, Ann 4, and Margaret 6 months.
In 1861, atNewbiggin, Middleton, Durham, William Bell, lead ore washing master & farmer, aged 21, sister Jane 19, and sister Margaret 10.

28th May 1858 (Durham Chronicle)
FATAL ACCIDENT AT THE DERWENT MINES. —On Wednesday evening se'nnight, about ten o'clock, an accident occurred at White Heaps, Derwent Mines, by which a young man named Isaac Stephenson, of that place, lost his life. He was ascending the shaft, and instead of climbing to the top by the ladders, he incautiously got hold of the spears to facilitate his ascent. He had placed his foot on the end of the bolt which connects them, and which projects out about an inch and a half, from which he had fallen off, and was precipitated to the depth of 14 fathoms. He was immediately taken up by his fellow workmen, but his injuries were of such a fatal nature that he only survived a few minutes.
In 1841, at Boltshope Mill, Hunstanworth, John Stephenson, aged 30, his wife Hannah (Bell, married 17th October 1829, Hunstanworth) aged 25, children, Isaac 8, John 5, and Mary 4.
In 1851, at Hunstanworth, John Stephenson, lead ore miner, aged 46, born, Stanhope, his wife Hannah, aged 40, born Hunstanworth, children, Isaac, lead ore miner, aged 19, John, lead ore miner, aged 16, Mary 14, Hannah 7, and Jane 4.

In 1861, at Whiteheaps, Hunstanworth, John Stephenson, lead ore washer, aged 57, his wife Hannah, aged 51, and daughter Jane 14.
In 1871, at Stanhope, Hannah Stephenson, widow, aged 61, daughter Mary Clennel, married, visitor, aged 34, granddaughter Hannah Jane, aged 1, boarders Elizabeth Currey aged 5, and Matthew Currey, iron miner, aged 31, unmarried, born Allendale.
In 1881, at Front Street, Stanhope, Joseph Currey, grocer & beer dealer, aged 36, born Allenheads, his wife Jane, aged 34, Mother in law, Hannah Stephenson, widow, annuitant, aged 71, and niece Elizabeth Currey aged 16.
In 1891, at Front Street, Stanhope, Joseph Currey, alcohol porter merchant, aged 47, his wife Jane, aged 45, Mother in law, Hannah Stephenson, widow, annuitant, aged 82, nephew in law, Joseph Wearmouth, labourer cartman, aged 28, and niece Elizabeth Wearmouth aged 26.
Possible death for John Stephenson, 1863/64/67.
Hannah Stephenson died, Saturday, 4th July 1891,aged 83, at Front Street, Stanhope.

16th June 1858 (Teesdale Mercury)

BARNARD CASTLE COUNTY COURT.

Thursday, June 10th, before H. Stapylton, Esq., Judge.

BEADLE v. STODDART.—Mr Raine for plaintiff, and Mr Barnes for defendant. The action was brought to recover the sum of £39 10. Plaintiff is a contractor residing at Windy Fell, near Eggleston; defendant is a contractor and butcher, at Eggleston. Plaintiff and defendant had jointly contracted to build for the Lead Company a spacious chimney for their works at Eggleston, and also to make a tramway from a quarry to the works. Plaintiff said that defendant had received £224 on account of the contract, and paid £146, which left a balance of £76, half of which he now sued for. His Honour found that defendant had received £219 7s 7d, and paid £181 2s 6d, leaving a balance of £38 6s 1d, half of which, £19 2s 6d he awarded to plaintiff with costs. It appears that the contract is still going on.

25th June 1858 (Carlisle Journal)

Great Band Contest at Alston

On Friday last this musical event, which has caused for some time much excitement in the neighbourhood, came off at Alston. The idea of a band contest was no doubt taken from a similar affair of more pretending dimensions which took place at Newcastle a few weeks ago. The thing was originated and conducted by individuals resident in Alston and the neighbourhood, and this fact will sufficiently account for the selection of this the highest—we had almost said the remotest—town in England, for gathering together the musical power of the district around the junction of the four northern counties of Cumberland, Westmorland, Durham, and Northumberland. The principal matter, that of raising funds for prizes, being considered feasible, the various bands of the locality were invited to compete. Seven of them accepted the invitation, namely, the Allendale Town Sax-Horn Band, Weardale Band, the Haydon Bridge Band, the Dufton Band, the Warwick Bridge Band, the, Nenthead Band, and the Alston Band. All were at the appointed rendezvous in good time, in excellent spirits, and if not all equally sanguine of success, were at any rate resolved to do their best for the

credit of their respective districts. The Newcastle and Carlisle Railway Company gave tickets for one fare from the stations east and west of Haltwhistle, and along the Alston branch. The morning was fine and clear, the country wearing a fresh blooming appearance after the showers of the preceding three days. The passengers from the east and west having transferred themselves to the carriages awaiting them at Haltwhistle, the train began to wind its tortuous way, at a slow four-horse-coach pace, up the valleys between high hills on each side, with odd houses scattered here and there, suggesting the inquiry—Where were the dwellings of the hundreds who augmented, at the roadside stations every two or three miles, the already-crowded carriages? On arrival at Alston, guns were fired as a welcome to a host of visitors more numerous than had ever before, within living memory or tradition thronged its rugged and eccentric Streets. A spacious Marquee, decked with flags, was erected near the railway station tor the purpose of the contest, in which there assembled the principal inhabitants of the town, and a great portion of the visitors. The proceedings were expected to commence at one o'clock, but it was two before the first band ascended the platform. At that time, and for an hour afterwards, the rain was falling in torrents, as it only does fall in "high places" and then was revealed the faulty construction of the Marquee, bringing into requisition bevies of umbrellas, hitherto enveloped in shining black covers, a la mode, for the protection of fair companions and their resplendent millinery. Each band played one piece, and then followed in the same order and played its second, after which the whole seven united and played "Rule Britannia" and "God Save the Queen." The order of playing was cast by lot, which was as follows: —

1. WARWICK BRIDGE BAND. —Leader, Mr Caruthers—
Quick March, The German, Crozier; Polka, The Alliance, Marriott.

2. ALLENDALE TOWN BAND. —Leader, Mr James Holmes—
Valse, The Venetia, Jackson; March, Napoleon's Imperial, Anon.

3. NENTHEAD BAND. — Leader, Mr Francis Swindle—
March, The Papal State, Tadolini; Valse, The Pride of the North, Brandon.

4. HAYDON BRIDGE BAND. —Leader, Mr Thomas Stobbart—Cavatina, La Somnambular, Bellini; Pas Redouble, La Somnambular, Bellini.

5. ALSTON BAND. —Leader. Mr John Featherston—
Overture, Tancredi, Rossini; Fantasia on Scotch Airs, Childe.

6. DUFTON BAND. —Leader, Mr John Wilson—
Grand March, Le Tete de Bronze, Auber; Overture, Le Macon, Auber.

7. THE WEARDALE BAND. —Leader, Mr Thomas Pearson—
Overture, The Caliph of Bagdad, Boieldieu; Quadrille, The Wedding, D'Albert.

Bands Nos. 3 & 7 and 2 & 5 each played over, the judges being unable to decide their respective merits. Throughout the whole of the day the Warwick Bridge Band was the favourite, the public, from whatever district, looking upon their claim to the first prize as being undoubted; great, therefore, was the dissatisfaction and disappointment when the award was made, and it was not

even placed. Upon the whole each played its pieced with greater precision than might be expected from provincial amateurs; though a much better effect might have been produced by the selection, in some cases, of music more suited to the capabilities of the performers. Owing to the delay in commenting, the proceedings were not terminated when the train left in the evening, consequently a great many were deprived of hearing the grand feature of the day, the amalgamation of the performers into one monster band. The judges were Mr K. Smith, of Leeds, and Mr E. Jackson, of Hull, whose decision was as under: —
1 and 2. Alston Band and Allendale Town Band, equal— and divided the first prize (£25), and second prize (£14), between them.
3. Weardale Band (£7).
4. Nenthead Band (£4)

Deaths

At Bridge End House, near Alston, on the 24th inst., John, youngest son of Mr Timothy Welsh, miller, aged 20 years.

26th June 1858 (Kendal Mercury)

SUDDEN DEATH AT DUFTON.—An inquest was held at Dufton on Saturday last before Geo. Thompson, Esq., coroner on the body of Mary, wife of Mr Christopher Liddle, miner, who was found dead in bed that morning. It appeared that deceased had been subject to disease of the heart for many years, and often complained of palpitation and sickness. She had been worse than usual the previous day and about five o'clock on Saturday morning she was sick and got up, but afterwards laid down in bed again, and at eight o'clock one of her daughters who slept with her discovered that her mother was dead. She was 53 years of age. Verdict, "Natural Death."

Christopher Liddle baptised 15th January 1804, at Dufton, son of Joshua Liddle and Mary Nicholson.
Christopher Liddle married Mary Willan 4th October 1829, at Dufton.
In 1841, at Dufton, Christopher Liddle, lead miner, aged 35, his wife Mary 35, sons Joshua 10, Christopher 3, brother William, lead miner, aged 25, and Thomas Blackett 5.
In 1851, at Dufton, Christopher Liddle, married, lead ore miner, aged 47, children, Joshua, lead ore miner, aged 21, Christopher 13, and brother William, lead ore miner, aged 42.
Mary Liddle died suddenly from heart disease.
In 1861, at Dufton Village, Christopher Liddle, widower, retired miner, aged 58, children, Joshua, lead ore miner, aged 30, Christopher, Ag Lab, aged 23, Tamar W, house keeper, aged 17, brother William, lead ore miner, aged 50, (deaf & dumb from birth) and lodger Thomas Blacket, lead ore miner, aged 24.
In 1871, at Dufton, Christopher Liddle, Ag Lab, aged 33, brother Joshua, lead miner, aged 39, sister Tamar W, hose keeper aged 27, uncle, William, retired lead ore miner, aged 60 (deaf & dumb from birth), and nephew William Liddle aged 1.
William Liddle died 1st quarter 1881, aged 70.
Tamar Willan Liddle married John Richardson, 10th June 1880, at Dufton.
In 1881, at Dufton, John Richardson, farmer of 300 acres, aged 32, his wife Tamar W aged 37, son John B 6, step son William aged 11, and mother Mary Richardson, widow, annuitant, aged 69.

At Dufton Churchyard: (Source Cumbria Family History Society)
In memory of Christopher Liddle who died Dec 23 1864 aged 60 years.
Also Mary his wife who died June 19 1858 aged 53 years.
Also George their son who died July 8 1833 aged 6 months.
Also Thomas their son who died July 12 1835 aged 2 months.
Also Joshua their son who died December 20 1878 aged 47 years.

29th June 1858 (Newcastle Courant)
Deaths
On the 20th inst., at Harrogate, Margaret wife of Jonathan Roddam., Esq., of New House, Weardale.
In 1841 at St John's Stanhope, Jonathan Roddam aged 20, (son of Joseph & Elizabeth bap 3rd August 1817) lead mine agent, & Margaret Roddam (Hornsby, father William, married at Carlisle, 21st July 1840) aged 20.
In 1851 at Cavendish Place, Rickergate, Carlisle, Samuel Blaylock aged 35, assistant cotton manufacturer, his wife Elizabeth aged 35, children, Sarah M. 8, Josiah 6, William H. 5, John H. 2, Agnes C. 8 months, Agnes Hornsby mother inlaw, widow, retired confectioner, aged 58, Joseph Roddam aged 9, nephew, and Agnes C. aged 7, niece.

9th July 1858 (Newcastle Courant)

FATAL, ACCIDENT—A fatal accident has occurred at the Derwent Mines. The unfortunate sufferer, Isaac Batey, of Smiddy Cleugh, with three other miners, were working on the vein which was filled with boss to the height of four fathoms from the level, when a portion of it in the centre gave way, precipitating him to the depth of about six feet. Another mass fell upon him from above, which covered him to the depth of four feet more, and although after that he was heard to cry for assistance, which was rendered as speedily as possible, yet some time necessarily elapsed before he could he extricated by his fellow workmen who had to use their best endeavours to prevent the impending masses from falling upon themselves, and when extricated life had nearly departed, as he breathed a few minutes only. The day preceding the accident, Batey and his partners had been engaged in removing the boss, and, it is supposed, had incautiously run it out to too great an extent. An inquest on the body was held at Hunstanworth, on Saturday, by Mr Favell, coroner, when a verdict of "Accidental death" was returned. Deceased was 51 years of age, and a native of Weardale, but for many years has resided in the neighbourhood of Blanchland. He has left a widow and six children.

In 1851, at Roughside, Edmondbyers, Isaac Baty, lead miner, aged 38, born Stanhope, his wife Mary 25, born Hunstanworth, children Mary Ann 5, born Newbrough, John 4, born Slaley, and Hannah 1, born Edmundbyers.

In 1861, at Boltshope, Hunstanworth, Mary Batey, miners widow, aged 36, children John 14, lead ore washer; Hannah11, Robert Isaac 9, and Elizabeth Esther 4 years.

In 1871, at Boltshope, Hunstanworth Mary Batey, widow, aged 46, son Robert Isaac Batey, lead miner, aged19, and grandson Isaac Ridley 1 year.

16th July 1858 (Carlisle Journal)
Marriages
At Alston Church, on the 13th inst., by the Rev. Joseph Hudson, curate, Mr Thomas Clark to Miss Jane Richardson.
In 1851, at Thirlwalls Lane, Joseph Clark, agricultural labourer, aged 49, born Chatham, Kent, his wife Frances 39, children John, lead miner, aged 18, Jenie, wool spinner, aged 16, Thomas, lead miner, aged 14, Sarah, wool spinner, aged 12, Frances 9, Mary A 6, Joseph 3, and William 1.
In 1861, at Thirlwalls Lane, Alston, Tom Clarke, lead miner, aged 23, and his wife Jane aged 21.

In 1881, at Whessoe Lane, Darlington, Thomas Davidson, grocer, aged 50, his wife Sarah, milliner, aged 44, daughters Frances M., milliner, aged 21, and Elizabeth A., milliner, aged 16. In 1881, at Brougham Street, Penrith, Isaac Craig, retired miner, aged 56, his wife Ann 49, sons William, drapers assistant, aged 23, John S., mason, aged 16, boarder, Thomas Cane Davidson, grocers

assistant 19, boarder William Goodfellow, drapers apprentice, aged 16, and domestic servant, Tamer Milburn, aged 17.

At Caldbeck, on Thursday, the 27th of May last, by the Rev. James Thwaites, Mr John Lancaster, miner, Greenrigg, to Miss Martha Wilson, of the same place.

17th July 1858 (Newcastle Journal)

The Late Jacob Wilson, Esq., of Alston.

The above named gentleman died at his residence, Alston House, on the 3rd of July, within a few days of the age of 88 Mr. Wilson is removed from the scene of his long life and useful labours. He was a man of great worth, strong judgment and upright mind, and will be long held in grateful memory by all who knew him. In all matters his counsel was ever sought, and his advice ever ready and ably given. Mr. Wilson outlived his wife only six months; she was a woman, admirable, overall, for singleness of intention in all her intercourse with others, and formed with her husband a true picture of English life in every relation. To their home and to their hearts none came too early, none returned too late.

See 24th November 1848, 9th November 1849, 9th July 1858, 17th July 1848, 22nd April 1864, 5th May 1868, 5th June 1875, 10th January 1880, 24th April 1880, 19th October 1880, 30th April 1892, 4th March 1896, and 28th October 1910.

24th July 1858 (Carlisle Patriot)

Valuable Discovery of Lead Ore.—A valuable vein of lead ore has been discovered traversing Wanthwaite Crag, in the royalty of R. Marshall, Esq., of Keswick. The vein was first observed to be productive of lead ore by Messrs. Bennett and Howe, and submitted to the examination of Mr. Henry Jones, of Alston, under whose direction a level has been commenced in the vein, which is now producing a considerable quantity of lead ore, a portion of which is rich in silver, technically termed argentiferous galena. The geological character of the rocks constituting the formation of Wanthwaite Crag are particularly favourable for the production of metalliferous substances, and the general characteristics of the vein already noticed in union with the valuable intersections, and the facilities afforded by the configuration of the mountain for working the veins effectually to an almost impenetrable depth without the assistance of elaborate machinery, altogether unite in the continuation of it becoming one of the greatest, mining localities in the Lake District.

Children of John and Hannah Jones baptised at St Augustine's, Alston:
Henry baptised 16th November 1823
John baptised 19th July 1825, buried 11th February 1826
John baptised 10th March 1828
John Jones senior was buried at Alston, 26th June 1836, aged 43.
In 1841, at Town Foot, Alston, Hannah Jones, dealer in boots, aged 47, Henry Jones, shoe maket, aged 18, and John Jones, lead miner, aged 12.
Hannah Jones died 3rd quarter 1849, registered at Alston.
In 1851, at Front Street, Alston, William Borrow, mineral dealer, aged 60, lodgers Henry Jones, lead miner, aged 29, and John Jones, lead miner, aged 24. In 1861, at Butts, William Burrow, mineral dealer, aged 70, and boarder, John Jones, lead miner, aged 34. Also at at Butts, Elizabeth Goodfellow,

unmarried, worsted spinner, aged 32 and her daughter Annie aged 10.
In 1861, at Butts, Alston,Sarah Burn, widow, aged 90, and lodgers, Henry Jones, lead miner, aged 39, and William Latimer, cartman, aged 57.
Henry Jones married Elizabeth Goodfellow, 2nd quarter 1868, registered at Alston.
In 1871, at Butts, William Burrow, mineral dealer, aged 80, and John Jones, assistant Mineral dealer, aged 44. (John Jones, unmarried, Mineral dealer died 4th quarter 1891, aged 65)
In 1871, at Butts, Alston, Henry Jones, lead miner, aged 49, his wife Elizabeth 44, and daughter Annie Goodfellow, domestic servant, aged 17.
In 1881, at Butts, Alston, Henry Jones, mining agent Barytes, aged 59, his wife Elizabeth 55, and daughter in law, Annie Goodfellow, domestic servant, aged 29.
In 1891, at Butts, Alston, Henry Jones, Lead & Barytes miner, aged 69, his wife Elizabeth 60, and step daughter, Annie Goodfellow, domestic servant, aged 38.
Henry Jones died 21st August 1893, aged 71, at the Butts, Alston.
In 1901, at Butts, Alston, Elizabeth Jones, widow, aged 73, and daughter, Annie, hosiery works labourer, aged 49.
Elizabeth Jones died 2nd quarter 1901, aged 74, at Alston.

24th July 1858 (Newcastle Journal)
SCHOOL TREAT.—At Leadgate-in Alston upwards of a hundred of the pupils of Leadgate-in-Alston National School! had their annual treat of cakes and tea from Rodderup Fell Mining Company yesterday week. This school, which is supported in a state of efficiency by the company, continued to maintain the popularity it soon acquired after the charge was conferred upon the present master, who receives on all occasions the liberal and hearty co-operation of the managers in everything that tends to the improvement of the school, no expense being spared to make it what a school ought to he. That it is duly appreciated, and stands pre-eminent in the general estimation of the neighbourhood. is abundantly manifested by the great numbers flocking to it from all parts;—many respectable tradespeople and other inhabitants of the town of Alston even, as well as places quite unconnected with the locality, sending their children to “An out-lying hamlet of the parish of Alston” to receive their education. As usual, after the children had finished tea, the wives of the neighbouring tenants and workmen of the company sat down to tables amply supplied with rich cakes and tea. The following ladies and gentlemen were present during the day to evince the great interest they take in all that pertains to the school and the “Hamlet,” viz. :—T. Wilson, Esq., Shotley Hall; Jas. Morrison, Esq., Newcastle; Captain George Wilson, Nent Hall; the Rev. Joseph and Mrs. Hudson, T. W. Crawhall, Esq., and Mrs. Crawhall, Raise, Alston; Mrs. Paull, Vicarage, Alston, &c., &c.

13th August 1858 (Durham Chronicle)
A LEADMINER KILLED.—An inquest was held at St. John’s Chapel in Weardale, on the 10th inst., before Mr Thornton, deputy coroner, on the body of Joseph Robinson, aged 46. Deceased was a lead miner at the Green Lowes mine. On the previous day, he had been putting up a scaffold to work upon, when a quantity of stone from the roof fell upon him. He was got out in

about five minutes, but was quite dead. It was an old working, and it was found that water had got in at the back which caused the roof to fall. No danger had previously been apprehended. Verdict—Accidentally killed.
Joseph Robinson married Phebe Race, 18th February 1837, at St John's Chapel, Weardale.
In 1841, at Stanhope, Joseph Robinson 25, his wife Phebe 20, children, George 4 and Phebe 2.
Phebe Robinson died 4th quarter 1846.
In 1851, at Stanhope Forest Quarter, Joseph Robinson, widower, lead miner, aged 37, children, George labourer, aged 14, Phoebe 11, Sarah 9, and Joseph 6.
In 1861, George Robinson, unmarried, lead miner, aged 24, sister Phebe 21, and brother Joseph, lead miner, aged 16.

25th August 1858 (The Derby Mercury)

A CALIFORNIAN LEAD MINE IN CUMBERLAND

Among the properties worked in the Teesdale district by the London Lead Company, is one called California, which is yielding immense profits. The vein for a considerable depth is 40 feet wide and so uniformly rich that every inch of the lode is broken down and brought to grass. The company, with but a small staff, raise between 5,000 and 6,000 bings of ore annually from this mine alone. In the same neighbourhood are the mines of Mr Beaumont, M.P., from which he obtains about 10,000 tons of lead and a large amount of silver annually, yielding princely revenue. *North Daily Express.*

27th August 1858 (Carlisle Journal)

FATAL ACCIDENT AT ALSTON. —THREE PERSONS KILLED.

A most melancholy accident occurred at the Manor House Iron Mines, at Alston, on Monday last, in which three men were killed. Thomas *(23)* and William *(18)* Forster and Richard Bowman *(28)* were working for iron ore in the Manor House Vein, when the roof of the mine gave way, and it is stated about 15 tons of stone fell upon them. The stone had to be blasted before they could be got out. The Forsters were both dead, but Bowman survived some eight hours. An inquest was held on the bodies on Tuesday, the 24th, when the jury visited the mine, and an adjournment for a week took place.
In 1851, at Ramseys Buildings, Alston, Robert Bowman, lead miner, aged 50, his wife Elizabeth aged 48, children Richard, lead miner, aged 20, Mary, woollen spinner, aged 16, Ann, woollen spinner aged 14, Joseph 11, Elizabeth 9, Jane 4, and Wallace 1 year.

Joseph Foster married Mary Hall 22nd January 1835, at St Augustine's, Alston.
In 1841, at Potatoe Market, Alston, Joseph Foster, lead miner, aged 25, his wife Mary 25, children, Thomas 6, Elizabeth 4, Joseph 1, and Nancy Hall, widow, aged 60.
In 1851, at Front Street, Alston, Joseph Foster, lead miner, aged 38, his wife Mary, straw bonnet maker, aged 37, children, Thomas 16, Elizabeth 13, Sarah 6, Anne 3, and mother in law, Ann Hall, widow, aged 70.
In 1861, at Kates Lane, Joseph Foster, lead miner, aged 49, his wife Mary 47, daughters, Sarah, hosemaid, aged 16, Anne 13, and Ruth 5.

In 1871 at Kates Lane, Mary Forster, widow, formerly domestic servant, aged 57, daughters, Sarah domestic servant, aged 26, Anne, dressmaker, aged 23, and Ruth, twister at woollen factory, aged 15.

Alston Cemetery:

In Loving Memory
of
Joseph Forster
who died May 14th 1870
aged 59 years
also Mary his wife who died
May 18th 1880 aged 66 years
Thomas their son aged 23 years
William their nephew aged 18 years
who were accidentally killed
August 29th 1858
Joseph their son who died
June 21st 1841, aged 2 years
Mary Ann their daughter
who died June 17th 1844 aged 2 years
Mary Jane their daughter who
died November 9th 1856 aged 5 years
Also Elizabeth their daughter
and wife of Matthew Davidson
Alston who died Decr 14th 1896
aged 39 years
Also Sarah their daughter
and wife of Joseph Lancaster
who died Oct 23 *(or 25)* 1908
aged 64 years

Deaths

At Alston, on the 16th inst., the wife of Mr Thomas Lee, Newshield, near Alston.
In 1851, at Newshield, Alston, Thomas Lee, farmer of 64 acres, aged 43, his wife Mary Ann 39, born Haltwhistle, children, Thomas 13, John 11, Jane 9, Sarah 9, and Ellen 7.
In 1861, at Newshield, Alston, Thomas Lee, farmer of 45 acres, aged 53, children, John 22, Sarah 20, and Ellen 18.
Thomas Lee died 18th April 1868, at New Shield.
At Low Skelgill, near Alston, on the 19th inst., Miss Ann Walton.
At Nenthead, on the 23rd inst., Mary Harrison, aged 76 years.
In 1841, at West Nenthead, Thomas Harrison, grocer, aged 65, his wife Mary aged 55, William Lonsdale, dissenting minister, aged 30, his wife Betsy (Elizabeth Baty, married 20th June 1837, Alston) aged 25, sons Harrison 2, and William 8 months.
In 1851, at Overwater, Nenthead, Mary Harrison, (nee Robson) widow, retired grocer, aged 69, nephew Harrison Lonsdale aged 11, born Whitehaven, niece Hannah Baty, unmarried, aged 25, born Hesket. Harrison Lonsdale, aged 21, bachelor, died at Nenthead 14th March 1860, probate was granted to William Lonsdale of Hornsea, dissenting minister, father of deceased, effects under £800.

Marriage
At the Wesleyan Chapel, Garrigill, in the Alston Circuit, on the 26th ult., by the Rev. W. Maltby, Wesleyan Minister, Mr Joshua Mulcaster, Crossgill, to Miss Rebecca Elliot, third daughter of the late Adam Elliot, of Silly Hole.
Joshua Mulcaster, son of James Mulcaster, and Margaret Pickering, born 20th June 1817, baptised at Alston, Redwing, 26th April 1818, died 23rd December 1888, at Maryport.
In 1861, at High Crossgill, Joshua Mulcaster, farmer, aged 43, his wife Rebecca aged 22, children, Mary J 1, and James C 3 months.
Joshua Mulcaster died 23 December 1888, at Maryport.
See 28th July 1843, and 22nd June 1864

15th September 1858 (Teesdale Mercury)
MIDDLETON-IN-TEESDALE
SCHOOL TRIP.—The London Lead Company with their wonted liberality, grave the teachers and Scholars attending the Schools — numbering upwards of 300—a trip to Redcar on Friday last They assembled at the School Room at an early hour, where between 20 and 30 covered carts and waggons were in readiness to convey them to Barnard Castle; where they arrived about half-past eight o'clock. The unfavourableness of the weather in the morning rather blighted the prospect of a fine day; but as they got out from amongst the hills, the day began to brighten, and gave every indication of affording pleasure and gratification to the eager and anxious travellers. They entered the train at Barnard Castle at Nine o'clock, arriving at Darlington at 9.40, where they were allowed three quarters of an hour's relaxation. The older portion of the scholars took the advantage of the time spent at the station in examining the first Locomotive Engine constructed, and now standing in front of the station. Whilst the older portion were thus gratifying their curiosity, the younger

classes had laid siege to the refreshment rooms, evidently intent upon first attending to the wants of the body before those of the mind. By the time they had all got satisfied, the signal was given for them to take their seats; and in a few more minutes they were again on their journey. They were all highly delighted with the interesting district between Darlington and Redcar—the country affording such a pleasant contrast with the part they had recently left. Arrived at their journey's end they were at once conducted to the expansive sands, and permitted to roam about at leisure for a couple of hours, after which an excellent Tea was provided by Mr Price in the National School; to which unmistakable justice was done. Having been satisfied once more, they proceeded to the railway station, and took their seats again for Barnard Castle, where they arrived at 5.15 pm. Their own conveyances were in waiting for them at the station, and having all got safely seated, they resumed their journey homewards, reaching Middleton about eight o'clock. They were highly favoured with fine weather during their stay at Redcar, and also on their return to Barnard Castle. It is gratifying to remark that no accident occurred to mar the enjoyment of the day, and the behaviour of the children was highly creditable to themselves and their superintendent Mr Hyslop. The arrangements of the railway company were all that could be desired.

5th November 1858 (Carlisle Journal)

KESWICK MINING COMPANY.

The general meeting shareholders was held at the offices the company, Austinfriars, on the 25th inst., Chas. Dear, Esq., in the chair.

Mr. CHARLES, the secretary, read the notice convening the meeting, and the minutes the last, which were confirmed.

A statement of accounts was exhibited, which showed: —Balance last audit, £5 14s. 9d.; ores sold, £1,847 18s 6d.; calls, £392 8s 2d.; spare materials, £44 2s. 3d.; loans, £250; amounting to £2,540 3s 8d. On the debit side—Mine cost, six months, £1,655 3s 2d.; merchant's bills, £700 18s. 8d.; sundry bills, £66 11s. 2d.; rents, £46 4s. 11d.; discount on calls, £11 33. 11d.; leaving balance in favour of mine, £50 1s. 10d. In the estimated account of assets and liabilities the balance against the mine was £336.

The report of Captain Postlethwaite was read, from which the following is condensed: —

"Oct. 22. In Lancaster's drift (over 20 level) we have driven 10 fathoms in orey ground, varying in value from 8 to 12 cwts. per fathom; we have also stoped over this drift (towards the adit level) 30 fathoms of ground, which has yielded 10 cwts, of ore per fathom; we are at present stoping this ground, at the low price of 25s. per fathom, by four men. The 30-fathom level north has been driven since the last general meeting 15 fathoms the course of the lode. When we took the lode down in the 30 we found it to have improved very much; we have now in the end a good lode, with 12 cwt of ore per fathom. In the 30 north have driven 8 fathoms on a strong, good looking lode, the first 4 fathoms of which will yield 12 to 14 cwts. per fathom. The levels are now further in advance of the slopes than they were six months ago, and nearly all the ore driven through during that time; we have yet to stope, so that should the ore driven through yield according its appearance, I may hope to be able to increase our returns. Oct. 23. The ore in the 30 end has further improved, and is now worth 15 cwts. of ore per fathom. There is also change in the 40 north since the lode has very much increased strength, and I am of opinion we shall have better ore very soon; the ground in the 40 is better, the 50 ends remain as last reported, also the stopes."

The Chairman stated that he had made advantageous arrangements with the railway company for the conveyance of the ore. He also read a lengthened report from Mr. Newby, a surveyor, who had examined the property with a view working water-power instead of steam, as they must go deeper at great expense.

Mr. Alderman CARTER said he had been shareholder for the last eight years, and some time back the water-wheel was removed because in summer it was dry and they could not work in the water; they were alarmed by being overwhelmed with water, and in the winter it was frozen up. It was now suggested to bring the water 2¾ miles; but he hoped they would not entertain such a proposition for a minute. It was an absurdity, and would be an endless task.

After some further discussion, at the request of the worthy alderman the question was dropped, and the report and accounts unanimously adopted.

The CHAIRMAN said he had had two samples of ore assayed, both from the Goldscope and Keswick mines. No. 1, from Goldscope gave 79 per cent, of lead and 6 ozs. 5 dwts. 10 grains of silver per fodder of 21 cwts.; No. 2, 79 per

cent, lead and 5 ozs. 16 dwts. of silver per fodder. From Keswick No. 1, 80 per cent, of lead and 6 ozs. 5 dwts. 10 grs. Of silver per fodder. No. 2, 78 per cent, of lead and 6 ozs. of silver per fodder, proving that the Keswick ore was equal to any in the district.
Mr. Alderman CARTER said since he had been connected with the mine they had never been in such good position. He had every confidence in Mr. Charles, who presented a fair, concise, and honest balance-sheet; and was agreeably surprised to find the liabilities had dwindled down to £336 2s 6d., and he believed they had a large amount of ore in reserve.
Mr. CHARLES believed the ores in reserve, less the expenses of taking them away, were of more value than the amount of liabilities.
Alderman CARTER said he had spent a large sum of money in Keswick, which he considered at one time lost. He now hoped they would soon be in a dividend paying stale. A resolution was passed authorising the committee to surrender the present lease and take new one from General Wyndham, the lord, for 21 years from January next. Mr. Carter, in proposing a vote of thanks to the chairman, said it was the first meeting that had been held since he was connected with the mine (8 years) without making call.
The resolution carried, and the proceedings terminated.

12th November 1858 (Newcastle Courant)
Deaths
At Scots House, Durham, on the 11th inst., in his 62nd year, deservedly and sincerely regretted, Hugh Lee Pattinson, Esq., F.R.S. *See 5th September 1826, 20th September 1850, 12th November 1858, 28th November 1868, and 29th October 1898.*
Hugh Pattinson son of Thomas Pattinson and Margaret Lee, the Pattinson and Lee families were members of "The Society of Friends", Quakers. Thomas was a grocer and draper; he died at the age of 57 years, on 19th May 1812, leaving Margaret with two sons, Thomas and Hugh.
In the register of the Society of Friends, Thomas Pattinson is described of
> "Alston town, merchant, and of Allendale monthly meeting; " and his place of burial is further specified as "near the Meeting-house door."[1]

Thomas married Rachael Watson (born Allendale, 5th July 1790) at Allendale meetinghouse on the 16th September 1812, and subsequently lived at Allendale, Townhead. They had two children William Watson born 19th October 1813, (died 8th August 1894, buried at Jesmond Cemetery) and Margaret.
In 1841, at Felling Cottages, Heworth, Rachel Pattinson, aged 50, independent, and William Pattinson, agent, aged 25. Thomas married Ann Watson, 3rd May 1842, in 1851, at Low Felling, William W Pattinson, chemical manufacturer, employing 500 workmen, aged 39, his wife Ann 31, children Thomas Wm., 6, Margaret 5, Mary 3, and John W 1 year.
Hugh was born on the 25th December 1796, and he married Phoebe Walton at Alston, parish church, on 25th December 1815.
Phoebe was the daughter of Thomas and Margaret Walton, of "Nest," Alston, Phoebe was baptised 1st January 1797.
It is interesting to note that to enable the marriage to take place in a "Church of England", it was necessary for Hugh to be baptised into the church.

"… on December 23, 1815, the Rev. Benjamin Jackson, vicar of Alston, met Hugh and his friends at the Angel Inn-an appropriate signboard for the occasion of changing, as Cobbett would have said, an "unbaptized," if not " buttonless," fellow into an orthodox Christian-and there performed the ceremony. The novitiate entered the room as Hugh Pattinson; after baptism he stood forth Hugh Lee Pattinson, having adopted his mother's maiden name of "Lee" in her honour." [2]

Children of Hugh Lee Pattinson and Phoebe Walton: —
1. Ellen baptised, 5th July 1818, Alston, married Robert Benson Bowman, botanist on 13th October 1842; they had three sons, Henry, Hugh Torrington, and Walter.
2. Margaret, baptised, 16th December 1820, Alston, married Isaac Lowthian Bell 20th July 1842, they had two children Mary Katherine, and Thomas Hugh.
3. Thomas Walton Pattinson, baptised, 24th December 1817, Alston buried 21st March 1820, at Alston.
4. Thomas Hugh baptised 18th August 1822, at Alston, died 18th April 1824, aged 2 years, buried at the Friends burial ground, Newcastle 20th April 1824.
5. Hugh Lee, born 1824, baptised 25th December 1829, at Alston, married Isabella Shield (22nd March 1853, at St James, Westminster), they had five children, Hugh Lee, Mary, John Smeed, Katherine Phoebe, and Winifred.
6. Mary, baptised, 25th Nov 1827, at Alston, married Robert Stirling Newall on 14 February 1849; they had 5 sons and 1 daughter.
7. Thomas, baptised, 9th October 1831 at Alston, died at Para, (State in Brazil, main City Belem) on the 15th inst., of July, of Yellow fever, on his way from Pernambuco (State in Brazil main city Recife) to the United State, aged 19.
8. Walter, baptised, born 13th May 1841, baptised, 29th October 1841, at Hanover Square Chapel, Newcastle, he died 6th March 1847.

In 1841, at Bensham, Gateshead, Hugh Pattinson 40, his wife Phoebe 40, Ellen Pattinson 20, Margaret Pattinson 20, Walter Pattinson 1 month.
In 1851, at Scott's House, Boldon, Hugh L Pattinson, manufacturing chemist, aged 54, his wife Phoebe 54, and grandson Walter Bowman 4.
Around 1821 Hugh became clerk and assistant to Anthony Clapham, a soap-boiler in Newcastle. In 1825 he obtained the post of assay-master to the Greenwich Hospital Commissioners, and returned to Alston. In 1831 he was appointed manager to the lead works of Mr. Wentworth Beaumont; here, after further experiments, he perfected his process for desilverising lead, and patented it in 1833.
He resigned his position with the Beaumont company, and in 1834, joined John Lee (his uncle) and a George Burnett who had started the Felling Chemical Works in 1833. He opened his own Washington Chemical Works in 1837, which he sold to R.S. Newall in 1872, his son in law.

The Gateshead Observer gave the following Obituary:—

DEATH OF HUGH LEE PATTINSON, F.R.S.

Our obituary column records the death, at Scots House, West Boldon, Gateshead, of one of the "remarkable men" of the North—Hugh Lee Pattinson, Esq., a native of Alston, in Cumberland, where he was born on

Christmas-day, upwards of 60 years ago. The son of a respectable tradesman, Mr. Pattinson took part in his father's business till manhood, when, as a mineralogist, he entered upon a wider sphere, and the appointment was subsequently conferred upon him of Assayer to the Lords of the Manor of Alston, (the Commissioners of Greenwich Hospital). He was afterwards engaged in the same capacity at Mr. Beaumont's lead-works in Blaydon: and here it was that he achieved his world-wide fame.

The desirableness of some more economical mode of extracting silver from lead, had been long obvious to those conversant with that branch of our national industry, and Mr. Pattinson was for some years engaged in occasional experiments on the subject. He attempted, in vain, to separate the lead from the silver by distillation and long-continued fusion. Various other experiments were tried, both in the dry way and by the application of liquid menstrua. All were alike unsuccessful. But his patient labours were not to go unrewarded. It happened, in the month of January, 1829, that in the prosecution of his object he required lead in a state of powder, and, to obtain it, adopted the mode of stirring a portion of melted lead in a crucible, until it cooled below its point of fusion, by which process the metal is reduced to a state of minute subdivision. He was now on the threshold of his great discovery.

One of those pregnant hints of Nature, offered to ordinary minds in vain, was presented to Mr. Pattinson's observant eye; and the secret of success was his. He saw -- and was struck with the fact -- that as the lead cooled down to nearly its fusing point, solid particles, like small crystals, made their appearance among the molten mass, gradually increasing in quantity as the temperature fell. Having watched the phenomenon twice or thrice, he began to conceive that possibly some difference might be found in the proportions of silver held by the part that crystallized and the part that remained liquid; and following up his conjecture by experiment, its truth was demonstrated -- the liquid lead yielding, on cupellation, much more silver than the crystals.

Three or four years passed away before Mr. Pattinson made his discovery practically available to the extent of his wishes; there were difficulties to be overcome in its profitable application; but all these gave way before his ingenuity and perseverance; and the result, as estimated twenty years ago, was equivalent to an addition of 54,000 ounces of silver to the wealth of England and Wales -- a considerable portion of which, it is pleasant to know, found its way into his own pockets. And while the lead was impoverished of its silver, it was improved in character by the abstraction -- an operation which the reflecting moralist may trace in the analogous experiences of humanity.

Prior to Mr. Pattinson's process (for which he took out a patent) the extraction of silver from lead could only be pursued with profit when the more precious metal was present in the proportion of 20 ounces to the ton.

The minimum was now reduced to 3 ounces; lead mines, before neglected, could be worked with advantage; and the new mode of working came into use far beyond the limits of our own island.

We have enlarged upon Mr. Pattinson's great act of alchemy, with which his name will for ever be associated: - among his other improvements in the industrial arts, there is but one more that we will mention -- his substitute

for white lead. With "sulphate of alumina," the "concentrated alum" of commerce (the manufacture of which was originated by the Felling Chemical Company), was exhibited in 1851, at the Crystal Palace in Hyde Park, "oxichloride of lead," prepared by decomposing native galena by the hydrochloride acid, which is produced in great excess in the manufacture of soda: - dissolving the chloride of lead thus formed in boiling water, and mixing the solution with the proper quantity of lime water to convert one half of the chloride into oxide. The old plan is to convert metallic lead into white lead: - the new to obtain the white lead direct from the ore. Specimens, with illustrations of its use in oil painting, were sent to the Exhibition from the Washington Chemical Works, by the son-in-law of the deceased, Mr. ISAAC LOWTHIAN BELL.

In 1838, when the British Association for the Advancement of Science met in Newcastle, Mr. Pattinson was one of the most potent wizards of "the wise week."

We have said it was in Blaydon the deceased discovered the secret, which led to his "patent process." We trace not his next immediate movements in life; but in or about the year 1834, in partnership with Mr. JOHN LEE (a relative), and Mr. GEORGE BURNETT, both of whom he survived, he commenced the Felling Chemical Works, which now cover a larger area than the Crystal Palace, and employ a thousand workmen. Ten years later - about 1843 – the deceased commenced, also, the works at Washington, in which are carried on, amongst other manufactures, that of magnesia, by a process discovered by himself, and patented -- the result being a much purer and cheaper article, and one which has driven almost every competitor out of the field.

In the neighbourhood of the Washington Works a populous and growing community now exists, which will make a respectable figure in the census of 1861, under the head of "Pattinsontown".

In 1850, the deceased was appointed, in Newcastle, to the office of a Local Commissioner in promotion of the Great Exhibition of 1851; and with other eminent chemists (M. DUMAS, the distinguished Frenchman, being Chairman), he served on the Chemical and Pharmaceutical Jury at the Crystal Palace.

He was a man of unbounded munificence. His public subscriptions were ever liberal, and his private charity extensive. Meeting, some years ago, one of his friends in the street, whom he knew to be interested in a charitable institution of recent date, he spontaneously introduced the subject, and asked, "What he must give? - how much to the building fund, and how much to the annual income?" The estimate was made. "Nay," said he, "you must double that." And such, in all things, was the lamented deceased. He was an ardent friend of education, and especially amongst his own people. We have frequently had occasion to mention the excellent schools and reading-rooms established in connection with the works in which he was a partner. No expense was ever spared, if he thought the workmen or their children could be improved in their education; and baths, savings banks, &c., also had his care. He invariably treated the humblest individual in his employ with consideration and kindness. He loved particularly the people of his native town. His tongue was racy of the soil that gave him birth, and his heart warmed to its inhabitants. He was ever

ready to aid them in their good works. He was one of the largest subscribers to their beautiful Town Hall, of which he laid the foundation stone, but the opening of which he must not behold. He will be there, however, in the thoughts of all when the ceremony takes place; for well they know that in him they have lost one of their best friends.

"The old master" was sorely missed at the Felling Chemical Works, when last the annual examination of the schools was held, and he, for the first time was absent. Many of the children were observed in tears - his best monument.

The deceased was a member of the Royal, the Royal Astronomical, and many other learned societies. He died a Vice-President of the Literary and Philosophical Society of Newcastle -- of which on the nomination of the Rev. ANTHONY HEDLEY, and others, he was elected a member on the 6th of March 1822.

Much earlier, however, (while yet at Alston), he had the use of its philosophical apparatus; and he was ever sensible of his obligations to the institution in his youth. From his boyhood the deceased was known for his "turn" for mechanics and chemistry; and he early became so proficient that he delivered lectures to his townsmen and the surrounding villagers with illustrative experiments. Nor, to the latest year of his life did he cease to be a student, but was ever careful to keep pace with the science of the day.

He was also a man of great general information -- had a rich fund of anecdote and a genial disposition -- and was an instructive and entertaining companion.

MRS. PATTINSON, who was born, we believe, on the same day with himself, survives her husband; and he also leaves a son and three daughters: - HUGH LEE PATTINSON, Esq., of Stote's Hall, Jesmond; MRS. R. B. BOWMAN, of Newcastle; MRS. ISAAC LOWTHIAN BELL, of Washington; and MRS. R. S. NEWALL, of Gateshead. The funeral of this eminent gentleman took place at the village of Washington on Saturday.

HUGH LEE PATTINSON
DIED
NOV. 11th, 1858,
AGED 62 YEARS

Hugh Lee Pattinson

Newcastle University Library, Special Collections, Henry Lonsdale's "The Worthies of Cumberland"

The chief mourners comprised:
HUGH LEE PATTINSON, Esq., son of deceased,
ISAAC LOWTHIAN BELL, Esq., Washington and
ROBERT BOWMAN, Esq., Jesmond, sons-in-law
W. WATSON PATTINSON, Felling New House, nephew
R.S. NEWALL, Esq., Fern Dean, Gateshead,
J. HYLTON, Esq., R. READMAYNE, Esq, Felling
THOMAS BELL, Esq., Usworth House,
JOHN FORSTER, Esq.
J. WILSON, Esq., of Newcastle,
W. SWAN, Esq., Washington
Many other gentlemen and 500 workmen attended. The neat little church was crowded to excess. Mr. Pattinson is deposited in a vault at the east end, at the head of which stands a monumental stone, recording the deaths of WALTER, his beloved child, who died March 6th, 1847, aged six years; and also THOMAS, who died at Para, in Brazil, July 17th, 1856, aged nineteen.
The coffin (the outer of oak and the inner of lead) was covered with black cloth, ornamented with brass.

16th November 1858 (Carlisle Journal)
NENTHEAD MINERS INSTITUTION. — The half-yearly meeting of this institution was held in the London Lead Mining Company's Schoolroom on Friday evening last, when the following papers were agreed to for the ensuing half-year's purchase, viz: — Daily Times, Illustrated London News, Bell's Weekly Messenger, Punch, Carlisle Journal, Newcastle Daily Chronicle, North of England Advertiser, and Christian News. The other publications are Wesleyan, Primitive, Church, Farmers', and Blackwood's Magazines, London Journal, Chambers's Journal, Christian Treasury, Leisure Hour, Fioral World, and Meliora. The above-named company also supply the institution with the Gardener's Chronicle, British Workman, Titan, and the Family Economist, also a library of books, containing nearly one thousand volumes. Very great praise is due to the company, their superintendent, and local agents, for their kind attention to the workmen, both in this and every other respect, as they furnish them with a school, the charges for which are merely nominal, and their selection of a teacher bids defiance to a comparison in this district —Cor.

PETTY SESSIONS
ALSTON, Dec 3.
(Before Thos. Wilson, and H. W. Friend, Esqs,, and the Rev. O. James.)
John Proud, of Garrigill, tea hawker, was charged (for about the twentieth time), with being drunk and disorderly at Alston. John explained to the Magistrates that, owing to having received an injury to his head some years ago, two glasses of ale would make him drunk. Fined 5s., and 11s. costs.
Thomas Snowdon, innkeeper, Alston, was charged with having company drinking in his house during divine service on Sunday. Defendant pleaded that the persons found drinking had just come from church, where they had been married that morning, and that he did not know he was offending against his

licence by supplying them with drink. Ordered to pay 7s. 6d., and be more careful in future.

Marriages

At Alston, on the 5th instant, by the Rev. W. N. Snowe, vicar, Mr William Madgin, labourer, to Miss Mary Archer.

In 1861, at the Butts, Alston, William Madgin, masons labourer, aged 26, his wife Mary 26, and son Thomas 9 months.

At Alston, Mr Isaac Todd, miner, Annatwalls, to Miss Hannah Craig, second daughter, of Mr Joseph Craig, miner, High Nest.

In 1851, at Low Annatwalls, Ann Todd, lead miners widow, aged 46, children, Isaac, lead miner, aged 21, Mary 18, Joseph, lead miner, aged 15, and John 11. In 1861, at High Cow Gap, Isaac Toss, Ag. Labourer, aged 31, his wife Hannah 26, and daughter, Mary 1.

In 1871, at High Skelgill, Alston, Isaac Todd, game keeper, aged 41, his wife Hannah 36, children, Mary 11, Anne 8, Hannah 5, Elizabeth 3, and Isabella 5 months.

In 1891, at Skelgill, Isaac Todd, game keeper & farmer, aged 61, his wife Haanah 56, and daughter Isabella 20.

In 1901, at Rodderup Tower, Isaac Todd, game keeper & farmer, aged 71, his wife Hannah 66, and daughter, Lizzie 32.

Isaac Todd died 6th March 1902, aged 72, at Alston.

Hannah Todd died 1st qtr., 1904, aged 69, registered at Alston.

22 December 1858 (Teesdale Mercury)

Deaths

At Hude, Middleton, on the 18th inst., John, son of Mr J. Bell, surveyor of Lead Mines, aged 3 years and 8 months.

24th December 1858 (Carlisle Journal)

In 1861, at High Lee House, Garrigill, Joseph P Slack, landed proprietor, aged 64, his wife Nanny 60, and married daughter Mary A Millican aged 30.

In 1871, at High Lee House, Garrigill, Nanny Slack, widow, annuitant, aged 70, married daughter Mary Ann Millican, annuitant, aged 40, and visitor, John Kidd, widower, desilverizer of lead, aged 67.

Deaths

At Alston, on the 21st inst., The Rev. Peter Wilkinson, Wesleyan minister.

28th December 1858 (Carlisle Journal)

THE OPENING OF ALSTON TOWN HALL.

Never until yesterday could the rising town of Alston boast of a Town Hall or a room suitable for large meetings or for concerts, or other entertainments. The Savings' Bank, an institution whose value has been highly appreciated in the locality, has been conducted in an inconvenient situation; the Mechanics Institution has been struggling outside the town at such a distance that few cared to visit it, and those who did go found but an uncomfortable reception, and the Board of Guardians have not had proper accommodation for

dispensing the charity at their disposal. But these defects and deficiencies were yesterday remedied by the opening of the building, which will at once be a credit to the inhabitants and an ornament to the town. …
The idea of having such a building erected was first mooted about two years ago, when the preliminary arrangements were made. The gentlemen of the locality came forward liberally and the Commissioners of Greenwich Hospital, the Lords of the Manor, handsomely gave the site and made a donation of £200 besides. Eighteen months ago the foundation stone was laid under the most favorable auspices of Mr Hugh Lee Pattinson, who unfortunately did not live to see the completion of a work, which he inaugurated and towards which he subscribed with a most liberal hand. The total cost of the building as it now stands is £2,199 13s 7d., (including £612 15s 3d the cost of the Savings Bank), but there is yet to be added a clock and a peel of bells, the cost of which additions will probably be £200 or £300. The subscriptions amount to £1,522 3s 6d., so that the trustees have the somewhat rare pleasure of starting with almost unfettered hands, as there only remains to be cleared off the trifling some of £64 14s 10d. The building is situated on the rising ground near the Vicarage, and is in a medieval style of architecture, and forms a striking ornament to the town — its clock tower, gables and pinnacles rising gracefully above the surrounding objects. …

31st December 1858 (Durham Chronicle)
MIDDLETON-IN-TEESDALE WORKMENS READING-ROOM SUPPER.— The third annual supper of the members of the Lead Company's Workman's Reading-room, took place on Friday evening last, when a goodly number sat down to partake of the abundant supply of Christmas fare set before them. After the removal of the cloth, R. W. Bainbridge, Esq., superintendent of the Lead Company's Works, kindly presided. It is always gratifying to see employers and employed meet on such occasions and no better proof of the signs of the times need be given, than such exhibition of sympathy and fellow-feeling between the two classes. The worthy chairman spoke of the uses and advantages of institutions like the present; and remarked how much better it was for young men to come and spend an evening in a room where there was every comfort and every facility for self-improvement, than to waste their time and their money at the alehouse. The first thing that prompted the idea in his mind of a reading-room in Middleton, was a visit some time ago, to the flourishing town of Middlesbro', where he had the opportunity of being in one. He then named the subject to the deputation from London, and they with their wonted liberality and respect for their workmen, at once consented to the erection of the present building. After a few more remarks, Mr J. Readshaw, jun., was called upon to address the meeting; and short addresses were also delivered by Mr M. Pinkney, Mr J. Wall, Mr J. Watson, and other members. At the close of the meeting votes of thanks were accorded to the ladies who had so freely given their valuable services in preparing the supper, &c., and to A. Todd, Esq,, for the gift of a quantity of milk, and also to the chairman for so kindly and willingly occupying tho chair that evening. The chairman, in responding, said he hoped it would not be the last time he would have the pleasure of meeting with them on such an occasion, as he had indeed spent a very pleasant and happy evening; and trusted that the young men would continue to improve their intellects and respect themselves, for if they

respected themselves they were sure to be respected by others. He was glad to learn they intended having a course of lectures during the winter, and he would cheerfully allow them the use of the schoolroom, if their reading-room was too small. The meeting broke up at ten o'clock.

6th January 1859 (Coroners Inquest, Carlisle Archives TCR 2)
John Robinson, aged 23, of Dykeheads, Nenthead, accidentally killed by a fall of stone from the roof of Capelcleugh mine.
Thomas Robinson married Mary Thompson, 26th February 1807, at Alston.

See 4th September 1841, 31st December 1842

7th January 1859 (Carlisle Journal)
NENTHEAD MINERS INSTITUTE.—The members of the above Institution held their anniversary on New Year's Day, when upwards of four hundred members and friends partook of an excellent tea provided for the occasion. After tea, eloquent and appropriate addresses were delivered by Messrs' W. Price, T. Proud, T. Pearson, and J. Teasdale. The chair was occupied by Mr. T. Moffat, who conducted the meeting in an able manner. All of the speakers are members of the Institution, and elicited frequent bursts of applause from the audience during the addresses, who showed the highest approbation and the utmost cordiality throughout the proceedings. During tea and at intervals between each address the Nenthead Amateur Band played a choice selection of the most popular airs in a first rate masterly style. By the Chairman's report the members number one hundred and eleven, and take into the room two daily and seven weekly newspapers; also eleven periodicals, in addition to several standard works. The London head Company give them a room, coals, candles, and a few periodicals all free of expense, in addition to a free circulating library of nearly one thousand volumes for the use of their

workmen. A vote of thanks was given to the ladies for serving up the tea, and also to the speakers and band.

21st January 1859 (Carlisle Journal)

Deaths
At Shildon, on the 15th inst., aged 73, Mr Thomas Watson, formerly a lead miner.

28th June 1859 (Carlisle Journal)
GARRIGILL FRIENDLY SOCIETY—The twenty-seventh anniversary of the Garrigill Friendly Society was celebrated on Friday, the 24th of June. After the financial business was disposed of, a procession of the members, headed by the Garrigill band of music, paraded the village, and then repaired to the Fox inn, where a most excellent dinner was provided by Mrs. Stout. Full English justice having been meted out to the good cheer placed before them, the members returned to the School Room. Mr. J. Mulcaster was called to the chair. Mr. W. Thomason, the secretary, read the report, which shewed that the society was in a very prosperous and thriving condition. The capital amounts to £1,626 1s. 8 ¾ d. The income during the year has been £43. 16s. 7 ½d. more than the expenditure. The number of members is 592, und 18 were proposed for membership. The meeting was addressed by Mr. Teasdale, of Nenthead and Messrs. Irving and Dent, of Garrigill. The band performed some beautiful pieces of music, and altogether the day was spent in a very agreeable manner. This society has contributed very largely to ameliorate the condition of the working population of this district when under circumstances of sickness. During the last six years the sum of £2,338. 3s. 11d. has been paid to members entitled to the benefits of the club. —*Cor.*

15th July 1859 (Morning Advertiser)
THE DERWENT MINES, on July 1st, a dividend of £5 per share was declared.

19th July 1859 (Cumberland and Westmorland Advertiser, and Penrith Literary Chronicle)
Marriages
At Alston Church, on the 12th inst., by the Rev. W. N. Snowe, vicar, Mr John Ashley Taylor, to Anne, daughter of Mr Joseph Hindle, Preston.

23rd July 1859 (Newcastle Daily Chronicle)
SCHOOL EXCURSION.—Yesterday morning about five o'clock 400 children belonging to the London Lead Company's school at Nenthead left that village in carts for Alston, a distance of about six miles. From Alston they were conveyed by train to Newcastle, and from the latter place to Tynemouth in the same manner. At Tynemouth, after enjoying all manner of games, they were summoned to an excellent tea, provided on the sands, and shortly afterwards started on their homeward journey. They would arrive at Nenthead about twelve o'clock at night, after an absence of about nineteen hours. It was said by the superintendent of the school that not one of the large number of children had ever seen the sea in their lives previous to yesterday, and on first beholding it they were nearly struck speechless with amazement. The whole cost of the journey is defrayed by the company.

30th July 1859 (Newcastle Journal)
SCHOOL TREAT AT ALSTON.—The Roderup Fell Lead Company gave their annual treat of tea to the pupils of Leadgate-in-Alston National School on yesterday week; there were 104 children present on the occasion. The children, the wives of the tenants, and workmen of the company, having partaken of the hospitality, the Rev. S. Y. B. Bradshaw, curate of Alston, affectionately addressed the children, encouraging them to perseverance in regard to education. The Rev. H. B. Bowlby, of Oldbury, near Birmingham, also addressed the youthful auditors at considerable length, pointing out the advantages of a good education. He congratulated them on the privileges they enjoyed in having a good school surrounded with pure air and beautiful scenery, so different from similar schools in large and populous towns. Among the company present were T. W. Crawhall, Esq., Mrs. Crawhall and party from the Raise; Mrs. Salvin and party from Alston House; Mrs. and Miss Fair, Alston; Capt. George Wilson, Nent Hall; and Thomas Wilson, Esq., of Shotley Hall. The company separated highly gratified with the proceedings, which were of a most interesting character.

12th August 1859 (Carlisle Journal)
Deaths
At Alston, on the 5th inst., Mrs Margaret Dodd, aged 71 years.
In 1851, at Town Foot, Alston, Margaret Dodd, widow, innkeeper, aged 62, born Kirkhaugh, daughter, Sarah 26, sister, Elizabeth Boustead, widow, annuitant, aged 54, nephew William Walton, servant, aged 20, lodger, William Hodgson, Maltsman, aged 27, and servant Hannah Davidson 23.
At Middle Park, near Alston, on the 4th inst., Mr David Armstrong, aged 74 years.
In 1851, at Middle Park, Alston, David Armstrong, farmer & carrier, aged 66, his wife Jane 59, daughter, Mary 30, and son Joseph, cartman, aged 28.

13th August 1859 (Carlisle Patriot)
FATAL ACCIDENT IN A QUARRY.—Mr. Carrick held an inquest on the 4th inst., at Nenthead on view of the body of Stephen Stout 38 years of age, a quarryman engaged with Joshua Walton and hit brother John, in quarrying slate for the Nenthead Company, in a quarry called “Flinty Fell.” They had detached a large block which it was necessary to break. Deceased was standing on one end of it, and just as Joshua Walton broke the stone, deceased fell backward to a depth of 10 feet, a piece of the block, weighing about 2 cwt., falling upon him, and killing him.—Verdict, "accidental death.”
In 1841, at West Nenthead, John Stout, lead miner, aged 50, his wife Margaret (Madgen, married at Alston, 25th June 1818) aged 40, children Stephen, lead miner, aged 20, William, lead miner, aged 19, Hannah 17, John, lead miner, aged 14, Margaret 14, Henry 9, and Elizabeth 7.
In 1841, at Clargill, William Walton, farmer, aged 46, his wife Margart (Lee, married at Kirkhaugh, 13th May 1821) aged 46 (born Kirkhaugh, Northumberland), children Henry 19, Elizabeth 17, Thomas 15, John 13, William 11, Isaac 9, Samuel 5, and Ann 2.
In 1851, at Holmes Foot, Nenthead, Stephen Stout, lead miner, aged 29, his wife Elizabeth (Walton, married 1st July 1843, at Alston) 27, sons Walton 3, and John 1 day.

In 1861, at Holmes Foot, Elizabeth Stout, widow, aged 38, children Walter, lead ore dresser, aged 13, John 10, Richard 7, Ann 5, and William 3.

13th August 1859 (Newcastle Daily Chronicle)
Marriage
Middleton in Teesdale, Mr William Shaw, Nenthead to Miss *Elizabeth* Morton of Egglestone.
James Shaw (Surgeon) married Frances Lee 17th August 1825, at St Augustine's, Alston.
Frances Lee Shaw of Nenthead, was buried at St Augustine's, Alston, 30th June 1835, aged 4.
James Shaw of Nenthead, was buried at St Augustine's, Alston, 29th August 1839, aged 36.
In 1841, at Hillersdon Terrace, Nenthead, Frances Shaw, independent, aged 35, children, William, washer of lead ore, aged 14, Joseph 6, Frances 5, and George 2.
In 1851, at Nenthead, Frances Shaw, widow, grocer, aged 46, born Weardale, son William T L, lead smelter, aged 23, daughter Frances E L 15 (married James French, clerk of Newcastle, son of Mr Henry French, of Holly Bush, Allendale, agent to the London Lead Company, 25th July 1864, at St John, Nenthead, Frances died 12th September 1870, aged 25), and son, George F aged 12.
In 1861, at Hillersdon Terrace, Frances Shaw, surgeons widow, aged 57, and daughter Frances E L aged 25.
In 1861, at Overwater, Nenthead, William T L Shaw, smelter, aged 33, born, Alston, and his wife Elizabeth, aged 32, born Egglestone.
Joseph Frederick William Morton Shaw aged 1year 10 months was buried at St John, Nenthead, 10th March 1868.
In 1871, at Hillersdon Terrace, Nenthead, William T L Shaw, lead ore smelter, aged 43, his wife Elizabeth 41, children, John James, 9, Frances E 6, and Mary Jane L 2.
In 1881, at Hillersdon Terrace, Nenthead, William T L Shaw, lead ore smelter, aged 54, his wife Elizabeth 52, children, John J, lead ore labourer, aged 19, Frances E M 17, and Mary J L aged 12.
In 1891, at Hillersdon Terrace, Nenthead, William T L Shaw, lead ore smelter, aged 63, his wife Elizabeth 61, children, John J, lead ore smelter, aged 29, Mary Jane Lee 22, and granddaughter Lily Shaw aged 5.
Mary Jane Shaw was buried at St John, Nenthead, 3rd April 1895, aged 26.
Elizabeth Shaw was buried at St John, Nenthead, 12th October 1894, aged 65.
In 1901, at Easington, Castle Eden, Featherstone English, game keeper, aged 33, his wife Frances aged 36, children, Jane, 9, Laura 6, Thomas 4, Frances 1, niece Lily Shaw 15, and father in law, William Shaw, living on his own means, aged 74
See 14th March 1868, 13th October 1894, & 13th April 1894

23rd August 1859 (Cumberland and Westmorland Advertiser, and Penrith Literary Chronicle)
PRESENT.—A very elegant and valuable tea service has been manufactured and presented to the Trustees of the **Garrigill Wesleyan Chapel**, for anniversary occasions, by Joseph Clementson, Esq.. of Hanley, Staffordshire,

The service consists of 330 cups, 330 saucers, 70 bread plates, 34 teapots. 34 milk jugs, 34 sugar basins, 24 slop basins, and 330 small plates. The whole are manufactured in the best style of workmanship, and are beautifully illuminated.

CALDBECK.—mining speculators in this parish are now receiving ample returns for their spirited investments, and have every prospect of a continuance. The present working mines are in full operation, and yielding copper, lead, and other valuable ores from the earth's produce in abundance. Our well skilled miner, Thomas Muse, has opened a new mine on the property of Richard Harrison, Esq., of a mile above the village, and seems throughout to Tod Crofts, called the High Moors, Tod Crofts,called the High moors, about a quarter of a mile above the village, and seems throughout to have every prospect of becoming a productive mine.

LAMB FAIR.—The annual fair at **Garrigill,** for the sale of lambs, was held on Tuesday, the 16th inst. About a thousand half-breds were in the market, most of which were sold. The fair, however, was very dull, and for a long time very little business was transacted. The farmers, in the end, were obliged to submit to a reduction of prices, and the fair ground was speedily cleared. The highest price obtained for any lot was 18s a head, but the average price was about 14s a head. There was a scarcity of buyers, owing, it is thought, to a want of meat.

2nd September 1859 (Carlisle Journal)

VALUABLE MINING SHARES FOR SALE IN ALSTON MOOR, CUMBERLAND.

TO be SOLD, by AUCTION, in the Town Hall, ALSTON, on Saturday, the 10th day of September, 1859, at Two o'clock in the Afternoon, ELEVEN Thirty- first PARTS or SHARES in the BLAGILL LEAD MINES, with the like Shares of all Minerals, Materials, &c., belonging the same.

The above Mines are held under Lease of the Commissioners of Greenwich Hospital, subject to a Royalty of One- Seventh on all Lead Ores raised, and are among the most productive Mines in Alston Moor, having produced thousands of Bings of Lead Ore. Numerous veins, or lodes, pass through the grant, which is worked by means of levels, all expensive pumping machinery being dispensed with.

There is a plentiful supply of Water available for dressing the Ores raised, and capital Roads pass through the Properly near the entrance to the Mines, which are situate within one and a half miles of the Town of Alston, and offer an opportunity for speculation seldom placed within the reach of capitalists.

Mr. STEPHEN LATHERN, of Newshield, will show the Mines on application, and will furnish all further particulars.

JONATHAN WOODMASS, Auctioneer.

9th September 1859 (Carlisle Journal)

CASE OF STABBING AT NENTHALL, NEAR ALSTON.

On Saturday evening last, about 11 o'clock, whilst Robert Bramwell a lead miner, was sitting in a public-house at the village of Nenthall, near to Alston, along with some other young men, a person called William Harrison a native Alston, but who, for some years past has been living in America came into the house and began to pick a quarrel with Bramwell. Bramwell was induced to

strip his clothes to fight with Harrison. The Latter, having gone into the passage, dared Bramwell to touch him, on which Bramwell laid his hand on Harrison's shoulder, but did not strike him. Harrison immediately drew a knife from his pocket and stabbed Bramwell in five different places — in the eye, in the back, and on other parts of the body. Harrison made his escape, but was apprehended, about three hours after, in his own bed, by Sergeant Teasdale, who bad been sought from Alston. Dr. Gill was immediately sought to attend Bramwell, who is now out of danger. Harrison was brought before the Rev. O. James on Monday last, and remanded until Friday, to enable Bramwell to attend.

A correspondent sends us the following additional particulars; —

"On Saturday night last, about midnight. Information reached Sergeant Teasdale that a man was stabbed in the public house at Nenthall. The officer set off with his assistant. On arriving at the house be found a great quantity of blood in pools on the floor of the passage and the bar, also the walls bespattered. William Harrison, of High Nentsbury, near Alston, who had only 5 weeks returned from America, had entered the house, had a glass of ale, and the young man (Robert Bramwell) whom he shortly afterwards stabbed in 4 or 5 places, treated him to his glass. It appears that Harrison and Bramwell got to arguing and quarrelling and would fight. Harrison stood in the passage and dared Bramwell, saying he would bet Bramwell 500 dollars that he durst not go and touch him nor lay hands upon him. Bramwell went towards Harrison in the passage, the company in the bar not thinking there was any danger of them fighting did not interfere.

Presently there was a rush against the enter door; Mrs. Graham, the landlady, observed the scuffle, and discovering a knife in Harrison's hand, and that he was striking Bramwell with it, gave an alarm, and the company in the bar all rose and made towards the door. A young man named Greenwell who was standing just outside and heard the disturbance forced the door open, and Harrison made his escape by running up the road. The young men who were in the house at the time ran after him towards Nentsbury but could not take him. Harrison left his hat behind all spotted with blood. Sergeant Teasdale and P.C. Coulton, of the Cumberland Constabulary, proceeded to the house of Harrison, between two and three o'clock in the morning, apprehended him in his bedroom, and conveyed him back to Nenthall. T. W. Crawhall, Esq., kindly furnished the officers with a conveyance to bring the prisoner to the lock-up at Alston.

The wounded man is attended by Dr. Gill, who arrived very soon after the occurrence took place, and dressed the wounds—one extensive wound to the left, eye, one upon the left arm, and another upon the left shoulder blade. It appears the knife Harrison used in this butchering affray broke by striking the shoulder blade, part of a knife blade was found on Sunday morning in the passage where the stabbing took place.

Harrison was brought before the Rev. O. James on Monday, when Sergeant Teasdale produced the doctor’s certificate, stilting that Bramwell was not able to appear in consequence of the injuries received. On the request of the officer, Harrison was remanded until Friday, the 9th inst. It is very doubtful whether Bramwell will be able to attend then, the doctor thinks not."

The Carlisle Journal of 24th February 1860 reported that at the Cumberland Spring Assizes, William Harrison aged 28 was found guilty of cutting and

wounding Robert Bramwell, with intent to maim and disfigure, and disable, or to do grievous bodily harm at Alston on the 3rd September.
Harrison was sentenced to 18 months imprisonment, with hard labour.

12th September 1859 (Newcastle Daily Chronicle)
NENTHEAD MECHANICS' INSTITUTION. —The opening of the Mechanics' Institution and Reading Room at Nenthead took place on Friday, when upwards of 400 people sat down to tea provided for the occasion. A public meeting was held in the old school-room belonging to the London Lead Company, at whose expense this neat, commodious, and respectable building has been erected. The meeting was attended by upwards of 500 people, Mr. Robert Bainbridge, of Middleton, ably filling the chair, who in his opening address showed that the London Lead Company's origin, as a speculating company, was attributable to the benevolent heart and principles of a female in Scotland belonging to the Society of Friends 170 years ago. The meeting was afterwards Addressed by Messrs. Atkinson, Moffatt, Price, Proud, U. Bainbridge, and the Rev. Mr. Holmes. The proceedings were enlivened by the stringed band playing well-selected and popular airs. Votes of thanks having been given to all taking an active part in the proceedings of the day, the meeting broke up.

12th September 1859 (London Daily News)
At the Tees Side Mine meeting, held on the 6th inst., the accounts showed a balance of liabilities over assets of £284. A call of 1s per share was made.

16 September 1859 (Carlisle Journal)
OPENING OF THE NEW READING ROOM, NENTHEAD. —Owing to the large increase of members of this institute the room became far too small, and the London Lead Company, in a noble and generous manner has come forward and rebuilt the same at their own expense for the use of their workmen, sparing no cost to make it neat and commodious. Too much praise cannot be given to the London Lead Company who take such a lively interest in the comfort of their workmen, the cultivation of their mental faculties, and the education of their children.
In addition to the new room, they supply the members with coals, candles, and a few periodicals, all free of expense, and also a free circulating library of nearly one thousand volumes for the use of their workmen.
The members number one hundred and twenty, and take into the room two daily and six weekly newspapers and twelve monthly periodicals. They have also a great number of standard works. All the members of this institute, met in this elegant building at three o'clock on Friday, the 9th inst., to await the arrival of R. W. Bainbridge, Esq., the head superintendent of the company, who was received with enthusiastic cheering on his entrance. He proceeded to open the room by a formal address, which was responded to by one of the members. They then adjourned to the large school-room, where, an excellent tea was served up in a first-rate style by the most respectable ladies of the locality, for the members and their friends, when nearly 500 partook of the social cup. After tea a public meeting was held in the large school-room, which, notwithstanding the wet and boisterous weather, was crowded to excess.

The chair was occupied by R. W. Bainbridge, Esq., who presided over the meeting in an able and efficient manner, and eloquent and appropriate addresses were delivered by Utrick Bainbridge, Esq., the Rev. T. Holme, Messrs. Price, Moffatt, Proud, and Teasdale. During tea and at intervals between each address, a choice selection of popular airs was played by the Nenthead Amateur Band, under the leadership of Mr. Joseph Raisbeck, the celebrated violin player, in such a style as called forth the admiration of all present. After the usual compliment of thanks voted for the different services rendered, the company dispersed, highly delighted to see that reciprocity of feeling which was manifested between masters and workmen.

23rd September 1859 (Newcastle Courant)
Marriages
At Launceston, Tasmania, 2nd June, William Clayton Esq., of Wickford, North Plains, to Alice, youngest daughter of the late Henry Kenyon Esq., of the City of London, and of Alston, Cumberland.
See 25th December 1863.
The Mercury (Hobart) on 22nd July 1861, reported the death on June 18, at Launceston, Henry Kenyon, infant son of Henry Clayton Esq., Wickford, aged 4½ months.
The Argus (Melbourne) 24th November 1876, reported the marriage on the 9th November of Henry Kenyon, of Launceston, son of the late Henry Kenyon Esq., of the Park Alston, Cumberland to Clementina second daughter of James Scott, Esq., J.P., M.L.A., of Bowhill, near Launceston, Tasmania.

11th October 1859 (Newcastle Daily Chronicle)

METALLIFEROUS CHARACTER OF WEARDALE.

(From the Mining Journal)
It would be most difficult, if not impossible, to name any locality in the British Isles where such a well-defined aeries of rich lead and silver bearing lodes are to be found as those which intersect the hill and dale country bordering the upper parts of the River Wear. After descending from the well-known metalliferous region of Alston Moor, it meanders for several miles through a picturesque vale, which, with its immediate vicinage, has long been distinguished for the singular productiveness of its several silver-lead mines. This favoured tract of country may, however, for the most part be said to forbidden ground to public enterprise. For upwards of half a century the Beaumont family have almost alone been privileged to explore and work its minerals; and though very partially, inefficiently, and, for the most part, inextensively, enormous has been the amount of treasure, in silver-lead ore especially, which they have thus developed during that period. The royalties commanding the grand group of metalliferous veins particularly adverted to, extending over a vast area, belong almost exclusively to Mr. Beaumont.
The main lodes have, for the most part, a nearly east and west direction, running parallel and generally in pretty close proximity to each other; numerous strings and collateral veins, commonly termed leaders, frequently group about them, or branch lengthily out therefrom at oblique, or right-angles, many of them, like the parent lodes being rich in metal. Most of the champion lodes especially, more or less, may be partially seen on the brows of hills, or in

the deep intervening gullies or ravines. But eminently conspicuous beyond all others may here and there be observed, in its wondrous course, the great trunk lode of Weardale, commonly known as the Great Slitt Vein. Its huge back sometimes presents broad streaks of white spar, traversing the more elevated regions, and forming a striking object in the distant landscape. Such is signally its appearance at Bolihope Fell, where it yielded a large quantity of lead ore close to grass, and where its glittering spars and many-coloured vein matrix afford in striking confusion a grand lineal display of its singular magnitude, and of the rare beauty and uniformity of its characteristics.

It can, in fact, by these kind of natural manifestations alone be traced along its line of bearing for a distance of 18 or 20 miles, as it courses through this often deeply undulating country. The circumstance, however, which especially imports to this mineral lode its pre-eminence and intrinsic value, is the remarkable uniformity and strength of its ore-bearing qualities; far exceeding, it is affirmed by competent judges, in this respect any lead vein ever opened in the North of England. The mines, indeed, now in operation upon it afford the most striking illustrations of its singular productiveness. Considering the very great extent of the metalliferous tract under consideration which belongs to Mr. Beaumont, his mines may, comparatively speaking, be truly said to be “few and far between;" nevertheless they yearly yield him upwards or 10,000 tons of the best manufactured lead, with a large amount of silver; of the latter, the lead ore of the Great Slitt Vein yields on an average about 10 ozs, per ton.

The Great Slitt Vein maintains a pretty uniform width of from 20 to 30 feet, and though it not uncommonly yields considerable quantities of ore near the surface, it has almost invariably been found to Increase in productiveness as additional depth is obtained. In Weardale, where it has been wrought down to a depth of 160 yards from the surface, and though a very varied series of strata, it has proved in descent almost uniformly productive, but richest in depth. The knowledge of this now well-ascertained character of the lode has lately induced Sir. Beaumont to commence driving an adit level three miles long, from a point in the river Wear, to intersect the Slitt vein at a considerably greater depth than the above. At the Slitt Mine, 200 yards from the surface, the vein is 16 feel wide and upwards, and yields from 15 to 20 tons of lead ore per fathom, rich in silver.

On the Sunny Side royalty also, a property of about 300 acres, which the Great Slitt Vein traverses for half a mile through its midst, an adit level has been constantly driving for the last three years, for the purpose of winning and unwatering this celebrated vein at a depth of some 120 or 130 yards; and it is calculated that the men will reach the grand object of their long and persevering labours about the commencement of the next year. The leading characteristics of the Great Slitt Vein are here also strikingly developed; and where it was extensively wrought, many years ago, in on adjoining property, it was found to be 30 feet wide in depth, filled throughout with an orey matrix, in the middle of which was a rib of pure ore three feet thick.

In the immediate vicinity of Sunny Side a number of remarkably productive mines are in operation, at the head, perhaps, of which stands the recently discovered but extraordinarily rich mine, aptly enough termed California, and where the vein for a considerable depth is 40 ft. wide, and said to be so uniformly rich throughout its whole thickness that every inch of the lode is

mined and crushed: a very small complement of men are already raising several thousand bings of ore per annum.
The great Sunny Side adit level has, in its course towards the Slitt Vein, already cut three veins or lodes—Whiteheaps White Vein, Smith's Vein, and Wooler's Vein, besides leaders or strings, all more or less containing orey matrix common to the metalliferous lodes of this neighbourhood. The Sun vein is expected to be intersected by the level some time before it reaches the Great Slitt vein; it was very profitably worked for upwards of 50 years in an adjacent mine. The Whiteheaps White vein was intersected near the entrance of the present long level, and even at this shallow depth it contained massive deposits of the brown hematite (quick, with strings of lead ore), so commonly met with on the backs of the great productive lead lodes of this and the Alston Moor district, especially where they intersect the great limestone. From several such mines, as Side Bend, Slitt Pasture, and the Heights Mine, very large quantities of the brown hematite (somewhat tantamount it would seem to Devon and Cornish gossans) are sent by rail to Darlington and other smelting works.
The Whiteheaps white vein presents, as intimated, at Sunny Side, the most promising indications of important deposits of lead ore in depth, particularly on reaching the 12 fm. limestone. At the Derwent Mines, north-west of Sunny Side, this master lode has been worked to a great extent and depth, and for the last half century has produced large quantities of lead ore, and still proves very profitable; it here averaged 16 oz. of silver to the ton.
The Weardale lodes, as they descend through the great series of coal, limestone, and Whin, sills (which mainly constitute the geological features of that part of the country), are not unfrequently ore-bearing throughout; but the Fell Top limestone, Great limestone, and Whin, are considered the best bearing sills of nearly the whole series. In short, the richness of the mines of this northern region are said to exceed considerably those of any other given district in the kingdom, and which will be rendered sufficiently apparent when it is stated that in some of the late official returns it was shown that the produce of the Weardale, Stanhope Burn, Harehope Gill, Bolihope, Allendale, and Derwent Mines, was as fellows; —Estimating the value of the lead ore at £15 per ton, and the silver at 5s. per oz.—In 1853,13,618 tons 10 cwts. of lead ore, and 67,300 ozs. of silver = £221,097; and in I854, 13,481 tons 7cwts. lead ore, and 64,000 ozs. of silver = £218,220. A respectable enough contribution (from so comparatively circumscribed an area) to the yearly annals of that prodigious sum total of mineral wealth, which mainly constitutes the stability, glory, and pre-eminence of our own “tight little Island."

21st October 1859 (Carlisle Journal)
ALSTON CATTLE SHOW. This annual show, almost the last of the season, was held Saturday last, in field near the railway station. The weather was remarkably favourable, a fine October day lent an additional charm to the picturesque scenery which surrounds the show ground, and although the sun was much obscured, it occasionally burst forth and lighted up the brilliant tints of the fast falling foliage in all their autumnal richness and variety. An excellent brass band, the Nenthead Union, played during the day in capital style, and the presence of gaily-dressed fresh-looking girls gave additional gaiety to the scene. The show of stock was altogether a very successful one, and especially

good in the department of Galloway cattle. The prize bull in this class was a very fine animal, and it is somewhat remarkable that he carried away the prize in spite of the presence of his father, who came off second best. For Herdwick sheep, of course the high-lying district in the limits of the society is particularly favourable, and those entered in this class were excellent specimens of the hardy breed. Some good horses and ponies were entered, and although the shorthorns were inferior to those ordinarily shown at the exhibitions held in the more fertile parts the county, there were evident signs of an improvement in this class. The Rev. Octavius James introduced a new feature into the show by giving prizes consisting of a copper kettle, copper sauce-pan, tea tray, tea caddy, and woollen petticoat, for the best butter, cheese, and home-spun yarn. This competition was regarded with great interest, and it would be no easy task for the judges to decide the best pound of butter among the 46 submitted to their inspection and taste. …

25th October 1859 (Cumberland and Westmorland Advertiser, and Penrith Literary Chronicle)

WESLEYAN METHODISM IN THE ALSTON CIRCUIT,

GARRIGILL is a pretty village in the circuit. There are in the neighbourhood about 1500 persons. Here we have a good society, and a large and congregation. A few months ago, the persons accustomed to assemble in the old chapel had to say "the place is too straight for us," and they said to the Trustees, very earnestly, "make room that we may dwell." The Trustees were willing; that a new chapel was needed became the unanimous opinion. After much thought and prayer, the matter was agreed upon. The old building was pulled down to the ground, and many felt deeply, because they had been "born there." Now, however, we have in its stead a neat, substantial, well-finished, and beautiful building, The interior is according to the model style of a Methodist Chapel, and externally it has a noble appearance. It will accommodate nearly 500 persons, comfortably seated. Great praise is due to architect and contractor, Mr. Macadam, of Alston, and all concerned. The cost, with all extras, is £500. Besides this, a great deal of labour was given. It was opened for Divine Service on Friday, by the Rev. L. H. Wiseman, of York, who preached two sermons. The services were continued on the Sabbath by the Rev. R. Cooke, of Shildon. The Divine presence was manifested at each service. The financial proceeds are---Friday's collections £33 5s: from the tea meeting, on Friday, when upwards of 1000 took tea, and the sale of articles given, £70. Sunday collections £36 15s. Total £140. The subscription list, &c., with this amount, makes a total sum in hand of £549. Nothing of the kind was expected. Our chapel clear, to God be all the praise. In this work all have done well; but one case ought to be mentioned, Mr Joseph Clementson, a gentleman now residing in Staffordshire, left Garrigill—his native village—-more than fifty years ago, when a boy. He has come to the opening services, contributed very largely in cash, and has presented to the Trustees, for the use of tea meetings, a sufficient number of cups, &c., &c., to accommodate 350 persons; also 24 beautiful collecting plates and a very beautiful baptismal font; the design was made on purpose, and is very chaste. With all these facts before us, at a meeting of a social character, on the 17th we sang with truly grateful hearts, "Praise God from whom all blessings flow."

3rd December 1859 (Newcastle Guardian and Tyne Mercury)
Deaths
At Nenthead, near Alston, 29th ult., aged 81, Mrs Isabella Brown, daughter of the late Mr Thomas Dodd, formerly agent at the above place.

GRANDSON,
WHO DIED 16TH NOVEMBER 1857
AGED 5 YEARS

6th December 1859 (Carlisle Journal)
PRESENTATION AT ALSTON.—Mr. J. C. Cain, of Alston, having been appointed surveyor of the W. B. Lead Mines, in Northumberland and Durham, the workmen of the several lead mines in Alston Moor, of which he was manager, have presented him on leaving Alston with a very handsome timepiece and moderator lamp, and, Mrs. Cain with a neat gold watch guard, as a token of respect. The following inscription is upon the timepiece: — "Presented to Mr. Joseph Cowper Cain, by the workmen of the several mines of which he was manager, to record the respect entertained for him on leaving Alston Moor, November, 1859.'' Mr. Dickinson, solicitor, was waited upon by a deputation of workmen and solicited to assist them, to which he very kindly consented, and having purchased the articles of Messrs. Reed and Sons, of Newcastle, he presented them on behalf of the workmen, who met on Friday evening, November 25th, in the Assembly Room, Crown Inn, Alston. In a very appropriate speech he pointed out the duties of manager of lead mines, with an acknowledgement that Mr. Cain had performed them in a most satisfactory manner. It must be most gratifying to Mr. Cain, on leaving Alston, to receive such a compliment from those with whom he has laboured so long, and expressed by one of the leading gentlemen in this part of the country, and one also who has the working man's interest at heart. — *Cor.*

10th December 1859 (Newcastle Daily Chronicle)

THE WEATHER IN WEARDALE. —The weather has been very severe in the neighbourhood of Middleton the last few days; frequent showers of snow have fallen, accompanied by a strong wind, blowing from the N.W. About fourteen miles to the west the road leading to Alston is completely "blocked up," and altogether impassable to wheeled conveyances. It was with great difficulty that a gentleman travelling between Nenthead and Middleton- in-Teesdale, on Wednesday last, got his horse over Yad Moss—the summit of the fell that divides the two counties of Cumberland and Durham, and where the snow appears to be deepest.

23rd December 1859 (Royal Cornwall Gazette)

At Tees Side Mine meeting, on Dec. 6, the accounts showed a debit balance, £168 4s. 8d. The excess of liabilities over assets was £364 7s. A call of 4s. 6d. per share was made.

23rd December 1859 (Carlisle Journal)

ALSTON MOUNTAINEER RIFLE CORPS.

We are glad to learn that the volunteer movement in the picturesque town and neighbourhood of Alston has been attended with considerable success. Since the large and influential meeting held in the Town Hall on the 2nd inst., other meetings have been held in the surrounding villages, which were respectably and well attended; viz., at Nenthead, Nenthall, Garrigill, and other places, under the able presidency of George Wilson, Esq., Nicholas Armstrong, Esq., and other gentlemen. Explanatory addresses were delivered in furtherance of the movement by Messrs. J. Dickinson, J. Friend. T. W. Crawhall, and others from the general committee. The Corps now numbers from 70 to 80 honorary and effective members. A meeting of the Committee was held in the Town Hall, on Friday, the 16th inst., Thos. Wilson, Esq., of Shotley Hall, chairman, when several additional names were entered as members, and there is little fear but that two companies will shortly be formed, which we doubt not will do honour to the name of Mountaineer Riflemen.

24th December 1859 (Carlisle Patriot)

Marriages

At Alston Church, on the 22nd inst., by the Rev. S. Bradshaw, Mr Thomas Hodgson, stonemason, to Miss Frances Borrow, both of Alston.

See 18th June 1892

On the 6th inst., at Kingsland, near London, aged 66, Bartholomew O'Connor, late secretary of the Derwent Mines Company, son of the late James O'Connor, of Madrid.

24 February 1860 (Carlisle Journal)
CUTTING AND WOUNDING AT ALSTON.
WILLIAM HARRISON (aged 28, reads), labourer, was charged with cutting and wounding Robert Bramwell, with intent to maim, disfigure, and disable, or to do grievous bodily harm, at Alston, on the 3rd September last.
Mr. PRICE and Mr. BRUCE appeared for the prosecution, and Mr. MC.OUBREY for the prisoner.
Mr. PRICE shortly stated the case, and called the prosecutor, who stated that he was in Jane Graham's public bouse, at Nenthall, on the 3rd September last, about 7 o'clock at night; the prisoner afterwards came in, and went to the opposite side of the room, and had a glass of ale. He (witness) went across

the room, and offered him a drink out of his glass. The prisoner talked about fighting the prosecutor, who said he would fight him if he laid down his knife. The prosecutor laid out his own knife on the table, and asked the prisoner to lay his down beside it, and he would fight him fair. The prisoner refused to do this, and went out; the prosecutor went out and followed him into the passage, when the prisoner told him that be would give him 500 dollars if he (the prosecutor) touched him. The prosecutor then touched him on the breast, but the prisoner said that was nothing, and again offered him 500 dollars if he would touch his coat. The prosecutor then put his hand on his shoulder, and the next thing the prosecutor felt was something sharp in his shoulder. There were several men sitting in the house, but none of them interfered. Mrs. Graham was standing in the passage, and was the only one who saw the offence committed. The prisoner afterwards stabbed him in the eye, and in the back; be had since been weaker in his sight from the effects of it. In reply to Mr. MC.OUBREY, the prosecutor said that the prisoner had been in America about five years, and that he had known him I before that time. He (prosecutor) stripped to fight but the prisoner did not.

Gilbert Graham said his mother keeps a public house at Nenthall, and that he saw the prisoner and prosecutor there on the 3rd of September last. He spoke to the quarrel in the house and to the prisoner going into the passage, as spoken to by the prosecutor. He saw the prosecutor after he was brought into the house, and saw him bleeding. Mrs. Graham was in the passage at the time, and saw something in the prisoner's hand "glinted" like a knife, but she could not speak positively. They soon afterwards fell together in the passage, and she called out that Harrison had a knife, when some of the people n the house ran out and carried ; Bramwell into the house. A doctor and policeman were afterwards sent for.

Dr. Gill spoke to the nature of the wounds, and said be attended Bramwell for ten days, till be thought he was out of danger.

The policeman stated that he took the prisoner into custody, when he said he did it to save his own life.

Mr. MC.OUBREY, in defence, did not deny the charge but urged the provocation in extenuation.

The Judge having read over the evidence and summed up, the jury retired, and afterwards returned with a verdict of Guilty. Sentence: *18 months' imprisonment, with hard labour.*

25th February 1860 (Carlisle Patriot)

Marriages

At Alston Church, on the 23rd inst., by the Rev. S. Y. B. Bradshaw, curate, Mr Joseph Pattinson, to Mary, daughter of Mr Jos. Walton, relieving officer, both of Alston.

Elizabeth Broadwood, died 2nd qtr., 1879, aged about 65, registered at Alston.

2nd March 1860 (Durham Chronicle)

PRESENTATION AT ST. JOHN'S CHAPEL, WEARDALE.

On, its becoming known that J Roddam, Esq., (mining agent to W B. Beaumont, Esq., M.P.), the staunch reformer and friend of the people, had to leave the hills and dales of his native place, the working men and tradesmen vied with each other to do him honour, and speedily they raised the noble sum of £110, which it was agreed should be spent in procuring a substantial token of regard. A splendid copy of the Scriptures, without note or comment of the value of £10, and a silver tea service and salver, of the value of £100 were purchased. As no room large could be found in the place to contain Mr Roddam's "troops of friends" the committee erected a platform by the Market Cross. Wednesday the 24th ult. was the day selected for the presentation to take piece. The weather was unusually clear and bracing, though exceedingly cold. At the hour appointed for the proceedings to commence 1,500 persons were assembled.

Mr Thomas Vickers commenced the proceedings by saying that when Mr Roddam left that place he would do so with that which was far more precious than the gifts they were about to present him with as a token of their regard, and that was the affection, the esteem, and gratitude of the inhabitants living in these dales (cheers).

Mr John Kellett, Sen., Ireshope Burn, then stood forward and said: —Ladies and Gentlemen, I come forward to perform a duty pressed upon me by my fellow workmen—a duty which is very pleasant to myself, as I am sure nothing can be more agreeable than to see masters and workmen professing the affection and esteem of each other. This has been the case between our late employer and ourselves and I presume that all will be satisfied when they see, that our mutual goodwill is none the less at our parting. I believe that we have been treated by him with the greatest respect, civility, and humanity and that under him we have had general employment. And when a man was borne down by pressure of age or accident Mr Roddam was, invariably, as soon as convenient, provided provided, a suitable place for him. Also when the head

of a family has been removed by death, and distress overwhelmed the widow and the fatherless, he has found them out, and caused the widow's heart to rejoice by on replenishing both purse and cupboard. Mr Roddam, in the name of the miners of Weardale, I beg to present to you this testimonial of their respect, and we ask you to accept this plate and Holy Bible, so that whenever you look upon them, you may have a lively remembrance of your old work-people, and be happy and prosperous in all your future life. The Bible is the best of books, and it is the source of England's greatness. May it's teaching be your chart through life, and your consolation in the hour of death, after which may it be handed down to your children as an heirloom (applause).

The Bible and salver contained the following inscription: — Presented by the miners of Weardale and other friends to Jonathan Roddam, Esq, as a token of respect on his resignation of the office of mining agent to W. B. Beaumont, Esquire.

Mr Roddam on rising was loudly cheered. He said: Ladies and gentlemen, I do certainly appear before you not in a condition to speak; (being very hoarse) but I assure you in accepting this munificent present, I feel this to be one of the brightest days in my life and one I never expected to see. Having spent so many years amongst you, and having so frequently met with your approval of my transactions, there cannot be a greater satisfaction to a human being than to see such a concourse of people assembled for such a purpose as this.

The feeling of respect displayed by you I fully appreciate, and heartily thank you for, I hope the prosperity or the dale will continue. You have an honest master, and I know his wish and desire is that you may be comfortable. (loud applause) I hope the same good feeling may continue between yourselves and those who may remain as agents (hear, hear) I never met with a body of workmen who equalled the men of Weardale for intelligence and steady attention to their duties. You have confidence in me; I always had in you: and that, in ray opinion is the true secret. "We had faith on another" (applause) Having always in the first place studied the interests of my employers in a proper way, in the next I cared for the working bees, and saw they had a fair share of the honey which they assisted to produce. In all my dealings I have acted upon principle, and endeavoured to carry out every possible improvement, and with a thorough intention of advancing your interests and welfare (hear, hear). In accepting this gift I certainly feel unnerved a little, and would like to say more than I can. I receive it with the greatest satisfaction: and if my family continue, it shall be handed down to my children and to their children, and I doubt not they will look upon it with pride, and cherish it as I will. I may not leave you altogether, but as often as we do meet, I hope our friendship will increase. I trust this bible will be my stay and guide through life.

Mr Roddam concluded amidst the hearty and oft-reiterated cheers of the people.

The Weardale Harmonic band, leader Mr Thomas Pearson, struck up "Ever of Thee," and played a variety of pieces, in the Market-place, in a very creditable style.

10th March 1860 (Westmorland Gazette)

ALSTON PETTY SESSIONS.

March 2nd. (Before Thos. Wilson and H. W. Friend, Esqrs., and the Rev. Octavius James).

Joseph Cousin, farmer, Green Ends, was charged by Hannah Varty, a servant in husbandry, with discharging her from his service, and refusing to pay her wages. She said that on Thursday, February 23rd, he ordered her away from his house, he tossed a bason of broth at her, and two quarts of water, and then took her by the neck to put her out, and told her to go away as he wanted nothing more with her.— In defence defendant denied the charge altogether, and said that complainant left his service on her own accord.—Ordered to pay her wages up to the time she had served, amounting £1 2s. 6d., and 9s. 6d. costs.

John Hetherington, carter, Garrigill, appeared to summons to answer a complaint made police-constable Coulton, charging him with being at an improper distance from his horse and cart on the Alston and Garrigill turnpike road, on the 21st ult. Complainant had cautioned him on two previous occasions. He pleaded guilty, and was fined 2s. 6d., and 10s. 6d. costs.

Hugh Walton, blacksmith, Alston, appeared fo summons, charging him with being drunk and disorderly in the Parish Church of Alston, on Sunday, the 26th of February, to the great annoyance of the congregation. Defendant pleaded guilty to the charge, also to having been previously convicted for a similar offence. He was fined 5s. and 11s. costs. He was reprimanded by the Bench, and told that if was brought before them again for a similar offence to the two which he had pleaded guilty to, he would be more severely dealt with and that he might thank the Rev. W. N. Snowe for not having pressed the case this time. Defendant left the court, saying that he would go and thank Mr. Snowe for his kindness in dealing so leniently with him.

16th March 1860 (Carlisle Journal)

Deaths

At Alston, on the 10th inst., Mr. Thomas Coulson, aged 71 years.

In 1841, at Middle Skelgill, Alston, Thomas Coulson, lead miner, aged 50, his wife Ann (Liddle, married 8th May 1811, Allendale) aged 50, and daughter Mary 15. In 1841 their daughter Jane aged 20 was working as a servant for Joseph Ramsey, grocer, and family at the Potato market, Alston.

In 1851, at Allendale Town, John Clarke, landed proprietor and road surveyor, aged 50, his wife Sally 45, son William S 13, and niece Ruth Swindale 11.

7th June 1860 (Shields Daily Gazette)
Patents.. Mr E. Borlase, of Allenheads, near Haydon Bridge, has applied for one for separating metals and metallic ores in a very ingenious way.

2nd June 1858 (The London Gazette)
1858, Feb. 24, No. 360. Letters patent to Edward Borlase of St. Just near Penzance,in the county of Cornwall, mining engineer, for "Improved apparatus for separating metals and metallic ores from other mineral substances."

25th November 1859 (The London Gazette)
1859, Nov. 15, No. 2586. Letters patent to Edward Borlase of Allenheads, Haydon Bridge, Northumberland, for "Improved apparatus for separating metals and metallic ores when mingled with other substances in the state of slime. Lond. 1860, fol. pp. 5,10d.

21st September 1860 (Royal Cornwall Gazette)
ROYAL CORNWALL POLYTECHNIC SOCIETY
The Society's Annual Exhibition was opened at the Polytechnic Hall, Falmouth, on Wednesday, the 10th instant and comprised in its various departments numerous objects of interest. … Near the Society's large Ornamental Fountain in the centre of the Hall was exhibited a large, working model of a Machine, invented by Mr. Edward Borlase, of St. Just in Penwith, for separating metals and metallic ores. In this machine water and stamped ore are conveyed by means of a launder into a circular vessel called a distributor, whence it passes through pipes or shoots into a large circular vessel, to which a rotatory motion is imparted by steam or water power, with such force and rapidity as to keep the mixture in solution till, by a second action of a rocking or jerking kind, the lighter rubbish is washed over a metal ring and is carried away; while the ore sinks and is preserved on the bottom of the rotating circular flat. The ring which guards the ore from being washed away with the rubbish may, by means of machinery, be raised or lowered according to the quality of the ore to be operated on. …

24th January 1862 (West Briton and Cornwall Advertiser)
To Mine Agents and Proprietors.
Great Saving in Dressing Tin and other Ores.
BORLASE'S PATENT BUDDLING MACHINE.
THE Patentee deems it unnecessary to publish a full list of its superiority; therefore, he only says that in the agents, report of Wheal Margaret Mine, they state it supersedes the former way in buddling by 50 per cent.
The Patentee does not wish to exaggerate it; but would recommend all patties connected with mining to go and see them working daily at

Providence and Wheal Margaret Mines (Uny Lelant), or at Carn Galver Mine (Zennor), Cornwall, on application to the agents thereon.
The patentee has agreed for several more, at different mines, which are in course of erection. He has sold the patent licenses to S. Higgs, Esq., for Providence Mine; also John Coulson, Esq., for Carn Galver Mine; and for further licenses, &c., (which he will be thankful for) apply to the patentee, Mr. E. BORLASE, East End, Redruth, Cornwall.

31st January 1873 (The London Gazette)
Patent Law Amendment Act, 1852. Office of the Commissioners of Patents for Inventions
269. NOTICE is hereby given, that the petition of Edward Borlase, of Redruth, in the county of Cornwall, Mining Engineer, praying for letters patent for the invention of " improvements in the construction of apparatus for separating metals and metallic ores from other substances," was deposited and recorded in the Office of the Commissioners, on the 23rd day of January, 1873.
and a complete specification accompanying such petition was at the same time filed in the said office.

Edward Borlase born at St Austell, Cornwall, 20th March 1820, son of John Borlase and Mary Ann Hart, who were married 3rd August 1816, at St Austell.. Edward was educated at Summercourt, St. Enoder, Cornwall.
1840 to 1849 he worked as a machinist at Delabole Slate Quarries, (St. Teath Parish, North Cornwall); 1853 to 1857, Engineer of Bristol Copper Mines, Connecticut, USA; 1858 to 1860, Machinist at Allenheads lead mines; then until 1879, engaged in introducing new uses and methods of dealing with waste of Cornish mines. Source: Bibliotheca cornubiensis. A catalogue of the writings, both manuscript and printed, of Cornishmen, and of works relating to the county of Cornwall.

In 1861, at Uny Lelant, Cornwall, John Vouren, tin mine agent, aged 51,his wife Elizabeth 68, daughter C Jane 27, and boarder Edward Borlase, unmarried, mining engineer, aged 40.
In 1871, at Redruth, Cornwall, Jane James, widow, annuitant, aged 40, son Peter Henry aged 5, and boarder, Edward Borlase, unmarried, mining engineer, aged 48.
In 1881, at 15 Basset Street, Redruth, Cornwall, Edward Rowse, carpenter, aged 47, his wife Catherine 50, children, Mary Elizth. 19, Catherine, dressmaker, aged 18, Janie Borlase, shop girl, aged 17, and boarder, Edward Borlase, mine engineer, aged 60.

23rd April 1891 (The Cornish Telegraph)
The many friends of Mr. Edward Borlase, of tin budde fame throughout the mining districts, will be sorry to hear of his decease, which took place on Sunday at the residence of one his friends in the parish of St. Kew.

7th May 1891 (Cornishman)
EDWARD BORLASE.
Brief mention has been made the newspapers of the sudden illness, death, and burial of Mr Edward Borlase, well known at, Redruth where he resided many years; at St. Just, in some of whose mines he had a

stake and where he liked to stay for weeks together, for in that place many of his early years were passed; and in mining circles throughout the county. 'Borlase's buddles' were known in all parts of Cornwall, indeed in all parts of the world to which Cornishmen go to introduce or manage mining, and Mr Borlase himself was liked by all those who knew him. For he had moved about a good deal. Home and foreign travel, with shrewd observation and the love of a bit of fun and a joke, made his society (which he never cared to thrust on any one) very agreeable. Of the working classes, he did not assume the least superiority on account of his buddle invention and the money it brought him. His knowledge of county interests was widespread and he constantly pondered what might be done to develop and aid them. But, naturally, his attention was more particularly given to all that related to the treatment of ore after it left the shaft's mouth: and he did not abandon it even after it had become ugly and cumbersome slime.

Edward Borlase was the son of Mr John Borlase, a St Austell man who migrated to St Just and died there. His mother was Mary, daughter of Mr Richard Hart, also a St Austell woman, and, like her husband, ending her days at St Just. Their son was born at St Austell March 20th, 1820, and was educated at Summercourt. For 10 years, from 1840 to 1849, he was machinist to the Delabole slate quarries. From 1853 to 1857 he was engineer of the Bristol copper-mines, Connecticut, U.S.A. Then Mr Borlase returned to England and became machinist at the Allenheads lead-mines in Northumberland. It was during these years that his thought and experiments were given improvements in the mode of dressing tin, particularly to the quicker, more thorough, and less expensive method of separating ore from its containing or accompanying waste.

In the beginning of 1858, while resident at St Just, letters patent were granted him for his buddies, described as 'improved apparatus for separating metals and metallic ores from other mineral substances.' While at Haydon-Bridge, Northumberland, a second set of letters patent were granted him (Nov. 15, 1859) for buddles, referred to as 'improved apparatus for separating metals and metallic ores when mingled with other substances in the state of slime.' Again, while resident at Redruth in 1873 Mr Borlase patented other improvements in the same direction.

For some time previous to 1876 Mr Borlase had given much thought to the development of a trade connected with the clays and waste mine-substances of Cornwall. At this he worked for several years with steady perseverance. He had means and was not, therefore, impelled to company-forming or to zealously push to economic results his wishes and experiments. He went, however, to considerable expense and spent much time on experiments designed to form the ejected and useless rubbish or the bal into tasteful shapes and change the useless into the useful—the powder or the clay, trampled underfoot as an annoyance and an encumbrance, into the ornament for mantelshelf or bracket. The Polytechnic Society's Reports for 1876 shew that the judges in the mechanical department, headed by the late Capt. Thomas Richards, F.G.S., considered Borlase entitled to a special

premium for his efforts to introduce new industry the utilization of Cornish terra-cotta and other clays. It should be remembered, however, and mentioned now, in common fairness, that the Rev C. M. Edward Collins, of Trewardale, had for many years 'pegged away' at the same subject. In 1868, he advocated the establishment of pottery and porcelain works in Cornwall, particularly at Fowey. And, the year before Mr Borlase exhibited his specimens, Mr Collins, with a force which was most earnest, endeavoured to impress the Cornish mind that Cornwall might made the rival of Watcombe for terra-cotta and of Bristol and Bow, Worcester and Dresden, or even of Devres and Capo di Monte, for ceramic products.

With the view of encouraging the modeller's art Mr Collins offered £3 3s towards a prize for a group of the harvest-subject 'Crying the neck'. 'Why' said Mr Collins, should not every cottage in the land be supplied with such pure and innocent source of pleasure as the reproduction of Wedgwood by a Cornish art-pottery, whence should issue their own native material and from the hands and designs of their own native artists—works calculated to dispense happiness to millions of the sons of toil. By the adoption, too, of local subjects, the strong love of Cornishmen for their native county might be interested and stimulated.' Devonshire's rich clay, given to the manufacture of coarse ware time immemorial, has got the start Cornish clays or finely-powdered granite and elven. Though Cornwall richly yields the china-clay and stone from which the most delicate 'china' may be made, other places have the manufactories, the artisans, and the artists. Watcombe worked while Cornishmen, with few exceptions, talked. And so, the thought and labours of Messrs Collins and Borlase have not yet borne much fruit. Both, however, have sown seed which may one day spring-up. And whenever future reference made to the history of this branch of Cornwall's industries, whether it they dormant or active, the efforts made for it by Messrs Borlase and Collins will not be forgotten.

Probate

2nd June 1891. Administration (with the Will) of the Personal Estate of Edward Borlase formerly of the Town of Redruth, late of St. Kew both in the County of Cornwall Bachelor who died 19 April 1891 at St Kew was granted at Bodmin to Jane Roberts of St just in Penwith in the said County Widow the sister and one of the next of kin. Personal Estate £516 5s.

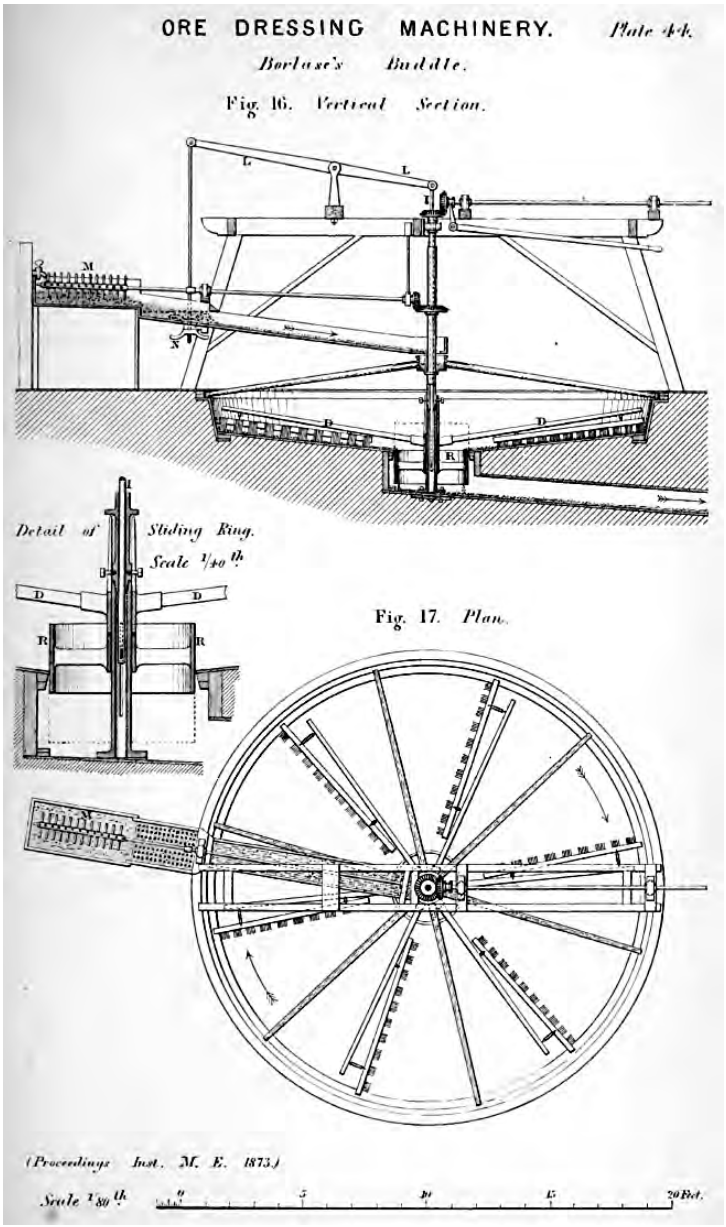
INSTITUTION OF MECHANICAL ENGINEERS PROCEEDINGS. 1873.

ON THE MECHANICAL APPLIANCES USED FOR DRESSING TIN AND COPPER ORES IN CORNWALL.

By Mr. HENRY T. FERGUSON, of Truro. Page 125.

…In Figs. 16 and 17, Plate 44, is shown an improved construction of Concave Buddle by Mr. Edward Borlase, now in extensive use at several mines, which has a mechanical arrangement for adjusting the level of the central outflow, by raising a ring R that slides upon the centre vertical shaft, as shown in the detail view to a larger scale. By this means the height of the outflow is adjusted more gradually and uniformly than by the plugged holes in the ordinary buddies, and there is less liability to waste by guttering. The sliding ring R is raised by hand by the rod I and lever L provided with the double adjusting nuts N; and the arms of the sweeps D

being supported upon the rising ring are kept constantly at the proper height by the same adjustment. A mechanical agitator M at the head of the feeding launder stirs up the stuff before entering the buddle. …



22nd June 1860 (Carlisle Journal)

FATAL ACCIDENT

An inquest was held before Mr G. L. Carrick, deputy coroner, at Craig Green in the parish of Alston, on Wednesday, the 21st inst., on the body of Matthew Davidson, lead ore miner, aged 33 years, who was killed in Craig Green Mine, by the fall of stone from the roof. Two other men, his fellow workmen, had a very narrow escape from the same fate. Verdict, "Accidentally killed."

Matthew Davidson, baptised, 30th May 1827, (Wesleyan) son of Jonathan Davidson and Sarah Cowing who were married at Alston 2nd June 1811.
Jonathan Davidson was buried at Garrigill 11th February 1840, aged 49.
Matthew Davidson of Nether Craig, aged 33, was buried at Garrigill 21st June 1860.

In 1841, at Nether Craig, Garrigill, Sarah Davidson, farmer aged 50, children Joseph, lead miner, aged 25, William, lead miner, aged 20, Jonathan, lead miner, aged 20, Sarah 15, John 14, Matthew 12, Hannah 10.
In 1851, at Nether Craig, Garrigill, Elizabeth Davidson, widow, farmer & proprietor, aged 63, children Jonathan, butcher, aged 28, Sarah 26, Mathew, lead miner, aged 23, Hannah 21, and granddaughter, Mary Ann Davidson 9 months.
In 1861, at Nether Craig, Sarah Davidson, lead miners widow, aged 73, son, Jonathan, farmer, butcher, aged 40, daughter, Hannah, house maid, aged 31, grandson, William Davidson 3. Sarah Davidson was buried at Garrigill, 12th May 1868.
See 18th September 1841, 15th June 1850, and 8th March 1890.

27th June 1860 (Teesdale Mercury)

MIDDLETON-IN-TEESDALE.

A MUSICAL ENTERTAINMENT of no ordinary kind was given in the Lead Company's School Room, on Friday and Saturday evenings last, by Mr G. Wallace and son, FROM Alston. Through the kindness of R. W. Bainbridge, Esq., the room was readily accorded to the performers, as was also the use of a piano-forte by Mr J. Marsden. The audiences were not numerous, but respectable; and we only regret they were not larger; for the opportunities afforded this neighbourhood of listening to such concerts are “few and far between.” It is a remarkable fact, but no less true, that the taste for the cultivation of music is, generally speaking, on the decline. The abilities of Mr Wallace as a teacher of music, as well as a performer, are comparatively unknown in this neighbourhood, but in Cumberland and Westmorland, where his duties have chiefly called him, they have been duly appreciated. His son. Friend Wallace, it only thirteen years of age, and is quite a prodigy in music. His performances on the piano-forte are wonderful in the extreme. The quickest and most difficult pieces are executed with the greatest ease and accuracy. He has a rich voice, and has perfect command of it, as was observed in the beautiful cadences which he performed. His father accompanied him on the clarionet, and is a noted performer on that instrument. The programme was well selected, but time and space forbid us criticising so fully as we could wish; suffice it to say that the execution of the military fantasia, “The Soldier's Welcome Home." “California Galop," and “Annie Laurie," with variations, was done in a very masterly style, which called forth loud applause. The rendering of the songs, “Beautiful Star," “I’ll hang my Harp on a Willow Tree,” and “Do they miss me at Home?" was also tastefully done, and exhibited great feeling. The Middleton Quadrille Band was in attendance and played several lively airs at intervals. At the close of the performance, R. W. Bainbridge, Esq., expressed himself highly gratified with the entertainment, and thought that a vote of thanks was due to Mr Wallace and son for the most creditable manner in which they had acquitted themselves. Mr Wallace having responded, a vote of thanks to the Band concluded the proceedings.

29th June 1860 (Carlisle Journal)

Marriages

At Garrigill church, on the 24th inst., by the Rev. G. Monkhouse, Mr. James

Vipond, draper, Garrigill, to Miss Ann Shaw, youngest daughter of Thomas Shaw, Esq., Shield Hill, Garrigill. *See 5th March 1831 and 14th January 1905*

Deaths

At Keswick, on the 19th inst., Mr Thomas Greenwood, lead miner, aged 33 years,—much respected.

At Nenthead, near Alston, on the 25th instant, Frances Ruth, daughter of Mr. John Millican, aged 16.

31st August 1860 (Newcastle Courant)

Fatal Accident in a Lead Mine

An inquest was held at the infirmary yesterday (Thursday) before J. Hoyle, Esq., coroner on the body of John Bell, lead miner of Stonecroft, Haydon Bridge. Deceased was employed at Settlingstones Lead Mine, near Fourstones. On the 9th inst., at about the time of evening when deceased and a man, named Coates, dropped work, some of the other men were engaged in

blasting ore, and in proceeding towards the bottom of the shaft they had to pass a place at which some powder was going to be fired. Coates got safely past, but deceased declined to do so until the shot was fired. On the smoke clearing away, search was made for deceased, and he was found lying in a hole, about three yards in depth, with his wrist and jaw fractured. Medical attendance was procured, but it was found necessary to remove him to the infirmary, where he expired on Wednesday last. The jury returned a verdict of accidental death.

7th September 1860 (Morning Chronicle)

TEES SIDE MINING COMPANY.

The general meeting of shareholders was held this day, at the offices of the company, Winchester-house, Old Broad-street; Mr. F. S. Hemming in the chair.

MR. JOHN B. REYNOLDS, the secretary, read the notice convening the meeting, and the minutes of the last, which were confirmed

The statement of accounts showed cash at bankers £24 12s. 11d., and the balance of liabilities over assets £55 18s. 11d.

MR. CRICK, the manager, said that every item was charged up, including the cost to the end of August, which was not yet due.

The CHAIRMAN said the lode in the shaft was now worth about £2 per ton.

The SECRETARY considered the mine was now worked in a very satisfactory manner, and he was glad the chairman had inspected it, as he had recently become a large shareholder, and no doubt great benefit would be derived by all parties interested.

The report of the agent was read, which was of a satisfactory nature, which, with the accounts, was adopted.

Mr. GILKHS wished to know what steps should be taken to keep the mine continually at work, as they were now compelled to stop either through frost or having too much water.

MR. CRICK had been in the mine for nine years, and it would never be worked all the your round until they erected steam machinery.

After a lengthened discussion a call of 1s, per share was made, and the proceedings terminated with a vote of thanks to the chairman.

12 September 1860 (Teesdale Mercury)

DINNER TO THE LEAD COMPANY'S WORKMEN

This town, on Saturday last was the scene of a demonstration on a scale of magnificence never before witnessed at Middleton-in-Teesdale; and which will ever be remembered and looked back upon with the greatest feelings of satisfaction and gratitude by all who were more immediately interested in it, as well as by those who were less intimately connected therewith. The event referred to was a Dinner given to the Workmen in the Teesdale district in the employment of the Lead Company, by Octavious Wigram, Esq., and J. Birch, Esq. (Deputation from the Court of Directors), on the occasion of Mr Wigram becoming Governor, and Mr Birch Deputy Governor of this Company. The place chosen for holding the dinner was the parade ground of the Teesdale Highland Rifle Corps—a very suitable site for such an occasion. The day before saw the joiners busily engaged in fixing the tables, seats, and erecting the tents; and the masons as busily occupied in setting up boilers, and making

other preparations for keeping the various articles of consumption at a proper temperature to be placed before the hundreds of hungry souls the next day. The publicans of the town were contracted with the important duty of making the dinner, which, we would not forget to state, was of excellent quality, and showed no deficiency in quantity, with the exception of "*sweet pies?*" Whilst the above preparations were going on, we can easily imagine the hot and odorous atmosphere the cooks were inhaling, before those beautiful rounds of beef, and scores of legs of mutton, not to mention the hundreds of plum puddings, and sweet pies which were placed upon the tables; these edibles being washed down by ale or water, as the guests thought most palatable. Great fears were entertained with respect to the weather keeping fine all day, as a thick mist hung upon the hill tops about 11 o'clock, which threatened to come down in the shape of rain. This omen was too correct, for about ___ o'clock, a slight shower fell, but only continued for a short time, the remainder of the day being free from rain, though not as bright as might have been wished for. The time fixed for dinner was half past 12, and previous to that hour the miners who from their priority of position, were to dine first, met at the top of Hude Bank where they arranged themselves in marching order, and headed by the Band of the Hill Corps, marched in front of Middleton House, proceeding by way of the Company's school to the parade ground; the Mickleton Band bringing up the rear. The whole procession being proceeded by two strong-armed workmen carrying a large banner, with the inscription, "Success to the Lead Trade." Other flags were in the procession, bearing upon them, "Peace and Plenty," "Honour to those who develop the resources of the Country." The men having got seated at the dinner-tables, and after grace had been said, the aforesaid rounds of beef and legs of mutton were speedily cut into a thousand pieces, to answer the demands of the various applicants by whom they were surrounded. The clatter of above sixty dozen knives and forks upon as many plates, reminded us of the noise of machinery, and certainly no piece of machinery could have better performed its work. The second course was sweet pies and plum puddings, as to the first no injustice could be complained of. The number who sat down to the table was 626, during the dining of whom the Rifle Corps ____ played an excellent _____ of music. The second table comprised the Rifle Volunteers, joiners, smiths, millwrights, _____, washer-boys, and other outdoor workmen, numbering 618, making with the carriers and waiters an aggregate of more than 1200. The agents, overmen, clerks, foremen, and other gentlemen who were invited, undertook the duty of carving, and dined afterwards. Whilst the workmen were dining, it was a pleasing sight, which did not go unnoticed, and one which will never be forgotten, to observe the Governor and Deputy Governor, with the worthy Superintendent of their works, R. W. Bainbridge, Esq., moving about and waiting upon them, and seeing that they were making a hearty dinner, and enjoying themselves. It seemed to afford the above gentlemen great pleasure and satisfaction to be thus engaged; and is a scene to seldom witnessed among masters and their workmen. Were such exhibitions of mutual feeling and good-will more frequent, we should not hear of the direful effects of those strikes, which have taken place in this kingdom. To return to our report: —at 4 o'clock, the workmen and volunteers, with the bands, again assembled in front of Middleton House, where they were addressed by Mr Robt. Grieves (one of the

oldest miners) and Mr W. Pinkney, in speeches appropriate to the occasion. After which, Mr Richard Watson, the native poet, read a composition he had made that morning, relative to the event, which shall appear in next week's Mercury. Octavius Wigram, Esq., then spoke as follows—It afforded him great pleasure and satisfaction to meet the workmen on this occasion, and to give them a treat in the shape of a dinner, and he was sure this would rank among the happiest days he had ever spent in his life. Time had wrought many changes since he first visited this district as a deputation from the Company's Court, both in a moral and physical point of view. The first time he was deputed to come to Teesdale was in 1822, and from that time until now, with only one or two exceptions, he had never missed paying an annual visit to this charming locality. There had been great improvements effected in the face of the country since he first knew it, as some before him could bear testimony; and the moral aspect of the population, he was glad to say, had kept pace with those improvements. No district in any part of the country, he might safely affirm, possessed more varied means and opportunities for the spread of knowledge than this. It was in every sense of the word, a highly favoured district. The school was created in 1818, and was the first of the kind built in the country, conducted on the same principles. Leaving the subject of education, he said it had been the constant wish of the Company to make their workmen and families comfortable and happy; nor did he think that they had failed in doing so. It had always been their desire to keep them in constant employment, and in bad as well as prosperous times the hundreds before him could bear witness that the mere object of a profitable remuneration had not been what the Company had principally looked at. One new feature that had sprung up in the country since his last visit was the Rifle Corps movement; and he was glad to see that this district was not behind in that noble cause; and he trusted that, should the country ever suffer from invasion he would himself have loyalty and patriotism to defend it. Having complimented the Volunteers on their appearance, he sat down amid three loud and hearty cheers. J. Birch, Esq., then stepped forward, and offered a few remarks, stating that he had only been connected with the Governor and Company for about a year and a half, and that this was but his second visit to Teesdale, and he had not much acquaintance with the locality as yet; he hoped it would not be the last time he should have the pleasure of meeting the Company's workmen, and in conclusion he wished them every success. After prolonged cheering had ceased, R. W. Bainbridge, Esq., said that the wives of the Governor and Deputy Governor ought not to be forgotten, as it was through the means of a lady that the Company was first formed. He then proceeded to say, that a lady, a quakeress, belonging the north passing through these dales, on her way to some friends in the south, seeing the population unemployed, and the want and destitution existing among them, named the subject to her friends, requesting them to form a mining company, more on philanthropic grounds, than for any particular remuneration derivable from it; she prevailed, and a company was established, the beneficial results of which had been apparent to all. Three enthusiastic cheers were then accorded to Mrs Wigram and Mrs Birch, after which the bands played a suitable air, and then headed the large procession through the town. The appearance of the procession was most imposing—reaching from Hude Bank through the market-place—the men marching six abreast. Having gone round by the New

Town, they returned to the market-place, where the bands played the National Anthem, and the whole disposed, with the exception of the Volunteers, who headed by their band, marched to the parade ground, and went through a series of military exercises.

19 September 1860 (Teesdale Mercury)

THE DINNER TO THE LEAD COMPANY'S WORKMEN

We last week printed a report of this Dinner, but through the little time at our disposal, were compelled to omit the speeches of Mr Grieves and Mr W. Pinkney. These speeches contain much that is interesting, and we have now great pleasure in submitting them to our readers. We append the lines written for the occasion by Mr Richard Watson. — Mr Grieves (the oldest workmen of the Company) said he had been engaged in the employ of the Governor and Company for upwards of 40 years. About the time that he entered the service of the Company, a dinner was given by Mr Masterman, on his accession as Governor, and he (the speaker) understood that the present dinner was given by Mr Wigram on his attaining to that high office, He in connection with his fellow workmen, felt extremely obliged to them, not only for the rich end abundant repast of which they had partaken, but also for the many favours conferred upon them in years gone by. He could remember the time when things were very different, both in reference to the earnings of the working classes, and also in the efforts made to improve their morals and increase their intelligence. He had no doubt that Mr Wigram, whom they had so long known as Deputy Governor, would in his more exalted position as Governor, be equally as solicitous to promote the welfare of the workmen. Mr Birch, who had now entered upon the office of Deputy Governor, though a comparative stranger amongst them, had produced a most favourable impression and if he trode in the footsteps of his predecessor, be would be equally respected, and have the same place in the affections of the people. After again thanking the Governor and Deputy Governor, as the representatives of the Company, Mr Grieves retired. —Mr W. Pinkney (who was introduced by R. W. Bainbridge, Esq.) said he duly felt the high honour conferred upon him that day, in being made the Aaron to that vast assembly. Although he regretted not having time to prepare an address becoming the importance of the event, still the task was a pleasing one, both in reference to the elements of a speech, which the occasion supplied, and from the fact that he was the mouthpiece of hundreds of grateful hearts. The sentiments he might utter, naturally suggested two divisions. One was Thanks, the other Congratulation. Their thanks were due to the Deputation, and the honourable Company they represented, for developing the resources of the country. In order to do this, two things were essentially necessary—Capital and Labour. Without capital, the hands of labour were tied, and the rich mineral treasures of their hills must bare remained hidden in the bowels of the earth; whilst the willing labourer continued in despondency, for want of the employment by which be gained his daily bread. Such was the case when the London Lead Mining Company commenced their operations in this district. Private speculators had triad, and small local companies had been formed—in some cases scarcely formed—until they became defunct. In other instances, after more perseverance, they abandoned their enterprise in despair, when, if the knowledge had but been vouchsafed to them, the prize was within their grasp. It was under these

auspices (not of the most inviting character) that the Lead Company commenced their works, and gave to labour a fresh impetus. Their thanks were next due to the perseverance which the Company had manifested in their operations, proving that they were actuated by motives nobler than those of a merely mercenary nature; for even the younger portion of that assembly would remember times of depression, when, if the Company had looked only to the pecuniary return for the capital invested, that capital would have been withdrawn and invested elsewhere and the labourer must have sought a new field for employment; but with a constancy which must have been prompted by feelings of true benevolence, they had carried on their operations under very discouraging aspects, and while commercial panics had swept with violence over the country, and many firms had succumbed to the storm and been involved in ruin, they had never felt a shock. The Company had stood firmly, and the consequence was that there was a degree of confidence amongst their workmen, in reference to their resources, which was not often felt elsewhere. Another subject, for which their thanks were due, was the liberal manner in which the Company had provided medical attendance for their workman and their families. How frequently was it the case, under other firms, that some accident befalling a man while following his employment, or family affliction, swept sway the savings of years in the expenses incurred in medical attendance, and placed him under embarrassments which seriously inconvenienced his future life. Another subject for which their thanks were due was, the liberal manner in which the Company had endeavoured to promote the mental and moral elevation of those in their employment. There was a period, not very long ago, when the upper classes of society looked with distrust on the increase of education, or the spread of intelligence amongst the working classes, from a mistaken impression that it was calculated to make them discontented with their lot, and to spread the seeds of anarchy and confusion, but the Lead Company had discarded this false theory, and taken the initiative in this district in reference to educational movements. The venerable structure to the left was associated with the most pleasing reminiscences of his own early youth; for under its roof, and under its present master, he received the whole of his scholastic acquirements, and to the latest hour of his life he should look back with pleasure to the happy moments spent in the weekday and Sabbath school. Another subject of thanks was the handsome manner in which the Company had responded to an appeal made to them by a portion of their workmen for a half-holiday on Saturdays. The mechanics and labourers at the yard, had long felt the desirableness of this boon, and the Company had generously granted it, and he had great pleasure in presenting the thanks of his fellow-workmen for the same. He now came to the subject of Congratulation, he congratulated the Company on the success which had crowned their efforts, he believed there were some present who remembered the first trials made by the Company, when it was very problematical whether success would crown their efforts or not, but their perseverance was now reaping its reward; the seed which had been sown was producing its fruit, and he hoped that the Company would be able to reap an abundant harvest. Another subject of congratulation was the improvement, which had taken place in the habits and morals of the people, which to a great extent was attributable to the liberal policy, which the Company had pursued. Men were left perfectly free to carry out their own religious convictions; they

could worship God “under their own vino and fig-tree, none daring to make them afraid,” and he felt happy to state that the morals and intelligence of the population would bear a favourable comparison with those of their neighbours. Lastly, he felt pleasure in congratulating the Company on the improvements, which had taken place in the method of carrying on the different processes, and the perfection, which had been attained in the machinery. In conclusion, he hoped that every trial would be successful, so that they might receive an abundant return for the capital invested, and their past munificence was a guarantee that their workpeople should participate in the advantages; for every appeal on behalf of any object deserving the Company's support, had bean promptly responded to. He now felt great pleasure in proposing three cheers for the Governor and Deputy Governor, and the noble Company they represented. (Loud and reiterated applause.) After the cheering had subsided. Mr R. Watson read the following lines, composed by himself: —

Dear friends, and fellow workmen,
It gives me great delight,
To see assembled round me here,
So many faces bright.
All by our kind employers met,
Let each concur with me,
Three cheers give for our good Queen,
And the Lead Company.

This place was but a wilderness,
A dreary dismal wild,
Enwrapp’d in poverty and gloom,
Till commerce on it smil’d.

The generous Lead Company
So nobly stepped forth,
And employed men to bring to light
The treasures of the earth.
Now see the change that has been wrought,
Come cast your eyes around,
And view the trees and flowery meads,
In verdant beauty crown’d.

Where winds swept o'er the purple heath,
Or o'er the barren plain,
Now sephyrs sigh among the trees,
Or wave the golden grain.

While our lead-mines are prosperous,
And commerce doth increase,
Let us, like loyal subjects, live
In unity and peace.

And may our valiant Rifle Corps
Like gallant patriots stand,
And drive away the ruthless foe
That dares invade our land.

Than lot each workman here around.
At once concur with me,
Three cheers give for our good Queen,
And the Lead Company.

19th September 1860 (Teesdale Mercury)

MINERS FRIENDLY SOCIETY.—The annual meeting of the Middleton-in-Teesdale Miners Friendly Society, was held at the Rose and Crown Inn, August 25th, ult. The meeting opened by the chairman making a few brief remarks on the benefit of the society, and hoping the members would have come with the rules grafted on their memories, and with the intention to choose right, men in the right places, and as a large number of the members were expected to be present, to hoped they would obey his call for the benefit of business. The officers were then chosen, consisting of a President, Vice-President, Secretary, Treasurer, and 7 Committee men, (and in addition 3 Auditors.) The report was then read which contained the following financial statement. Income, Monthly Subscriptions £180 4s 8d; Donations £4; Entrance Money £3; Fines £1 2s 5d; Interest £23 0s 3d. Total income £211 7s 4d. Outlay, paid to Sick Members £148 19s 4d; paid at Deaths £22. Total outlay £170 19s 4d. Gained during the year, £40 8s. During the last 18 years this society has gained on an average, £31 15s 6d a year. (Cheers). The meeting was highly supported by Mr Coates, Mr Pinkney, and Mr Sedgwick. It was agreed to have a dinner on the 15th of September, and a procession, headed by the Middleton-in-Teesdale Highland Rifle Corps Band. The chairman then said that be and his colleagues had never had a jarring string during the whole of the past year. Peace and order were kept up during the whole of the meeting to an extent, which had not been equalled for many years. The meeting then concluded by passing a vote of thanks to W. Ewart, Esq., (Surgeon), for his ability and fidelity towards the members of the Society; also to His Grace the Duke of Cleveland, for his donation, and to Anthony Todd and Son, Esqrs., for their donations. Levi Bainbridge, Secretary, Jonathan Morton, President. The Anniversary of the Miners Friendly Society was celebrated on Saturday last, by a dinner hold at Mr M. Sherlock's, Rose and Crown Inn, previous to which the members walked in procession through the town, headed by the band of the Volunteer Rifle Corps; after which they returned to the inn to do justice to the substantial repast "mine host" had provided against their return.

21st September 1860 (Carlisle Journal)

FATAL FALL FROM A HORSE

An inquest was held at Milburn, on Monday last, before Mr Richard Wilson, coroner, Kendal, on the body of Thomas Cockfield, of that place, miner. On Saturday evening last, he was returning from the annual dinner given by the London Lead Mining Company, to their workman at Dufton, and when between the later place and Knock, he was observed by a person on the road to fall from his horse; he ran to his assistance, but deceased never spoke, and died immediately. He appeared to have fallen upon his head and dislocated his neck.

28th September 1860 (Carlisle Journal)

NENTHEAD. —The deputation of the Court of Directors of the London Lead Company (Octavius Wigram, Esq., and J. Birch, Esq.) paid their annual visit to Nenthead last week accompanied by their ladies and friends and as J. Masterman, Esq., who has held the office of governor for a great number of years has retired from Office, Mr Wigram, who has for many years, been deputy-governor is now appointed governor, and Mr Birch deputy-governor, which event they have celebrated by another proof of their kindness and generosity in treating all their workmen in the Nenthead and Garrigill district with a good substantial dinner of the old English style—roast beef plum pudding, &c., which was served up in a credit able manner by the innkeepers of the village. The large school-room, joiner's shop, and reading room were all fitted out for the occasion where nearly 800 partook of the refreshment. During dinner, the gentlemen with their numerous staff of agents kindly attended to everyone. Between eleven and twelve o'clock all the workmen of Nenthead assembled to meet the Garrigill men who marched into the place in possession, preceded by the Garrigill band and also the Nenthead brass band who went to meet them. The Nenthead violin band played a number of popular pieces, during dinner in a first-rate Style. After dinner all the men assembled in front of the Miners Arms inn, when Mr. Robert Black, the oldest workman in the Company's service, returned thanks to the gentlemen for their kind treat. Mr. Caleb Liddle, one their workmen, then stepped forward, and in a long eloquent, and appropriate address congratulated both masters and workmen on the good feeling which existed between them, pointing out the many manifestations of the kindness and generosity of the master and of the free liberty which the workmen enjoyed both physically and religiously, not forgetting to express their gratitude and goodwill of the men towards their masters. Mr. Wigram then stepped forward and was received with enthusiastic cheering. He expressed his delight and satisfaction at meeting them on the present occasion. He said he had annually visited that place for 39 years, with the exception with once or twice, and that he delighted to see the marked improvements in the morals and manners of the people in the course of that time, and the improved aspect of the country in general. He pledged himself to do his utmost, as he had always done, for the comfort and happiness of his workmen and their families. —Mr Birch then rose amidst deafening cheers, and gave a short but eloquent address, assuring the miners he had travelled through a great part of Europe, Asia and Africa, and that he had never spent a day that afforded him more pleasure and satisfaction than that day. The workmen then formed a procession of six men deep, headed by the two bands of music, preceded by a large banner (the motto being "Let there be union") and marched around the place. A grand and imposing sight it was, to see a procession a quarter of a mile in length, and all the hills and elevations covered with spectators, anxious to see the procession and hear the strains of the music. *See 15th March 1879.*

I JOSEPH DICKINSON, Superintendent Registrar of the District of Alston, the County of Cumberland, do hereby certify that Building named PRIMITIVE METHODIST CHAPEL, situate at GARRIGILL GATE, the Parish of Alston, in the County of Cumberland, being duly certified as a place of Public Religious Worship, was REGISTERED for the SOLEMNIZATION of MARRIAGE therein, on the Tenth day of

December, in the year of our Lord One Thousand Eight Hundred and Sixty. Witness my hand, this fifteenth day of December, in the year of our Lord One Thousand Eight Hundred and Sixty. JOSEPH DICKINSON, Superintendent Registrar.

Deaths

The deceased was a native of and has resided all his life in the parish of Allendale, where he was universally respected for his affability and kindness of disposition, and readiness to aid in every good work.

9th November 1860 (Durham Chronicle)

ACCIDENT TO TRAVELLERS IN, WESTMORELAND. —

An accident, which might have been fatal, occurred on Thursday evening week, to a party of gentlemen travelling between the towns of Appleby and Dufton, in Westmoreland. Their names are Mr J. Elliott, cashier to the London Lead Company; Mr H. G. Bainbridge, son of the superintendent of the Company's works; Mr J. Pattinson, jun., one of the clerks of the above company, and Mr R. Dodds, groom, all of Middleton in Teesdale. When within 150 yards of Dufton, the horses took fright, bounding off at full speed; and Mr Elliot, with all his driving experience, was altogether unable to draw them up, and there being a quick and awkward turn of the road into the yard belonging Dufton House at this point, the result was a violent upsetting of the whole party. The conveyance was broken in pieces, and the horses having liberated themselves from it by coming in contact with the walls of the stable, returned hack to Appleby at a most furious rate, with nothing but the pole attached to them. Mr Bainbridge and Mr Pattinson escaped uninjured, except the latter gentleman spraining his heel; but Mr Elliott and Dodds were not so fortunate, though we are happy to learn that neither of them are severely hurt.

1st December 1860 (Carlisle Patriot)

COUNTY OF CUMBERLAND
TO BUILDERS

PERSONS desirous of CONTRACTING for the WIDENING of NENT BRIDGE, Alston, and other work in connection therewith, may see the Drawings and Specifications at the POLICE OFFICE, Alston, from the 1st of Dec. till the 8th, and at the Office of J. 10th December 1860 (Newcastle Daily Chronicle)

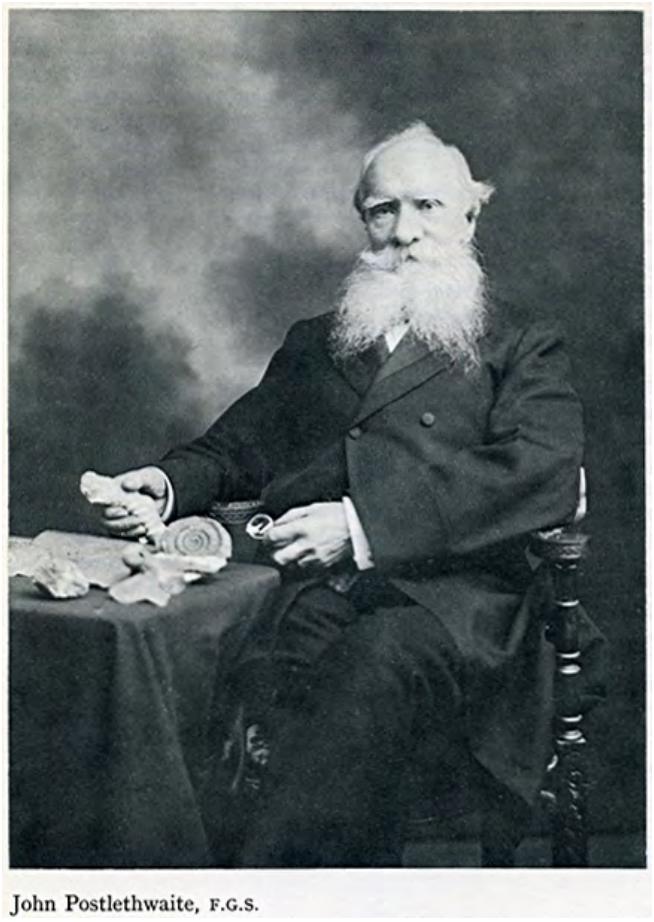
REJOICINGS AT THE LEAD MINES AND MILLS OF
W. B. BEAUMONT, ESQ., M.P.

Great rejoicings hire taken piece throughout the mining dales of East and West Allendale and Weardale, during the past week, the whole of the agents, tenants, and a large body of workmen, haring shown the greatest enthusiasm in the way in which they hare received the intelligence of the birth of a son and heir of W. B. Beaumont, Esq., M.P., at Bywell, on the 2nd inst. On the arrival of the news at Allenheads, on Monday morning, guns were fired, flags hoisted, and refreshments given to the miners and others. On Wednesday, general festivities took place at the Miners' Rooms, at Allenheads, Carshield, and Newhouse. The workmen and tenantry were entertained, and every demonstration of rejoicing showed how heartily the news was welcomed. The healths of Mr. and Lady Margaret Beaumont were drank with the greatest enthusiasm; and many a prolonged cheer echoed among the hills when a welcome to the son and heir was proposed. On Saturday, the 8th, further rejoicings took place at the smelting mills, and in Allendale town. At the former place, the 7th Northumberland Rifle Volunteers (established at the sole expense of Mr. Beaumont) fired several rounds, and royal salutes of cannon were fired here and elsewhere, drowned almost in the hearty cheers of the assembled throng. Mr. Sopwith, the chief agent, in addressing the workmen, spoke with great feeling on the advantages possessed by the district in the benevolent interest taken by Mr. and Lady Margaret Beaumont in education and other sound and excellent means of improvement. A dinner was given by Mr. Beaumont to the whole of the members of the Allendale Volunteers, Mr. Sopwith in the chair, supported on his right by Mr. Steel and Capt. Sopwith, and on his left by Lieutenant Coats and Ensign Arnison. The vice-chairs were

filled by Rev. T. Emerson, incumbent of Allendale, and Mr. Arnison. This, as well as all the other rejoicings, passed off in the most agreeable manner, and it is gratifying to record such harmonious and spirited rejoicing, and such sincere demonstrations of respect in every part of these extensive mining districts.

28th December 1860 (Carlisle Journal)
Marriages
On the 24th inst., at the Wesleyan Chapel, Cockermouth, by the Rev. J. Ingham, Mr John Postlethwaite, second son of Mr James Postlethwaite, Annie Eliza Robinson, second daughter of Mr William Robinson.



John Postlethwaite, F.G.S.

James Postlethwaite son of William, married Mary Dixon, daughter of Robert, at Crosthwaite, 4th November 1837.
John Postlethwaite, son of James and Mary, was baptised 26th July 1840, at Newlands.
In 1841, at Birkrigg, Newlands, near Keswick, James Postlethwaite, lead miner, aged 20, his wife Mary 25, children, William 3, and John 1.
In 1851, at Braithwaite, Crosthwaite, James Postlethwaite, lead mine agent, aged 33, his wife Mary 38, children, William 12, John 10, and Jane 9.
In 1861, at Brandley lead mines, Crosthwaite, James Postlethwaite, lead mining agent, and Wesleyan local preacher, aged 43, and his wife Mary, formerly dressmaker, aged 48.

James Postlethwaite, lead mine agent, died 22nd April 1869, at Keswick, aged 51. Probate was proved by William Postlethwaite, Schoolmaster, of Wreay, in the parish of St Mary, Carlisle.
In 1861, at Keswick, John Postlethwaite, lead miner, aged 20, and his wife Ann E aged 24.
In 1871, at Eskin Place, Keswick, John Postlethwaite Railway Clerk, aged 30, his wife Ann Eliza 35, daughters, Mary Anne 3, and Kate 6 months.
In 1881, at Eskin Place, Keswick, John Postlethwaite Railway Clerk, aged 40, his wife Ann Eliza 45, children, Mary Anne 13, and Kate 10, and Derwent 7.
In 1891, at Eskin Street, Keswick, John Postlethwaite, companys accountant, aged 50, his wife Ann Eliza 55, children, Mary Jane 22, and Kate 19, and Derwent, railway clerk, aged 17.
In 1901, at Eskin Street, Keswick, John Postlethwaite, companys accountant, aged 60, his wife Ann Eliza 65, children, Kate 30, and Derwent, , bank clerk, aged 27.
In 1911, at Eskin Place, Keswick, John Postelthwaite, railway accountant, aged 70, and his wife Ann Eliza aged 75.
Anne E Postlethwaite, died 1st quarter 1912, aged 76, registered at Cockermouth.
John Postlethwaite, died 20th September 1925, at Workington.

28th December 1860 (Durham Chronicle)
Middleton-in-Teesdale. —The fourth annual supper of the members of the London Lead Company's Workmen's Reading Room was held on Christmas Eve, when about fifty sat down to the Christmas cheer which was set before them; and we need scarcely say, did ample justice to it. This part of the evenings proceedings being over, R. W. Bainbridge, Esq., was called on to preside. After a short and appropriate speech, he called upon Mr J. Pattinson, jun., to read the report of the past year, which stated the present number of paying members to be 92, and honorary members, 7. The income amounted to £24, 5s 7½d, and the expenditure to £15, 17s leaving a balance of £3, 8s 7½d. Interesting addresses were delivered by the Rev. W. J. Wilson, Mr W. Pinkney, Mr J. Readshaw, Mr M. Pinkney, Mr J. Pattinson, sen., Mr W. Coates, Mr G. Hetherington, and other members. One of the members in the course of his remarks having made allusion to the want of an Encyclopaedia in the institution, the worthy chairman replied that he had a good one in his possession, and he should be very happy to present it to the room. The proceedings were considerably enlivened by the presence of the Middleton-in-Teesdale quadrille band. After the usual votes of thanks, the company separated.

8th January 1861 (Cumberland and Westmorland Advertiser, and Penrith Literary Chronicle)
NENTHEAD.—On the first night of the New Year, the Nenthead Amateur Band held a Concert, in the Lead Company's School Room, which, although the weather was very stormy, was attended by a great number of all ranks. The entertainment commenced with the “Charlestown Quadrilles,” which were performed in a very masterly style, after which Mr J. Atkinson sung “Gentle Annie,” chorus by the whole band, which met with great applause. A quick step followed, after which the same gentleman sung “Hard Times come again no

more," chorus by the whole band; next a Valse, then song and chorus, "Some Folks," next a Polka, after which a song "Hold your Horses," by the whole band in chorus, and joined in by the whole company with great applause. After an interval of ten minutes the band played the "Brazilian National Hymn," then a song and chorus " I long for my home in Kentucky," next the "Evening Bells Quick Step," after which a song and chorus "Yo Yah Yo," next a Valse by the band, then a song and chorus "Camptown Races," after which the band played a Scotch Air with variations in such a style as astonished all who heard them. The night's entertainment finished with the song and chorus of "Good Bye."

11th January 1861 (Durham Chronicle)
Middleton in Teesdale— The quarterly sale of newspapers and periodicals taken into the London Lead Company's Workmen's Reading Room was held on Saturday evening, when the following prices were obtained, viz. :—The Times, 4s 3d; Daily Chronicle, 2s 8d; Manchester examiner, 2s 7d; Leeds Mercury, 2s 6d; Durham Chronicle, 2s 1d; Carlisle Journal, 1s 10d; West Durham News, 8d; Teesdale Mercury, 7d; and a number of serials at corresponding prices.

18th January 1861 (Newcastle Courant)
Deaths
At Ferry Field, near Stanhope, on the 10th inst. aged 68, Mr Francis Jaques, for about 40 years in the employment of the London Lead Company.
Baptised 17th June 1792, at Stanhope, son of Francis and Elizabeth Jaques.
In 1851, at East Ferry Field, Francis Jaques, smelter and farmer of 8 acres, aged 58, his wife Dorothy aged 52, children Joseph, quarryman, aged 25, children, Elizabeth, at home, aged 22, Ann, dressmaker aged 18, Jane, 14, Esther 9, and lodger John Elliott, day labourer, aged 22, and nephew, John Elliott, smelter, aged 20, visiting.
In 1861, at East Ferryfield, Dorothy Jaques, widow, farmer of 9 acres aged 62, daughter Ann, milliner, aged 28.
At Westgate, Weardale, on the 20th ult., aged 5 years, and on the 13th inst., aged 2 years, Joseph, the beloved children of Mr Joseph Walton, draper.

18th January 1861 (Durham Chronicle)
MIDDLETON-IN-TEESDALE. —The annual "pays" of the London Lead Company, Weardale, Alston Moor, Westmorland, and Teesdale districts were made last week. The workmen of the last named district were paid at Middleton on Saturday. On account of the immense quantities of snow on the roads, the journey, a distance of upwards of eight miles, had to be performed on horse-back.

18th January 1861 (Carlisle Journal)
TO SCHOOLMASTERS.
WANTED immediately, SCHOOLMASTER for the HIGH PLAINS SCHOOL, in the Chapelry of GARRIGILL, in the Parish of Alston. The above School is Endowed and has liberal support of Scholars. Particulars may be known by application to Mr. JOHN MOFFAT, Flatt.

23rd January 1861 (Morning Post)
At a meeting of the Tees Side Mining Company to-day, it was resolved to place it under the operation of the Limited Liability Act, a call of 1s. per share being made in the meantime.

25th January 1861 (Durham Chronicle)
HOUSEBREAKING AND ROBBERY. —A good deal of excitement has been occasioned by a burglary which was perpetrated at Nenthead near Alston, on the evening of the 10th inst. Three brothers, of the name of Stephenson, employed as carters at the lead mines, and residing together in the same house, had, it appears, on the evening in question, gone out for a stroll, their maid servant also being absent from the premises. On their return, they found that an opening had been made through one of the windows by smashing four squares of glass and breaking the frames. Entering the house they discovered that a desk had been broken open, and a sum of £114, including two £5 notes of Backhouse's Bank, abstracted therefrom. A caddy, containing £200, had, apparently, been taken up and thrown away by the thieves, while three watches remained undisturbed, though exposed in such a position that they could not have been passed unnoticed. There was a dog on the premises, and as this animal neither gave any alarm at the time or subsequently showed any symptoms of having been drugged, it is supposed that the perpetrators of the robbery must have been persons well known about the place. The thieves, whoever they are, have, as yet, escaped detection, but the police are actively employed in investigating the affair.

29th January 1861 (Carlisle Journal)
MIDDLETON-IN-TEESDALE— CONCERTS.—Two concerts were given in the London Lead Mining Company's School Room, on the evenings of Friday and Saturday week, by a number of amateur performers from Nenthead. The music was both vocal and instrumental. The instrumental part was unexceptionable, especially the performance of Mr. Raisbeck on the violin, in "Rousseau's Dream" with variations, and Mr. Tatters's execution and fine blowing of the clarionet in the "Brazilian National Hyman." The vocal part was performed by Mr. Atkinson. The concerts, as a whole, passed off well, and had the attendance been equal to the merits of the performance, the room would have been much more crowded.
Marriages
At Alston Church, on the 22nd inst., by the Rev. S. Y. B. Bradshaw, curate, Mr Joseph Renwick, of Ashgill, Garrigill, to Miss Catherine Armstrong of Alston.
In 1861, at Main Street, Alston, Joseph Renwick, farmer, aged 34, and his wife Catherine, milliner, aged 26.
Catherine Renwick died 3rd qtr., 1863, registered at Alston.
In 1871, at Ashgill side, Joseph Renwick, widower, land owner, aged 44, sons, Joseph 9, and William 7.
At Alston Church on the 24th inst., Mr William Graham, to Miss Mary Armstrong, both of Park, near Alston.

26th February 1861 (Newcastle Daily Chronicle)
TEES SIDE MINE. —Capt. Jeffrey, one of the most experienced and popular agents in the North has offered to take the management of this property for a

percentage in the profits, and his offer has been accepted by the company. Seeing that he is well acquainted with the mine, the most satisfactory results may be anticipated, and a considerable advance in the market value of shares. —*Mining Journal*

12th March 1861 (Carlisle Journal)
Marriages
At Ninebanks Church, West Allen, on the 6th instant, Mr David Edgar, grocer, Carshield, to Miss Mary Ridley, school-mistress, Carshield.
John Edgar married Mary Lowden, 11th December 1824, at Ninebanks, West Allendale.
David Edgar baptised 9th January 1825, at Carshield, son of John and Mary Edgar.
John Edgar aged 36, of Dyke Nook, was buried at Carshield 23rd July 1833.
Hugh Dawson married Mary Edgar, at Ninebanks, 13th January 1836.
In 1841, at Dyke Nook, Carshield, Hugh Dawson, dresser of lead ore, aged 25, his wife Mary 30, children, Joseph 5, Mary 2, Maria 2, David Edgar, dresser of lead ore, aged 15, and William Edgar, dresser of lead ore, aged 12.

See 29th April 1864, regarding Sarah Fleming.

9th May 1861 (Whitehaven News)

A MAN FALLING DOWN A MINE
STRANGE AFFAIR AT ALLENDALE.

The other day, there was at Carshield, West Allendale, a letting of the various workings in the lead ore mines in the district, called “Bargain day." A public house is situating a hundred yards from the mining offices, where generally on these occasions many go to drink. On the above occasion a young man, named Walton Stokoe, residing at a lonely village about two miles off, called Welhope. was one of the inmates of the tavern. Late in the evening some of his companions went away home, but he did not accompany them, and the publican and family retired for the night, leaving him in a room alone and the door unfastened that he might leave when he chose. He left some time during the night to go home, the night being dark and he having to travel over a wild fell, on which was an old lead ore shall, open, about 40 yards deep, into which he fell. He was not searched for till about a week afterwards, as he had occasionally been absent for some days together before. No particular alarm was felt; but on his not returning in the course of the week a search was begun, and the body was found in the shaft. One leg was fractured, and there was a cut about the lower part of his back, but the chest, head, and face were uninjured. The body was in a sitting posture, and had been in the shaft about 8 days. It is believed that he has been alive three or four days in this fearful situation. He was a strong, healthy young man, aged 31 years, and was engaged to have been married this month. The remains were interred at Ninebanks burying ground, attended by a large concourse of people Strange to say, no coroner’s inquest was held, no inquiry into the state in which deceased left the public house, nor at what hour, &c. Ought such things to be? — *Carlisle Examiner*

21st May 1861 Cumberland and Westmorland Advertiser, and Penrith Literary Chronicle)

Marriages

In 1861, at Main street, Alston, Hannah Walton, widow, innkeeper, aged 75, son in law Albany Little, labourer, aged 35, married daughter, Jane Little, dressmaker, aged 35, grandsons, Thomas W. Little 5, John Little 3, grand daughter Hannah White 13.

28th May 1861 (Carlisle Journal)
ROBBERY BY SCHOOLBOY.—Joseph Goodfellow, a school-boy, aged 12 years, has been apprehended at Alston and committed to take his trial at the Sessions for stealing threepence worth of lead piping, the property of George Peart, schoolmaster, Alston**.** *See 4th & 5th July 1861*

31st May 1861 (Carlisle Journal)
PRESENTATION OF A FLAG TO THE ALSTON MOUNTAINEERS.
On Friday last (being the occasion of the Queen's birth-day), the 6th Cumberland Rifle Corps (Alston Mountaineers) were presented by Mrs Paull, sister of the Rev. W. N. Snowe, vicar of Alston, and chaplain of the corps, with a magnificent flag. The corps, under the command of Captain Dickinson, assembled on the parade ground about 6 o'clock in the evening, and shortly afterwards Mrs. Paull, accompanied by a number of friends, appeared on the ground, and were received by the corps at open order with the general salute. The ranks were then closed, and having formed three sides of a square,
Mrs Paull advanced with the flag, and addressed the corps as follows: — "Captain Dickinson, I have the pleasure of presenting to yourself, the other officers, non-commissioned officers, and privates of the 6th Cumberland Rifles this flag, a slight token of my high appreciation of the objects for which this corps has been formed, and of my confidence in the zeal, patriotism, and gallantry of its members, and of my certainty that should they in the exercise of their duties ever be called on to march out against the enemies of our country, in defence of our Sovereign Queen, our liberties, and the happy ties of our English homes, they will distinguish themselves on the field of battle as British soldiers ever have done, and ever will do, bearing their flag untarnished and triumphant through all difficulties and dangers, a fitting emblem of British valour, and at length return to their happy homes covered with glory and honour."
At the conclusion of her address, Mrs Paull delivered the flag to Captain Dickinson, and the Rev. chaplain then proceeded to ask a blessing, after which Captain Dickinson appropriately returned thanks to Mrs Paull and handed over the Flag to the custody of Ensign Crawhall.
A large concourse of people were on the ground to witness the interesting ceremony, including Mrs Captain Dickinson and family, Mrs Bell, H. W. Friend, Esq., and Miss Friend, Mrs Crawhall, the Rev. R Robinson, of Nenthead, John Cowper, Esq, the Misses Dickinson, of Spency Croft, Mr and Mrs Buck, Mr E. Cowper, &c., &c.
The corps afterwards marched past in slow and quick time to the music of the Alston band, and went through several company movements, skirmishing, and blank firing, not omitting to make a charge at the double with fixed bayonets in

the direction of the numerous assemblage, who were witnessing the proceedings. The corps are justly proud of the honour shewn to them by Mrs Paull, and it is hoped that such attention will have the effect of giving encouragement to their loyal and patriotic movement, and inducing the men to perfect themselves in their honourable calling.
On Sunday morning the corps, under the command of Lieut. Friend, attended Divine Service, and heard an excellent address from their worthy chaplain.

28th June 1861 (Carlisle Journal)
Inquest at Nenthead. —An inquest was held on Thursday last at Nenthead, before R. Carrick, Esq., deputy coroner, on the body of Robert Walton *(Aged 20)*, who was drowned whilst bathing in a large reservoir belonging to the London Lead Company. A young man from Alston, who was with him, nearly met with the same fate by trying to extricate him, struggling until his strength was spent, when he had to relinquish his hold; and had it not been for John Archer, who happened to be there at the time and got a long stick which he reached to him and drew him out, or he probably would have sunk also.

2nd July 1861 Cumberland and Westmorland Advertiser, and Penrith Literary Chronicle)
Marriages
At the Wesleyan Chapel, Garrigill, on the 23rd ult., by the Rev. J. Barrowclough, Mr Jos. Pickering, of Hill Top, miner, to Jane, second daughter of Mrs Bramwell, of High Shield Hill. *Probable emigration to New Zealand*
Deaths
At Alston, on the 22nd inst., Mr Robert Dickinson, aged 40 years.
In 1851, at Balmans Lane, Alston, Robert Dickinson, lead miner, aged 31, and his wife Mary 28.
At Alston on the 27th inst., Mrs Sarah Dickinson, advanced in years.
In 1861, at Kates Lane, Sarah Dickinson, lead miners widow, aged 83, and son William Elias, lead miner, aged 59.
At Annatwalls, near Alston, on the 24th inst., Mr John Fawcett, aged 77 years.
In 1861, at Annatwalls, Alston, John Fawcett, retired farmer, aged 76, and his wife Ann 76.

4th July 1861 (Whitehaven News)
STEALING LEAD AT ALSTON
Joseph Goodfellow (12; reads and writes imperfectly), was charged with stealing a piece of lead piping, the property of George Peart, at Alston, on the 17th May.—He pleaded guilty, and was sentenced to 14 days hard labour, and afterwards to be sent to a reformatory for five years.

5th July 1861 (Carlisle Journal)
JUVENILE PETTY LARCENY.

In 1861, at Alston Workhouse, J. G. scholar, aged 12

12th July 1861 (Durham Chronicle)
Middleton in Teesdale.— The quarterly sale of newspapers and periodicals taken into the London Lead Company's Workmen's Reading Room was held on Saturday evening last, when the following prices were obtained viz. :—The Times, 6s; Manchester examiner, 3s 2d; Newcastle Daily Chronicle, 3s 6d; Northern Daily Express, 3s; Leeds Mercury, tri-weekly, 2s 6d; Carlisle Examiner, 2s; Illustrated London News, 2s 7d; Durham Chronicle, 1s 6d; Teesdale Mercury, 6d; and a number of other serials at corresponding prices.

17th July 1861 (Teesdale Mercury)
EGGLESTON
FLOOD IN THE EGGLESHOPE BURN.—
On Friday last, a vast quantity of rain fell on the hills adjacent to Eggleston. Considerable damage was done to the Lead Company's works at the California Mine, through the flooding of the Eggleshope Burn. The brook rose suddenly to an unexampled height, and several persons had to run for their lives. A good deal of lead-ore and other materials were carried away, and some of the reservoirs received injury. Eyewitnesses describe the appearance of the torrent as awful foaming down the valley with the utmost fury, and covering the low grounds. From the immense quantity of water precipitated

suddenly into the Burn, it is supposed that a water-spout must have burst on the hills.

19th July 1861 (Carlisle Journal)
Fatal Accident To A Miner. —An inquest was held at Nenthead upon the body of Thomas Liverick, aged 29. The deceased was a miner employed in the lead mines at Nenthead. Last Wednesday as he was working there a large stone fell upon him, and he was dead before he was extracted, his back having been severely injured. The jury returned a verdict of "Accidental death."

In 1841, at Nenthead, Thomas Liverick, lead miner aged 30 (died 24th June 1850, buried at Nenthead 26th June 1850, probate records state the death was 23rd June 1850, effects under £200, as probate was awarded to his son Lancelot on 3rd June 1874) his wife Jane (Forest, married 18th February 1830, at Alston) aged 30, children, William 11, Thomas 9, Ann 6, Bella 4, Lancelot 2 and John 12 days, (died 2nd quarter of 1841).
In 1851, at Nenthead, Jane Liverick, widow, aged 41, children, William, lead miner, aged 21, Thomas, lead miner, aged 18, Ann 16 (born Gosforth, Newcastle, Northumberland), Isabella 13, Lancelot, lead ore washer, aged 11, Sarah 8, and Jane 5. Their mother Jane died 11th February 1857, buried 13th February 1857, aged 46, at Nenthead. (Note error on memorial stone).
In 1861, at Nenthead, William Liverick, unmarried lead miner, aged 31, brother Thomas, lead miner, aged 28, sister, Ann, house keeper, aged 26, brother Lancelot, lead ore miner, aged 21, sisters Sarah, house maid, aged 18, and Jane, house maid, aged 15.

Marriages
At Alston Church, on the 17th inst., by the Rev. T. H. Thompson, curate, Mr Richard Clare Gurney, Sanderton, Buckinghamshire, to Miss Jane, second daughter of Mr John Pattinson, bookseller, Alston.
Deaths
At Alston, on the 11th inst., Mr James Alder, schoolmaster at Eston Junction, aged 28 years.

6th August 1861 (Cumberland and Westmorland Advertiser, and Penrith Literary Chronicle)
Marriages
On the 28th ult., at Garrigill Gate, by the Rev. G. Monkhouse, Mr Ralph Armstrong, miner, to Ann, eldest daughter of Mr Bramwell, Farmer, Redwing.
In 1871, at High Hermitage, Garrigill, Ralph Armstrong, lead miner, aged 31, his wife Ann 34, children, Matthew 9, Tom 7, Joseph 5, and Ann 2.
In 1881, at High Hermitage, Ralph Armstrong, lead miner, aged 41, his wife Anne 44, children, Matthew, lead miner, aged 19, Thomas, lead ore dresser, aged 17, Joseph, lead ore dresser, aged 15, and Annie 12.
In 1891, at Rice View, Garrigill, Ralph Armstrong, farmer, aged 51, his wife Anne 54, and daughter Annie 21.

14 August 1861 (Teesdale Mercury)
MIDDLETON-IN-TEESDALE.
On the afternoons of Tuesday and Wednesday last, Octavius Wigram, Esq., of London, Governor of the corporation of the London Lead Mining Company, gave an exhibition of dissolving views to the children of the company's several

schools in the district. On both occasions there was a considerable number present of a "larger growth," who appeared to be as highly interested as the more juvenile portion of the audience. The subjects exhibited embraced scenes in Egypt, Turkey, Switzerland, France, Arctic regions, &c., which the worthy exhibitor accompanied by short explanatory remarks. There was also thrown up- on the canvas a variety of subjects of a more ludicrous character; one of which called forth the hearty plaudits of the youngsters; being that of a Frenchman represented as being asleep with his month widely opened, and an uninterrupted ingress afforded to a number of rats, after which the man awakes, and finding himself sick, raises himself up and begins, amid groans of a most pitiable nature, to vomit the little rascals up again. On Saturday afternoon, Mr Wigram again exhibited his views to the boys employed at the ore dressing, and others who chose to attend, and was favoured with a large company.

We had the pleasure of witnessing; on Friday afternoon last, a spectacle of a most gratifying and pleasing character, and one which will long be held in remembrance, not only by the immediate parties concerned, but also by all who were favoured with the opportunity of being observers. It is always an agreeable sight to see people happy and enjoying themselves, especially if their enjoyment springs from a harmless and innocent source, and is unassociated with anything of a brutalising and vicious tendency, and each as is not calculated to corrupt the tastes of our nobler nature. The event alluded to, was the occasion of the annual visit of the deputation from the court of directors of the London Lead Mining Company, who most liberally treated the wives a, widows of their workmen in the Teesdale district, to a substantial dish of tea, in the company's school room. It will be in the recollection of most of our readers, that a dinner was given to the employees of this company about a year ago, when nearly 1,800 partook of the hospitality so generously afforded them. It was their intention to have given this tea on the same day, but from the full handed-ness of the innkeepers of the town, who had the providing of the dinner, it was found inconvenient to do so; consequently the further liberality of these gentlemen was reserved for the present occasion. As in the case of the dinner, so it was in this instance, the innkeepers had the entire preparation of the whole affair and to make our report as brief as possible, with respect to the quality of the delicacies so amply provided, and to the general management of the concern altogether, we can only say, that they fully sustained the good character awarded to them on the occasion referred to last summer. The various kinds of bread ware of an excellent quality, adapted to suit the taste of the most fastidious. And the temperature of the “cheering cup," as well as its strength, was kept at a degree essentially necessary for the application of the common term "a good cup o' tea." The good landladies knew from self experience, the severe criticism to which their productions would be subjected; and to the best of our knowledge they have afforded the greatest satisfaction. We understand 600 had to be catered for—a hundred to each innkeeper—but the total number who sat down amounted to nearly 700; the amplitude of the preparations however, being quite adequate to meet the extras over the estimate. The day dawned with bright sunshine, and seemed as if the saint whom so many believe to have the ordering of the weather in his power at the present time, had condescended to honour the occasion by the bright and effulgent rays of a summer sun. St.

Swithin, however, whose rain (reign) is truly one of terror just now, did not depart from his usual routine of "raining" when he is king, for about midday the clouds began to close in, and gave unmistakeable evidence of what might be expected to form one of the ingredients of the days proceedings. About two o'clock there was a short shower, which fortunately, only lasted a short time; after which the remainder of the day was one of uninterrupted sunshine. The rain, contrary to ordinary usage, had the effect of increasing the number of tea-drinkers, by impeding operations in the hay-field, for had the day been free from it, doubtless several would have been tempted to have taken advantage of such an opportunity of winning their hay. A good while before tea, which was ordered to be on the table at four o'clock, the clouds dispersed, and the sun poured down his resplendent rays, enhancing considerably the pleasure of the day. To farther increase the day's enjoyment, the Mickleton Brass Bend, and also that of the 12th Durham Rifles were in attendance, playing alternately selections of fashionable airs daring the afternoon. It is a greet desideratum on such occasions to secure the presence of a band of musicians; and the very admirable manner in which the above acquitted themselves, was highly creditable. Precisely at the hour appointed, there was a full complement of ladies for the first table, and by the time they had satisfied themselves, a second division was ready, thus they proceeded until the whole were cared for; there being no stoppage throughout. We compared the clatter of the workmen's knives and forks at the dinner last year, to the noise of machinery; but we hope the ladies will pardon us the liberty of saying, that the comparison fell far short when placed in juxtaposition with the present occasion. Without expatiating further on this part of the day's procedure, we go on to state that, after tea, the entire number met in front of the residence of R. W. Bainbridge, Esq., where the suitable and lively air, “When shall we meet again?" was sung; after which one of the ladies, in appropriate terms, returned thanks to the gentlemen of the deputation—Octavius Wigram, Esq., J. W. Birch, Esq., and W. Gladstone, Esq.—for their kind and considerate attention to the wants of them and their families, concluding by wishing "Success to the London Lead Company." After this, it was intimated that the gardens and grounds of R. W. Bainbridge, Esq., were kindly thrown open during the remainder of the afternoon, to which large numbers repaired; the above bands playing whilst the large concourse paraded the grounds. The shades of evening setting in, brought to a termination the proceedings of a day which will long be remembered, and such marked kindness on the port of employers, cannot but be warmly and gratefully appreciated by their workman.

20th August 1861 (Carlisle Journal)

NENTHEAD.—The deputation of the London Lead Company paid their annual visit to the Lead Mines at Nenthead, on Tuesday, the 13th inst. These visits are always hailed with the greatest delight by the workmen, owing to the kind manner in which the deputation visit the houses of their tenants and workmen, and administer to the wants of those who stand in need. Last year they treated all their workmen (which in this district alone amounted to between six and seven hundred, with a good substantial dinner; and on Tuesday, last they provided tea for all their wives and widows. Three hundred and fifty partook of the same in the large schoolroom, fitted up for the occasion. The Union brass band was placed outside the schoolroom and the violin band inside, where

they played a variety of the most popular airs, which greatly enlivened the proceedings. On the following day Octavius Wigram, Esq., of London, governor of the company, entertained the scholars of the Nenthead and Garrigill schools with a splendid exhibition of magical figures and dissolving views, which was both amusing and instructive. Not less than 500 were present. On the following day, he gave a similar entertainment to the workmen and their families, when about 700 were present, the room being crowded to excess. A vote of thanks was then accorded to Mr. Wigram, for his kindness and condescension in affording such a delightful treat.

21st August 1861 (Teesdale Mercury)

MIDDLETON

Several interesting specimens of foreign curiosities have been added to the museum in the Lead Company's Reading Room, kindly presented by Mrs J. W. Birch, of London, some of which are of great antiquity. Amongst them are the following:—a couple of small baskets, wooden spoons, and a child's sandals, found in a tomb at Thebes, Egypt, supposed to be upwards of 2,800 years old. Water jar found in an old Indian tomb in Ambalema, New Grenada, South America. A sea porcupine, from the coast of Australia. Mummy cloth, in which the bodies of the Ancient Egyptians were rolled up after being embalmed. Pieces of rock which forms the base of the great pyramid in Egypt. Mummy Ibis, from the pits near Thebes. Basket made by children in Nubis, Upper Egypt; and a curiously carved milk bowl formed of half a gourd, also from Nubis. An excellent and perfect specimen of a fossil fish, picked up in his travels in Italy and Lombardy, has also been presented by Octavius Wigram, Esq., of London.

LINES COMPOSED ON THE OCCASION OF THE TEA PARTY

I wish again to make it known,
The kindness our employers have shewn;
It was display'd a year ago;
And now it cheers our hearts to know,
In all their doings they have not
The widows and our wives forgot;
It was a pleasing sight to see
Six hundred of them drinking tea.
Some say women (one war 'tis true)
Have little with their works to do
Yet Still a loving woman's smile
Can cheer the miner in his toil.
Yea, with the husband shares the wife
In all the cares and hopes of life;
Sickness or pain, whatever befall,
None like a woman can console.
I hate the man who, void of shame,
Can vilify a woman's name,
And call her silly, superstitious,
Vain, deceitful, or capricious,
There are exceptions, I'll agree.
They have their faults, and so have we.
No matter what men say about them,

We know we cannot do without them,
You'll see, if you will history scan,
They've done their part at well as man;
Nor energy nor courage lack'd.
When they're been call'd upon to act.
Know that 'twas in a woman's reign,
We crush'd the power of haughty Spain;
And 'twas when Queen Anne wore the crown,
That Marlborough gain'd so much renown.
And on the Continent broke all
The armaments of boasting Gaul.
And when hare we had such a one,
Since Alfred sat upon the throne,
Who has so much adored been
Aa our present gracious Quern?
And too much praise we cannot give
Her Majesty—long may she live!
We read of Joan of Arc, who broke
The fetters of a foreign yoke:
A Grace Darling, who on the wave
Did the poor shipwreck'd seamen save;
And nearly all have heard the tale
Of noble Florence Nightingale.
And in our dale, I do believe
A woman did the plan conceive
To form a Company to explore
The lead-veins, and employ the poor.
Brave hearts concurr'd in her designs,
And thus commenc'd the Teesdale Mines.
At that time 'twas a speculation
Which promis'd poor remuneration,
And did, as every one must know,
No mercenary motive show.
Since that time it has firmly wrought,
When other firms have come to nought;
And standing like a granite rock,
Impregnable to every shock.
Then let us give, with hearts sincere,
Our employers a hearty cheer;
And to their Superintendent give
One, too,—he's worthy to receive
Our humble thanks; all will agree
Throughout the mines, and say with me,
He has done all he could invent
To make us happy and content.
Then success to the mining trade,
May the mining interest never fade;
May our resources never fail,
And peace and plenty crown our dale.

RICHARD WATSON

24th August 1861 (Newcastle Daily Chronicle)
Died
Bay Bridge, near Blanchland, 21st inst., aged 43 Mr Wm. Robinson, formerly of Hunstanworth, and for many years agent to the Derwent Mining Company.
In 1851, at Hunstanworth, William Robinson, planner and surveyor, aged 32, born Hunstanworth, his wife Elizabeth, aged 23, born, Blanchland, and daughter Ann H 1.
In 1861, at Bay Bridge, Blanchland, William Robinson, merchant, aged 43, his wife Elizabeth aged 32, children, Charlotte Jane 8, and Caroline Matilda 4.
George Patrick married Elizabeth Robinson, 3rd quarter 1864, registered at Hexham
In 1871, at Blanchland, George Patrick, grocer, aged 43, his wife Elizabeth, 41, children, Caroline M Robinson 14, Mary Ann Patrick 5, and Elizabeth Patrick 2, (Charlotte Jane Robinson, 18, was working as a parlour maid, at Alnwick in 1871).

5th November 1861 (Carlisle Journal)

CHILD DROWNED IN A TROUGH

An inquest was held at Nenthead, Alston, on Saturday last, on the body of a child four years old, named Sarah Ann Hutchinson. On Thursday the child had been sent to a trough, the property of John Swindle, to fetch some water, and whilst in the act of doing so, she over balanced herself, fell in and was drowned. The jury returned a verdict of "Accidental death."
In 1861, at Wardway Foot, Nenthead, George Hutchinson, lead miner, aged 43, his wife Catherine 45, children, George 15, Elizabeth 6, Sarah A 3, and boarder, Jane Swindle, lead smelters widow, aged 65.
See 25th February 1843 & 25th December 1867.

9th November 1861 (Newcastle Guardian and Tyne Mercury)

PRESENTATION OF A TESTIMONIAL TO JOHN NEVIN, ESQ,

The proceedings in connection with the presentation of a testimonial to Mr Nevin, mining agent to W, B. Beaumont Esq., West Allendale, took place at Mr White's, Temperance Hotel, Ninebanks, on Saturday the 3rd Inst.; and though the matter had not fully developed itself more than four months since, the design has been in contemplation for three or four years. The more immediate cause of its taking place just now, however, is that Mr Nevin will shortly leave West Allendale, for Lead Hills, in Scotland, to enter upon the duties of chief agent to the Mining Company of that place, Mr Nevin may be taken as a type of the progressive tendencies of the age. He entered Mr Beaumont's mining office at Coalcleugh, 26 years since, as clerk, a stranger to those matters pertaining to practical mining. This want, however, he soon supplied, and gave proof of that unflagging energy and untiring perseverance which gained him the first agency in the district some 20 years since. It may scarcely be necessary, then, to state that Mr Nevin has discharged the duties of his late agency to the entire satisfaction of his employer; and has also gained golden opinions from the workmen in West Allendale, Indeed it is only doing an act of justice to this gentleman's great abilities in mining matters to state that he has for some years now stood confessedly foremost in the three counties of Northumberland, Cumberland, and Durham, as a practical mining agent.
The miners and other inhabitants of West Allendale, as soon as they became acquainted with Mr Nevins' intentions of leaving the district, set themselves to

work with right good will to raise a fund for the purpose of purchasing him a fitting testimonial. And when it is taken into account the length of time Mr Nevin has been amongst them, the kind consideration he has always evinced for their welfare, more particularly the fatherless and the person struggling with a large family; together with the various useful and benevolent institutions founded and patronised by him, and the parochial improvements he has been the means of accomplishing, without fee or reward, this act on the part of the people of the locality is no more generous and noble, than it is filling and wall earned on the part of the recipient. To have let him go from amongst them without some public recognition of his many valuable services and sterling worth, would have manifested the worst ingratitude on the Dale. But, judging from the circumstances connected with this case we venture to assert that the people of West Allendale are as ready to appreciate and reward a good action as Mr Nevin is to perform one, and this makes them deserving of their man In short, the regret would seem to be with all parties that Mr Nevin, from a desire to benefit his family, has chosen to leave a locality with which, both as regards himself and the people generally, so many pleasant associations are connected, and in which so many warm wishes for his welfare are treasured up The little village of Ninebanks was all astir on Saturday forenoon in making preparations for the proceedings of the day. The articles comprising the testimonial, consisting of silver tea and dinner services, were placed on a large table in the hotel for public inspection, and the place was crowded for several hours with persons desirous of gaining a sight of the costly gift. Tea, it had been announced, would be ready at three o'clock, and somewhat after that hour Mr and Mrs Nevin, with about fifty of their friends, sat down to table. Among those present we noticed the Rev. J. Scurr, Incumbent of Ninebanks, the Rev. Titus Emerson, Allendale Town, George Lee. Esq., Land Ends, and Mr G, G Leo, his son, John Wilson, Esq., Tailor Burn, Joseph Lee, Esq., Keenleyside Hill, and Mrs Lee. Wm. Wilson, Esq., Taylor Burn, Thomas Harrison. Esq., Greenlycleugh, Win. Montgomery, Esq., Bank Cottage, George Short, Esq., Park House, Wm. Taylor, Esq., Ninebanks, and Mrs Taylor, John Walton, Esq., Riding House, and Mrs Walton, Mr William Walton, postmaster, Haydon Bridge, Mr John Lee. Ninebanks House. Mr Matthew Henderson, Holme Lands, Mr William Hunter, Parmeatly Hall, Mr John Henderson, Ouston, Mr George Dickinson, Allendale Town, Mr Matthew Hetherington, Haydon Bridge, Mr William Taylor, Park Shields, Mr Joseph Henderson, Land Ends, Mr M, Lee, Horsley, &c., &c. After tea, of which about 100 partook, the presentation took place in the open air, no room in Mr White's being largo enough to hold the company present. The Rev. J. Scurr was chosen to preside, who in a few appropriate remarks, introduced Mr J. Craig, Kinsleyrow, who, as a miner, had been previously appointed to make the presentation address.

Mr J. CRAIG said: The committee Appointed to carry into effect the wishes of the miners and other inhabitants of West Allendale, with regard to presenting Mr Nevin with some token of their respect and esteem, for the many valuable services he has rendered to the district for the last 20 years, have chosen me as their mouthpiece on this occasion. Nothing is farther from my intention than indulging in those fulsome and adulatory statements so common on occasions like the present. We have no thought of ascribing perfection to Mr Nevin. Nor do we believe that all the past actions of our friend and master are free from

blame, or as shining and unsullied as the silver articles before us. But then he is all the more like ourselves on that account. I believe it is over 26 years since Mr Nevin came to West Allendale and entered Mr Beaumont's mining office, at Coalcleugh, as clerk. His knowledge of mining matters at that time, I can assure you, was very slender. Previous to that time, Mr Nevin wore a pair of strong, mudded shoes, cotton- cord trousers, and fustian jacket, and travelled on the Allendale turnpikes as a cartman, and how carted many hundred bings of ore from Barneycraig to Allan Mill, the very place of his late labours and achievements. You will not think that our master at that time had no thought nor wish to rise (no, no). The person who has cultivated his mind for anything that may turn up, and has thought earnestly about himself and those about him, and who is ever ready to prosecute to the almost every plan likely to lead to his social and pecuniary advancement, is the only one who can ever expect to succeed in this busy bustling and competing country of ours. Such a man was Mr Nevin, and we know the result. And Mr Nevin, as clerk at Coalcleugh, did not remain long in that position; for his active mind soon gained him the first: agency in the district, and he is now considered by competent judges to be one of the first practical mining engineers in the north of England (applause). Well, now let us look back at John Nevin, the cartman of 27 years ago, and then to Mr Nevin, the mining agent of to-day, and we may well wonder at the contrast, and acknowledge that there are but few such examples of individual success in the annals of our country (hear, hear) I know that some of you gentlemen, when making your fine wiredrawn speeches, tell us about Cincinnatus having been taken from the plough to serve his country. We working men know nothing of this strange person with the more strange still name; consequently, his exploits do not affect us in either head or heart.

But as to our distinguished master, we know that from being a drudge on the road, he has become a great man, and we think it an honour to him to place these circumstances of his eventful life before this meeting, boasting that Mr. Nevins' great success in life has afforded us the opportunity of pointing to the fact of his having risen so fast, and so far (applause). Coming still nearer to the object of our present meeting, I would just observe that Mr. Nevin’s eminent qualifications as a mining engineer are little ahead of his abilities as an agriculturist and architect (hear. hear). The improvements made by him on some of his farms, though not coming exactly within noticeable distance of our present proceedings, may be pointed to as first rate specimens of draining, manuring, planting, fencing, and all the other necessary arrangements for farming purposes in our locality, and his able, willing, and gratuitous labours as an architect are known to us all. The substantial bridges that span our streams, and the commodious and healthy schools for the training of our children, will be among the most enduring material monuments of his great abilities and active goodwill towards West Allendale (cheers). But after all the miners of this district, whose labours Mr. Nevin has directed for so many years, will long retain a lively recollection of his kind, considerate, and forgiving disposition, and would fain hope that they will be long remembered by him, when far away from the scenes of his late toils and triumphs (applause). West Allendale has become too circumscribed; here he has burst his bonds; left off his dead-level agency; and opened out shop at Lead Hills, there to revolutionise its book keeping, bargaining, washing, working, mechanical appliances, and other things, for the benefit of his employers, and

the extension of his own fame. Long may he live to enjoy the fruits of his past and future achievements, surrounded by a peaceful, prosperous, and affectionate family, in a happy home. It is little more than four months since it was first whispered that Mr. Nevin had some thought of leaving for a better situation in Scotland, and then there was also heard the whisper of "a testimonial.' A public meeting was immediately convened, which resulted in the appointment of a committee, whose duty it was to carry out the object of that meeting. The duties we have had to perform, and the reception we have met with from the people generally, have been of the most pleasant and gratifying kind. And now with our shillings, florins, half crowns, crowns, half-sovereigns, &c., we have been able to purchase the articles before us, and our regret only is that they are not more in number However, they are the free will offerings of a grateful people, and this, we are sure, will enhance their value in the estimation of those to whom we are about to hand them over. (applause)

Mr. Nevin, on rising to respond, was received with cheering. On this subsiding, he said: Mr Craig, Ladies and Gentlemen—It has pleased God to cast your lot and mine in an age of universal activity and progress an age in which every one who wishes to maintain his position in this stormy and uncertain life is called upon to do the best for himself whilst endeavouring to advance the interest and promote the welfare of those around him. This I certainly have done to the nest of my ability; feeling that it was a duty incumbent upon me not only as the humble representative of my employer in this district, but as a native of the parish in which I have so long resided. What Mr Craig has so kindly and ably stated to my advantage I cannot altogether agree with; for believe me that the success of the many enterprises that have been carried out during my residence amongst you must, in a great measure, be attributed to yourselves; for unity is strength, and I have no hesitation in saying that a more united people for good than, you are does not exist in any other parish; and so long as you have such gentlemen residing amongst you as I now see around me to take the lead in everything calculated to benefit the district, you need not despair of success in all your undertakings, although I am about to leave you with whom it has been my lot to associate on the most friendly terms for very many years past, and whose kindness towards me on all occasions I shall never forget (cheers), Mr Craig has stated, in too flattering terms, that I have been successful as a mining agent, and that I leave the mines of the district in a prosperous condition, More credit in this is due to my employer than to myself; for I do assure you that there is no gentleman in Great Britain that is more enterprising, or has the interests and welfare of those in his employment more at heart than Mr Beaumont, and his chief agent is equally as spirited and well disposed towards you (applause) Mr Craig has stated that of which, I dare say you are all aware, that I am about to leave this district for Lead Hills, Scotland. This charge was, a few months ago, as unlooked for as it was then in many respects unwelcome; but having now, as it were, crossed the Border, it is only for me to make the best of the change I can. I am determined to do my utmost to promote the interests of my present employers; and should it please God to grant me health and strength, with a few yeas of hard work and perseverance I have no doubt as to the ultimate result at; all events I will act so as to deserve success. But this, ladies and gentlemen, is somewhat foreign to the subject for which we have met

together. You have, it appears, too highly appreciated my merits; otherwise you would not have prepared this splendid testimonial for me, —a gift which. I assure you, I gladly accept, and for which I return you my warmest thanks. As a memento of your kindness I will ever cherish it, and trust to leave it to my family untarnished as a token of your kindness and good feeling towards me when about to leave this my favourite dale (applause), I have spent 26 years of the best part of my life amongst you; and during that period have had full opportunities of judging of your feelings and character, and have found them such that it is with the deepest regret on my part that we are about to be separated for a time at least: but wherever I may go, or whatever I may do, the good people of this parish, and more particularly of this district, will be dearest to me. I again thank you for your kindness, and gratefully accept this your precious gift (loud cheering).

At this stage of the proceedings, the evening being very cold, the meeting was adjourned to the hotel dining room, where a number of loyal and local toasts were given and responded to with the greatest enthusiasm the company doing ample justice to Mr White's teetotal wine. We must not omit noticing the Allendale Town saxhorn band being in attendance, led by Mr James Holms, who enlivened the proceedings with their spirit-stirring music. Altogether the proceeding was of a very sober and satisfactory kind, and was an honour to him to whom honour was due.

John Nevin son of John Nevin, farmer Burnlow, Allendale & his wife Elizabeth Ridley, born 12th April 1811, baptised 28th April 1811, at St Cuthbert's, Allendale.

John Nevin married Jane French 29th April 1841, at Allendale.

In 1841, at Coalcleugh, John Nevin, lead mine agent, aged 25, and his wife Jane 20.

In 1851, Agents House, West Allendale, John Nevin, lead mine agent, aged 39, his wife Jane 29, children, Margaret 8, John French 6, Robert Henry 2, and Elizabeth 4 months.

In 1861, at Carshield House, John Nevin, lead mine agent, aged 49, his wife Jane 39, children, Robert H, 12, Elizabeth 10, Jane F 5, Margaret A 4, George J 2. John French Nevin aged 16 was at School in Sedbergh, Yorkshire.

John Nevin died at Leadhills 30th July 1867

John French Nevin died 6th July 1878, aged 33.

In 1871, at Mansion House, Leadhills, Jane Nevin aged 48, children, John F, manager of lead mines, aged 26, Margaret A 14, and George J 12.

Jane Nevin died 23rd October 1877, aged 56, at Leadhills.

In 1881, at Holly Bank, Mirfield, Yorkshire, George Jackson Nevin, commercial clerk, aged 22, sisters, Jane French 25, and Margaret A. 24.

In 1891, at Flash Lane, Mirfield, Yorkshire, George Jackson Nevin, woollen manufacturer, aged 32, sisters, Jane F. 35, and Margaret A. 34.

In 1901, at Flash Lane, Mirfield, Yorkshire, George Jackson Nevin, manager of woollen mill, aged 42, sisters, Jane F. 45, and Margaret A. 44.

In 1911, at Selwood Cottage, Haydon Bridge, Jane French Nevin, private means, aged 55.

Probate 1926: George Jackson Nevin of Hill House, Allendale, died 3rd November 1925, administration (with will) Newcastle upon Tyne 22nd June to Jane French Nevin and Margaret Ann Nevin, spinsters. Effects £1091 8s 1d.

OF JOHN AND JANE NEVIN, WHO DIED
AT LEADHILLS, ON 6TH JULY 1879,
AGED 33 YEARS.

12th November 1861 (Carlisle Journal)

FATAL ACCIDENT AT GREENSIDE MINES.

On Friday last an inquest was held at the Royal Oak Inn, Keswick, before Thomas Howson, Esq., deputy coroner of the Western Division, and respectable Jury, on view of the body of James Mcintosh, who was accidentally killed at Greenside Lead Mines, on the instant. Charles McIntosh gave the following evidence:—I am brother of the deceased. He was twelve years of age, and has worked at Greenside Lead Mines about one and half years. He and I worked there on the 5th instant. He was driver, and had the management of a pony, which was used for drawing waggons on the tramway. He had also to shift the points to let the other waggons past; he used a coal-

rake for that purpose. About half-past four p.m. on the day in question, someone shouted that he had fallen over the wall, which is within few feet of the tramway. I looked towards the me, and saw him lying on the edge the rocks, having fallen distance of twenty feet. I made towards him, but before I could reach him he fell down the embankment into the water which runs from the reservoir. I endeavoured to get hold of him, but the water was running so strong that it carried him over a waterfall before I could do so. I then lifted him up, he was bleeding about the head, and seemed to be much injured, and begged of me to lay him down again. I think he must have been in the act of turning the points when he fell, for they were half turned after the accident occurred. Teasdale McIntosh, father of the deceased, stated that he lived at Brigham, and was working at Greenside the day that his son was killed, and assisted in conveying him home. He died on the turnpike road, when about three miles off. He was attended by Dr. Rumney, of Watermillock, who stated that death was caused from fracture of the skull and compression of the brain. The jury, without hesitation, returned a verdict of "Accidental death," and presented the father of the deceased with their usual fee of six shillings. Since the accident occurred the company have caused railings to be placed by the side of the wall alluded to, in order to prevent accidents future.

29th November 1861 (Carlisle Journal)
Marriages
At Garrigill Church, on the 21st inst., Mr John Hodgson, Little Gill, to Ann, youngest daughter of Mr Joseph Lancaster, Garrigill Gate.
Joseph Lancaster married Jane Murrah (daughter of William Murrah and Margaret Bell, born 17th March 1803), 20th November 1822, at St Augustine's, Alston.
In 1841, at Garrigill Gate, Joseph Lancaster, lead miner, aged 40, his wife Jane 35, children, Sarah 15, Joseph 13, Jane 10, Ann 7, William 4, and Thomas 2.
Jane Lancaster was buried 27th August 1849, aged 46, at St John's, Garrigill.
In 1851, at Iving, Garrigill, Joseph Lancaster, lead miner, aged 52, children, Sarah 25, Joseph, lead miner, aged 23, Ann 16, William 14, Thomas 11, Isaac 9, and Mary 4.
In 1861, at Garrigill Village, Joseph Lancaster, widower, stone mason, aged 61, children, Ann, house maid, aged 25, William, stone mason aged 22, and Isaac, stone mason aged 18. See 25th February 1865
In 1871, at Garrigill Gate, Joseph, Lancaster, widower, stone mason, aged 72, and his son Isaac, lead mine labourer, aged 27.
Joseph Lancaster of Iving, Garrigill, was buried, 16th March 1875, aged 76, at St John's, Garrigill. See 20th March 1875, & 8th June 1878

Stephen Hodgson, married Elizabeth Parmley, 8th September 1823, at St Augustine's, Alston.
In 1841, at Little Gill, Low House, Stephen Hodgson, lead miner, aged 50, his wife Elizabeth 40, children, William, lead miner, aged 15, Stephen, lead miner, aged 15, Thomas 13, Mary 10, and John 7.
Stephen Hodgson of Little Gill, was buried 27th March 1848, aged 61, at St John's, Garrigill.

St John's Church Yard, Garrigill

STEPHEN HODGSON
DIED AT LITTLE GILL
MARCH 25TH 1848
AGED 61 YEARS
MARY ANN HIS DAUGHTER
DIED SEP 21ST 1868
AGED 37

In 1851, at Garrigill, Elizabeth Hodgson, widow, farmer of 30 acres, aged 54, children, William, lead miner, aged 28, Stephen, lead miner, aged 26, and John, lead miner, aged 17
In 1861, at Little Gill, Garrigill, Elizabeth Hodgson, widow, farmer, aged 70, children, William, lead miner, aged 37, Stephen, farmers son, aged 35, John, lead miner, aged 27, Mary Ann 30, and granddaughter, Elizabeth Hodgson aged 6.
Mary Ann Hodgson of Little Gill, was buried 24th September 1868, aged 37, at St John's, Garrigill. See 26th September 1868
In 1871, at Little Gill, Elizabeth Hodgson, widow, farmer of 125 acres, aged 79, son William, farmers son, aged 47, and granddaughter, Elizabeth Hodgson, aged 16.
In 1871, at Garrigill Gate, John Hodgson, lead miner, aged 37, his wife Ann 36, children Jane 8, Elizabeth 5, and Stephen 1.
Elizabeth Hodgson of Little Gill, was buried 7th February 1880, aged 90, at St John's, Garrigill.
Jane Hodgson married Thomas Bardgett (a miller), 4th quarter 1880, registered at Penrith.
In 1881, at Garrigill Gate, John Hodgson, lead miner, aged 47, his wife Ann 46, children Stephen 11 and John 4.
In 1891, at High Beldy, Garrigill, John Hodgson, lead miner, aged 57, his wife Ann 56, children Stephen, lead miner, aged 21 and John, farmer & carrier, aged 14.
In 1901, at Castle Terrace, West Lane, Penrith, John Hodgson, retired miner, aged 67, his wife Ann 66, son John Joseph, grocers carter, aged 24, and granddaughter, Edith Bardgett, dressmaker, aged 18.
John Hodgson, died 4th quarter 1905, aged 72, registered at Penrith.
Ann Hodgson died 4th quarter 1907, aged 71, registered at Penrith.

St John's Church Yard, Garrigill

In Loving Memory
of

10th January 1862 (Durham Chronicle)

NENTHEAD READING ROOM.—The members of this institution held their anniversary New Year's Day, when 120 sat down to an excellent supper. The Rev. J. Robinson, incumbent of St. John's, Nenthead, occupied the chair, and Mr John Hyslop the vice chair. After the cloth was removed, the chairman gave a very interesting address on the institution. Several toasts were afterwards given and responded by the vice-chairman and other members of the society. Mr Raisbeck's violin band was attendance, and greatly enlivened the proceedings by playing variety of the popular airs and Mr James Atkinson also sung a number of melodies. After a vote of thanks to the chairman for his services, the meeting separated.

21st February 1862 (Carlisle Journal)
THE SUPPLY OF WATER AT ALSTON.—On Friday, the 8th inst., a meeting of the inhabitants was held in the Town Hall, to take into consideration the very defective state of the water supply, Mr. J. M. Pauli in the chair. The chairman read a report which he had drawn up, setting forth the necessity and uses of a good supply of water, in a local and sanitary point of view, to the inhabitants of the lower part of the town especially. Dr. Arnison moved, and Mr. J. Watson seconded, “That this meeting, having its attention drawn, particularly by the report just read, to the state of the water supply, pledges itself to assist as far as possible in devising means for carrying out the object forming the subject of its consideration." Moved by Mr. Thomas Little, and seconded by Mr. Thomas Ramsay, “That a committee be appointed to enquire more particularly into the existing state of things, and determine proximately the amount of money capable of being raised by subscriptions, &c., and report on that point at a future meeting, to be held within a month from this date." The above resolutions were carried unanimously, and Mr. John Cowper proposed, and Mr. J. Dickinson seconded, “That Messrs. C. Arnison, T. Little, J. Walton, S. Ramsay, and G. Thompson, form the committee to act in accordance with the above resolutions." This was also carried, and the meeting separated.

RIVER TYNE COMMISSION

The usual monthly meeting of the River Tyne Commissioners was held yesterday, in the Boardroom. Mr. Cowen (chairman of the Commission) once more presided, and was warmly congratulated by his colleagues.

THE POLICE, BALLAST, AND MOORINGS COMMITTEE.

This committee reported relative to the memorial of the Pelaw Main Colliery owner, as to the speed of the river steamboats, that it; had been arranged that the harbour master should issue a handbill. Inspector Dowson reported that he, on the 2nd inst., proceeded on a visit of inspection to Allendale. He passed through the lead works of W. B. Beaumont, Esq., M.P., and found a large quantity of ashes and other refuse from the works put into the river Allen, which in done by being brought in wheel barrows and sent over the bank side; and on the occasion of storms and land floods, the waters flow amongst it, and carry it down to the river Tyne. He also saw a wire screen at the works placed over a runner of water Rowing into the Allen; and that screen was used for the purpose of separating the ash dust from cinders. This had been done by the order of Mr. Thomas Steel, chief agent at the mills. At Allenheads he saw a large quantity of lead refuse and sand mixed, lying in the river Allen, which passes through the works at that point, and the bed of which is paved with stones about 300 yards below the works. He saw a man and a boy washing lead ore. After separating the lead from the sand and refuse, the boy wheeled the sand and refuse in a barrow and tilted it into the river. That was done by

the authority of Mr. Bewicke. The distance of this part of the Allen from its juncture with the Tyne was about four miles. The committee recommended that a representation of these facts should be made to Mr. Sopwith, Mr Beaumont's chief agent.
Mr. Clayton said he was sure Mr. Beaumont would do everything that was necessary.

17th June 1862 (Cumberland and Westmorland Advertiser, and Penrith Literary Chronicle)
Marriages

27th June 1862 (Carlisle Journal)
6th CUMBERLAND (ALSTON) RIFLE VOLUNTEERS.
This Corps was inspected Colonel Wake on Friday afternoon last. The members mustered at the drill ground at 3 o'clock, and after having been proved and formed up at open order the Colonel was received with presented arms and inspected the Company. After having marched past in quick time Captain Dickinson took the command, and the corps was put through several movements as a centre company of an imaginary battalion, a system of drill of which the Colonel highly approved, and also through some light infantry drill. At its conclusion the Colonel addressed the members of the Company, and expressed in decided terms his pleasure at the very unexpected and efficient manner in which the Company had drilled, especially alluding to their silence in the ranks, dressing, &c. He complimented the drill instructor on his system of drill, and impressed on the members the necessity of attending regularly at drill, preparatory to the forthcoming Review at Carlisle, where the corps will appear in scarlet, the future uniform of the battalion. Three cheers having been given for the Queen, and three for Colonel Wake, the men were marched to headquarters and dismissed. The muster roll contains the names of upwards 70 members, of whom 46 appeared at the inspection.

11th July 1862 (Carlisle Journal)

1st August 1862 (Durham Chronicle)
Durham Summer Assizes
CIVIL SIDE, WEDNESDAY, JULY 30.
(Before Mr Justice MELLOR]
THE QUEEN v. THE INHABITANTS OF STANHOPE.
Mr JAMES. Q.C., and Mr Davison for the prosecution; Mr Sergt. Atkinson and Mr Overend, Q.C., for the defendants. Mr Davison opened the pleadings. Mr James, in opening the case, said this was an indictment against the inhabitants of the parish of Stanhope; and charged them with the non-repair of a highway. There was a turnpike road called the Lobley Hill Road, leading into and towards a certain common highway in the parish of Stanhope. In common law all public highways were repairable by the parish in which they were situate. There was no doubt in the world that the road in question was in the parish of Stanhope, and if he proved that the road existed, the inhabitants of Durham would no doubt be bound to repair it. The real question for the jury to determine would be whether or not there was a road in existence. The road which had been indicated commences from the turnpike road called the Lobley Hill Road, and which extends in a direction from Stanhope to Wolsingham, through Frosterley, and from Frosterley the road continued over the Wear by a bridge, and then came on to a place tailed Bolyhope Common. The road passed along the common and on to Bollyhope smelting mills. It then passed along the road until it came to a place called Shaftwell Head, and there it joined another highway which was indisputably a highway. The indicted road extends from Bollyhope smelting mills to Shaftwell Head, and then joined the higher road

leading from Stanhope to Barnard castle and Middleton in Teesdale. Mr James then observed that he did not think it necessary to go at great length into a matter of this description, because it was entirely a matter of fact, but be would prove that so far back as living memory extends, this road had been used commonly for carts and carriages by her Majesty's subjects, whenever they pleased to use it. —A number of witnesses were called on the part of the plaintiff to prove that this was a high road, and had been for many years. Witnesses were being examined when the Court rose until Thursday.

CIVIL SIDE, THURSDAY, JULY 31.
THE QUEEN v. THE INHABITANTS OF STANHOPE.

The hearing of this case was resumed by continuing the evidence for the plaintiffs. The case occupied nearly the whole of the day. The proofs adduced on the part of the plaintiffs having been closed. Mr OVEREND addressed the jury for the defence at considerable length. —A great number of witnesses were then called to prove that the road in question was not a public road —The jury, after consulting for about ten minutes, found a verdict for the defendants. —Mr Bainbridge, of Alston, was solicitor for plaintiff; Mr Hutchinson, of Stanhope, for the defendants.

At Alston Church, on the 9th inst., Mr Thompson Spark, joiner, of Birkenhead, late of Alston, to Miss Ruth Dixon, of Alston.

10th September 1862 (Teesdale Mercury)
MIDDLETON-IN-TEESDALE
On Tuesday last, the London Lead Company, with that liberality which forms so prominent a feature in their character, gave the scholars and teachers of their workmen's children of the various schools in the Teesdale district, a treat to an excellent dish of tea. The afternoon bore a threatening aspect, large dark clouds forming themselves in rapid succession, as if about to burst upon the interesting spectacle below. Precisely at 4 o'clock, the scholars assembled at the Old School Room, marched in front of Middleton House, down Hude, and passed the Rose and Crown Inn to the Lead Company's School-room. Having reached the building, the girls entered, whilst the boys proceeded to the Old School again. About 840 scholars, and 60 teachers and waiters sat down, and the sight was one which never was witnessed before in this locality. It was a most pleasing spectacle to see so large a number of the rising generation all met together, and decked out in their best; and not the least amusing part of the scene was the justice done to the provisions set before them, and to listen to the curious remarks passed from one little fellow to another. The Band of the 12th Durham Rifles was stationed outside the building, and performed with their accustomed ability, a selection of fashionable music. There was a large assemblage of spectators, and the scene was one in which every person present appeared to be interested. The deputation from the Company's Court of Directors were present on their annual visit, and evinced as keen an interest in the proceedings as any that were present. The whole affair throughout was conducted in a most satisfactory manner, and was an event long to be remembered by all who witnessed it. We reserve a description of the New School for a future occasion.

16th September 1862 (Carlisle Journal)
CRICKET
ALLANHEAD V. NENTHEAD.
The above clubs have played two matches this season—the first came off at Allanheads *(sic)*, on Friday, the 27th June, when the Nenthead club won easily; the second match came off at Nenthead on Saturday, September 6th, when the Nenthead club again came off victorious. The day was one of unclouded sunshine, and a beautiful flag fluttered in the breeze, on which was inscribed that appropriate motto "Let there be harmony." The Nenthead Brass Bind enlivened the game by playing at intervals in beautiful style. The members and friends, to the number of about fifty, sat down to an excellent dinner, provided by Mr. Jos. Blacklock, in his usual excellent style. The evening was agreeably spent, the band dispensing sweet and appropriate music. Songs, toasts, and sentiments followed in due course, and the

uninterrupted good-will that has so long existed between these clubs seemed more strongly cemented.

19th September 1862 (Carlisle Journal)
NENTHEAD.—This place was visited this week by the deputation of the London Lead Company, who treat all their workmen's children who attend the different schools in the district, and all the Sunday school teachers, with an excellent tea. Last year this noble and generous Company gave all their workmen's wives tea, and the year before all their workmen, numbering nearly 800, an excellent dinner, and this year they have not overlooked their children. The teachers and scholars all met at the Nenthead School-room, on Friday last, and marched in procession, headed by the Nenthead brass band, to the District House and back. The day was fine, and the roads thickly lined with spectators to see all the children marching in such good order, and so well trained by their excellent master, Mr. Hyslop, and each class attended by their Sunday school teacher. Upwards of 600 sat down to an excellent tea, served up by the three innkeepers of the village, viz., Mr. Blacklock, Mrs. Moffat, and Mrs. Shields, who all did their utmost to excel each other in the richest pastry and the best furnished table. After doing justice to the good things provided, the band played the National Anthem, and the company dispersed, highly gratified.

26th September 1862 (Carlisle Journal)
Deaths
At Alston, on the 22nd inst., Elizabeth, wife of Mr William Fulton, aged 59 years.
William Fultan born 14th February 1803, 1st son of John Fultan, Alston, hairdresser, native of Hexham, and his wife Elizabeth daughter of William Watson.

23rd January 1863 (Durham Chronicle)
FATAL ACCIDENT IN A LEAD MINE NEAR STANHOPE. —
An inquest was held at the house of Joseph Askew, publican, Crawleyside, near Stanhope, on the body of John Collinson, a lead miner, who had been killed by a quantity of stone and lead ore falling upon him whilst working in the Cornish Hush Lead Mine, on the 14th instant. A man named Bainbridge and deceased ware working together, and about two minutes before the stone fell Bainbridge had retired about five feet from where they were working to smoke his pipe, when the stone fell upon poor Collinson. The stone was removed off him in a short time, but he was quite dead. Verdict, accidental death.
John Collinson, of Crawleyside, aged 26, buried at Stanhope, 17th January 1863.

10th February 1863 (Cumberland and Westmorland Advertiser, and Penrith Literary Chronicle)
Deaths
On the 12th ult., Hannah Crosby, infant daughter of Mr Jonathan Walton, Donks Villa, Nenthead, aged 5 weeks.

13th February 1863 (Newcastle Courant)
Deaths
At Mansfield Street, on the 9th inst., aged 60, Ann, relict of Mr George Bainbridge Dixon, of Ludwell, Stanhope, Weardale.

14th March 1863 (Newcastle Journal)
THE LATE JACOB WALTON, ESQ., ALSTON.
With sincere regret we announce the death of this deeply lamented gentleman. The melancholy event took place at his residence, Green Ends, near Alston, on the 2nd inst., in the 54th year of his age. Extensively engaged in mining operations, both as a proprietor and practical engineer, Jacob Walton was well known and highly respected throughout the mining districts of the northern counties. By his varied intelligence urbanity of manners, and

honorable conduct, he had gathered around him a numerous band of sincere and attached friends, who deeply deplore his death.

Jacob and Phoebe Walton, family memorial Alston Cemetery

In the locality where he lived, he had secured the goodwill of all classes, and his removal is regarded as a public loss.

His remains were committed to their last resting place, in the New Cemetery, Alston, on the 6th, in the presence of a numerous company of sincere mourners; and, in order to testify the utmost respect for his memory, all the shops in the town were closed on the occasion

Jacob was the son of Jacob and Mary Walton, baptised at Redwing Chapel on 25th April 1809, his father was an enterprising lead miner and businessman who had a number of valuable mining leases namely Brownlee Hill. He married Phoebe Pears on 22nd December 1836; they had 8 children, Mary, John Pears (See 25th September 1875), Jane (See 12th July 1865), Phoebe (See 23rd December 1876), Frances (See 12th July 1865), Margaret (See 15th September 1868), Sarah (See 7th March 1874) and Jacob. Like is father he

was an excellent businessman and developed the families' interest in lead mining taking many profitable leases and having shares in many mines not least Fallowfield mine.
The Family history is described in depth in the book by Alastair Robertson "The Walton Family, A Lead Mining Dynasty of The Northern Pennines" published 2004.
See 14th May 1836, 13th June 1840, and 23rd November 1864.

17th March 1863 (Cumberland and Westmorland Advertiser, and Penrith Literary Chronicle)
Marriages

In 1861, at Hill Top, Nenthead, Jane Havelock, lead miners widow, aged 71, son Ridley, lead miner, aged 37, son Thomas, lead miner, aged 33, and daughter Elizabeth 30. See 14th August 1875, 22nd April 1882

18th May 1863 (Carlisle Journal)

Nenthead.—An inquest was held on Thursday last at Nentsbury, upon the body of John Bell, a lad 14 years of age, who met with an accident on the previous Tuesday which resulted in death. The unfortunate lad while engaged there on the day in question, fell between the rollers of the Dow Gang Leadmine Crushing Mill, at Nenthead. One of his legs was torn off below the knee, and amputation of the limb at the thigh joint was deemed necessary, but the lad did not survive the accident more than five hours. The jury returned a verdict of accidental death.

In 1851, at Hayring, Nenthead, William Bell, lead miner, aged 51, his wife Mary (Faucet, married 11th June 1825?) aged 45, children William, lead miner, aged 20, Sarah 17, Thomas, lead miner, aged 14, Mary 11, Ann B 8, John 2, and lodger John Low, lead miner, aged 22.

In 1861, at Cloghall, Nenthead, Mary Bell, lead miners widow, aged 55, sons, William lead miner, aged 30, and John lead miner, aged 12.

In 1861, at Low Grassfield, Nenthead, Thomas Fairless, lead miner, aged 23, born Stanhope, his wife Mary 21, and daughter Sarah Bell Fairless, aged 2.

In 1871, at Haggs Foot, Nenthead, Mary Fairless, widow, char woman, aged 31, children Sarah 12, John 9, Mary Ann 7, and brother William Bell, lead miner, aged 40.

Thomas Fairless died 1st quarter of 1865; Mary Bell died 1st quarter 1869.

19th May 1863 (Cumberland and Westmorland Advertiser, and Penrith Literary Chronicle)

Deaths

12th June 1863 (Newcastle Courant)
FATAL ACCIDENT AT THE DERWENT MINES.—On Thursday morning, about eight o'clock, a serious and fatal accident occurred at the Derwent Mines, near Blanchland, by which two men lost their lives. In the 80 fathom level, about 15 fathoms north of "Taylors Shaft," four men were employed in plate laying, and while two of them, named respectively John Nattrass, of Stanhope, and George James, of Shildon, were in the act of carrying plate, a piece of timber, over which they were passing, and which formed part of the platform, or, what is termed in mining phrase, a " bunning," broke, and the

unfortunate men were precipitated to the depth of six fathoms, falling in contact with the mouth of a hopper. The most speedy exertions to reach them were made by their companions, but ere relief could be afforded both were quite dead. From their external appearance death must have been instantaneous. The bodies were afterwards removed to the Pressure, where an inquest was held on Saturday, be fore Mr Favell, coroner, at which it appeared that the fall of the timber had resulted from its being injured about five feet from its end. This was supposed to have been produced by the effects of "shots" in a part of the mine. A verdict of accidental death was consequently returned. Nattrass was 53 years of age, and although he resided at Stanhope, had been employed at the Derwent Mines about 40 years. He has left a wife and five children to lament their loss. James was an unmarried man, only 29 years of age, the chief support of his widowed mother.
John Nattrass aged 54, was buried at St Thomas, Stanhope, 7th June 1863.
In 1851, at Blanchland, William James, lead ore miner, aged 59, his wife Susannah 52, children, John, lead ore miner, aged 26, Thomasin 25, William, lead ore miner, 21, Ann 19, George, lead ore miner 17, and Mary 13.
William James died 4th quarter 1855, registered at Hexham.
In 1861, at Shildon, Blanchland, Susanna James, widow of lead ore miner, aged 62, sons, William, lead ore miner, aged 32, and George lead ore miner, aged 27.

3rd July 1863 (Carlisle Journal)
Deaths
At Alston, on the 30th ult., Thomas, eldest son of Mr John Dryden, aged 21 years—deeply regretted.
In 1861, at Main Street, Alston, John Dryden, widower, Ironmonger & sub postmaster, aged 65, children, Jane , fathers assistant, aged 25, Thomas, fathers assistant, aged 19, John 14, and house servant, Isabella Pearson aged 35. See 13th March 1869.

7th July 1863 (Cumberland and Westmorland Advertiser, and Penrith Literary Chronicle)
ALSTON.
PIC-NIC TO CROSSFELL.— On Tuesday last between 40 and 50 ladies and gentlemen from Alston, Nenthead, and Garrigill, a held pic-nic on that immense and beautiful mountain, which is twenty miles in circumference at the base, and rising to the height of 2,901 feet above the level of the sea. The day being exceedingly fine added greatly to the enjoyment of all parties, but more especially to those desirous of minutely contemplating the works of nature in that beautiful panorama which was on this occasion set before them. After having partaken of a splendid lunch at the "Gentleman's Well," the party ascended to the summit, where they dispersed in groups to enjoy themselves after their own fashion, some making botanical and mineral researches, others enjoying themselves in innocent games, whilst some sat down on the slope of the hill to view the plain beneath, whose utmost boundaries no naked eye can penetrate, whose beauties no tongue can describe. Here gulfs yawn and precipices threaten, beyond, the high hills dance in the reflecting waves of the Solway, and the calm lake Ullswater gently washes the distant shore: whilst afar off may be seen the lofty Helvellyn and Skiddaw rearing their august

heads. As the evening was last waning and the sun began to tinge the far horizon, the pleasure-seekers began to return to the well, where they in groups partook of an excellent tea, and where the ladies very justly received great credit for the substantial manner in which they served up the refreshments of the day. Three cheers having been given, the party wended their way down to the different mining shops where conveyances awaited them, all evidently highly delighted with the day's enjoyment.

21st August 1863 (Carlisle Journal)
Deaths
At Glenridding, Patterdale, recently, Mrs Millican wife of Mr Joseph Millican, band master, aged 43 years.
Elizabeth Millican died at Patterdale 2nd August 1863.
Joseph Millican married Mary Tuer 12th November 1864, at Patterdale; this was Mary's 2nd marriage Mary Arnison married William Tuer 2nd quarter 1854, registered at Penrith, William Tuer died 2nd quarter 1855, registered at West Ward, Westmorland.
In 1871, at New Bridge Cottage, St Johns in the Vale, Keswick, Joseph Millican, lead miner, aged 53, his wife Mary 37, children, Edwin 17, Eliza 14, Robinson 11, Charles 5, Elizabeth 4, Arnison 2, and Emma 3 weeks.
In 1881, at Bisks Rd, Cleator Moor, Joseph Millican, iron ore miner, aged 63, his wife Mary 47, children Edward, iron ore miner, aged 25, Robert, engine fitter, aged 21, Charles, miners labourer, aged 16, Elizabeth, housework, aged 14, Arnsion 12, Mark 7, Thomas 4, and Hannah 9 weeks.
Possible death, 4th quarter 1884, registered at Whitehaven.
In 1891, at 10 James Street, Cleator Moor, Mary Millican, widow, aged 56, sons, Mark, iron miner, aged 16, Thomas 14, and Sarah Stainton 2.

Hannah Millican married John Richardson 14th December 1833, at Patterdale.
In 1841, at Forge, Church Coniston, John Richardson, copper miner, aged 30, his wife Hanah 25, children, Thomas 6, John 5, Mary 2, and Mark 2 weeks.
In 1851, at Farrend, Church Coniston, John Richardson, copper miner, aged 43, born Hilton, Westmorland, his wife Hannah 38, children Thomas, copper miner, aged 16, John, copper miner, aged 15, Mary 12, Mark 9, Sarah 7, Wesley 4, and Hannah 1.
Hannah Richardson died 1st quarter 1852, registered at Ulverston.
In 1861, at Farrend, Church Coniston, John Richardson, copper miner, aged 53, his wife Margaret 46, children, Mark, iron miner, aged 19, Wesley, copper dresser, aged 14, Hannah 11, and Edward 7.

Wesley Millican emigrated to Australia, http://www.theshipslist.com/ gives the following information: The ship "Eastern Empire" arrived from London 7th March via Plymouth 16th March arrived at Port Adelaide, South Australia 20th June 1864. On board Wesley Millican aged 34 miner from Lancashire, his wife Jane 34, children Hannah 2, Elizabeth 1 and Mary infant.
The South Australian Register of 26th August 1891, recorded the death on the 24th August at Kapunda, Jane the beloved wife of Wesley Millican aged 62 years.
Wesley Millican died 24th March 1909, aged 80.
The Advertiser (Adelaide) 25th March 1909, reported, "The friends of the late Mr Wesley Millican are respectfully informed that his funeral will leave the

Kapunda Railway station on arrival of the 2 pm train, Thursday for the Clare road Cemetery."

The Kapunda Herald of 26th March 1909, reported

"Yesterday afternoon the remains of the late Mr. Wesley Millican were brought to Kapunda from Tickera, Y.P., for burial. He had been residing with his eldest daughter (Mrs. J. Rothwell). Mr. Millican was a very old resident of Kapunda, having started work in the Kapunda copper mine in 1854 and continued until it closed in 1878. Subsequently at various times he worked on the property as a tributer. He was a member of the Kapunda Town Council for a term, representing East Ward. A few years ago he removed from Kapunda for the purpose of residing with one or other of his children. The deceased joined the Sir John Franklin Lodge of Oddfellows, M.U., in 1864, by clearance from the Pride of Westmoreland Lodge, M.U. (England). He was in his 81st year at the time of his death. The remains were interred in the Clare-road Cemetery."

25th August 1863 (Cumberland and Westmorland Advertiser, and Penrith Literary Chronicle)

PATTERDALE. Accident at Greenside Mines. —John Atkinson, of Matterdale, a workman at these mines, was lately seriously injured by the explosion of shot. Soon after the accident it was found necessary to amputate two fingers. One hand is completely shattered and one eye blinded. The sight of the other eye it is expected he will regain. He still lies in precarious condition.

4th September 1863 (Newcastle Daily Chronicle)

DESCRIPTIVE SKETCH OF THE MINE AND TOWN OF ALLENHEADS

THE members of the British Association having availed themselves of the opportunity of visiting Mr. W. B. Beaumont's extensive Lead mines at Allenheads, it may interest the readers of the Chronicle to-day to learn something of that interesting a remarkable district. Having visited it, I have been requested by the Editor of this Journal to furnish such an account as may serve to illustrate the observations of the visitors of yesterday. …

However, the wonders of Allenheads lie in the mines below. To see these, it is necessary to put on the miners' attire. Cottered up in a pair of trousers intended to fit Sir John Falstaff; with a waistcoat and jacket worn by somebody narrow enough to have given Mordan his idea of a pencil case, and surmounted by a broad brimmed hat with a great hole in the front, probably to let the water trickle through, you are equipped for the undertaking. The descent, which is ninety-two fathoms to the Blackett level, is an unusual sensation to the stranger; it is like descending into a grave, a desperately deep and uncomfortable one too. To look into it, makes your head-dizzy. You looked down and down into the iron bound chasm, until your eye is met by a cloud of floating vapour, through which you have to pass; and the utmost reach of vision is not a tenth of the depth you have to penetrate. The prospect is as when you lean over the water and look upon the clouds reflected in it until you feel as though you were about to fall into the eternity of bottomless sky below. You step into a wet square box of iron, taka a candle stuck in wet clay, which yon think is hardly enough to light you, to tumble out of which you feel every prospect Mr Curry—the most careful of conductors steps over you,

and he standing there, you begin to descend. Squatting down in the box, being well advised to keep your headstall, and your hands well within your adopted coffin, the water drops upon you with subterranean freedom. You wonder why; the chains do not break, and precipitate you to the bottom. It is true they never have broken, but they might, and you have no doubt that they will take that occasion of doing it, you descend and descend, the iron grooves rattle, the water splashes, and new sensations so entirely possess you, that the world you have left, seems a dim dream of a past existence. You suddenly see a man standing in a dark cavity, holding a candle in his hand, in the most unconcerned way imaginable. This is one of the inhabitants of the underground world, whose cool undisturbed matter of fact presence is reassuring. Before you are aware that you have cessed descending, you are asked to step out, which rather alarms you at first; you don't see how the thing is to be done, next; you are aware that the shaft descends much deeper down, and you expect nothing less than to tumble over in the attempt to land. When you are helped out you discover a horse and a chubby-faced boy of 18 or 14 waiting to drive you into the interior. You are invited to sit in a hopper-shaped waggon, which has no seat, into which you sink by gravity and rest by percussion. In fact, you are shaken and condensed until you fit the place. Your carriage reminds you of those cages of the old tyrants, in which the person enclosed could neither sit, nor stand, nor lie. Mr Curry easily adjusts himself by art and habit, and sits right opposite to you, holding his candle between his knees. Your best course is to observe his immobile position, for immediately
Chubby-face gives the horse a lash, and away you are dragged up a narrow granite-looking channel a mile and three-quarters in length. The horse's feet splash in the water, and the iron wheels rattle along the dubious way. At every point the jutting crags appear to block the passage. The least you expect is that your ears will be scraped off by the ugly projections, and you are afraid to and you are afraid to turn up your eyes lest the lashes should be abraded by the crags ever head. It is a consolation to look Into Mr Curry's quiet face and see that his head remains still upon his shoulders. Ever and anon the channel turns off almost at right angles, and you see when this is going to happen from Chubby-face’s sly leer as he strains himself to get a sight of you over Mr Curry’s shoulder, well knowing that he is going to give you a tremendous jolt, the effect off which he evidently enjoys. Suddenly you pass by a gloomy cavity in which stand a row of miners, who are waiting for you to pass. As they stand up with their long, naked, muscular arms and beetling bonnets, each with his candle in his hand—they look like a row of illuminated saints, such as occupy the niches of the old cathedrals. After a time you get out and wade up to your ankles in water, dodging the tramway for a resting place, holding by the wet rocks to prevent your taking a subterranean bath at full length. At last you find yourself at the end which turns out to be a small hole in a limestone rock whom the miners are burrowing with candles in a cloud of powder smoke, and banging like blacksmiths at a long chisel with which they, are boring preparatory to blasting.
As you contemplate the length of way you have come and the depth you are below the earth, a sense of oppression comes over you. The whole superincumbent weight of the world seems to lie upon you, and to be about to crush you. You gladly retrace your steps, when you come upon another wider and gloomier passage, when you learn that far far below you, as far as you

have descended, lie other subterranean excavations, another colony of men performing the same operations, but your eagerness to join them has considerably decreased. In an angle of the darkness your attention it drawn to a ladder, which stands over a chasm and rests precariously against a hole above. You know it is a hole, for a glimmering light assures you of it. When you have climbed up not without trepidation—-for your knees are always in the way, and the steps feel nowhere, you find yourself in another long channel of the great Henry vein. As far as the eye can see, candles glimmer and blasting operations resound, and the smoke, like a thick grey cloud, gives you a sense of suffocation. You arrive at a heap of stones, which nearly touch the roof, over which you climb in a stooping posture, and slip down into a deeper pit and a denser cloud. On you travel to other heaps, over which you climb in a similar way. You feel all return hopeless, and see only a choice between being crushed to death and suffocated. But on your way your glimmering candle reveals to you the wondrous miracles of the mine. You are face to face with the elementary facts of geology. You are in the very heart of the limestone. The pure lead-ore, which has slept there for millions of years, shines upon you from roof and sides with its virgin brightness, and you lay your hands upon it with a sense of wonder, gladness—and suffocation. The far end terminates in another hole, where the miners are perforating, pecking, and blasting their way along the veins, sinking after it below, or pursuing it above, as the indications of the ore seem to warrant them. ‘The whole earth is honeycombed so extensively, and the stranger is so bewildered by the labyrinth of nameless roads, that if the British Association were turned in without a guide, they would be found wandering about there when that renewed body next returns to Newcastle in 1888. Of course the miner feels none of the sensations which a stranger experiences, it is very absurd to feel consternation in conditions of well-known safety: but then you do not know that they are safe: everybody is absurd in new circumstances, with the conditions and security of which they are unacquainted. Mr Martin at the Burtree Pasture Mine, relates that a sea-captain who went down the mine in his father’s days, a valiant man who had cut his way through many a line- of-battle ship, was seized with terror at being in the mine during blasting, which so shakes the whole place that the hour spoken of in Revelations, when the rocks shall fall, seemed to him to have arrived. On retracing your steps back to the level you come upon a wide and gloomy staircase of prodigious watery and slippery steps, which winds in a spiral way to the upper ground. Up these interminable gloomy, dripping, corridors, blacker and more mysterious than those of Udolpho, the men can find their way to the upper world; and the horses go up and down alone. The stranger is glad to return by the swifter way of the shaft. You want the legs of Jack the Giant Killer to mount those far extending muddy steps, in a darkness which like that of Egypt can be felt, and where your chances are of meeting on your cavernous way a horse or two “with a mission." You think it well on the whole to decline that mode of exit.

The pursuit of mining is in its very nature speculative, both to proprietor and to the working miner. In searching for coal at Merton Winning, as much as £300,000 was spent before the coal was reached which the speculators were in search of. But the working lead miner has a more speculative trade than the cool miner. Three or four lead miners contract to execute a certain space or quantity of ore at so much per bing. These contracts extend to 6 or 12 months,

according to the custom of the mine, and the viewer who lets and the miner who takes compete with each other in judgment as to its value; and, according to the knowledge of the miner, it may prove a good or a bad speculation for him. If the vein turns out well, he may doable or even treble his ordinary earnings. His work is reckoned and his profits estimated every 6 months at Allenheads, when he receives the whole of what is due upon his contract. But, as working miners have no capital and must live, they are allowed a certain sum of money weekly, which is called “subsistence money.” Before Mr Sopwith's time as chief agent of Mr Beaumont's mines in Northumberland and Durham, this sum was 7s 6d. a week. On Mr Sopwith's advice it was increased to 10s. This was an important improvement, as it is paid if the miner’s earnings should fall below it. Of course, when the day comes to estimate the contracts, some are found to be fortunate and others the reverse, and instead of having additional money, they are in debt in proportion to the money overdrawn. When Mr Beaumont came into possession of his property, he found his men were owing in this way £1,100, which he very generously cancelled. It must have been a noble satisfaction to have been the author of the gladness, which diffused itself throughout the mines, and moors of Northumberland and Durham when that gift became known to the men and their families. At that time the new Chief agent proposed a plan for the diminution of any further arrears that might arise, so shrewd and considerate that it is entitled to very great praise both for the plan and the spirit of it. Indeed, it has an air of Communism about it. It is the application of that principle of solidarity that only very sanguine Frenchmen have ever ventured to advocate. Indeed, there were not six men in the British Parliament at that time, and there are not twelve men now, who would believe in its realization. It was no other than this, that each man whose earnings exceeded 15s. a week should give 10 per cent, of the excess of his earnings over that sum for the benefit of his less successful comrades. Thus the man who earned 15s 10d a week would subscribe one penny, he who earned 25s. would give one shilling, and in consideration of this Mr Beaumont would remit one half the arrears which might be incurred by the men, which whether it was equivalent to the half or not was to be accepted as such, and the unsuccessful miner who was £4 in arrear would only have to pay £2. Of course, when the earnings were better, half the amount of debt would be covered by 5 per cent. and the tenth would not be called for. In Weardale, when the mines yield well 3 per cent is sufficient. These men unanimously accepted this novel arrangement thus equalising the condition of their comrades and establishing an interest in each others success.

4th September 1863 (Newcastle Journal)

THE BRITISH ASSOCIATION.
EXCURSION TO ALLEN HEADS.

By far the most interesting and—in spite of the bad weather —the most successful event of the present meeting of the British Association was the excursion which, yesterday took place to Allenheads, the center of the great W. B. Lead Mining District, the highest Village in England, and the capital of a little kingdom, the history and geography of which is hardly so much known to the general world as that of many an island in the South Seas, The excursion took place at the invitation of Wentworth Blackett Beaumont, Esq., M.P., the

proprietor of the W.B. Lead Mines, and so to speak, the monarch of the territory in which they are situated. Through his generous liberality it was arranged that any members or associates of the British Association who might desire to inspect one of the most interesting and least known districts of the North of England should be permitted freely to do so, and should, moreover, be entertained by him during their necessarily brief stay in his dominions. In accordance with this invitation, some two hundred ladies and gentlemen left the Central Station, at seven o'clock yesterday morning, for Haydon Bridge—the nearest point at which the Newcastle and Carlisle Railway line approaches to Allenheads. The morning, though somewhat dull, was nevertheless tolerably promising, and the excursionists—who were accompanied by Thomas Sopwith, Esq., F.R.S., the able and estimable chief agent of Mr. Beaumont—left the town in high spirits; the prospect of enjoyment which lay before them being doubtless rendered doubly acceptable by the remembrance of, the dry routine work of the previous week. It is needless here to enlarge upon the beauties of the country through which they passed between Newcastle and Haydon Bridge. The vale of the Tyne showed to more than its usual advantage in the early morning light, and now and then, as the mists rolled away from the hills to the right and left of the train, a prospect was afforded, the loveliness of which must have gone far to dissipate any disagreeable impression our scientific visitors may have formed of the North of England from the singularly unfavorable circumstances under which they have seen Newcastle. Haydon Bridge was quickly reached, and here the whole party left the railway and took to the road. Ample accommodation, in the shape of numerous omnibuses, drags, and vehicles of sundry other descriptions, was provided for them, so that it was not long before all were seated behind stout and willing steeds, and ready for tire start *en route* to Allenheads, some sixteen miles to the south. There were many, doubtless, who, with appetites sharpened by the cool morning air would have preferred a temporary rest under the hospitable roof of mine host of the Anchor, but time would not permit, and the long procession was therefore immediately started amid the cheers of the people of Haydon Bridge, who had turned out in great force to witness a now illustration of “The Journey of the Magi."

The road from this point to Allenheads is one of rare and striking beauty. From the moment it leaves Haydon Bridge it begins to rise, and, passing over fell after fell, attains at length at Allenheads a height of some 1,400 feet above the level of the sea. Yesterday it was seen to full advantage during the early part of the journey, but unfortunately before the excursionists had proceeded far the clouds began to gather on the hill-tops, and the rain—which we believe falls at Allenheads about 250 days in the year—began to fall in a steady and determined manner that gave but little hope of a fine day. In spite of this drawback, however, the scene presented to the party was not one that will be easily forgotten. For a short distance, after leaving Haydon Bridge, the road skirted the edge of a slight eminence above a little “beck,” half concealed by the luxuriant foliage which adorned its banks; from thence it turned away to the right, and entered wilder scenes. First the grey and ivy-crowned ruins of Langley Castle —associated in every mind with bye-gone scenes of border life, and a less peaceful invasion than that which was then being carried out, were passed, and shortly afterwards visible tokens were given of the proximity of the great mineral wealth with which the district abounds, by the appearance

of the grimy and smoke-engendering works of Langley Smelt Mill. Here the members of the association received their first visible welcome, for Mr. Dinning, the lessee of the mill, had, in honour of their visit, raised on his chief building, in happy combination, the standards of Mr. Beaumont and the Greenwich Hospital Commissioners. Here, too, the dwellers by the roadside were gathered in front of their habitations to witness the passing of the excursionists—a spectacle which, in a country so little known, and so seldom visited, seemed to excite no small wonder and interest. From this point, the country through which our route lay became wilder and more attractive at every step. The fields of wheat and barley became scarcer and scarcer, until at length they altogether disappeared, and were replaced by scantily covered meadows huge stretches of black peat land, or moors enpurpled with the blooming heather. The rich foliage of the trees which grow on Tyneside gave place to dark green masses of the mountain ash, the larch, the pine, the fir, and other trees, which we commonly associate with regions much further from our own doors than that through which we were passing. But what the scene lost in cultivated softness, it gained in wild and picturesque beauty. As we were carried further and further on towards our destination, almost before we were aware, we found ourselves enclosed in a vast amphitheater of hills—the "fells" of Northumberland—which rise one above the other in barren but impressive grandeur till they were hidden in the dense mists and lowering clouds. Now and then the barrenness of the immediately adjacent scenery was relieved by the sudden opening up of some fir-covered gorge, which, if not so extensive, bore all the characteristics of the wild beauty of similar regions in Norway or Switzerland. At length Catton—a plain little hamlet of stone-built houses—was passed, and then the road approached the river Allen, which flowed in a small and sullen stream at a great distance below our feet. After winding along its banks for some distance, the long train of carriages was stopped, for Allen Mill, the chief lead smelting mill connected with Mr. Beaumont's works was reached, and party of the excursionists who were desirous of inspecting it proceeded to do so. Here they saw the process by which the rough ore extracted from the mines is converted into pigs of lead, and they also had an opportunity of witnessing the manner in which a still more precious metal—silver—is extracted from the lead by the beautiful and well-known process of the late Hugh Lee Pattinson. The remainder of the party, who were not impressed with the necessity of visiting the smoky range of buildings in the hollow beneath them, went on to Allendale Town—a large though by no means picturesque village, containing many substantial houses, and comfortable dwellings for the humbler classes—where, at the King's Head, an excellent breakfast was awaiting them- Their long mountain ride enabled them all to do full justice to the hospitality of Mr. and Lady Margaret Beaumont, and it was some time before this, the first section of the party, were ready to leave the table. Before they did so, however, Mr. T. J. Bewicke, the chief resident engineer at the W. B. mines, announced that 'those who wished to enter the mines in actual work must at once proceed to Allenheads seven miles further —where dresses and every other convenience were provided for them; whilst those who did not care to undergo the fatigue and discomfort necessarily attendant upon a descent into the bowels of the earth might enter the Blackett Level at the point where it was entered from the hill-side, and see

in it the process by which the great galleries necessary in lead mines are excavated.

And here we may shortly pause and give some account of the extent of the W. B. Mines, and the means by which they are worked. The mines of Allenheads, Coalcleugh, and Weardale, have been wrought almost from time immemorial. The document relating to their earlier history have, unfortunately, in the lapse of time, been destroyed; but we believe that, from the year 1720, there is an accurate account of every fathom of working that has been driven, and every bing of ore that has been raised. They are now, and for long have been, the largest lead mines in the world, mined by a single proprietor. Our readers will, doubtless, be amazed when we tell them that the extent of Mr. Beaumont's mineral territory alone is somewhere about 140 square miles. The amount of lead annually raised from this rich metalliferous district varies from nine to ten thousand tons, and the; number of persons in Mr. Beaumont's employment—men and boys—is now between 2,500 and 2,600. The responsibilities attending the possession of such incalculable wealth as is represented by these works, and the exercise of the power necessarily attendant-upon it is, doubtless, great; but, happily, in the hands of the family with whom that wealth and power have so long remained, there has been no abuse of either, and, at the present moment, there is no prospect of any change, save for the better, taking place. Some idea of the care Mr. Beaumont exercises over the mining population who, directly or indirectly, are employed by him, may be gathered from the fact that there are in the district eight admirably conducted schools, nearly all built entirely by Mr. Beaumont, in which the children of all his workpeople may be educated; four first-class reading rooms; three benefit societies, which, from their peculiar constitution and wonderful success, may well be considered model societies; and a rifle corps (the 7th Northumberland) entirely equipped at the expense of Mr. Beaumont. The religious welfare of the people is not less completely provided for by numerous churches and chapels which find in the lord of this vast territory a warm and liberal supporter; nor must we omit to mention that, in these works of benevolence and patriotism, as well as in more scientific labours', Mr, Beaumont finds a constant assistant in the chief agent, Mr Sopwith, in Mr. Bewicke, the resident engineer, and in every officer in his employment.

To return, however, to matters more intimately connected with the working of the mines, we may premise that, in those at present worked, there are miles of drifts and galleries almost innumerable, and shafts which may literally be counted by the hundred. In addition to all these mines, is a great work already alluded to, which deserves more special mention. That is the Blackett level, a great gallery commenced about the year 1855, and which it is intended to drive, in a straight line, for a distance of seven miles from Allendale Town to Allenheads. This tunnel, or gallery, is entered on a level with the surface at Allendale Town, and is already driven a considerable distance in from the hill side. At four other points on the line, viz., Breckonhill, Sipton, Holmes Linn, and Studdon Dene, shafts have been sunk to the level of the gallery, and, from the bottom of these shafts men are at present, and have been for years, actively engaged in driving in either direction to meet each other. When they do so, and when the whole level is completed, it will undoubtedly be one of the greatest works in the world, for it will then be a tunnel of the enormous length of seven miles, entering the hill-side level with the surface at one end, and at

the other terminate about one hundred fathoms below the surface. Our readers will not unnaturally inquire the reason for undertaking this prodigious work, and incurring the immense expenditure, which it will inevitably entail. The answer is short and clear enough. It is known, or at any rate confidently believed, from the strata of the district through which the gallery is cut, that lead abounds in it, awaiting only the bold and enterprising efforts of man to be brought to the surface, and turned to good account. Already, in the comparatively small extent to which the level has been completed, several veins, and indications of veins, of lead have been met with; but it is one peculiarity of this mineral district, that the lead is only to be worked to a profit when it is met with in the Great Limestone formation, and the work of driving the level is therefore continued until a vein is met with in or under the Great Limestone. When such a vein is encountered, the trouble and outlay that has already taken place in this great undertaking will be more than repaid, and Mr. Beaumont and his eminent scientific advisers will find their anticipations fully realised.

And now as to the motive power by which all the great machinery necessary in these vast works, —both in the mines at present working, and in those which are yet to be rendered productive—is enabled to perform its duty. It will astonish our readers not a little when we tell them that steam power is in no instance used in connection with the mines, that in fact steam engines have long since been disused as antiquated, expensive, and inappropriate. Nowhere in the kingdom could a more striking and practical example of what Sir William Armstrong means by the economy of fuel be found than in the W.R Mines. It may not be generally known that in that district from fifty to seventy inches of rain fall in the year, being more than double the average fall of the Eastern Counties of England, and higher, we believe, than in any other part of the country. Yesterday, in fact, when the rain fell almost incessantly, the weather was only in its normal condition. Unpleasant as this tremendous fall of ruin may be in many respects, or in other districts, it is not quarrelled with at Allenheads. There the water which falls from Heaven upon, the great ridges of ling-clad mountains is every drop of value, and by that skilful application of science to practical purposes, of which we last week heard so much, it is made to supply the place of coal, and by providing a power equal to that obtained from our great combustible mineral, to save an enormous consumption of that precious and rapidly-disappearing material. Sir William Armstrong, in the course of his long and active life, has achieved many great things, but we doubt if he has accomplished anything greater than the triumph of mind over matter, which, in conjunction with his friend Mr. Sopwith, he has achieved at Allenheads. Some twelve years ago, when the hydraulic power, which he was the first to discover, was yet in its infancy, he was employed to supply all Mr. Beaumont’s mines with that power in place of steam. He has now in the Allendale district erected hydraulic engines at six spots above and two under ground. We do not profess to be able to give our readers a full and correct description of the scientific details connected with these engines, but as briefly ah possible we will endeavour to render their mode of working clear. At various points upon the hills surrounding Allenheads, and in the midst of which the Blackett Level runs, great reservoirs have been constructed, in which the water, so bountifully provided by nature, is stored. From these sources, as well as from the river Allen, it is led to the different spots where it

is required, and there it is made to turn water wheels of immense size, and of the best possible construction. These wheels, in turning, work force pumps, which force the water into what is called the accumulator, that accumulator being a cylinder, containing water, which is pressed upon by a very great weight, which acts upon the water with a pressure exactly the name as though the water in the accumulator was the lower part of a column of water 1,400 feet in height. In the engines underground, they have, from their position, the advantage of a head of water of about 180 feet, and these engines are worked with that head of water by the natural pressure of the column. When they come to the surface, however, they have not the advantage of accumulating the water in an actual column, as they can only gain a height sufficient to turn the wheels. These wheels, however, in their turn, by means of the ingenious application of the accumulator, exercise, as we have said before a force equal to a column of water of 1,400 feet. It is by means of these remarkable contrivances of real genius that the power which nature supplies free of cost, and to an unlimited extent, in the “everlasting hill’s” of Allendale, is made to take the place of the costly power obtained from coal, and to do everything that steam can do. We are aware how imperfect our description of the working of these engines necessarily is, and we will only add to what we have already said respecting them that they are employed for pumping, winding, and performing all the other operations in connection with the mine; that not one penny is paid directly for the enormous power they exert, and that during all the years they have been in use they have not cost more than a few pounds for repairs. Such an exemplification of the varied uses of hydraulic power must, we think, when it becomes generally known, lead to the more extensive use of that power wherever it is available.

We have now, however, after this long, but not, we trust, uninteresting digression, to take up our party of excursionists where we left them, at the inn at Allendale Town. Those who desired to view the mines actually in work were conveyed, directly after breakfast, to Allenheads, where, under the guidance of several of Mr. Beaumont’s agents, they entered the mines, and penetrated to the Workings. Not having accompanied this party, we cannot speak as to the sights which awaited them in the dark recesses of the ancient mines they visited; but, judging from the pleasure they expressed when they returned to the surface, we imagine they must have been greatly gratified by their journey underground. Another party, and a much smaller one, proceeded to the Adit Level, or north opening of the Blackett Level, where it enters the hill side, and, having donned suitable garments—which, though useful, and perhaps picturesque, could by no stretch of fancy be considered ornamental—were wheeled on waggons specially prepared for their use along a smooth and well laid railway to the further end of the tunnel. They were accompanied by Mr. J. C. Cain, the chief underground agent of the mines, who explained to them all that they could wish to know. We cannot omit to notice the remarkable ease with which this portion of the works was visited. No more inconvenience was experienced by the excursionists than if they had been passing through an ordinary tunnel in an express train.

Having returned to “bank,” this portion of the party again entered their conveyances and proceeded along the road toward* Allenheads The scenery of this portion of the journey presented, in a still more striking degree, all the features of wild and majestic beauty already noticed. On every side the great

fells, purple with the delicious bloom of the heather, bathed, and in some cases half concealed, in watery mists, and chequered with occasional patches of larch or fir, rose up sometimes to a height of more than twenty-two hundred feet, whilst far below the road the peaceful Allen—intercepted at every minute or two for same industrial purpose—pursued its way to the Tyne. Here, too, traces of the peculiar habits of the people inhabiting this district became visible. Quiet and unaccustomed to the visits of any large body of strangers, they viewed with wonder and some amusement—caused, doubtless, by the eccentric conduct of not a few of the philosophers—the invasion of their lonely territory by such an army. The huge stacks of peat, too, which everywhere were piled against the houses, showed that it was not in motive power alone that cost was economised. Want of space forbids our dwelling upon the scenes which were thus presented to the travellers, or we might here tell tales of the great fells which would astonish those who yesterday saw them in their summer garb, when in the almost arctic winter which visits this unknown nook of Old England, those very fells are covered to the depth of many feet with snow, hapless wayfarers, struggling over them, have missed track, and have wandered further and further away from their proper route, until at length, wearied with fruitless efforts to regain the buried road, they have lain down on the pitiless fell-side and died, or perchance, if Providence were kind, been rescued by the strenuous exertions their friends and neighbours. We may, however, be permitted to say that long before such a weapon as the Armstrong ordnance had been heard by the general world, these very hills resounded to the sharp report of Sir William’s rifled cannon, and that amongst the guns, thus tried and proved in the district was that which stands in the exhibition at the Central Exchange News Room.

At Sipton, one of the shafts connected with the Blackett level, and some three miles from Allenheads, the party stopped and proceeded to inspect the hydraulic machinery, erected there by Sir Wm. Armstrong, That gentleman was himself present, and proceeded, in the must patient and painstaking manner, to explain the different portions of the machinery. We have already' given a general notion as to the manner in which it is worked, but we can give the reader no idea of the admirable way in which it performs all the duties that could possibly be required of it. Sipton once left behind, the scattered, but pleasant, little village of Allenheads was not long in being reached. Everybody, on getting out and looking around in the midst of the pitiless rain, which was falling heavily, recalled to mind the fact that they were now 1,400 feet above the level of the sea, and in the highest inhabited, village in England, and there was something so peculiar about the place—it had such an out-of-the-world, but, withal, a most comfortable and respectable appearance—that, at the first look, it struck one as being exactly what might have been expected. Everything about the place was trim and neat to the last degree. The very lead-washing and crushing works, and the workshops connected with the mines were as carefully kept as many a gentleman's house, whilst nothing could be more neat and pleasing than the appearance of the handsome range of offices, or of the school house in which Mr. Fisher presides so admirably. A warm welcome awaited the visitors here. The large and handsome newsroom was thrown open for their reception, and round the blazing fire here burning, and which, in the temperature of Allenheads, was anything but unacceptable, coals and shoes were dried, and preparations made for further investigations.

The ladies or the party were accommodated in the very handsome hall, where they received every mark of hospitality from their distinguished hosts, Mr. and Lady Margaret Beaumont, The gentlemen then proceeded in a body to inspect the works for the preparation of the lead ore, by washing, crushing, &c., preparatory to its being smelted in the adjacent mills. Here, as everywhere else, the whole of the machinery is worked by hydraulic power, and innumerable contrivances are introduced for facilitating the task of preparing the ore. The whole of the various stages were lucidly explained by Mr. Bewicke. On returning to the offices, Mr. Sopwith and Sir Win. Armstrong went over the plans of the mines, and drew attention to many interesting circumstances, which would otherwise have escaped the notice even of the most observant. Some little time was spent in this manner, and at three o'clock precisely the whole party adjourned to the large water-proof marquee, of admirable construction, which had been erected in the grounds adjoining the hall. Here a repast of the most sumptuous description had been laid out. The guests were received by Mr. and Lady Margaret Beaumont, and every possible attention was paid to their comfort, both by their entertainers and the various gentlemen connected with the management of the mines who were present.

Dinner being over,

Mr. Beaumont proposed “The Health of the Queen," which was drunk with all the honours.

Mr. Beaumont then said: Ladies and gentlemen, —Time is short, I am sorry to say; I will, therefore, not detain you long; but I cannot allow you to depart without bidding you, in the name of Lady Margaret Beaumont and myself, all the welcome, and ail the hospitality which it is possible words can convey. (Great cheering.) I regret, indeed, that the only element against which we could not contend, viz., the weather, has not been favourable to us. I fear that it must have deprived many of the interest and pleasure which they would have had had they been able carefully to have inspected the works around them. I will now, gentlemen, only propose the health, success, and prosperity, of the British Association. (Loud cheers.) I believe it is the first time in the history of that association that it has ever paid a visit in such high altitudes. I believe we are now 1,400 feet above the level of the sea. (Cheers.) I trust that it may not be the last time that many of you may come to see this district. (Great cheering-) You have only had an opportunity to-day of just seeing the country. I am aware that there are many scientific men amongst you who will take great interest in all the machinery, which my excellent friend Sir William Armstrong has placed here.

(Loud Cheers.) I can only assure you, in the name of my agents and myself, that we shall be willing at all times to afford every facility to gentleman who wish to take real interest in all they see, and to the best of our power to explain it. (Loud cheers.) But, gentlemen, you have seen what science can do for this district. That has been illustrated in the works, which have been constructed by Sir William Armstrong. (Cheers.) I feel, therefore, that I cannot do better than connect his name with this toast. (Cheers.) I beg to propose to you “Health, success, and prosperity to the British Association, and to its president, Sir William Armstrong.”

The toast was drunk with “three times three,” the band playing "The Keel Row.”

Sir Wm. Armstrong said: The British Association and its President have so often been toasted during the past week that I feel quite at a loss to have anything new to say, if anything could have inspired new ideas, it would have been the enthusiastic reception which you nave given to my friends toast. As it is, I can only say, with all my heart, “Thank you.” (Loud Cheers.) I will, therefore, turn to another subject. I would remind you that we are indebted to Mr. Beaumont and to Lady Margaret Beaumont—(great cheering)— for what would have been the ‘most brilliant — transcendently the most brilliant— excursion of the British Association, but for causes over which we had no control; but, as it is, gentlemen, I am quite sure it stands rivalled by none. (Cheers.) To those who dwell in cities as I do, and us most of you do, to come into the open country, and into such a country as this, where both art and nature present so much to instruct, it is the highest possible treat, if you have all enjoyed yourselves, in spite of the weather, as much as I have done, you have enjoyed yourselves very greatly. (Cheers.) I beg to propose the "Health of Lady Margaret Beaumont, of Mr. Beaumont, and of Master Wentworth Blackett Canning Beaumont.”

The toast was drunk with " three times three,” the band playing “The White Cockade.”

The Chairman, in responding, and: Ladies and gentlemen, — We thank you, indeed, most sincerely, for the very kind way in which you have received our health’s. I think that I cannot do better than imitate Sir William Armstrong’s brevity; but I trust on the occasion as brevity is the soul of wit, so on this occasion I use brevity because no words can convey to you the feelings of Lady Margaret Beaumont and myself with respect to the reception you have given us. (Cheers.) Yon have been pleased to drink the health of that young gentleman there (Master Beaumont). He is not himself able in words to thank you, but I trust the day will come when, another quarter of a century having parsed and the British Association being again at Newcastle, he will be in a position to return thanks for his mother, and to do so in language, if not more sincere, yet certainly more able than that which I use. (Cheers.) We beg again to thank you all from the very bottom of our hearts. (Cheers.)

Capt. Beaumont proposed the next toast, "The health of Mr. Thomas Sopwith, F.R.S.” In doing so he said “Before separating, I shall beg you to drink the health must cordially of a person who is well known amongst you. I, myself, have not had the advantage of long residence in this country, nor am I at all, beyond my own connections, known in this part of the land; and, therefore, I can only speak of the qualities of that person whose health I am about, to propose, by hearsay. But I can do so with confidence, for it is upon hearsay of the strongest and most trustworthy kind. I beg to call upon you to drink “The Health of Mr. Sopwith.” (Great cheering.) Those cheers, ladies and gentlemen, show me how truthful was my idea, when I thought that the toast I was about to propose would be acceptable to you. Mr. Sopwith. I believe I am right in saying—and my opinion is confirmed by those capable of forming a judgment—holds the very highest position, in point of talent and scientific acquirement, of any person—I will bar hardly anybody—in this part of the country. (Cheers.) I believe that Mr. Sopwith, as I am sure, it was his intention, has given every explanation, on the part of my cousin, to you which it was in his power to give. I ask you to drink the most cordial health of Mr. Sopwith, who has been, I believe, a great friend of my family.

The toast was drunk with three times three, the band playing “The Old English Gentleman."
Mr. Sopwith, in responding, said: I beg to thank you most sincerely for the kind compliment you have been pleased to bestow upon me, by drinking my good health. I assure you that it is on honour which is altogether unexpected, but which, I will say, is very grateful to me. For it has been my greatest happiness, during many long years, to have had the management of these extensive mining concerns belonging to Mr. Beaumont, and I will here take the opportunity of saying, as I am addressing gentlemen from all parts of the kingdom, that I can moat unhesitatingly affirm that the measures pursued by my most excellent and most highly-respected friend, Mr. Beaumont, in the management of his extensive property, have been the means not only of developing those improvements in mining which you have had some slight opportunity of seeing to-day, but those efforts have also seen extended towards the improvement of the people.—(cheers)— towards conferring the most solid benefit above all others upon them, by giving them a solid and an excellent education— (cheers)—and in all those most excellent and most benevolent efforts, in which no one knows so well as I do the depth of feeling which has actuated Mr. Beaumont, (Cheers.) But in all those excellent and benevolent objects he now has in Lady Margaret Beaumont; A most active and able promoter, and under their joint auspices that hospitality which you are partaking of to-day is only an example of that benign and healthy influence which their kindness and liberality is extending over that wide district in which they exercise so great an influence. (Cheers) In pursuing my labours here as a mining agent and director of these mines, you must all of you well understand what a great happiness and pleasure it has been to me to have had the able co-operation and assistance of Sir Wm. Armstrong, whom I am proud to call one of mv oldest friends, and one whose valuable aid I know has ever been given in the most disinterested manner to his country. I shall not, gentlemen, tire you by saying more. I will endeavour to follow the good example of brevity which I think ought to be studied on all these Occasions, but I would only say that I do hope and believe that my young friend (Master Beaumont) on my left, when the British Association comes to this place again, which I hope will be long before five-and-twenty yeans—(cheers)— will be found imitating the good example which has been set him, and I hope that he may live during many successive meetings of the British Association to meet his fellow-countrymen in the hearty and happy manner in which we are doing on this occasion. I beg, gentlemen, once more to thank you most cordially for your kindness. (Cheers.)
The company then broke up, and proceeded once more to their carriages. Some little delay occurred in the village, and then, amid the cheers both of philosophers and inhabitants of Allenheads— for many a friendship between both parties had been struck up during their brief meeting—the party once more started on their way to Haydon Bridge. As they passed once more through the glorious scenery we have imperfectly endeavoured to describe, they were enabled to enjoy the prospect more than in the morning, owing to a cessation of the rain, which had hitherto fallen. Their whole journey from Allenheads to Haydon Bridge was one continued ovation, for at every point the people of the neighbourhood come out to greet them with hearty cheers. At the railway station their train was waiting for them, and they were conveyed to Newcastle, having spent a day long to be remembered for its many great and

rare pleasures, In visiting one of the most interesting, as it is one of the least known, districts in the country.
We ought to add that the conveyances were supplied by Mrs. Cleghorn, and that everything in connection with this as with all other departments was of the most satisfactory description.
Mr. Weddle, the station-master at Newcastle also deserves credit for the assistance he afforded, in forwarding the vehicles and horses for the conveyances, as well as the special train for the excursionists themselves.

PARISH OF ALSTON, WITH GARRIGILL.
TO LAND VALUERS, &c.
NOTICE IS HEREBY GIVEN, that the GUARDIANS of the Parish of Alston, with Garrigill, in the County of Cumberland, are desirous of receiving TENDERS, from Professional Valuers, for making a new VALUATION LIST of all Messuages, Lands, and other Hereditaments liable to the Poor Rate in the said Parish, which comprises about 1,300 Houses and 36,000 Acres of Meadow, Pasture, and Common Land. Sealed Tenders must be addressed to the Clerk, and endorsed "Tenders for Valuation," not later than Friday, the 6th Day of November next. The Guardians will not be bound to accept the lowest nor any Tender. By order of the Guardians, JOSEPH DICKINSON, Clerk. Board Room, Alston, 3rd October, 1863.

10th November 1863 (Cumberland and Westmorland Advertiser, and Penrith Literary Chronicle)
FATAL ACCIDENT.— On Tuesday morning, October 27th, a melancholy and fatal accident occurred at Rodderup Fell Mine, Garrigill. As number of workmen were proceeding up the level in a waggon, the head of John Watson Charlton, of High Crossgill, came in contact with the roof, and was bent back. This so injured the spine, that the sensation of feeling was at once taken away from his arms partially, and from his body below the shoulders entirely. He languished in an utterly helpless condition until the following Thursday morning, when death terminated his sufferings. Deceased was 24 years of age, a genial disposition, and entertained towards his fellow workmen and companions, a warm hearted friendship. He was greatly respected by a large circle of youthful acquaintances, and his remains were followed to their last resting place, by an unusual large number of people.
In 1851, at Darkgill, Garrigill, Edward Charlton, farmer, aged 46, his wife Isabella (Nee Watson, married 24th October 1835, at St John, Garrigill) aged 39, children, Isabella 13, John 11, and Jonathan 5.

In 1861, at Low Crossgill, Garrigill, Edward Charlton, farmer, aged 56, his wife Isabella 49, children, John W., lead miner, aged 21, (buried 1st November 1863, aged 24, at St John, Garrigill), Jonathan, lead miner, aged 15, Jane A. 7, (buried 21st August 1861, aged 8, at St John, Garrigill) and Edward A., 6;(buried 11th October 1861, aged 6, at St John Garrigill).
Isabella Charlton, died at Gateshead, aged 59, and buried 30th November 1870, at St John Garrigill.
In 1871, at 9 Warwick Street, Gateshead, Edward Charlton, retired farmer, aged 66, children, Jonathan, commercial ____, aged 25, Isabella, house keeper, aged 33.

13th November 1863 (Carlisle Journal)
Deaths
On November 2nd, Hannah, the wife of William Ewart, Esq., M.D., of Middleton in Teesdale, aged 50 years. Friends will please to accept this intimation.
See 28th June 1844

13th November 1863 (Carlisle Journal)
CRICKET.—The members of the West Allendale Cricket Club held their third animal dinner at the house of Mr. John Fairless, innkeeper, Carshield, on Saturday, the 7th inst. The dinner was served up in the style of elegance which characterises Mrs. Fairless's establishment. At a quarter to four o'clock in the afternoon the Carshield Brass Band assembled together at the Long Room, when they struck up with the enlivening and spirit-stirring tune of the "White Cockade," and marched up to the inn, where they, along with the rest of the members of the cricket club, sat down and did ample justice to the good things placed before them. The chair was ably filled by Mr. H. Dargue, of Great Corby, Wetheral; and the vice-chair was occupied by Mr. T, Millican, lead ore inspector, Carshield. The cloth being removed, the list of loyal and patriotic toasts was gone through with spirit and enthusiasm. The band enlivened the company at intervals by performing some select pieces of operatic music. The toasts having been gone through, the company broke up well pleased with having enjoyed a very cheerful, pleasant, and agreeable evening. —*Cor*.

13th November 1863 (Newcastle Courant)
Deaths
In West Parade, on the 4th inst., aged 15, Mary Ann, only daughter of Mr Thomas John Bewick, of Allenheads.
In 1861, at Tynemouth Place, Tynemouth, Elizabeth H Saker, schoolmistress, aged 40, Louisa E Lambert, teacher, aged 19, Mary A Bewick, scholar, aged 12, and house servant, Isabella Clelland aged17. See 15th March 1865, and 4th September 1897.

4th December 1863 (Newcastle Courant)
PROPOSED DIVISION OF HEXHAMSHIRE AND ALLENDALE COMMON.
A numerously attended meeting of stint-owners and occupiers of Hexhamshire and Allendale Common was held at the house of Mrs Holmes, King's Head Inn, Allendale Town, Allendale, on Friday afternoon, with a view to the adoption of such measures as might be deemed best calculated to obtain a

division of the above common. Mr John Johnson, Old Town, was called upon to take the chair.

The CHAIRMAN said that this matter had been taken up in consequence of some kind expressions which fell from Mr W. B. Beaumont, while presiding at the dinner of the Allendale and Hexhamshire Agricultural Society in that very room, with respect to the improvement of land and other things, in consequence of which the stint-owners and occupiers had deemed it necessary to convene a meeting on the subject. At that meeting it was resolved to convene the present meeting for the purpose of adopting measures best calculated to obtain a division of the common. He might presume to say, that while they saw around them large tracts of waste and moor land of little value in their present state, their neighbours on all sides were dividing theirs with benefit to themselves and others. He thought, therefore, they ought to adopt all measures and means—of course with the approbation of Mr Beaumont—to secure the enclosure of the large and extensive property of Hexhamshire and Allendale Stinted Pasture. (Hear, hear,) The division could not fail to be beneficial to Mr Beaumont, and in addition to that the fencing, draining and manuring of the moor, consequent on its division, would afford employment to many of the youthful population, who had now to seek employment elsewhere. (Hear, hear.) No one would be more benefited than Mr Beaumont, he being in possession of one-fourth of the stints. The stinted pasture of Allendale included on area of 18,094½ acres that of Hexhamshire being 4,797 acres. Therefore they might say that there was between 20,000 and 30,000 acres of land lying so as to be of little or no value at all in its present state. That meeting had been convened for the express purpose of petitioning their worthy lord of the manor, Mr Beaumont, to consent to a division, hoping that be might grant the request of the memorialists. (Hear, hear.) The Chairman then read the following memorial, which had been drawn up: —

To Wentworth Blackett Beaumont, Esq., M.P., Lord of the Regality or Manor of Hexhamshire and Allendale

The humble memorial of the undersigned stint-owners of Hexhamshire and Allendale Stint Pastures, in the county of Northumberland. —

SHEWETH, —That your memorialists are of opinion that it would be greatly to the advantage of the said stint-owners of Hexhamshire and Allendale Stint Pasture, and to the district generally, to have the said stint pastures, divided and enclosed, whereby an end will be put to many quarrels and misunderstandings which are now continually arising between the said stint holders, both In respect to the number of their stints and of their particular heaths, which are become reproachful to the district

That if the Hexhamshire and Allendale Stint Pastures were divided and enclosed, it would afford the means of employment to many poor persons the stint-owners would be afforded the opportunity of improving their land, and of enhancing the value of the same, and the district generally would thereby be greatly benefited and become more cultivated and healthy.

Your memorialists, therefore, humbly pray that you will be pleased to take the matter into your serious consideration, and give your sanction to a division of the stint pastures In Hexhamshire and Allendale, under the direction of the Enclosure Commission of England and Wales, and your memorialists will ever pray,

Mr JASPER STEPHENSON, of Newbiggin, moved that the memorial be adopted, and that it he submitted to each proprietor of Hexhamshire and Allendale Stinted Pasture for signature, the memorial to be then presented to Mr Beaumont.
Mr THOMAS HARRISON, of West Allen, seconded the motion.
Mr R, R. DEES, of Newcastle, solicitor to Mr Beaumont, said he represented Mr Beaumont, who was absent. He had, however, no special instructions from him about this matter; but he might say that it had been considered by him before, when he saw very good grounds of objection against a division,
Mr CHARLES GREY, of Dilston Hall, said that he was present us the representative of the Commissioners of Greenwich Hospital. As their representative, the Commissioners being owners on this common, he had thought it his duty to attend that meeting, in order that he might be in a position to know what was done, so as to form an opinion for himself as to the desirability of the proposed division; and it would be his duty to report to the Commissioners what the feeling of the stint-owners and occupiers was on the subject, and also, if he could learn it, what were Mr Beaumont's feelings on the matter. The Commissioners he imagined would be unwilling to do anything which would be disagreeable to Mr Beaumont, or that would in any way infringe his rights. As large proprietors in that part of the county they had been placed more than once under obligations to him, and on that account and as neighbours they would be unwilling to do anything contrary to his wishes. It was his opinion, grounded on experience, that as a general rule it was for the advantage of the country that commons should be enclosed. (Hear, hear.) But of course every singles instance of such enclosure must stand upon its own merits, as there might be peculiarities in some cases, which did not exist in others. That was one reason why he wished to make himself acquainted with the peculiarities of this common. He had enclosed other commons with which the Commissioners had to do, and they had forwarded the enclosure in every way; and it would appear to him *prima facia* that it would have been Mr Beaumont's wish to enclose this common. Therefore, if he found that he was not anxious to have it enclosed it would become his (Mr Grey's) duty to make himself acquainted with his reasons for not wishing to enclose, and also, at the same time, to ascertain what the opinion of the stint-holders on the common was on the subject. So far as he could form an opinion on the matter, he did not think that there would be anything offensive in sending that memorial to Mr Beaumont; who, no doubt, would give them reasons for his assent or dissent to its prayer.
Mr BEWICK, of Allenheads, engineer to Mr Beaumont, suggested that it would be better if the stint-owners first ascertained whether the proposed division of the common would pay, before putting their hands to the memorial. Those stint-owners who signed it should, before doing so, satisfy themselves that it was worth dividing.
Mr DEES also expressed his opinion that before they put Mr Beaumont in a condition to give his veto upon the question, the stint-owners should consider whether the division would pay or not. Mr Beaumont had considered the matter last year, when a proposition to divide Hexhamshire Common was made without consulting him, and he was obliged to use his veto upon the project. In stating this, he (Mr Dees) did not mean to say that these were Mr Beaumont's views on the present proposal. He thought, however, that in a

country like that, where mining was more important than bogs and wastes, it was not for the advantage of any of them that this division should take place.
Mr GREY thought that if the stint-owners had gone, in the first instance, into estimates as to the cost of enclosing the common, Mr Beaumont might have looked upon their action as a hostile act, on the ground of their going into the matter before they had ascertained whether he was agreeable to the proposal or not. He thought the stint-owners had taken the proper course, in proposing to memorialise Mr Beaumont.
Mr DEES did not think that anything could be more respectful than the memorial, but he did not think that any gentlemen should commit themselves to it without previous consideration as to whether the division would pay.
Mr GEORGE LEE, West Lands Ends, said that the division of that common had been fully considered by the people of Allendale for the last seven years.
Mr BEWICK thought they might easily make the necessary preliminary calculations without any expense. They knew the area of the common, and they might readily calculate the cost of enclosing it.
Mr HARRISON said he believed most of the people of Allendale had already made the calculations. They had seen the great good which had been done in adjoining counties by the enclosure of commons. In Cumberland, many people who had at first been opposed to the division of the commons were now, by getting portions of them, almost independent. Many advantages must necessarily accrue to the people of Allendale from the enclosure of the common.
Mr BEWICK differed in opinion from Mr Harrison, and would like to see his figures. His own opinion was, that it would cost some £36,000 before that common was even fenced, and then they would have it to drain and lime.
Mr Jos. LEE, of Keenleyside Hill, was of opinion that Mr Bewick had greatly over-estimated the cost.
Mr STEEL, of Podsbank, mentioned an instance where the expense of fencing some enclosed common was so great that the land itself would not sell for sufficient to cover it.
Mr DINNING, of Langley Smelt Mills, said that though not a stint-owner, he and his brother represented between them nearly one hundred stints. So far as they were concerned, they, of course, had the right to use that value. They had experienced, however, considerable difficulty in herding their cattle on the common; and what they said was, “ Let us have our share of the ground, that we may herd our cattle together, and do with them what we like.” That was his feeling, so far as those stints were concerned. On the other hand, he was one who was interested in the welfare of the whole district. He had had an opportunity of seeing the position and progress of society, and the improvement in other parts of the country; and it always delighted him, when he went to Alston and Penrith, to see fences creeping up, and people adding fine little allotments to their property. Taking the interest of the people of Allendale into consideration, what an amount of employment would it not create? and after those improvements were effected, would they not be adapted to keep a larger amount of cattle than the common was now doing, and would not that be a boon to the inhabitants? He did not want to advance a single word of disrespect to Mr Beaumont, and he thought everything should be conceded to him connected with his high position in the district. He was sure that the minerals, the game, and everything that he required in the shape

of conveying peats, and making roads, would be no obstacle. He thought that, under these circumstances, it was very desirable they should ascertain whether there was any prospect of that common being enclosed or not. (Hear, hear.)
The CHAIRMAN then put the motion for the adoption of the memorial, when 31 hands were held up for it, and 7 against. The motion was consequently declared to be carried. A deputation was appointed to present it to Mr Beaumont, and the meeting broke up. *Enclosure did not take place.*

16th December 1863 (Teesdale Mercury)

MIDDLETON-IN-TEESDALE.

The half-yearly audit of the accounts of the London Lead Company's Workmen's Reading Room was made on Saturday evening last, by Mr. J. Pattinson, jun. and Mr. Ralph Bell The following is an abstract of the report:—Balance brought forward from last audit £8 0s 2½d; subscriptions received £4 19s 2½d; sale of papers and periodicals £3 3s 10d; making a total of £16 6s 3d. Expended in carriage of newspapers. &c., 15s 8d; cost of newspapers and periodicals £7 6s 8d; total expenditure £8 2s 4d. Balance resting in the treasurer's hands £8 2s 11d. As we have already stated in previous reports, the Lead Company generously pay for the cleaning of the room, and also find coal, gas, &c. The number of members shews a slight decrease compared with last half-year, owing to parties leaving the town. There are 6 honorary and 73 ordinary members, making a total of 79. The committee are happy to state that the institution was never in so healthy a condition than it is at the present time, being most satisfactorily attended. There are four daily and four weekly newspapers taken into the room, viz., the Times; Leeds Mercury; Manchester Examiner; Newcastle Daily Chronicle; Illustrated London News; Punch; Durham Chronicle; and the Teesdale Mercury; and a good selection of Periodicals. The Freeman newspaper is also presented to the Institution by R. Stagg, Esq., Dishforth; and the Mining Journal, Gardener's Chronicle, Alliance Weekly News, and the Journal of the Society of Arts, by R. W. Bainbridge, Esq., Middleton House. The sale of newspapers and periodicals for the ensuing quarter will be held on Friday evening, when a large attendance is expected.

25th December 1863 (Newcastle Courant)

Deaths

8th January1864 (Newcastle Daily Chronicle)
MAN FOUND DEAD. —On Saturday last, a man was found dead close to the works of the once-celebrated rich lead mine called Hudgill Burn, near the turnpike road leading from Alston to Nenthead, and about two miles from the town of Alston. The deceased, who appeared to be about 55 years of age, and who was covered with rags and almost in a state of nudity, was seen begging in the immediate neighbourhood in the after part of the previous day, and had lodged in the Alston Workhouse on Thursday night, where he breakfasted the following (New Year's Day) morning. When found, he had in his possession the sum of 4½d. in money and a piece of bread. A Coroner's inquest was held on the body on Monday, when a verdict of "Found dead" was returned.

15th January 1864 (Newcastle Courant)
Deaths
At Alston, on the 5th inst., aged 19, Margaret, daughter of Mr John Walton, of the Turk's Head Inn. *See 22nd August 1868*
At West Black Dean, Weardale, on the 10th inst., Jane, wife of Mr J. E. Anderson.

22nd January 1864 (Carlisle Journal)

25th March 1864 (Newcastle Courant)
FATAL ACCIDENT AT THE DERWENT MINES.—On Thursday afternoon, an accident occurred at the Derwent Mines, near Blanchland, which resulted in the death of Mr Thomas Morpeth, of Fell Grove, who for a great number of years has acted as superintendent of the workmen employed in the extensive lead mines in that district. On the day named Mr Morpeth was performing his duties of inspecting various workings in the mines; and having visited the workmen employed near the 80 fathoms level, he inquired of one of the miners, who worked at some distance, if he had time to go down the level before the despatch of the loaded waggon from that place. He was answered in the negative, and particularly requested not to attempt it. Despite this advice, Mr Morpeth, who was of a persevering disposition, unfortunately ventured on his journey? He had not proceeded far when he was caught by the loaded waggon, on a slightly inclined part of the line, and struck with such great force on the chest and head that he only survived about two hours. The body was immediately conveyed to its home, and an inquest on it was held at Blanchland, on Saturday, before Mr J. M, Favell, coroner, when a verdict of accidental death was returned. The deceased, who had been in the employment of the Derwent Mining Company from his boyhood, was 64 years of age, and has left a widow and family to mourn his end.
In 1841, at Fellgrove, the family name is given as Winskill, Thomas, lead miner, aged 40 (baptism 12th January 1800, father John Winskill), his wife Mary, 35, children Elizabeth, 15, John 13, Jane 8, Rebecca 6, Jonathan 3, and Mary 2. There is a record of Thomas Winskill marrying Mary Forster, at Blanchland 20th July 1822.
In 1851, at Fellgrove, the family name is given as Winskill, Thomas, lead mine agent, aged 51, his wife Mary, 47, children John, mine clerk, aged 23, Jane 17, Rebecca 15, Jonathan 13, Mary 11 and Thomas 9.
